You are the master of your destiny, venturing across the sea of stars meeting the challenge of alien worlds in...

UNIVERSE
The Role-Playing Game of the Future

INCLUDING
- Character Generation
- Skills • Robots
- Equipment
- World Generation
- Character Action
- Space Travel
- Encounters

SPECIAL BONUS
- Introductory Adventure "Lost on Laidley"

the complete game in one bound volume plus a huge 20”×30” pull-out star map and four pages of full-color planet maps!
I. Introduction
   1.0 The Universe and the Future
   2.0 The Gamesmaster and the Players
   3.0 Sequence of Events
   4.0 Requirements for Play

II. Character Generation
   5.0 Character Heritage
   6.0 Character Development
   7.0 Character Professions

III. Skills
   8.0 Acquiring and Improving Skills
   9.0 Military Skills
  10.0 Psionic Skills
   11.0 Vehicle Skills
   12.0 Scientific Skills
   13.0 Technical Skills
   14.0 Interpersonal Skills
   15.0 Environmental Skills

IV. Robots
   16.0 Robot Attributes
   17.0 Robot Systems

V. Equipment
   18.0 Economic Guidelines
   19.0 Weapons
   20.0 Protective Equipment
   21.0 Vehicles
   22.0 Personal Equipment

VI. World Generation
   23.0 Star Systems
   24.0 Geographical Features
   25.0 Population and Technology

VII. Character Action
   26.0 Travel and Record Keeping
   27.0 Creating Encounters
   28.0 Creature and NPC Interaction
   29.0 Action Rounds
   30.0 Hits and Damage

VIII. Space Travel
   31.0 Hulls and Pods
   32.0 Interstellar Travel
   33.0 Interplanetary Travel
   34.0 Space Combat

IX. Encounters
   35.0 Creatures
   36.0 Non-Player Characters
   37.0 Spaceship Encounters
   38.0 Accidents

Appendix B: Player Charts & Tables
Index
1. Introduction

When you were a child, you probably played spontaneous, informal games in which you pretended to be a policeman, an Indian, a parent, or a pirate. You imagined what these mysterious and powerful people were capable of, and then you acted out scenes with your friends. There was no winner or loser — everybody won by getting the thrill of pretending to be another person. These games of “make-believe” had no real rules, no structure, and no equipment. They depended solely upon the imagination of the players to keep them lively and interesting.

What is Role-Playing?

Much of the wonderful, imaginative experience and freedom of play of these childhood games can be found in their adult counterpart — role-playing games. A role-playing game is also one in which you pretend to be someone — but the “someone” is very detailed in abilities, physical description, and nature. In fact, characters in role-playing games are as detailed as the characters in a major novel. These characters inhabit a world which is also very well described. In a science fiction role-playing game, such as Universe, the world is one of technology and aliens, missions and explorations, and all the romantic color of an imaginary time and place presaging the future of humanity.

Each active character in the game is played by a live player. There are many other characters and creatures, all of whom are operated by the Gamesmaster. The Gamesmaster is a combination of referee, storyteller, and “Hand of Fate.” He keeps the story unfolding by telling the players what is happening and judging the results of any actions the players take. He has a very free hand to interpret the situation as he sees fit within the guidelines of the rules. The Gamesmaster usually works from a prepared story synopsis called an adventure. This is the setting of the story and something of a general script outline for the course of the action. It also can contain maps and tables of information on the area and its inhabitants. This adventure is a tool for the Gamesmaster and is not directly used by the players, although the players will actually create the detail and action of the story by their decisions as they participate in the adventure.

An Example of Role-Playing

In a role-playing session, the players (usually three to nine people) sit around a table with the Gamesmaster at the head. Sometimes the adventure can be played through in one sitting but, more typically, the players will meet a number of times to finish the adventure. Adventures can be strung together and players play the same character from game to game in a role-playing cam-
The Universe and the Future

Rakal, the Expedition Chief, surveyed the hot, violent terrain. The movement had set him on his guard; he worried for the eight other members of the Survey Team. Looking at his Biofilter he asked, “What form do you think it takes?”

Myfina, the biofilter replied, “The readings on my bio scanner indicate a skittishness; perhaps our scanning has caused it harm. May I send my Scoutover to inspect it at closer range?”

Rakal hesitated. At Myfina’s verbal command the ‘bot whirred through the thin atmosphere and began to traverse the 100 meters to the creature. “Do we know the chemistry of its energy transmitter?”

“It is an alkaloid life form, Chief.” The robot’s metallic twang was clear through the respirator helmet speaker. This model had been with them a long time, Rakal thought. He squinted as he looked into the harsh blue-white sun, following the bot’s flight.

Rakal was concerned. He had seen too many specimens damaged through ignorance. Equipment couldn’t think for itself — man still must rely all too much on his instinct. If only the psion were along on the Survey. Why had he allowed K’ral, his navigator, to remain shipboard? “The Shut-tlecraft needs no navigator to reach the surface,” the psion had scolded. “Leave me my astrogation chores and our courses will be plotted by your return. Good hunting!”

K’ral, however, might have been able to communicate with this creature...where was the Scoutover, anyway? It should have returned or at least given readings.

Myfina, any readings from the ‘bot?”

Myfina was to the distance and paid Rakal no heed. “Myfina, any readings?”

He quickly looked around the perimeter at the remainder of the Survey Team. They, too, were staring at some point in the distance. Rakal quickly drew his Paint Gun. His instinct not to watch the creature had probably just saved his mind. His mind, however, was filled with moans of great pain; pain that was not his own...he ran. Looking for cover by the ridge, he was stopped by an outcropping of cyan rock, so he turned north. The moaning increased. He dared not look back but knew the creature followed. Rakal needed to circle back to the Shuttle and return to the ship; unless he somehow managed to slow the creature down this would be impossible.

As he searched for higher ground, the moaning became more distant. Realizing it was now or never, he turned to face his pursuer. He aimed the weapon at the beast. He touched the trigger lightly to activate the aiming beam. The creature approached rapidly. The aim found the cortex, or what appeared to be the cortex; Rakal fired. The coherent light splashed as the creature’s natural armor splayed the beam everywhere. Rakal retreated and fired again. The beam scattered wildly...Rakal felt a burn on himself from a reflection. Rakal thought of running, but the beast no longer seemed ugly; what a lovely melody he found running through his brain. Wasn’t that the creature’s song? He stood up as it flew very close. Looking up into the enormous open eye, he thought was how soft and wide it would be once he got inside.

It was the 24th Century. Mankind, searching for its destiny, had begun to explore and colonize the Milky Way. The stars themselves are now man’s playground; they are also the seat of his greed.

After having overcome the temptation to annihilate himself, man found the time to let science proceed with its work. The most significant endeavor was the isolation of the chromosomes controlling the intensity of psionic talent. Once this was isolated and brought out of its dormant state, the psionic abilities of some individuals could be realized. These first test missions in telekinesis, psychokinesis and, ultimately, in forms of aportation. It was thus that faster than light travel via mass teleportation (called hyperjump) was discovered.

The Psion were found to act as catalysts for both travel and communications between the stars. They became extremely wealthy and aloof, as their talents tended to isolate them from society. Feared by the ignorant, and the unenlightened alike, they guarded many secrets and controlled the throttle on man’s outward expansion.

At last the dream of leaving behind the earth was within mankind’s grasp. The final frontier was before him. The earth, politically stable at last, funded the first colonizing missions. Each major national power sent its own ships to habitable worlds to explore and colonize. To govern these new worlds, the earth founded the Federation of Planets. Not to be caught in the old mistakes once again, the federation was a loose conglomerate of these worlds rather than a tightly-fisted ruling body. Some of the large colonies set themselves up as independent states, practically free from federal authority. The federal influence was exerted at the spaceports within the star systems. No direct control was instilled upon them. But very strictly enforced taxation was the method of the times. The armed might of the federation was considerable, consisting of far-reaching army and naval forces (both space-faring). Local forces resented the presence, but were usually no match in any combat situation.

The federation still controlled, to a large extent, the monetary systems. This was to ensure fair trade amongst the stars. The unit of currency was the Tran, the library transaction for one Transfer. This was the equal of 500 1980 dollars. The Tran was subdivided into one thousand Milli-transfers or Mil.

With fair (or at least reasonably fair) trade ensured by federal measures, business and technology flourished. Robots became economically feasible, as well as technologically, and they were as commonplace as the home computer of the 1980’s. Business became the major sponsor of scientific missions, mainly to discover new resource sites and discover the means of bringing these resources back. This exploration spawned a new curiosity on the part of mankind: the capturing and exhibition of alien creatures discovered on these new worlds. Trade involving live specimens was lucrative, and every week brought the news of a new find.

The initial colonies met with mixed success; some flourished while others blossomed. Many kept their own national flavor; Russian, Chinese and Hindustan could just as easily be heard on a colony world as Universal, the business language of the era. Universal had its roots in the English of the 20th century, but was as closely related to that as English was to the Middle English of the 11th century.

Amongst the languages which still existed were German, French, Italian, Spanish, Russian, Swedish, Afrikaans, Hindustani, Portuguese, Dutch, Arabic, Greek, and Arctican.

As mixed as the national flavor of the colonies was, so was their level of economic and technological development. Although exploration was speeded exponentially due to hyperjumping, commerce between stars was still slow due to the long transit time from the jump points into a system and the world itself. This jump point had to be outside the system’s gravity well; thus the distance was often very great.

The pressures facing mankind’s first colonists were tremendous; the mettle of mankind’s best and brightest was sorely tested. Some worlds found new strengths under this pressure while others reverted to old ways for the peace which they hoped simplicity would bring. Still others just could not match the spacefaring technology of the era with the resources at hand in the sometimes hostile environments. Thus the level of civilization in each colony found its own. Chinese, French, Italian, Spanish, Russian, Swedish, Dutch, Arabic, Greek, and Arctican.

And what of Earth and its future history? The planet, much battered and misused, had survived pretty much intact into the era. Much of its life and livelihood resides above the surface. The spacefaring technology had moved industry into orbit. Along with the many spaceports launching one colony ship after another, these working space factories cluttered the orbital lanes around the earth. This development had allowed much of the land to be reclaimed and enjoyed once again by the people; massive refertilization projects were undertaken and a green and beautiful Earth once again flourished.

No contact with intelligent alien life had occurred. Long having been both the dream and the nightmare of mankind’s new space-faring mobility, discoveries of ruins and numerous artifacts and burnt out space ships held the promise of unknown design saw hopes (and fears) rise.

Civilization had progressed, but still man needed to strive and take risks to advance. The Universe held wonder and surprise; danger lurked around every outcropping of ore.

This vision of the future lies before you, as your own game. These rules are your guide and your key to the Universe; the journey is yours to take.
The Game master's Guide portion of the Universe rules contains detailed information on Character Generation, Character Skills, Robots, Equipment, World Generation, Character Action, and Space Travel. At the end of the Game master's Guide section, on pages 48 through 65, is a complete set of all charts and tables the Game master will require to run an adventure. The Game master should also refer to Appendix A (Logsheets) in preparing to run a session of Universe, and to Appendix B (Player Charts and Tables) if he wishes to provide his players with copies of pertinent charts.

2.0 The Gamesmaster and the Players

Universe is a role-playing game, and in such a game there is no winner or loser; rather, the Gamesmaster and the players interact in a non-competitive way to resolve adventures. The Gamesmaster acts as a referee. Within the framework of the rules, he objectively determines the effects of the players' actions. The players act out the part of their character as if that character actually existed in the universe the GM has created. The actions which the players take within the GM's universe may be grouped together to form adventures, which are similar in length and complexity to a short story.

The GM is a master storyteller, a weaver of tales which deal in the unknown: unknown worlds, uncharted star systems, unmapped reaches of the galaxy. These stories, strung together, form the campaign. Players yearn to lose themselves in this "alternate existence," and the GM is the one who creates it.

The rules of Universe are intended as a framework in which the GM creates adventures for the players. These adventures can exist individually or be strung together to form a campaign. Either method is viable: a coherent campaign takes much more of the GM's time to create and maintain but there are certain joys which come from seeing characters grow, story lines intertwine, and history is created. The players see the GM's, and he has final say concerning anything to do with that story. This includes the rules, which he is free to alter to fit his individual needs. However, the GM should not take free license with the rules; they were not published to be disregarded. Rather, careful inspection by a conscientious GM will yield what modifications he can make without unbalancing play. The players are great sources of feedback on this; they will let the GM know loud and clear if something about play bothers them.

To feel confident enough to alter any rules, and to GM Universe well, the GM must know the rules intimately. Since he is the final arbiter, this knowledge is a must. Many GMs believe that the GM should not have all the power. This is a fantasy; the GM holds both the power and the responsibility to make the game work, just as he is a part of the story. If the GM does not feel that he has a handle on the story, he should either find another GM, or develop a cooperative GM system. GMs must give the players enough information to act; if the GM does not give them enough information, the players will either act independently or wait for the GM to take action. If the GM does not act, the players will act. The players are the characters in the game; the GM must treat them with respect, and give them the information they need to act. The GM is responsible for maintaining the continuity of the story, which includes the characters, the setting, and the plot.

4.0 The Gamesmaster presents the adventures. This may be done any number of ways. Some of the most common are through a pre-arranged meeting with a sponsor, picking up a story line left over from a previous adventure session, or letting the players go do what they wish and letting them find adventure. A non-player character for instance, could approach the players and offer employment (see the adventure in the Adventure Guide, Lost on Ladiey), or coerce the players, or drop a clue as to some interesting occurrence the players might become curious about. The goal for the GM is to entice (not force) the players into going on the adventure he had planned for them. Players do not often like being forced into doing something. Sometimes it is the only way (as in a hijacking scenario), but a constantly manipulated player is an unhappy player. If the adventure created by the GM is interesting enough, the players will want to go without much provocation.

5.0 The adventure begins and continues until resolved. This may force the playing of an adventure beyond the time that a session must end. In that case, the GM "freezes" the time, and the players pick up where they left off the next time they meet. Play will normally continue until either the characters succeed, they fail, or they aren't sure and return from whence they came. During play, the GM must think as a narrator describing the events as an impartial observer and giving the players all the information they would ordinarily become entitled to. The GM plays the parts of various NPC's, describes graphically locations the characters find themselves in, resolves combat (taking the side of the enemy or creature), and tells the players the results of their actions. During the adventure, the players have as much if not more control than the GM due to the decisions they must make.

6.0 The adventure is resolved. The characters have succeeded, failed, or staged a strategic
withdrawal. Any adjustment to the characters' records are made and plans discussed to meet and play again. If this was a single adventure, not mixed in with an extant campaign, the GM may wish to give the players the answer to the adventure (such as it might be), if they did not find it themselves. In a campaign situation this would not occur, as many answers are yet to be discovered through continued play.

[4.0] Requirements for Play

[4.1] This book contains all the information necessary to play Universe.

This book also contains one full-color Interstellar Display and a full-color, four-page Adventure Folder for use with the adventure, "Lost on Laidley" (see page 80).

Note that, throughout these rules, reference is made to the use of 20-sided dice. These dice are available from many adventure game dealers, and it is recommended that players purchase one or more pair of dice (see 4.4). If players have no 20-sided dice, an ordinary deck of playing cards may be used. Simply remove the Ace through 10 from both a black suit and a red suit, and use these cards as described in 4.4 when required to one die, two die, or percentile die.

Note also that reference is frequently made throughout this book to DeltaVee, the tactical space combat game specially designed for Universe. DeltaVee — complete with rules, map, and playing pieces — is available separately from your adventure game dealer. Should you have any difficulty interpreting the rules, please write to SPI, phrasing your questions so they can be answered by a simple sentence, word, or phrase. You must include a stamped, self-addressed envelope. Write to:

SPI Rules Questions Editor for Universe
257 Park Avenue South
New York, N.Y. 10010

[4.2] The Interstellar Display shows the positions, in three dimensions, of every known star within 30 Light Years of earth.

Each star's location is shown using three coordinates (x, y, z). Each coordinate represents a distance in light years from our sun (Sol). The x and y coordinates are also shown visually, by the star's actual position on the display. The z coordinate is a positive or negative number representing the star's distance above or below the plane of the display (the plane of the earth's equator). Also included on the display are a chart listing the distances between other stars. The Interstellar Display is not used as a playing surface. It is intended as an information source for the players and the GM. The GM chooses stars from the display (and uses the information provided with each star) when he generates worlds.

[4.3] The GameMaster's Guide includes many masters of logs and records that must be photocopied before use.

These include the Character Record, Star System Log, Environ Hex Map, and eight pages of different sized World Logs. The logs in this book should be carefully removed to facilitate photocopying. Note that World Logs 8 and 9 take up two pages each. SPI grants permission to photocopy all this material for personal use.

[4.4] All die rolls in Universe are conducted with one or two 20-sided dice only.

In a given situation, the GM or one of the players will be called upon to roll dice in one of three different ways: roll one die, roll two dice, or roll percentile die.

One Die. Roll one 20-sided die and read the result. A result of 0 is always considered a 10.

Thus, a range of numbers from 1 to 10 is possible when rolling one die.

Two Dice. Roll two 20-sided dice and add the two results together. On both dice, a result of 0 is considered a 10. A range of numbers from 2 to 20 is possible when rolling two dice. Example: If one die result is a 4 and the other is a 7, the two-dice result is 11.

Percentile Dice. Roll one die and read the result as the 10's result (i.e., multiply the result by 10). Roll the second die and add its result to the first. When rolling percentile dice, a result of 0 is considered a 10 unless both dice show a 0 result, in which case the result is read as 100. A range of numbers from 1 to 100 is possible when rolling percentile dice. Example: If the first die result is 5 and the second die result is 9, the percentile dice result is 59.

Note: By using two dice of different colors, a percentile number may be rolled quickly. One die is declared as the 10's die, and then both dice are rolled together.

[4.5] The GM and the players must provide some miscellaneous play aids.

All concerned should have a pencil with a good eraser. The GM should have a set of colored pencils or markers to draw world logs, environ hex maps, and other game displays. Plenty of scrap paper is also fervently recommended.

A large hexgrid map (with 19mm or 25mm hexes) is recommended for use as the Action Display (see 26.1). The tactical space combat maps may be used if nothing else is available. Miniature figurines or cardboard counters are recommended for conducting Action Rounds on the Action Display.

Additional 20-sided dice are helpful in speeding up play. Some players (and GM's) prefer their own personal pair of dice. The GM will find a pocket calculator most helpful.

II. Character Generation

Each player of Universe assumes the role of a character. The player develops the distinct personality and abilities of his character during adventures, as the character interacts with the other players' characters and the various entities controlled by the gamemaster.

The player generates a character by using the rules in Sections 5, 6, and 7. By rolling dice and making choices in the order laid out in these Sections, the character is developed into an adult who is a result of the luck of his parentage, the pressures of his environment, and the decisions he has made throughout adolescence and young adulthood. A completely generated character is defined by a series of numerical Characteristic Ratings and Skill Levels that represent the character's strengths and weaknesses in all situations that might occur while playing adventures.

Each player keeps track of his character's attributes and acquisitions during character generation and throughout his adventuring life on a Character Record. The GM should provide each player with a photocopy of the Character Record included with this booklet. The players should use pencil to fill in their Character Record, as much of the information they record will be altered during play. At some point during character generation, the player must select a name and a sex for his character. These decisions are entirely up to the player, but it is suggested that a character's sex be the same as that of the player. The GM should supervise character generation and all record-keeping on each Character Record, to make sure the current status of a character is noted correctly. If the GM wishes, he may make a second copy of each Character Record to verify all character information and/or to note things about a character that he does not want the player to know (such as a price on his head or an undetectable alien disease).

Terms Used in Character Generation

Characteristic. A numerical rating, ranging from 1 to 12, which describes a facet of a character's physical, mental, or emotional makeup. Characteristic Ratings are determined during character generation and may not be increased once play begins. The nine characteristics each character receives are:

Strength. The brute force a character can exert using the muscles of his arms, legs, and torso. Strength determines how much a character can carry, how far he can throw an object, and the force with which he may strike.

Endurance. The amount of punishment the character's body can absorb before he loses consciousness or dies. Endurance determines the length of time a character may keep up an exertive action (such as sprinting) and the amount of time required for the character to heal from wounds or diseases.

Dexterity. The character's digital control and eye-hand coordination. Dexterity affects the character's use of any hand-held weapons and the efficiency with which he may perform complex tasks with his hands.

Agility. The quickness with which the character uses his body. Agility determines
the speed with which a character can move and his ability to dodge and maneuver in close quarters.

Note: The preceding four characteristics are collectively referred to as the Physical Characteristics.

Intelligence. The character's intuitive and acquired knowledge. Intelligence affects the character's ability to note peculiarities and to deduce information in a situation.

Mental Power. The character's control of his mind and emotions, especially in stress situations. A character with high mental power (4, 5, or 6) may be psionic. Note: The mental power Characteristic Rating ranges from 0 to 6.

Leadership. The character's ability to lead others and to control a situation. Leadership determines whether or not a party of characters have the initiative during combat (see 29.1).

Empathy. The character's ability to interact with humans and other intelligent and semi-intelligent beings. Empathy affects the chances of communication with alien life forms and may allow a character to perceive another human's unspoken intentions.

Aggression. The base instinct of a character exhibits, especially in a stress situation. A character with a low Aggression Rating will often behave in a cowardly or self-preserving manner, while a character with a high Aggression Rating will often take reckless actions in combat. A character's aggression may be controlled by his mental power.

Field of Study. One of seven areas of schooling that a character undertakes in his youth, including theoretical science, applied science, business, the humanities, the mind, the body, and the military. In addition, each character's basic education is represented by the general field of study. The fields of study a character undertakes affect his characteristics, the professions he may choose, and the skills he may acquire.

Habitat. The environment in which the character was raised. Each character's habitat constitutes his environment (expressed in terms of the contour of the land and its major features), a gravity type, a temperature range and, in some cases, an urban background.

Potential. A numerical rating, expressed as a multiplier from ¾ to 4, representing the strengths and weaknesses exhibited by the character in his childhood. There are four potentials: physique, coordination, intellect, and social background. Once character generation is completed, potentials have no effect on the character.

Skill. A specific area of expertise that may be acquired by a character. During character generation, each character receives Initial Skill Points, with which to acquire skills before entering a profession, and normal Skill Points, with which to acquire skills while practicing his profession. The proficiency that a character has with a given skill is represented by a numerical level ranging from 1 up to a maximum level that varies from 2 to 5, depending on one of his Characteristic Ratings.

Exception: An Environ Skill Level or a Gravity Skill Level may be a negative number or 0. Unlike characteristics, skills may be acquired and improved during play. The nature and use of all skills are detailed in Chapter III. Three skills are introduced in the early part of character generation.

Environment. The character's knowledge and acclimation in a specific environ. Each character receives Skill Levels in all 33 environments listed on the Environ Skill Display of the Character Record during character generation. The single highest Environment Skill Level received is his Skill Level in his home environ.

Gravity Skill. The character's ability to function in a specific gravity type. Each character receives a Skill Level in all four gravity types on the Character Record during character generation. The single highest Gravity Skill Level received is his Skill Level in the gravity type of his home planet.

Urban Skill. The character's familiarity with the ways of city life and the upper classes. Certain characters receive an Urban Skill Level during character generation; those that do not are considered to come from essentially rural areas.

Study Point. A representation of a commitment by the character to a certain field of study. Each character receives 2 to 6 Study Points which he expends to enter any of the seven fields of study.

Character Generation Sequence

To generate a character, the player should conduct the following steps in order. The specific procedures mentioned in this outline are explained in detail in Sections 5.0, 6.0, and 7.0.

A. Character Heritage

1. Determine 4 Potential Multipliers. Each character begins as a series of four numbers, representing his potential in the areas of physique, coordination, intellect, and social background.

2. Calculate the number of Study Points the character receives. A character receives from 2 to 6 Study Points, depending on his potential.

3. Determine the character's natural habitat. This includes the character's home environ, his Skill Levels in all environments, his Skill Levels in various gravities, his comfortable temperature range, and his Skill Level in urban areas. Certain characters may come from a deep-space environ.

4. Determine the character's social standing. Each character receives a particular family history and initial wealth. Each character receives from 1 to 5 Initial Skill Points, depending on his social standing.

B. Character Development

5. Choose fields of study for the character. Study Points are expended to choose any of seven fields of study.

6. Choose initial skills for the character. Initial Skill Points are expended to choose a variety of basic skills. Skills that may be chosen depend on the character's fields of study.

7. Determine the character's 9 Characteristic Ratings. The character's Potential Multipliers and fields of study affect the determination of his characteristics.

C. Character Professions

8. Choose a profession for the character. Any one of 23 professions is available, depending on the character's fields of study and Characteristic Ratings.

9. Declare how many years the character will practice his profession. A character may not be able to spend as many years at his profession as the player declares; he may be discharged or without work for part of the declared time.

10. Determine the effects of age on the character. His physical characteristics (strength, endurance, dexterity, and agility) may be reduced if the character is beyond the age of 24.

11. Calculate the number of Skill Points the character receives. The character's profession, his Intelligence Rating, and the number of years he spent at it affect the number of Skill Points received.

12. Choose skills for the character. Skill Points are expended to choose and improve a variety of skills related to the character's profession and his fields of study. Mark any skills for which the character is eligible that were not chosen for him.

13. Determine benefits the character receives from his profession. Weapons, equipment, money and/or prestige are available to a character, depending on how long he spent at his profession.

[5.0] Character Heritage

The early years of a character's life are very important in forming the basis of his physical and mental makeup. The well-being of his predecessors determines the opportunities the character will be able to exploit. Each character receives a series of potential values representing an early assessment of his attitudes, skills in the habitat in which he was raised, and a financial endowment based on his family's social standing.

[5.1] The player begins generating his character by determining the character's potential in the areas of physique, coordination, intellect, and social background.

For each of these four, the player rolls one die and locates the result on the Character Heritage Table (page 49) to find the character's Potential Multiplier for that area.

The player must roll for each Potential Multiplier in the order listed above. As each potential is determined, its Multiplier is recorded on the Character Record.

After determining all four potentials, the player adds the multipliers together to find how many Study Points his character receives, in accordance with the Character Heritage Table (page 49).

Note the number of Study Points received on the Character Record.

[5.2] The player uses the Habitat Table to determine the natural environment
in which his character grew up and in which he will be most effective during play.

The player rolls one die to determine the column on the Table used and rolls a second die to determine the entry referred to in that column. The second die result is modified by adding the character’s Physique Multiplier and subtracting his Coordination Multiplier. A multiplier of \( \frac{1}{2} \) is considered 0 for this purpose. Each entry on the Home Environ Table contains the following information:

The specific type of environ from which the character comes. Each environ type is stated as a two-part abbreviation, explained on the Table. The first part represents the contour of the land (flat, hills, mountains, or peaks). The second part represents the major features of the land (volcanic, cratered, barren, light vegetation, woods, forest, jungle, marsh, or ice). Exceptions to this two-part system include the three water environs (inland, seaway, submergence), or sea submergence. Certain characters may be able to choose a deep-space environ (see 5.5).

The character’s Home Environ Skill Level. Each character receives a Skill Level ranging from 1 to 6 in his home environ. This level may be reduced if the player chooses to increase his character’s Gravity Skill Level (see 5.4). A character’s Skill Level in his home environ affects his Skill Level in other environs and may be improved during play of the game.

The gravity on the character’s home planet. Each gravity type is stated as an abbreviation, explained on the Table. Near weightless gravity represents from 0.00 to 0.40G, light gravity represents from 0.7 to 1.60G, heavy gravity represents from 1.3 to 1.7G, and extreme gravity represents from 2.0 to 2.5G. Each character is considered to be at Skill Level 1 in his own gravity type and at lesser Skill Levels in other gravity types (unless his Gravity Skill Level is increased per 5.4). Gravity Skills may also be improved during play.

The temperature range in the character’s home environ. Each temperature range is stated as an abbreviation, explained on the Table. Cold ranges from –50 to 0 degrees Fahrenheit; normal ranges from 25 to 100 degrees; and hot ranges from 125 to 175 degrees. Characters receive no Skill Level in their temperature range.

The character’s Urban Skill Level. Certain results give a character an Urban Skill Level ranging from 1 to 4. If a result from the Table lists no Urban Skill Level, the character receives none. A character’s Urban Skill may be improved during play.

[5.3] Habitat Table
See page 49.

[5.4] The player records the information obtained for his character from the Habitat Table on the Character Record as follows:

• If an Urban Skill Level is obtained, note the number in the Urban Skill Level box.
• Place an X rather than a number in the Temperature space corresponding to the character’s comfortable temperature range.

GAME MASTER’S GUIDE, PAGE 5

- Record a 1 in the proper Gravity Type box. If desired, a character’s Gravity Skill Level may be increased at this time by reducing the Environ Skill Level the character received. Thus, a character that received an Environ Skill Level of 3 may receive a Gravity Skill Level of 2 (or 3) in his gravity type by reducing his Environ Skill Level to 2 (or 1). A character’s Environ Skill Level may never be reduced below 1. A character’s Urban Skill Level may not be reduced to increase his Gravity Skill Level. After recording the character’s Gravity Skill Level, subtract 2 from the Level and record this result in the Gravity Type boxes adjacent to the character’s home Gravity Type box (even if the number is negative). Then subtract 2 more and note this result in the box adjacent to the boxes just filled in. Repeat this once more if necessary. These numbers represent the character’s Gravity Skill Levels in gravity types other than the one in which he grew up.

Example: A character has a Skill Level of 1 in Light Gravity. A –2 is entered in the Near Weightless box and in the Heavy box. A –3 is entered in the Extreme box.

- Record the character’s Environ Skill Level in the proper box of the Environ Skill Display. The Level may be reduced if the character’s Gravity Skills were increased (see preceding). Then reduce the Environ Skill Level by 1 and enter this number in every box on the Display directly adjacent to a side (not diagonal) of the character’s Home Environ box. Reduce the Skill Level by 1 again and enter this number in every box on the display directly adjacent to the boxes just filled in. Repeat this process until the entire Environ Skill Display is filled. Negative numbers will be used in some boxes. However, an Environ Skill Level may never be below –6. These numbers are the character’s Environ Skill Levels in environ types other than the one in which he grew up.

Example: The player has filled out the Display to show the Environ Skill Levels that his character (who has a Skill Level of 4 in his home flat/jungle environ) has in all possible environs.

[5.5] The player may choose a deep-space environ for his character if the character meets the following prerequisites:

- He has a Physique Multiplier of \( \frac{1}{2} \) or 1.
- He has a Coordination Multiplier of 3 or 4.
- His home planet gravity type is near weightless.

The player may voluntarily declare that such a character is from a deep space environ, such as an orbiting space station, a spaceport, or an asteroid mining complex. The character’s Habitat Table result is ignored and his Character Record is not filled in according with 5.4. Instead, the following steps are conducted:

1. The character receives an Urban Skill Level of 4; note this in the Urban Skill Level box on the Character Record.
2. The character is accustomed to normal temperatures; place an X in the Normal Temperature space.
3. The character has a Near Weightless Gravity Skill Level of 3; enter a 3 in the Near Weightless box, a 0 in the Light Gravity box, a –2 in the Heavy Gravity box, and a –5 in the Extreme Gravity box.
4. The character is accustomed to no natural environs; enter a –4 in all 33 boxes of the Environ Skill Display.

When using the Social Standing Table (see 5.6), add twice the character’s Social Background Multiplier to the die result only (the character’s Urban and Environ Skill Levels are ignored).

When expending Initial Skill Points (see 6.2), the following skills may be chosen in addition to those listed for the character in 6.3: agriculture, EVA, and asteroid mining. These skills are not available to the character when expending Skill Points acquired from his profession (unless they are listed in his profession or one of his fields of study).

[5.6] The player uses the Social Standing Table to determine his character’s family history and the

amount of money with which he is endowed.

The player rolls one die and modifies the die roll as follows:
- Double the character's Social Background Multiplier and add the product to the die result.
- Add the character’s Urban Skill Level to the die result.
- Subtract the character’s Home Environment Skill Level from the die result (use the number derived from the Habitats Table, before it was reduced to increase Gravity Skill Levels).

Note the social standing result corresponding to the modified die result on the Character Record.

Roll one die again and multiply the die result by the amount of money shown for the acquired social standing. Note this product on the Character Record. Remember, one Tran equals 1,000 Mils.

The Initial Skill Point Modifier shown for the acquired social standing is used in conjunction with 5.8.

Aside from determining how much money and how many Initial Skill Points he receives, a character’s social standing will affect him during play. When encountering NPC’s and when dealing with bureaucracy and government, the GM should take into account a character’s social standing. Class distinctions in Universe are not as pronounced as in, say, a feudal society; but people still feel most comfortable with those of similar background.

[5.7] Social Standing Table
See page 50.

[5.8] The player determines how many Initial Skill Points he character receives for experience gained in the early part of his life.

The player rolls one die, adds the Initial Skill Point Modifier (listed with the character's social standing on the Social Standing Table) to the die result, and refers to the Initial Skill Points Table (page 50).

A player expends Initial Skill Points after choosing fields of study for his character (see 6.2).

[6.0] Character Development

Each character undertakes one or more fields of study during his teen years. His schooling provides him with basic skills and, along with his potentials, determines his final characteristics.

[6.1] The player expends Study Points to have his character undertake any of 7 fields of study.

These include theoretical science, applied science, business, the humanities, the mind, the body, and the military. An eighth field of study, general, is automatically undertaken by every character, with no choice of Study Points.

Each field of study costs 1 Study Point to enter (Exception: See the mind, following). The player declares which fields of study his character is entering and notes the choices on his Character Record. A character may enter any given field of study twice at a cost of 2 Study Points (representing heavy concentration by the character in that field). If this is done, write the field of study twice on the Character Record. A given field of study may not be studied more than twice.

Restrictions on the Study of the Mind: A character must have an Intellect Potential of at least 2 in order to study the mind. The expenditure of 2 Study Points is required to study the mind once; 4 Study Points must be expended to study the mind twice. A character may not study the mind if he is studying the military and/or business.

A player should expend all his available Study Points when generating his character. Unused Study Points are useless during play.

[6.2] The player expends Initial Skill Points to give his character basic skills acquired in youth.

The expenditure of 1 Initial Skill Point allows the character to receive any skill for which he is eligible at Skill Level 1 only. No more than 1 Initial Skill Point may be expended for a particular skill at this time.

The types of skills that may be chosen for a character depend on his fields of study. The skills listed in 6.3 may be chosen for a character that has undertaken the appropriate field of study. At this time, a character may receive no skill that is not mentioned in one of his chosen fields of study. All characters may receive skills in the general category on the skill list.

Initial Skill Points that are not expended before determining characteristics are lost.

[6.3] The following skills may be chosen for a character that has undertaken the appropriate field of study.

See Chapter III for a detailed explanation of each of these skills.

Theoretical Science: Chemistry, physics, programming, biology, geology, astronomy.

Applied Science: Suits tech, electro tech, construction, vehicle tech, programming.

Business: Programming, recruiting, law, economics, trading.

Humanities: Linguistics, diplomacy, law, teaching.

The Mind: Psionic boost, psionic communication, life sense.

The Body: Unarmed combat, ambush, EVA, gravity (home gravity type only), jet pack, survival.

Military: Battlefield, longarms, handguns, demolition, grenades.

General: Streetwise, laser/stun pistol, gambling, blades, ground vehicles, urban (only if character already has an Urban Skill Level of 1 or greater), environ (home environ only).

[6.4] The player determines his character's 9 characteristics one at a time, by using the Characteristic Modifier Chart and the Characteristic Generation Table.

The Characteristic Modifier Chart is used to calculate the effect of the character's potentials and fields of study on each characteristic. The Characteristic Generation Table is used to find the actual rating of each characteristic.

For each characteristic, the player completes the following steps:

1. Add together all numbers listed for the characteristic on the Modifier Chart that correspond to the fields of study undertaken by the character. If a given field was studied twice, double the corresponding number. Note that every characteristic is considered to have undertaken the general field of study and may add its number to the total.

2. Check the potential section of the chart to find which potential affects the characteristic and multiply the total determined in Step 1 by the Potential Multiplier. If two potentials affect the characteristic, multiply the total by the first Potential Multiplier and then multiply this product by the second Potential Multiplier.

3. Roll percentile dice and add the final product derived in Step 2 to the dice result. Locate this modified result on the Characteristic Generation Table to find the rating for the characteristic. Mark the rating on the Character Record.

Important: If an Agility Rating of less than 5 is received at this time, it is considered a 5. The Mental Power Rating is divided by 2 (rounding fractions down) before being noted on the Character Record. The Mental Power Rating may range from 0 to 6.

This procedure is conducted nine times when generating a character — once for each characteristic.

Note that no potential affects the aggression characteristic. The modifiers listed under aggression on the Modifier Chart are simply added to (or subtracted from) the characteristic generation dice result, as appropriate.

[6.5] Characteristic Modifier Chart
See page 50.

[6.6] Characteristic Generation Table
See page 50.

[7.0] Character Professions

Every character in Universe undertakes a profession — a particular area of employment where he may hone his abilities, gain skills, accumulate wealth, and/or acquire weapons and equipment otherwise difficult to obtain. There are 23 professions, including seven branches of military service. However, the character must fulfill certain requirements to enter a profession, and sometimes these are quite strict. A character with poor attributes can always be a colonist for a short while and start his adventuring early, while still young and naive. Each character practices his profession for a number of years and, if he has been in the military, is then discharged; if he has been in a commercial profession, he is considered "for hire" at the end of his term of employment, and his life of individual exploits then commences.

Each character is considered to be 20 years old upon entering a profession. The player should look over the entire list of professions before choosing one, and then note
Each profession has a list of prerequisites that a character must fulfill in order to enter that profession.

Certain fields of study must have been undertaken by the character. Some of his Characteristic Ratings must meet certain minimums. In some professions, a certain amount of initial wealth is required and/or other special requirements must be met. A character that does not meet all the prerequisites of a given profession may not enter that profession.

A character with a Mental Power Rating of 5 or 6 may enter certain professions whether or not he meets any prerequisites of that profession.

Such professions list a mental power waiver in their prerequisites, and include star sailors, scouts, space pirates, interstellar traders, and merchant explorers.

A character who enters one of these professions in this manner is considered to be a psionic navigator, an interstellar pilot whose psionic powers enhance the efficiency and accuracy of hyperjumping. Such a character must spend 2 Skill Points acquired from his profession (see 7.5) to achieve Navigator Skill Level 2 and 2 more Skill Points to achieve Pilot Skill Level 2. If the character receives fewer than 4 Skill Points for practicing his profession, he must apply all the points to two of these skills as evenly as possible. Other than these requirements, a psionic navigator undertakes his profession like any other character. If he wishes, however, he may choose additional Skill Levels in navigation and piloting within the restrictions of 7.6.

The player must declare how many years his character wishes to spend at his profession and then use the Employment Table to determine how many years are actually spent in the profession.

The player declares that his character will work 2, 4, 8, 16, 20 or 20 years at this profession. Then he carries out one of the following procedures:

- If the character is a colonist or a thinker, the declared number of years is the actual number of years employed. The Employment Table is not used. Add 20 to the number of years spent in the profession and note this sum as the character’s age on the Character Record.

- If the character is in a military profession, roll one die and cross-reference the die result with his, and then consult the Employment Table corresponding to the declared years of employment. The result represents the actual number of years the character served before being discharged. Add 20 to the actual number of years employed and note this sum as the character’s age on the Character Record. The character is considered to be at the point in his life immediately after his discharge; his declared years of employment has no further effect and does not count against him if greater than his actual years of employment.

If the character is in any other profession, add 20 to the declared years of employment and note this sum as the character’s age on the Character Record. Then roll one die and cross-reference the die result with the column of the Employment Table corresponding to the declared years of employment. The result represents the actual number of years in which the character was gainfully employed. If the result is less than the declared number of years, the difference in years is considered to be time of unemployment; the character does not receive the benefits of experience from those years, but has aged through them.

A character who is 28 years of age or older, the player must use the Effects of Age Table to determine if any of the character’s physical characteristics are permanently reduced.

The player rolls one die and adds the character’s age to the die result. He then locates the modified result on the Table to find how many points may be removed from his character’s Endurance, Agility, Strength, and/or Dexterity Ratings. Points must be removed from among the characteristics as evenly as possible in the order indicated. Erase the listed rating and replace it with the new reduced rating. Example: A 36 year old character receives a reduction result of 5 from the Table. The player reduces the character’s Endurance Rating by 2 and his Agility, Strength, and Dexterity Ratings each by 1.

A single rating may not be reduced below 1 in this manner. If it was about to happen, skip to the next characteristic.

Each profession description contains a Skill Point Modifier used with the Skill Point Table to determine the number of Skill Points the character receives.

The player refers to the column of the table matching his character’s actual years of employment. He then rolls one die, adding the character’s Intelligence Rating and the Skill Point Modifier from the profession’s description. Locating the modified die result in the proper column yields the number of Skill Points that the character receives for practicing his profession.

Skill Points are expended to purchase a variety of skills for the character, representing expertise acquired during his years of employment.

A player may choose any skills for his character that are listed in his profession description. He may also choose any skills in the listings for the character’s fields of study in 6.3. Exception: A character that studied the mind may choose or improve only a skill from that field of study if his Mental Power Rating is 4 or greater. Any skills listed in the general category of 6.3 are also available. The expenditure of 1 Skill Point allows the character to receive 1 Skill Level in any skill for which he is eligible. Skill Points may be expended to purchase any level in a given skill (at the rate of 1 point per level), within the following restrictions:

- If the character was employed for 4 years, no single skill may exceed Level 3.
- If the character was employed for 8 to 12 years, no single skill may exceed Level 4.
- If the character was employed for 16 to 20 years, no single skill may exceed Level 5.

The skill list in each profession may place additional restrictions on specific skills that the player must acquire. For example, if the character in a profession requires the acquisition of a certain skill, the character may not spend his Skill Points in the expenditure of an Initial Skill Point (see 6.2) may now expend Skill Points to increase the level of that skill, but he is still subject to these restrictions.

A player may improve an environ skill (if allowed by his fields of study or profession) by expending a Skill Point. The expenditure of 1 Skill Point allows the player to increase the Skill Level in 1 environ and the 4 environs directly (not diagonally) adjacent to it on the Environ Skill Display by 1 level each. Thus, a Skill Point expended to increase woods/hills would also increase light vegetation/hills, woods/mountains, woods/flat, and forest/hills. Environ, urban, and gravity Skill Levels are not affected by the years of employment restrictions in this case; however, the limits listed in 15.0 must be adhered to.

After all chosen skills have been assigned Skill Levels, the player places an X in each Skill Level space for every skill his character was eligible to receive but did not take. This includes all skills listed for his profession, his fields of study and, if from a deep space environ, those listed in 5.5. Skills marked in this manner are familiar to the character and he will be able to acquire them easily during play (see 8.2).

Each profession description contains a variety of material benefits the character may receive from practicing that profession.

The player rolls one die and adds the character’s actual years of employment to the die result. He then locates the modified die result on the Benefit Table to find his character’s Benefit Level (a letter from A to F). The character’s benefits for the level of the acquired Benefit Level in the description of his profession.

Benefits include weapons, equipment and currency. The capabilities of weapons and equipment are detailed in Chapter V. Cash is received as lump sum (add this to any money the character may possess) or as a multiplier (multiply the listed amount of money by this number). Characters in a military profession also receive a rank of office, a duty uniform, a dress uniform (uniforms are not listed in the benefits) and, in some instances, an annual pension.

GM Note: The rank a character achieves in a military profession will help him during play when dealing with other military characters and non-player characters, especially if he is wearing his uniform. For example, a captain of the space sailors may receive special favors when travelling in a government spacecraft, such as preferential accommodations or extra information concerning the destination. The above information may be amended. (Although the player should record the amount in the Money section of his Character Record.) A character’s first pen-
sion payment is received one game-year after the character is generated. See 26.2 for time-
keeping guidelines.

[7.8] The Profession Tables include the Employment Table, Effects of Age 
Table, Skill Point Table, 
and Benefits Table.

See page 50.

[7.9] Each player may choose one of 
the following 23 professions for his 
character.

ASTROGUARD (Military) 
A member of a planetary or star system 
spaceship force. The astroguards protect the 
spaceplanes from privateers and monitor all 
ship traffic coming into and out of local 
space. Usually operating in groups of small 
craft, astroguards also respond to distress 
calls and are sometimes called upon for 
combat duty.

Prerequisites: Study of the military; Aggression Rating of at least 5.
Skill Point Modifier: 1.
Skills Available: Gunnery, missile guid-
ance, space tactics, pilot, air vehicles, EVA, 
spaceship tech (1 Level only).
Benefits: 
A. Corporal: 300 Mills cash.
B. Flight Sergeant: 1 Trans cash.
C. Flight Lieutenant: 3 Trans cash; internal 
gravity web.
D. Squadron Leader: 10 Trans cash; 250 
Mills per year pension; internal gravity web.
E. Wing Commander: 25 Trans cash; 750 
Mills per year pension; internal gravity web.
F. Group Captain: 60 Trans cash; 2.5 Trans 
per year pension; internal gravity web.

CIVIL INSPECTOR 
A civilian employed by the federation’s 
Agency for Interstellar Development. A civil 
inspector travels from world to world admin-
istering the progress of colonization 
programs. He watches for and prevents 
private exploitation of planets still in the 
early stages of development. Although he 
receives some self-defense training (in case 
of hostile merchants in isolated areas), a civil 
inspector usually calls for military aid when 
things get rough.

Prerequisites: Study of the humanities and 
business; Characteristic Ratings of at least 
Intelligence 6, Leadership 4, Empathy 6, 
and Mental Power 2.
Skill Point Modifier: 4.
Skills Available: Handguns, unarmed 
combat, agriculture, biology, planetology, 
urban.

Benefits: 
A. 250 Mills cash.
B. 700 Mills cash; translator.
C. 2 Trans cash; translator or interstellar 
commink.
D. 7 Trans cash; translator and interstellar 
commink.
E. 20 Trans cash; Frazette Blue robot with 
information system and recorder system.
F. 40 Trans cash; Manner 36sd robot with 
information system, weapon targeting system, 
laser pistol system, recorder system.

COLONIST 
A citizen of the federation, living and work-
ing on a newly settled planet.

Prerequisites: None.
Skill Point Modifier: 0.
Skills Available: Trading, air vehicles, 
marine vehicles, agriculture, mining.
Benefits: 
A. Nothing.
B. 1 Trans.
C. 2 Trans; Civ Level 6 laser pistol.
D. 4 Trans; Civ Level 6 laser pistol.
E. 8 Trans; car.
F. 15 Trans; Civ Level 5 automobile; Civ 
Level 6 laser pistol.

DIPLOMAT 
An employee of the federation or any planet 
government serving as a representative to 
other planets. Diplomats are “couriers” of 
oficial decisions and agreements. As a sym-
bol of goodwill, diplomats enjoy great hospit-
ality whenever visiting an area in an official 
capacity.

Prerequisites: Study of the humanities and 
the mind; Characteristic Ratings of at least 
Intelligence 7, Empathy 7, Mental Power 2. 
The Aggression Rating may not exceed 6.

The character’s initial wealth must be at least 1 Tran.
Skill Point Modifier: 8.
Skills Available: Recruitment, program-
ming, computer/robot tech (1 Level only), 
urban.

Benefits: 
A. 300 Mills cash.
B. 1 Trans cash; audio-sealed case.
C. 3 Trans cash; audio-sealed case; trans-
lator.
D. 10 Trans cash; audio-sealed case; trans-
lator; interstellar commink.
E. 25 Trans cash; Manner 38sdf robot with 
holographer system, language system.
F. 60 Trans cash; Solidstate V-201 with 
creative thought system, holographer system.

DOCTOR 
An esteemed member of the medical profes-
sion. The state of medicine in the 24th Cen-
tury allows MD’s to perform feats of healing 
approaching the miraculous. Doctors work 
out of medical offices in urban areas or, in 
sparingly populated colonies, travel from set-
tlement to settlement as called for.

Prerequisites: Study of theoretical and 
applied science; Characteristic Ratings of at 
least Dexterity 7, Intelligence 8, Mental 
Power 2, and Empathy 6.
Skill Point Modifier: 10.
Skills Available: Teaching, diagnosis, 
treatment.

Benefits: 
A. First aid kit.
B. 3 Trans cash; first aid kit.
C. 1 Trans x Intelligence Rating in cash; Civ 
Level 6 mediscanner.
D. 4 Trans x Intelligence Rating in cash; Civ 
Level 6 mediscanner.
E. 10 x Intelligence Rating in cash; Civ Level 
8 mediscanner.
F. 20 x Intelligence Rating in cash; Manner 36sd robot with medical system.

ENFORCER 
A privately employed bodyguard, soldier, or 
security specialist. Enforcers usually work 
for corporations that control a large area of 
the world, executing the rules of the company or 
patrolling restricted lands. Enforcers are 
sometimes hired by backwater colonies to 
quell criminal activity or civil unrest. En-
forcers are generally disliked by those they 
are watching over.

Prerequisites: Study of the mind and the 
bod; all Physical Characteristics must be at 
least 4; Intelligence must be at least 5; 
Leadership must be at least 5.
Skill Point Modifier: 6.
Skills Available: Battlefield, demolitions, 
machine guns, longarms, handguns, paint 
gun, recruiting, law, military, ground 
vehicles.

Benefits: 
A. 500 Mills cash.
B. 1.5 Trans cash.
C. 3 Trans cash; Civ Level 5 pistol.
D. 10 Trans cash; Civ Level 8 laser pistol.
E. 25 Trans cash; Civ Level 8 paint gun.
F. 60 Trans cash; Civ Level 8 paint gun; Civ 
Level 5 submachine gun.

EXPLORER A 
crewman or part-owner of an interstellar 
exploration vessel. Explorers organize and 
carry out private expeditions to unsettled 
planets, gathering information to facilitate 
future commercial development. Often their 
efforts are financed by large corporations 
and private investors. Explorers are most 
concerned with the profitable gain of knowl-
edge; they rarely transport large cargoes and 
their ships are not usually armed.

Prerequisites: Study of business and either 
theoretical or applied science; Characteristic 
Ratings of at least Intelligence 7, Mental 
Power 3, and Empathy 4. The character’s ini-
tial wealth must be at least 500 Mills. The 
mental power waiver applies (see 7.2).
Skill Point Modifier: 4.
Skills Available: Handguns, paint gun, 
gunnery, pilot, linguistics, survival, air 
vehicles, marine vehicles, planetology, 
biology, geology, astronomy, navigation, 
any environs, any gravity.

Benefits: 
A. Nothing.
B. Initial wealth x 3.
C. Initial wealth x 5; Civ Level 8 bioscanner.
D. Initial wealth x 10; Civ Level 8 geo-
scanner.
E. Initial wealth x 25; neuroscanner.
F. Initial wealth x 50; Manner 50sd robot 
with bio system, self-activation system, and 
holographer system.

FREEFALLER (Military) 
A soldier in the zero-gravity branch of the 
federal armed forces. Freefallers are usu-
ally assigned to a fleet patrolling a single 
star system. They attack and defend asteroid 
belts, small moons, and space colonies, and 
specialize in spaceship boarding operations.

Prerequisites: Study of 2 of the following 
fields: applied science, the body, and the 
mind; Characteristic Ratings of at least 
Dexterity 6, Agility 7, and Aggression 4. The 
character’s home gravity type may not be 
heavy or extreme.
GAMEMASTER’S GUIDE, PAGE 9

SKILL POINT MODIFIER: 3.
SKILLS AVAILABLE: Near Weightless Gravity Skill Level is automatically increased to 2 (if not already equal to or greater than 2) at no cost in Skill Points. Battlefield, body armor, machine guns, arc guns, longarms, handguns, jetpack, demolitions, EVA, suit tech, weapon tech, near weightless gravity (in addition to any levels received as described in the preceding).

BENEFITS:
A. Lancer: 300 Milis cash.
B. Corporal: 1 Tran cash; Civ Level 6 expedition suit.
C. Sergeant: 3 Trans cash; Civ Level 7 expedition suit.
D. Lieutenant: 10 Trans cash; 250 Milis per year pension; Civ Level 7 expedition suit.
E. Captain: 25 Trans cash; 750 Milis per year pension; Civ Level 7 expedition suit; arc gun.
F. Colonel: 60 Trans cash; 2.5 Trans per year pension; Civ Level 7 expedition suit; arc gun; jetpack.

HANDYMAN
An engineer or technician working with any kind of planet-based technology. Handymen build and repair electrical devices, protective suits, weapons, computers, robots, and vehicles. They are employed by all branches of government, military and commercial concerns.

PREREQUISITES: Study of applied science twice; Characteristic Ratings of at least Dexterity 6 and Intelligence 6.
SKILL POINT MODIFIER: 5.
SKILLS AVAILABLE: Agriculture, programming, physics, energy tech, spaceship tech (1 Level only), weapon tech, computer/robot tech.

BENEFITS:
A. Basic repair kit.
B. 1 Tran cash; basic repair kit.
C. 3 Trans cash; Civ Level 7 electrokit.
D. 10 Trans cash; Civ Level 8 electrokit.
E. 20 Trans cash; Civ Level 8 vehicle kit.
F. 40 Trans cash; Civ Level 8 vehicle kit and robot kit.

INTERSTELLAR TRADER
A crewman or part owner of an interstellar freight vessel. Traders travel from world to world, purchasing and selling goods for profit. Trader ships are usually armed, as a defense against space pirates and unfriendly planet governments. Although traders stay on the right side of the law, they are always willing to venture away from established trade routes if good money can be made.

PREREQUISITES: Study of business; Characteristic Ratings of at least Intelligence 6 and Mental Power 2. The character’s initial wealth must be at least 1 Tran. The mental power waiver applies (see 7.2).
SKILL POINT MODIFIER: 4.
SKILLS AVAILABLE: Longarms, handguns, arc gun, gunnery, missile guidance, space tactics pilot, linguistics, diplomacy, asteroid mining, astronomy, EVA, planetology.

BENEFITS:
A. Nothing; all initial wealth lost.
B. Civ Level 7 business computer.
C. Initial wealth x 2; business computer.
D. Initial wealth x 5; business computer.
E. Initial wealth x 12; business computer.
F. Initial wealth x 30; Brumman II robot with spaceship tech system; business computer.

LAWMAN (MILITARY)
A member of a planetary law enforcement agency. Lawmen perform the functions of today’s policemen, protecting the citizenry and investigating crimes. However, the sparse and spreadout populations of most worlds often require lawmen to travel from settlement to settlement executing justice wherever necessary, much like the marshals of the old west.

PREREQUISITES: Study of the body and the humanities; all Physical Characteristic Ratings must be at least 4.
SKILL POINT MODIFIER: 3.
SKILLS AVAILABLE: Machine guns, longarms, handguns, paint gun, air vehicles, marine vehicles, urban, any environs, any gravity.

BENEFITS:
A. Patrolman: 250 Milis cash.
B. Constable: 700 Milis cash; Civ Level 6 laser pistol.
C. Sergeant: 2 Trans cash; Civ Level 8 laser pistol.
D. Marshal: 7 Trans cash; Civ Level 6 paint gun and used rover (ATV).
E. Inspector: 20 Trans cash; 500 Milis per year pension; Civ Level 8 paint gun.
F. Chief: 40 Trans cash; 2 Trans per year pension; Civ Level 8 paint gun and any handgun.

MERCHANT
A trader of goods on the local (planetary) level. Merchants travel from settlement to settlement on a sparsely populated world, or arrange for transport of goods from point to point on a world. Merchants handle everything from basic foodstuffs to fine electronic equipment to contraband.

PREREQUISITES: Study of business twice or study of business and applied science; Characteristic Ratings of at least Intelligence 5 and Empathy 7. The character’s initial wealth must be at least 1 Tran.
SKILL POINT MODIFIER: 5.
SKILLS AVAILABLE: Diplomacy, air vehicles, marine vehicles, agriculture, electro tech, computer/robot tech, vehicle tech, urban, any environs.

BENEFITS:
A. Nothing; all initial wealth lost.
B. Civ Level 7 business computer.
C. Initial wealth x 3; Civ Level 7 business computer.
D. Initial wealth x 10; Civ Level 7 business computer.
E. Initial wealth x 20; Civ Level 5 truck.
F. Initial wealth x 40; Civ Level 7 jet.

RANGER (MILITARY)
A soldier in the standard federal ground force. A ranger’s responsibilities cover all aspects of line and garrison duty on a planet surface, including air and marine patrol. During combat, rangers come in as the “second wave” following the spacetroopers and carrying out any “mopping up” operations.

PREREQUISITES: Study of the military and the body; all Physical Characteristic Ratings must be at least 4.
SKILL POINT MODIFIER: 2.
SKILLS AVAILABLE: Artillery, machine guns, paint gun, bows, military ground vehicles, air vehicles, marine vehicles, weapon tech, vehicle tech, treatment, any environs.

BENEFITS:
A. Ranger: 300 Milis cash; respirator.
B. Corporal: 1 Tran cash; Civ Level 6 respirator helmet.
C. Sergeant: 3 Trans cash; Civ Level 8 respirator helmet.
D. Lieutenant: 10 Trans cash; 250 Milis per year pension; Civ Level 8 respirator helmet; Civ Level 6 laser pistol.
E. Captain: 25 Trans cash; 750 Milis per year pension; Civ Level 8 respirator helmet; Civ Level 8 laser pistol.
F. Colonel: 60 Trans cash; 2.5 Trans per year pension; Civ Level 8 respirator helmet and paint gun.

REPORTER/JOURNALIST
A newspaper or media personality, this individual can become widely known, can establish contacts on many levels of federation society, from the underworld to the high echelons of government, and can become to dangerous and exotic places on assignment at no cost to self (other than to his safety).

PREREQUISITES: Study of the humanities and either business or theoretical science; Characteristic Ratings of at least Intelligence 7, Mental Power 2, Aggression 5.
SKILL POINT MODIFIER: 7.
SKILLS AVAILABLE: Unarmed combat, survival, disguise, forgery, counterfeiting, urban, air vehicles, programming, electro tech, recruiting.

BENEFITS:
A. Reporters receive an audio recorder.
B. Nothing additional.
C. 2 Trans cash; still camera.
D. Credentials with planetary news service; 500 Milis x Intelligence Rating in cash; superoid camera.
E. Credentials with star system news service; 3 Trans x Intelligence Rating in cash; holographer.
F. Media celebrity throughout federation; 25 Trans x Intelligence Rating in cash; Mander 38ufd robot with information system, holographer system.

The GM should take a reporter’s status into account when the character requests information, assistance, or financial backing from commercial, government, or media officials.

SCIENTIST
A researcher or inventor employed by the federation or by a private concern. Scientists specialize in any of the physical sciences and are the powers behind the advanced technology and discoveries of the 24th Century. As such, any expedition or venture of an exploratory nature will receive much more support if a qualified scientist participates.

PREREQUISITES: Study of 2 of the following: theoretical science, applied science, or the humanities; Intelligence Rating of at least 8.
Skill Point Modifier: 9.
Skills Available: Teaching, agriculture, chemistry, planetology, programming (1 Level only), biology, geology, astronomy, physics, computer/robot tech (1 Level only).
Benefits: A. 1 Tran cash. B. 2 Trans cash; Civ Level 5 chemlab. C. 500 Mils x Intelligence Rating in cash; Civ Level 6 chemsynthesizer. D. 2 Trans x Intelligence Rating in cash; Civ Level 7 chemlab. E. 6 Trans x Intelligence Rating in cash; Civ Level 8 bioscanner and geoscanner. F. 15 Trans x Intelligence Rating in cash; Frazette Amber robot with geo system, chemical system, bio system, and information system.

SCOUT (Military)
A member of the exploration branch of the federal armed forces. Scouts lead the way to unexplored worlds, gathering specimens and information, forging the path for future colonists. Scouts usually work in small teams when conducting an expedition and sometimes work alone. Although administered by the military, the scouts rarely participate in actual combat.
Prerequisites: Study of theoretical or applied science; all Physical Characteristics must be at least 3; Characteristic Ratings of at least Mental Power 2 and Empathy 6; the mental power waiver applies (see 7.2).

Skill Point Modifier: 4.
Skills Available: Longarms, handguns, pilot, EVA, survival, air vehicles, marine vehicles, jetpack, planetology, treatment, biology, geology, astronomy, suit tech, any environs, any gravity.
Benefits: A. Scout Second Class: 300 Mils cash. B. Scout First Class: 1 Tran cash; Civ Level 6 expedition suit. C. Masterscout: 3 Trans cash; Civ Level 7 expedition suit. D. Single Scout: 5 Trans cash; Civ Level 7 expedition suit; neuroscanner, and rover. E. Expedition Leader: 25 Trans cash; 750 Mils per year pension; Civ Level 7 expedition suit and crawler. F. Scout Commodore: 60 Trans cash; 2.5 Trans per year pension; Civ Level 7 expedition suit and used explorer pod.

SPACE PIRATE
A crew-member or owner of an outlaw spaceship. Space pirates waylay commercial vessels in interplanetary space, smuggle illegal and legal goods, and terrorize asteroid mining operations and small colonies. Pirate vessels may sometimes be chartered for secret journeys to distant parts at exorbitant prices.
Prerequisites: All Physical Characteristics must be at least 5; other Characteristic Ratings must be at least Aggression 7 and Mental Power 2. The character must have an initial wealth less than 4 Trans and must not have studied the humanities. The Mental Power waiver applies (see 7.2).
 Skill Point Modifier: 6.
Skills Available: Body armor, handguns, piloting, EVA, survival, unarmored combat, gunnery, missile guidance, space tactics, pilot, linguistics, disguise, forgery, counter-duty, EVA, air vehicles, asteroid mining, planetology, astronomy, spaceship tech, weapon tech, near weightless gravity.
Benefits: All space pirates receive an internal gravity web: A. Nothing; all initial wealth lost. B. Initial wealth x 2. C. Initial wealth x 4; wanted by federation. D. Initial wealth x 10. E. Initial wealth x 10; Terwillicker 5000 battle- craft; wanted by federation. F. Initial wealth x 20; Piccolo spaceship with light weapon pod. Before beginning play, a space pirate may turn any amount of his money into booty. He may purchase any weapons, robots, or equipment as if he were on a Civ Level 6 world with no law restrictions. No bargaining is allowed. If a space pirate is wanted by the federation, the GM should take this into account when the character encounters any planetary law enforcement NPC’s, and especially when he encounters any federal authorities (see 27.0). The character should be kept constantly on the run.

SPACE TECHNICIAN
A specialist in the design, construction, and repair of spaceships and related equipment. Space techs are indispensable members of any lengthy space voyage. Usually employed by commercial shipping companies and ship manufacturers, space techs are sometimes called upon by governments and military branches for their specialized services.
Prerequisites: Study of applied science twice; Characteristic Ratings of at least Dexterity 7, Intelligence 7, and Mental Power 2.

Skill Point Modifier: 8.
Skills Available: Psion tech (1 Level only), EVA, programming, astronomy, physics, energy tech, spaceship tech, computer/robot tech.
Benefits: A. 500 Mils cash. B. 2 Trans cash. C. 5 Trans cash; Civ Level 7 electrokit. D. 15 Trans cash; Civ Level 8 electrokit. E. 30 Trans cash; Civ Level 7 spaceship kit. F. 60 Trans cash; Frazette Amber robot with spaceship tech system, electro tech system, self-activation system.

SPACETROOPER (Military)
A soldier in the federal assault force, specializing in body armor combat on planet surfaces. Troopers are famous for their mass assaults, rapid victories, and esprit de corps. Spacetroopers are always at the forefront of any major attack and move on once the way is cleared for the standard military forces. Although their operations are sometimes launched from ground bases, spacetroopers are trained exclusively for ground combat.
Prerequisites: Study of the military and the body; all Physical Characteristics must be at least 6; Aggression Characteristic Rating must be at least 5. The character’s home gravity type may not be extreme. The mental power waiver applies (see 7.2).

Skill Point Modifier: 5.
Skills Available: All Gravity Skill Levels except Near Weightless are automatically increased to 0 (if not already equal to or greater than 0) at no cost in Skill Points. Body armor (1 Level required), artillery, machine guns, paint gun, arc gun, military ground vehicles, suit tech, any environs, any gravity except Near Weightless (in addition to any levels received as described above).
Benefits: A. Trooper: 300 Mils cash; Civ Level 6 armor vest and respirator helmet. B. Corporal: 1 Tran cash; Civ Level 6 reflective body armor. C. Sergeant: 3 Trans cash; Civ Level 7 impact body armor. D. Lieutenant: 10 Trans cash; 250 Mils per year pension; Civ Level 7 reflector/impact body armor.
E. Captain: 25 Trans cash; 1 Tran per year pension; Civ Level 8 reflective body armor.
F. Colonel: 60 Trans cash; 3 Trans per year pension; Civ Level 8 reflector/impact body armor and arc gun.

SPY
A member of a federal or planetary intelligence agency. Spies are used throughout the federation to gather information and to conduct secret missions on planets that the federation or rival planetary governments are suspicious of. Spies usually work alone, under a variety of identities.
Prerequisites: Study of the mind and the body; Characteristic Ratings of at least Dexterity 7, Agility 6, and Intelligence 8; Urban Skill Level of at least 1.

Skill Point Modifier: 7.
Skills Available: Demolitions, longarms, handguns, paint gun, arc gun, bows, linguistics, disguise, forgery/counterfeiting, weapon tech, urban.
Benefits: All spies receive a set of false identity papers.
A. Nothing additional.
B. Civ Level 6 plastic pistol.
C. Any one handgun or laser pistol.
D. 700 Mils cash; Civ Level 8 laser pistol and any other handgun.
E. 4 Trans cash; Civ Level 8 paint gun and any one handgun.
F. 20 Trans cash; arc gun and any one handgun.

STAR SAILOR (Military)
A member of the federal navy, serving aboard a spaceship. Responsibilities may range from plotting courses to piloting a craft to manning the guns during battle. A star sailor is familiar with all manner of known space craft and is more comfortable in a zero-G environment than he is on the ground.
Prerequisites: Study of the military and either applied sciences or the body; Characteristic Ratings of at least Agility 5, Intelligence 7, and Mental Power 2. The character’s home gravity type may not be extreme. The mental power waiver applies (see 7.2).

Skill Point Modifier: 6.
Skills Available: Near Weightless Gravity Skill Level is automatically raised to 0 (if not already equal to or greater than 0) at no cost in Skill Points. Pilot, astronomer, energy tech, suit tech, spaceship tech (1 Level only), weapon tech, space tactics, gunnery, missile
III. Skills

Characters use skills in all aspects of play. Each skill provides a character with expertise in a specific area of endeavor. The skill descriptions in this Chapter explain when and how each skill can affect play. Each character receives skills during character generation and, once he begins adventuring, a character may improve those skills and acquire others.

Each skill description lists the maximum level that may be achieved in that skill (for example, the maximum level that may be achieved in the geology skill is 7). Each skill also lists a characteristic limit, which is the highest level a character may achieve in a skill when the Characteristic Rating appropriate to a particular skill is lower than the maximum limit for that skill (thus, a character with an Intelligence Rating of 5 can increase his geology skill to a maximum level of 5). These limits are summarized on the Character Record.

When the GM is organizing an adventure or offering employment to the characters, he should take their skills and professions into account (for example, a character with high scientific Skill Levels should have no problem finding a sponsor for a scientific expedition). During play, situations will surely arise that call for character abilities not specifically explained in these skills. After familiarizing himself with how the skills work, the GM should easily be able to determine the chances and effects of any task the characters wish to attempt.

Many skills are presented in the form of one or more tasks, each representing a particular use to which a character may put the skill during play. Each task is noted with a + symbol and has a base chance of success expressed as a percentage. Each task is carried out according to the following procedure and any special rules listed with the skill or task description.

1. The character declares which specific task listed in the appropriate skill description he is undertaking. In most cases, he must have access to a particular piece of equipment.

2. One of the character's Characteristics Ratings (specified in the skill description) is added to the square of his Skill Level, and the total is added to the base chance listed for the task. In some instances, the Skill Level may be increased (before squaring) by a piece of equipment or decreased if the task is especially difficult. The base chance may be further modified by the task description or at the GM's discretion (in some cases, he may apply a modifier secretly).

3. The character rolls percentile dice (the GM should roll if he wishes the outcome to remain secret). If the dice result is equal to or less than the modified chance, the character succeeds at the task. When a task requires a certain amount of time to perform (listed with the equipment description or with the task description), the time required to perform the task is reduced by 1% for each percentage point below the chance the dice result indicates. If the dice result is greater than the modified chance, the character either fails outright, must spend more time at the task to succeed, or suffers some other disappointment. Each skill description lists different effects for failing a task. Many skills introduce a variety of results depending on how far above or below the modified chance a dice result falls.

Unless specifically prohibited, a character that does not possess a given skill may attempt a task or other use of the skill. However, the base chance of success is not increased by a Characteristic Rating or any other attribute of the character, nor will equipment increase his Skill Level. Exceptions: Treatment, 12.0.

A character that fails at a task in a given situation may not attempt that specific task again. Another character may attempt the task. However, his chance of success is reduced by 1% for each percentage point by which the previous attempt failed (for example, if a character had a 60% chance of success at a task and failed by rolling an 80, the next character to attempt the task has his chances reduced by 20). This reduction is cumulative; if a third character attempted the task, his chance would be reduced for both the first and second characters' failures. The GM should not allow an additional task attempt until the time required for the previous attempt has passed.

8.0) Acquiring and Improving Skills

Once generated, a character possesses a variety of skills at Level 1 or higher. During play, he will be able to improve these skills and acquire others by collecting Experience Points (EP's). As a character conducts actions related to a skill, he slowly amasses EP's in that skill; when he has collected enough EP's, he expends them to increase his Skill Level. When a Skill Level is increased, further improvement becomes more difficult as the number of EP's required to advance to the next level increases with each advance.

A character that has no Skill Level in a given skill is unskilled in that area. He is also unskilled if he has an X in the skill space on the Character Record, but he is somewhat familiar with the skill and may learn it more easily than a character with nothing marked in that skill space. The fact that a character is unskilled does not prevent him from conducting actions related to that skill or gaining EP's for the skill. Exceptions: An unskilled character may not undertake a task from a...
psionic skill at all (see 10.0). An unskilled character may not undertake a task from a scientific skill unless he is familiar with the skill (has an X in the skill space; see 12.0).

Each character keeps track of all his current Skill Levels and the number of EP's he has for each skill on his Character Record. Pencil should be used, since Skill Levels change and EP's are collected and expended.

[8.1] Each time a character uses a skill, he has a chance of receiving an Experience Point.

Certain die results obtained by a character when using a skill reward him with one Experience Point. Each skill description or section lists the die result needed and the type of rolls that are eligible to provide the character with an EP in that skill. Example: As explained in 12.2, a character that is attempting a treatment task receives an EP if either die of his percentile dice roll shows a 0, 1, or 2. Thus, he would receive one EP if the dice result were 01 through 32 or any higher number on either die.

When a character receives an EP, he immediately notes it in the EP space for the skill just used on the Character Record.

No more than one EP may be gained from a single skill or dice roll, even if the appropriate numbers appear on both dice of a percentile dice roll. An EP may be gained by a character whether or not the skill was used successfully, as long as the appropriate number appeared on the die. An unskilled character who is attempting a scientific task receives an EP only if he succeeds at the task and rolls the appropriate number.) Certain skill descriptions contain additional methods by which Experience Points may be gained.

[8.2] A character may increase a given Skill Level by amassing a number of EP's equal to the next level in that skill.

Each character keeps track of the EP's he has gained in each skill on his Character Record. When he has collected a number of EP's for one skill equal to the next level in that skill, he erases all those EP's and increases the Skill Level by 1. Thus, a character must acquire 2 EP's to increase a Skill Level from 1 to 2, 3 more EP's to go from level 2 to 3, 4 more EP's to go from level 3 to 4, and so on. Skill Level increase may not take place during an Action Round or procedure; the character should wait until a pause in the action to implement an increase.

Exceptions: A character that does not possess a skill, but has an X in the skill's space on his Character Record (noted during character generation, see 7.6) must collect 3 EP's to attain Level 1 in that skill. A character that does not possess a skill, and does not have an X in the skill's space, must collect 8 EP's to attain Level 1 in the skill. If a character reaches Level 1 in a skill by either of these methods, subsequent Skill Level increases occur normally.

When an EP is gained for using a skill, it may only be assigned to that skill. Note that the four vehicle skills are divided into sub-skills (see 11.11). An EP gained for a vehicle skill is assigned to the skill, not to a specific sub-skill.

When a skill reaches the maximum level that a character may attain, he may no longer earn any EP's for that skill. Skill Levels may never be permanently reduced, even if the characteristic limit for the skill drops below the current Skill Level attained by the character. This could happen if a Characteristic Rating is permanently reduced by injury (see 12.3). Temporary reduction of a characteristic has no effect on Skill Level increase; characteristic limits for Skill Levels are based on the Characteristic Ratings of a character at his best health.

Experience Points should not be confused with Skill Points and Initial Skill Points, both of which are used during character generation only.

[9.0] Military Skills

Military skills include all those used in character combat (fighting NPC's, creatures, or other characters on a plane or in a spaceship), space combat (spaceship, and other action-related situations. Specific personal weapon skills are explained in 9.1, and space combat skills are explained in 9.2. Explanations of other military skills follow.

AMBUSCH

7 Levels/Limit: Agility

The character may move silently and swiftly and may approach and attack a target undetected. The location of a character that conducts ambush successfully will be unknown to those he is hiding from. The character's Agility Rating, Battlefied Skill Level, Environment Skill Level, and the sphere of his Ambush Skill Level are added to the base chance of any ambush task. The highest Environment Skill Level and the square of the highest Battlefield Skill Level in the enemy force are subtracted from the base chance. The GM may secretly apply other modifiers as the situation warrants. A character who is performing ambush movement may move as far as normally allowed (see 29.2), but may not fire a weapon while moving. An unskilled character may attempt only the first task listed, and nothing is added to his base chance.

u Move secretly during an Action Round in which the enemy is unaware of the character's location: (15 x the Terrain Value)*, with addition for darkness, if applicable.

u Move secretly during an Action Round in which the enemy is aware of the character's location: (5 x the Terrain Value)*.

u Attack enemy being in close combat without being detected (see 29.9): 30%. Character must be undetected by all except victim in order to attempt this task.

u If currently undetected, fire at enemy being with a ranged weapon (such as a bow or thrown knife) without being detected: 50%.

An ambush task may not be attempted in an area with a Terrain Value of less than 2 (including any modifier for darkness). When a character successfully performs an ambush task, the GM controls the enemy force as if they had no idea of the character's whereabouts. A dice result for any ambush task that is above the modified chance indicates failure; the character's location is known.

A character who rolls a 0 or 1 on either die when attempting an ambush task receives an Experience Point.

ARTILLERY

6 Levels/Limit: Intelligence

The character is familiar with all aspects of mounted gun use. He may spot targets and aim stationary artillery, tank guns, and self-propelled artillery.

The base chance to hit a target with artillery fire is 50%. From this chance, 1 or 2 is subtracted for every 100 meters away the target is located. The character's Intelligence Rating and the square of his Skill Level are added to the base chance. If the percentile dice result is greater than the modified chance for a given artillery fire, the shell strikes 2 hexes (ten meters) away from the target for each percentage point over the chance the dice result indicates (GM determines direction).

An unskilled character adds nothing to his base chance when firing artillery and, if he misses is target, the shell strikes 4 hexes away from the target for each percentage point over the chance the dice result indicates.

A character who rolls a 0 or 1 on either die when attempting to strike a target with artillery fire receives an Experience Point.

BATTLEFIELD

6 Levels/Limit: Leadership

The character is experienced in ground combat and the execution of successful strategies and tactics. He recognizes the signs of battle and the warning signs of battles to come. Battlefield skill affects various procedures during encounters with NPC's and creatures.

u The highest Battlefield Skill Level among the characters in a party is subtracted from the awareness chance during a creature encounter. The square of the highest Battlefield Skill Level among the characters in a party is subtracted from the awareness chance during an NPC encounter (see 28.2).

u The character chosen as the party's leader during an Action Round (see 29.1) adds his Battlefield Skill Level to his Initiative die roll. If NPC's are the enemy, twice his Skill Level is added.

u A character may use his Battlefield Skill Level instead of his Mental Power Rating when making a Willpower Check (see 29.8). The battlefield skill is not used when making a Shock Check.

Battlefield skill also aids a character who is planning strategy for a battle ahead of time. The GM should take the character's Skill Level into account, as well as the quality of his stated plans, when determining the reaction and performance of the enemy force.

A character who rolls a 0 on the die when making an Initiative Check receives one Experience Point for his battlefield skill. The GM may also give a player who successfully plans an attack (as described in the previous paragraph) an Experience Point. No other die or dice rolls concerning a character's battlefield skill may provide him with an Experience Point.

BLADES

7 Levels/Limit: Dexteriry

The character is adept at using a weapon in a parry and riposte. The GM gives a 10% chance to parry and riposte (GM determines direction). When a character's parry and riposte are successful, the GM determines the type of hit the character makes. The GM may also give an Experience Point for a successful parry and riposte (GM determines direction).
The character is skilled in the use of daggers and swords. When attacking or defending in close combat, a skilled character adds his Dexterity or Agility Rating (his choice) and the square of his Blade Skill Level to the Hit Strength of his blade only. A dagger (but not a sword) may be thrown as a ranged weapon as described on the Weapon Chart and in 9.1.

A character that rolls a 0 on the die when attacking with a blade in close combat receives an Experience Point. A character who rolls a 1 or 2 while attempting to hit a target with a thrown knife receives an Experience Point.

**BODY ARMOR**

6 Levels/Limit: Agility

The character has experience maneuvering and fighting in body armor and other protective attire. The body armor skill contains all the attributes of the EVA skill, plus the following:

- The movement rate of a skilled character wearing augmented body armor may be increased if his Skill Level is high enough (see 26.4 and 29.2).
- A character with body armor skill may add his Strength Rating and the square of his Skill Level to the Hit Strength of his body armor or battle sleave when participating in close combat (see 29.9).
- A character who rolls a 0 or 1 on either die when attempting to avoid a body armor accident receives an Experience Point. A character who rolls a 0 on the die when using body armor to attack in close combat receives an Experience Point.

**DEMOLITIONS**

6 Levels/Limit: Dexterity

The character is skilled in the use of plastic explosives and dynamite to blow holes through doors, floors, or simply destroy a structure. If the character has sufficient demolitions equipment, he may attempt to prepare explosives so that when detonated, they will destroy all that the character wishes destroyed while leaving surrounding structures unharmed. When setting explosives, he should declare whether detonation will be triggered by radio, wire, or timer.

The base chance to destroy a declared structure and nothing but that structure is 45%. The GM may reduce this chance if the structure to be destroyed is smaller than a trap door. The character’s Dexterity Rating and the square of his Skill Level are added to the base chance. A percentile dice roll that is greater than the modified chance by 30 or less indicates that the explosion occurs when planned but is too powerful (if an even dice result) or too weak (if an odd dice result). The effect of such a result is left up to the GM. A percentile dice roll that is greater than the modified chance by more than 30 indicates that the explosives failed to detonate and are now defective (if an even dice result) or that the explosives blow off while being set, thus injuring the character (if an odd dice result). The nature of such an injury is left up to the GM.

An unskilled character adds nothing to his base chance when setting explosives and, if his dice result is greater than the base chance at all, the explosives go off while being set (whether the result is even or odd). A character who rolls a 0, 1 or 2 on either die when attempting to set explosives receives an Experience Point.

**EVA (Extra Vehicular Activity)**

6 Levels/Limit: Agility

The character is able to operate and maneuver in an expedition suit on the surface of a planet and in a zero-G environment.

When a character is wearing body armor or an expedition suit with an Encumbrance Rating (see the Protective Attire Chart, 20.0), his EVA Skill Level is subtracted from the Rating to determine the Movement Rate (see 26.4 and 29.2). A character wearing augmented body armor may not use his EVA skill to increase his movement (the body armor skill is used for augmentation). A character without EVA skill suffers the full effects of an Encumbrance Rating.

A skilled character’s Agility Rating and the square of his Skill Level are added to his base chance to avoid a suit/armor accident (see 27.8). The base chance to avoid an accident and the procedure undertaken are similar to that of a vehicle accident (see 11.2). An unskilled character has nothing added to his base chance of avoiding such an accident.

A character who rolls a 0 or 1 on either die when attempting to avoid an accident in an expedition suit or respirator helmet receives an Experience Point.

**JET PACK**

6 Levels/Limit: Agility

The character is able to operate a jet pack, a device strapped to the back that allows flight. A character’s Jet Pack Skill Level affects the speed and maneuverability he may attain with the pack (see 29.3). A skilled character’s Agility Rating and the square of his Skill Level are added to his base chance to avoid a jet pack accident (see 27.8). An unskilled character has nothing added to his base chance of avoiding such an accident. A character who rolls a 0, 1 or 2 on either die when attempting to avoid a jet pack accident receives an Experience Point.

**UNARMED COMBAT**

6 Levels/Limit: Agility

The character is skilled in fighting with his hands and body. When attacking or defending in close combat, a skilled character uses his Dexterity, Strength, or Agility Rating (his choice) plus the square of his Unarmed Combat Skill Level (see 29.9). An unskilled character uses one half (round up) of his Strength, Dexterity, or Agility Rating only. A character in close combat with a creature has his Unarmed Combat Skill Level reduced by 1 (to a minimum of 1) if:

- A character that rolls a 9 or 0 on either die when attacking unarmed in close combat receives an Experience Point.

[9.1] Weapon skills allow a character to use a weapon effectively during combat.

All weapon fire is conducted in accordance with 29.5 and the Weapon Chart (19.0). The chance to hit a target with a weapon is equal to the base chance listed for the weapon on the Fire Chart plus the character’s Dexterity Rating plus the square of his Skill Rating with the weapon. A character that is skilled with a weapon may often fire it more than once in a single Action Round (depending on the weapon).

A character that is not skilled with a weapon may use the weapon with the following restrictions:

- His chance to hit is equal to the base chance listed on the Weapon Chart only; nothing is added for his Characteristic Rating.
- He may fire the weapon only once per Action Round.
- He may not fire while moving or controlling a vehicle (he may fire while riding in a vehicle, see 29.6).

The following skill descriptions list the specific types of weapons that each skill allows the character to use (if more than one).

**ARC GUN**

6 Levels/Limit: Dexterity

The character may fire an arc gun.

**BOWS**

7 Levels/Limit: Dexterity

The character may shoot a short bow, long bow, or crossbow. When shooting a long distance with a short bow or long bow, the character’s Strength Rating (as well as his Dexterity Rating) is added to his hit chance (see Weapon Chart).

**HANDGUNS**

6 Levels/Limit: Dexterity

The character may fire a pistol, needle pistol, laser pistol, or sun pistol. Note that the latter two weapons are also included in the laser/stun pistol skill listing. A character may use either Skill Level when firing a sun or laser pistol; however, any Experience Points gained when doing so may only be applied to the laser/stun pistol skill.

**GRENADES**

8 Levels/Limit: Dexterity

The character may throw fragmentation, smoke, illumination, and gas grenades. When throwing a grenade a long distance, the character’s Strength Rating (as well as his Dexterity Rating) is added to his hit chance (see Weapon Chart).

**LASER/STUN PISTOL**

5 Levels/Limit: Dexterity

The character may fire a laser or stun pistol.

**LONGARMS**

6 Levels/Limit: Dexterity

The character may fire a musket, rifle, carbine, or needle rifle.

**MACHINE GUNS**

5 Levels/Limit: Dexterity

The character may fire a sub-machine gun or an emplaced machine gun (see 29.3).

**PAINT GUN**

7 Levels/Limit: Dexterity

The character may fire a paint gun.

A character rolling a 0 on either die when attempting to hit a target with a ranged weapon receives an Experience Point. A character may not receive an Experience Point when using the Hit Table or rolling dice for any purpose other than actually attempting to make his hit chance. A character conducting more than one fire in a single Action Round considers only his first hit chance dice roll of the Round for possible Experience
Point gain. If a character is firing in a non-combat, non-pressure situation (such as putting holes in an immobile, helpless target), the GM should invalidate any dice rolls he conducts for EP purposes.

[9.2] The following four skills are used aboard a spaceship or battlecraf during space combat.

These skills modify the procedures outlined in the DeluVee rules and 34.0. Any character aboard a spaceship or battlecraf that is participating in combat may be assigned to the functions that any of these skills entail. However, if the character is not skilled at his function, his performance will threaten the spaceship’s chances of survival.

A character may use two space combat skills at the same time, if he is skilled at both, in the following instances:

- **Pilot and gunnery** when in a battlecraf.
- **Pilot and space tactics** when in a spaceship’s bridge.
- **Missile guidance and space tactics** when in a weapons or armor pod.
- **Gunnery and space tactics** when in a spaceship’s bridge, weapon, or armor pod.

When a character is using two skills at once, the level of each is reduced by 2 (to a minimum of 1).

**GUNNERY**

9 Levels/Limit: Dexterity

The character may effectively use shipboard laser and particle weapons against enemy craft. A character may be assigned to any single weapon aboard the spaceship (for instance, to the ship’s bruster, or to one of its pods that contains laser and particle weapons or to a battlecraf’s bruster. The character’s Skill Level modifies any fire conducted from his assigned location as follows:

**Unskilled:** The Target Value is increased by 4. No Target Program modifier is applied.

**Level 1:** No Target Program modifier is applied.

**Level 2:** One half the normal Target Program modifier is applied.

**Level 3,4:** Fire conducted normally.

**Level 5:** A – 4 modifier or the Target Program modifier (whichever is greater) is applied.

**Level 6:** A – 6 modifier is applied (instead of the TP modifier).

**Level 7:** A – 6 modifier is applied (instead of the TP modifier) and may be used to reduce the range (exception to DV 8.5).

**Level 8:** A – 8 modifier is applied (instead of the TP modifier) and may be used to reduce the range.

**Level 9:** As in Level 8. In addition, every hit achieved by the gunner is considered a critical hit.

A gunner assigned to an arsenal pod may conduct two fires in a single Fire Phase (see DV 8.1). When doing so, his Skill Level is reduced by 1. A gunner may also conduct two fires in a single Fire Phase if assigned an additional fire from a battle communications pod.

A character receives an Experience Point for gunnery each time he rolls a 1 when using the Fire Results Table (DV 8.6). He may not receive an Experience Point when using the Hit Table.

**MISSILE GUIDANCE**

9 Levels/Limit: Intelligence

The character may effectively launch missiles control their course, and spot their targets. Any character may be assigned to oversee missile fire in a hunter, weapon, or arsenal pod of a spaceship. The character’s Skill Level affects the launch and performance of missiles from that pod.

**Unskilled:** MIMS and Intelligent Missiles may not be launched at all. A guided missile may not receive Maneuver Commands once launched. 2 is subtracted from every missile interception chance.

**Level 1:** MIMS may not be launched at all. A guided missile may receive only one Maneuver Command for each control Guided Missile Command issued to its spaceship. 1 is subtracted from every missile interception chance.

**Level 2:** MIMS may not be launched at all. 1 is subtracted from every missile interception chance.

**Level 3:** 1 is subtracted from every missile interception chance.

**Levels 4, 5:** No modifications.

**Level 6:** Prepare Missile Command not required to launch unguided or guided missile.

**Level 7:** As in Level 6 and 1 is added to every missile interception chance.

**Level 8:** Prepare Missile Command not required to launch unguided, guided, or intelligent missile. Each missile possesses 1 extra Energy Unit. 1 is added to every missile interception chance.

**Level 9:** Prepare Missile Command not required to launch any type of missile. Each missile possesses 2 extra Energy Units. 1 is added to every missile interception chance.

A character receives an Experience Point for missile guidance each time a missile he launched successfully intercepts a target (even if the target has an active force field). In addition, at the end of a space combat, the character rolls percentile dice. If the result is equal to or less than the total number of missiles launched by the character (counting a MIMS as on missile), he receives an Experience Point.

**PILOT**

9 Levels/Limit: Intelligence

The character may effectively maneuver a spaceship or battlecraf. Any one character may be assigned to pilot a spaceship or battlecraf, and when doing so is considered to be in the bridge. The character’s Skill Level modifies the number of Maneuver Commands he may issue to the ship each Command Phase and affects the performance limits of the craft.

**Unskilled:** No more than one Maneuver Command may be issued in a single Command Phase; no Weave Commands may be issued. The spaceship may not receive “free” Maneuver Commands upon entering a planet hex (see DV 6.5).

**Level 2:** No more than three Maneuver Commands may be issued in a single Command Phase; no Weave Commands may be issued.

**Level 3:** No Weave Commands may be issued.

**Levels 4, 5:** No modifications.

**Level 6:** Ship’s Maneuver Rating increased by 1.

**Level 7:** Ship’s Maneuver and Velocity Rating increased by 1 each.

**Level 8:** As in level 7, and the chances of missile interception and asteroid collision are reduced by 1 each.

**Level 9:** As in level 7, and the chances of missile interception and asteroid collision are reduced by 3 each.

Pilot skills may also be used when controlling a shuttle or any craft in low planet orbit, as described in 11.0.

A character receives an Experience Point for pilot skill at the conclusion of any space battle in which he piloted a craft that was fired upon. He may also receive an Experience Point when attempting to avoid an accident while controlling a craft in low planet orbit, as explained in 11.3

**SPACE TACTICS**

9 Levels/Limit: Leadership

The character may effectively direct battle strategies undertaken by a spaceship he is commanding during space combat. Space tactics may not be used aboard a battlecraf. Any one character may be assigned to space tactics, and a character so assigned must occupy the ship’s battle communications pod, if the ship has one. If not, he must be in the bridge, a weapon pod or an arsenal pod. The character’s Skill Level affects the number of Battle Commands that may be issued to the ship and the number of fires that may be conducted from the ship.

**Unskilled:** No more than 1 Battle Command may be issued to the spaceship in a single Command Phase and no more than 1 fire may be conducted from the spaceship in a single Fire Phase. Active Search, Rendezvous and Tractor Beam Commands may not be issued at all.

**Level 1:** No more than 1 Battle Command may be issued in a single Command Phase and no more than 1 fire may be conducted in a single Fire Phase.

**Level 2:** No more than 2 Battle Commands may be issued and no more than 2 fires may be conducted.

**Level 3:** No more than 3 Battle Commands may be issued and no more than 3 fires may be conducted.

**Levels 4, 5:** No modifications.

**Note:** If the number of Commands of fires a ship may normally receive or conduct is less than listed above, the ship’s limitations take precedence.

**Level 6:** 1 additional Battle Command may be issued.

**Level 7:** 1 additional Battle Command may be issued and 1 additional fire may be conducted.
Level 8: As in level 7, and the Civ Level of the ship is increased by 2 when attempting to activate a force field during missile interception (see DV 9.8).

Level 9: 2 additional Battle Commands may be issued, and 2 additional fires may be conducted, and the ship's Civ Level is increased as in level 8.

A character receives one Experience Point for space tactics at the conclusion of any space battle in which he commanded a spaceship that was fired upon.

[10.0] Psionic Skills

Psionic skills allow a character to use the powers of his mind in tangible ways. These skills are restricted; that is, unless a character possesses a psionic skill or is eligible to possess the skill (has an X in its space), he may not attempt the skill at all. Furthermore, a character with a Mental Power Rating of less than 4 may never receive Experience Points for any psionic skill he uses.

With the exception of navigation, none of the psionic skills require any special equipment. However, a psionic rig may enhance a character's use of certain psionic skills.

Using certain psionic skills puts a terrific strain on the character's mind. If the skill is used poorly, the character may suffer psionic backlash, the effects of which range from a temporary blackout to insanity or death.

LIFE SENSE
9 Levels/Limit: Intelligence

The character is sensitive to the living energy emanations of all living beings. During the Encounter Procedure, the square of the single highest Life Sense Skill Level among the characters in the party is automatically subtracted from the awareness chance during a creature or NPC encounter. If the GM rolls a 9 on either die when conducting an awareness check, he should inform the character that contributed with Life Sense (if any) that he has gained an Experience Point.

When perception of a creature is possible (see 28.1), a character with life sense may attempt to perceive a creature's awareness percentage if the creature is intelligent: 20%. The creature's Intelligence Rating (if any), the character's Mental Power Rating, and the square of his Skill Level are added to the base chance. If the attempt is successful, the GM immediately reveals the creature's Intelligence Rating (or lack thereof) to the character. A dice result that is greater than the modified chance indicates failure; the character cannot perceive the creature's mind and may not try again. A character who rolls a 0 on either die when attempting to perceive creature intelligence receives an Experience Point.

MIND CONTROL
9 Levels/Limit: Intelligence

The character may attempt to interfere with or actually take control of another individual's mind. During an Action Round, a skilled character may attempt to control any character, NPC, or creature (however, see 10.2) that is within his natural sight. A character wearing a psionic rig may attempt to control an individual within 100 km whose exact location is known to him. A character attempting mind control may not move, fire or attack during the Action Round.

The base chance of successful mind control is 10%. To this is added the character's Mental Power Rating and the square of his Mind Control Skill Level. The square of the character's Mental Power Rating is subtracted from the chance. The attempting character rolls percentile dice. If the dice result is greater than the modified chance, the attempt fails; check for psionic backlash. If the dice result is equal to or less than the modified chance, 1 is temporarily subtracted from the target's Mental Power Rating for every 10 (or fraction thereof) below the chance the dice result indicates. One of the following two procedures is then carried out:

If the target's modified MP Rating is now 1 or higher, the target must immediately check for shock (see 30.3), using the modified Rating. If shocked, the target does not collapse; he remains motionless in place for one Action Round.

If the target's modified MP Rating is now 0 or less, the target is controlled by the attempting character. A controlled individual may be moved or commanded to perform any other actions possible in an Action Round (see 29.3) in any way the controller wishes. A controlled individual may not be directed to do anything suicidal (such as walking off a cliff or firing a weapon at himself). He may be directed to do such things as attach his hulls, toss or use his weapons, or run wildly away. An individual remains controlled for one Action Round only.

A character who rolls a 0 or 1 on either die when attempting mind control receives an Experience Point.

NAVIGATION
9 Levels/Limit: Intelligence

The character has learned the secrets of hyperdrive thought. He is familiar with the concepts, design and use of spaceship hyperdrives. If aboard a spaceship that has an explorer, hunter, jump, or augmented jump pod — and the spaceship is at a valid jump point — the character may attempt a hyperjump, within the limitations of 32.0. The character declares his destination star system (and planet within the system, if known) and calculates his chance of success as follows:

The square of his Navigational Skill Level (a standard or augmented jump pod increases the Skill Level), plus the square of his Mental Power Rating, plus 10 x the highest Starport Class in the destination system (if the character has been to the star system before, increase the Starport Class by 1); if the character frequents the star system, increase the Starport Class by 2; both of these bonuses may be applied to a 0 Class Starport, but may not increase the Class of any starport above 4), minus the distance between the spaceship's current position and the destination star system (in light years).

The character rolls percentile dice, and the GM refers to the Hyperjump Table (see 32.3), using the difference between the dice result and the calculated chance to locate the outcome of the hyperjump. If the outcome includes Psionic Backlash Modifier, the GM rolls percentile dice again, adds the modifier to the dice result, and locates the result on the Psionic Backlash Table (10.4).

A character who rolls 0, 1, 2 or 3 on either die when attempting a hyperjump receives an Experience Point. An EP may not be gained from a dice roll for the Psionic Backlash Table.

PSIONIC BOOST
5 Levels/Limit: Intelligence

The character may attempt to call upon the powers of his subconscious to improve his performance in a stress situation. In any situation where the character is called upon to use a military skill or a vehicle skill, he may declare that he is attempting to temporarily improve that skill with a psionic boost. Only those skills in 9.0 and 11.0 that the character possesses at Level 1 or higher are eligible for psionic boost.

The base chance of successful psionic boost is 25%. To this is added the character's Mental Power Rating and the square of his Psionic Boost Skill Level (may be increased if wearing a psionic rig). The character rolls percentile dice. For every 10 points (or fraction thereof) below the modified chance the dice result indicates, the declared Skill Level is increased by one. Thus, a character with a 50% chance of psionic boost who rolled a 38 would increase the declared skill by 2 levels. For every 10 points (or fraction thereof) above the modified chance the dice result indicates, the declared Skill Level is decreased by one. If an unsuccessful boost attempt reduces the declared Skill Level below 1, the character is considered unskilled at the task. The effects of psionic boost (successful or unsuccessful) last for one use (one die roll) of the declared skill only.

A character who rolls a 0 on either die when attempting psionic boost receives an Experience Point. A character may not receive an EP for a skill if he attempted to improve its current use with psionic boost.

PSIONIC COMMUNICATION
8 Levels/Limit: Intelligence

The character can send and receive thoughts with other individuals. At any point during play, the character may declare that he is attempting to send a psionic (unspoken) message to another character, NPC, or creature (however, see 10.2) within his sight. A character wearing a psionic rig may attempt to send a psionic message to an individual anywhere on the same world or within 200,000 km. The character declares the intended receiver and the GM calculates the chance of success as follows: To the base chance of 10% is added the character's Mental Power Rating, plus the square of his Psionic Communication Skill Level, plus the receiver's MP Rating, plus the square of the receiver's Psionic Communication Skill Level. The GM rolls percentile dice. The GM subtracts the modified chance from the dice result and locates the difference in one of the following outcomes:

- 20 or less: Successful communication has been established. The two individuals converse silently for the equivalent of one minute (adjudicated by GM).

- 19 to 0: The character may send one message to the receiver. The receiver may not return a message except to acknowledge receipt.

The character may attempt to communicate with another individual (even if the other individual is in the same room) using the Psionic Communication Skill but will be less successful. The character must roll percentile dice and locate the result on the Psionic Communication Table (10.5).
+1 to +10: The receiver is aware that the character is attempting to contact him, but cannot receive a message.

+11 to +20: The receiver is aware that someone, somewhere is attempting to contact him. The sender is not aware of this fact.

+21 or more: No contact is achieved at all.

A character may not attempt psionic communication with a specific individual more than once per day.

A character that rolls a 0 on either die when attempting psionic communication receives an Experience Point. If successful psionic communication is established and the receiver has (or is eligible to acquire) the psionic communication skill, he also receives an Experience Point on a roll of 0. The GM should not allow EP gain for psionic communication if the skill is being used when normal or radio conversation could be safely used.

**PSYCHOKINESIS**

**9 Levels/Limit: Intellligence**

The character is able to move and manipulate objects in his environment. The character may declare that he is attempting to lift and/or move any unattached object within his sight. A character attempting psychokinesis during an Action Round may not make another attack or fire.

The chance of successful psychokinesis is 10% minus the size (0-9) of the world the character is on (considered 0 if in a zero-G environment). The character's Mental Power Rating and the square of his Skill Level are added to the chance. The character rolls percentile dice. If the dice result is less than the modified chance by at least a number of percentage points equal to the kilogram weight of the object (rounded up) to be moved, it is successfully lifted. Any additional amount that the dice result falls below the chance may be converted to movement of the object: Divide the difference by the whole kilogram weight of the object (rounding the quotient to the nearest whole number) to determine the number of hexes (five-meter increments) the object may be moved on an Action Round (tenths of seconds). Example: A character with a 65% chance of lifting a three kg object rolls a 25. He may lift the object and has 17 percentage points with which to move it. Dividing 17 by 3 provides the character with the ability to move the object 6 hexes in an Action Round. If the object had weighed between 14 and 20 kg, he would be able to lift it a short distance but would not be able to move it.

A character that is able to move an object with psychokinesis may hurl the object at a target. The Hit Strength of a hurled object is calculated as follows: (20 + [the Agility Rating of the target]) is subtracted from the speed of the hurled object (the number of hexes it moves in an Action Round). If this number is 0 or less, the object may not harm the target. If the number is 1 or greater, multiply it by the whole kilogram weight of the object to produce the damage. This damage is applied by the rounding fractions down. It is used as the Hit Strength on the Hit Table or the Equipment Damage Table (depending on the type of threat). See 30.0. If this quotient is less than 1, the target is not harmed. In summary:

**UNIVERSE, PAGE 14**

**Weight x [Speed – (10 + Target Agility)]**

A dice result for a psychokinesis attempt that is above the modified chance at all indicates failure; check for psionic backlash.

If the character is wearing a psionic rig while attempting psychokinesis rolls less than his modified chance, the number of percentage points below the chance the die result indicates is multiplied by 10. Thus, if the character in the preceding example were wearing a psionic rig, his dice result would be considered 200 percentage points below his chance. He could then move the three kg object 66 hexes in one Action Round and strike an NPC (Agility Rating of 8) with a Hit Strength of 7. A psionic rig does not increase the actual psychokinesis chance.

A successful psychokinesis attempt lasts one Action Round only. If a character wishes to continue controlling an object, he must conduct another attempt.

A character who rolls a 0 on either die when attempting psychokinesis receives one Experience Point. However, a character may receive no more than one EP when controlling an object through more than one Action Round.

[10.1] A character may enhance certain of his psionic skills by wearing a psionic rig.

If wearing a psionic rig while attempting psionic boost, a character's skill level is increased by 2. A psionic rig greatly increases the range (to 100 km) over which a character may attempt mind control and greatly increases the range anywhere on the world over which the character may attempt psionic communication. A psionic rig increases the effect of successful psychokinesis by a factor of 10. These effects are detailed in the specific skill descriptions. A psionic rig does not aid navigation, psion tech, or life sense. If a psionic rig is being worn by a character that must use the Psionic Backlash Table, 10 is subtracted from the result on the table.

A psionic rig weighs 3 kg and may be purchased in a psionic institute for 25 Trans.

[10.2] If a character is aware that a creature has an Intelligence Rating, he may attempt mind control or psionic communication with the creature.

Such a creature is considered to possess a Mental Power Rating of 1 unless otherwise specified. A character's Mind Control and Psionic Communication Skill Levels are reduced by 2 when dealing with a creature. If a creature has no Intelligence Rating or the characters are not aware that it has an Intelligence Rating, mind control and psionic communication cannot be attempted with it.

[10.3] A character must sometimes check for psionic backlash after attempting navigation, mind control, or psychokinesis.

If a dice result for mind control or psychokinesis is above the modified chance, the difference is located on the Psionic Backlash Table and the listed effect is applied to the character (no additional dice roll is made). If the outcome of a hyperjump includes a psionic backlash modifier, the character must roll percentile dice again, apply the modifier to a roll, and locate the modified result on the Psionic Backlash Table to determine the effect on the character.

If a character is wearing a psionic rig, 10 is subtracted from the result on the Psionic Backlash Table. However, the rig may become damaged, as listed in certain outcomes.

A shocked result from the table is carried out in accordance with 30.3. If a shocked character is not in an action situation, it can be assumed that he blacked out for a few moments and then came to with no long term effects.

A character that suffers Mental Power loss as a result of psionic backlash may regain the lost points only if he is healed at a psionic institute (see 10.5). Lost Mental Power Points may be regained at the rate of one per month once healing has begun. If a character's Mental Power Rating is reduced by 2 or more, he may use none of his skills (psionic or otherwise) until healed; he is temporarily insane. The manifestation of his insanity is determined by the GM.

**[10.4] The Psionic Backlash Table is used to determine the effects of psionic backlash.**

See 51.0.

**[10.5] A psionic institute is a secluded center of research and meditation controlled by psions.**

Any world with a class 3 or 4 spaceport has a psionic institute (see 25.5). The location of an institute on a given world is determined by the GM. Any character that is a psionic navigator or a thinker may always enter a psionic institute. Any character with a Mental Power Rating of 3 or greater may enter a psionic institute if accompanied by a psionic navigator or thinker. A character in an institute may be healed of any ill effects of psionic backlash and any physical ailments as well. Psionic rigs may be purchased and repaired at an institute.

**[11.0] Vehicle Skills**

Vehicle skills allow a character to safely drive or pilot all types of planet-based vehicles on the ground, in the atmosphere, or on or below liquid.

Any character may attempt to operate a vehicle. However, in situations that require skillful maneuvering or quick decisions, a character with the proper skill will be much more likely to see himself and his passengers through safely.

Vehicle skills are organized in a different way than other skills. There are four vehicle skills: ground vehicles, air vehicles, marine vehicles and military vehicles. Each of these skills is divided into five or six sub-skills, each representing proficiency with a particular type of vehicle in the skill category. As a character increases a vehicle skill, he receives Experience Points to assign to its sub-skills.

The following vehicle skills and sub-skills are available to the characters:

**AIR VEHICLES**

**9 Levels/Limit: None**

The character is familiar with the theories of atmospheric flight and the operation of all
types of air vehicles, broken into the following sub-skills:

**Direct Lift.** Any jet-powered craft designed for point take-off and landing.

**Glider.** Any air vehicle powered only by air currents or human strength. Also includes "mechanical birds," such as an ornithopter.

**Helicopter.**

**Jet Plane.**

**Propeller Plane.**

**Shuttle.** A rocket-powered vehicle designed to fly from a planet surface to low orbit and back. A character with pilot skill is considered to have this skill at the same level.

**GROUND VEHICLES**

**9 Levels/Limit: None**

**All-Terrain Vehicle.**

**Animal Drawn.** Includes all vehicles drawn by horses, oxen, and alien beasts of burden, and the riding of any such animals.

**Automobiles.**

**Sled.** Any powered or non-powered vehicle designed for travelling over snow and ice. If an animal-drawn sled is being used, the driver uses the lower of his Animal Drawn and Sled Skill Levels.

**Tractor.**

**Truck.** Any vehicle, designed for road use, with more than two axes.

**MARINE VEHICLES**

**9 Levels/Limit: None**

**Motorboat.** Any small engine-powered craft.

**Oar Boat.** Any craft powered by human strength.

**Sailing Ship.** A craft of any size powered by wind.

**Submarine.** Any submersible vessel.

**Supervessel.** Any large engine-powered ship, such as an ocean liner, supertanker, or aircraft carrier.

**MILITARY VEHICLES**

**9 Levels/Limit: None**

The character is familiar with the operation of a wide range of military vehicles, broken into the following sub-skills:

**Armed All-Terrain Vehicle.** A character with this sub-skill may operate an unarmed ATV at the same skill level. When doing so however, any Experience Points gained must be applied to the Ground Vehicles Skill, not to Military Vehicles.

**Armored Personnel Carrier.**

**Half Track.**

**Self-propelled Artillery.**

**Tank.**

**1.1** Each level a character achieves in a vehicle skill allows him to increase his sub-skills by a number of points equal to the new Skill Level.

For example, a character at Skill Level 1 in Ground Vehicles could assign 1 point to the automobile sub-skill. When he achieves Level 2, he could assign 1 additional point to the automobile sub-skill and 1 point to the truck sub-skill. Upon reaching Level 3, he assigns 3 more points to any of the ground vehicle sub-skills, and so on until he reaches Level 9, when he receives 9 points to assign to any of the sub-skills (he would then have a total of 45 points assigned to all the ground vehicle sub-skills). Points received when reaching a new Skill Level may be assigned to sub-skills in any manner as long as a single sub-skill does not exceed Level 9, and as long as points are assigned only to sub-skills for vehicles that have been used by the character in some capacity since the last increase.

**Note:** When choosing a vehicle skill during character generation, the player receives and assigns points to sub-skills as follows:

- At Skill Level 1 he receives 1 sub-skill point.
- At Level 2 he receives a total of 3 points;
- At Level 3, a total of 6 points;
- At Level 4, a total of 10;
- And at Level 5, 15.

**[1.2]** When a potential vehicle accident is imminent, the character driving the vehicle must attempt to overcome the hazard, using his vehicle skill.

The base chance to avoid an accident is 25%, 50%, or 75% (see 38.0). The Performance Modifier of the vehicle is added to the base chance. The character's Deductible Rating and the square of his Sub-Skill Rating are added to the base chance. If an unskilled character is driving the vehicle, nothing is added to the base chance.

1. The character driving the vehicle rolls percentile dice. If the dice result is less than or equal to the modified chance, no accident occurs at all, and this procedure is concluded (the GM might wish to describe some sort of "close call" to the players). If the result is greater than the chance, an accident occurs and the following steps are conducted.

2. The GM subtracts the modified chance from the dice result and locates the difference on the Hit Table (30.9) to determine the type of damage incurred by the vehicle. He does not add a die roll to the difference (as is stated on the table). The GM should then describe the nature of the accident to the players in colorful terms.

3. If the vehicle incurs heavy damage or worse as a result of the accident, any characters aboard may be hurt. Each character must roll one die, applying the following modifiers: subtract the character's Agility Rating; add 10 if the vehicle is partially destroyed; add 20 if the vehicle is totally destroyed. Locate the modified die roll on the Hit Table and apply any hits incurred by the character as explained in 30.2. Characters are not hurt in a vehicle accident resulting in superficial or light damage.

**[1.3]** A character who rolls a 0 or 1 on either die when attempting to avoid a vehicle accident receives one Experience Point.

The character may also check for Experience Gain after every 30 hours (or so) of driving time in which no accident check occurs. The GM and/or the driving character should keep track of "safe" driving time since the last accident check for this purpose. After 30 hours have passed, the player rolls percentile dice and gains an Experience Point if a 0 or 1 appears on either die. The dice roll has no purpose aside from checking for Experience Point gain.

**[1.4]** The type of vehicle sub-skill used for a specific vehicle is listed on the Vehicle Chart.

Two sub-skills are listed for certain vehicles on the chart. In this case, the driver must use the one sub-skill that applies to the current use of the vehicle. If the GM introduces a vehicle into play that is not covered by the Vehicle Chart (21.1, 21.2, or 21.3), he must assign one (or two) of the applicable sub-skills to it, and announce this to the players.

**[1.0]** Scientific Skills

Scientific Skills allow a character to attain a wide variety of analyses, syntheses, studies and treatments that will often be of vital importance to the party.

A character may undertake a scientific task only if he possesses the appropriate skill, or if he is eligible to use the skill (that is, if there is an X in the Skill Level space on his Character Record, see 7.6). Exception: Any character may attempt to diagnose an ailing person.

Unless otherwise stated, all scientific tasks require a particular lab, scanner, or other piece of equipment. Some of these devices provide the character with a temporary increase in his Skill Level (as explained on the Personal Equipment Table). This increase is not applied if the character does not possess the skill required for the task. Exception: An unskilled character attempting treatment may receive an increase when using a medicarnic (his Skill Level is considered to be 0 for this purpose).

Each task requires a certain amount of time to perform. In most cases the time required is listed with the description of the equipment that must be used. If the task requires no equipment other than for its primary function, the time required is listed in the task description. The time required to perform a task may be reduced or increased, as explained in the chapter introduction.

The GM may have an NPC or service that the party has encountered attempt a task that the party previously failed. The GM should discourage repetitive use of a task (such as scanning for geological resources every 50 meters) by informing a character doing so that he is not eligible to receive Experience Points.

**[6.0] Astronomical Intelligence**

The character is learned in the study of celestial bodies and the geography of known space. His services are required when attempting to locate an unexplored planet or when attempting to locate one's own position after a hyperjump error. All spaceships contain equipment necessary to survey the stars. A Civ Level 8 spaceship or explorer pod increases a character's Astronomical Skill Level by 1. If the survey pod increases the level by 2, 

**T** Locate unexplored planet (when in space system): 80%

**T** Locate uncharted planet (when in space system): 70%
UNIVERSE, PAGE 18

GEOLGY

7 Levels/Limit: Intelligence
The character can identify all known types of rocks and minerals and has studied the forces that compose and control planetary crusts and mantles. If he has a geolab or geoscanner, he may analyze a sample for mineral and resource content. If he has a geoscanner, on a planet surface, he may also survey the areas for minerals, other resources, fissures, or volcanic activity. A dice result for any geology task that is no more than 10 above the modified chance for the task indicates success with a 10% increase in the time required for each extra percentage point. A dice result that is more than 10 above the modified chance indicates failure.

Analyze sample to find all abundant chemicals: 70%.
Analyze sample to find all abundant and trace chemicals and complex compounds: 25%.
Synthesize element or simple compound (water, oxygen, explosives, acids): 20%.
Synthesize complex compounds (such as drugs or proteins): 5%.

DIAGNOSIS

9 Levels/Limit: Intelligence
The character is familiar with the theories of medicine and the nature of all ailments suffered by humans. His services are essential before a patient may be healed. If the character has a first aid kit or a mediscaner, he may attempt to diagnose injury or disease suffered by another person (not himself) and thus allow and aid the medical treatment of that person.

Determinate ailing being for treatment: 90%. From this chance the GM subtracts (3 x the total number of hits received by the patient); 7 hits would be a subtraction of 21.
If the patient is suffering from something other than hits to his physical characteristics (such as poison or disease), the GM secretly determines how much is subtracted from the chance. The modified chance may exceed 100% after adding it for the character’s skill. No time is required to perform this task. The time listed on the Equipment Chart to use a first aid kit or mediscanner is for treatment only.

A result for diagnosis that is above the modified chance indicates that diagnosis has failed; treatment may not be conducted by the characters at all. If the dice result is less than the modified chance by more than 20, the Skill Level of the character that will treat the patient is increased by 1 (this may be the diagnosing character or any other with treatment skill). If the dice result is less than the modified chance by more than 40, the Treatment Skill Level is increased by 2. If the dice result is less than the modified chance by more than 70, the Treatment Skill Level is increased by 3.

A character without diagnosis skill may attempt to diagnose. When doing so, the 90% chance (with the subtraction for the ailment) may not be increased at all. Successful diagnosis by an unskilled character may not increase a character’s Treatment Skill Level.

When attempting to diagnose an ailing alien life-form, a character uses the lower of his Diagnosis and Biology Skill Levels. If he fails both of these skills, he is considered unskilled at the task. The GM may also apply this rule when a character is diagnosing a human with an alien disease.

PHYSICS

6 Levels/Limit: Intelligence
The character is educated in the study of matter, energy, motion, and force. If he has an energy scanner, he may analyze an object, an area or an occurrence for the type of forces and energy that caused or might affect it. Unlike most other scientific tasks, the time required to conduct a physics task depends on the task itself, not on the attributes of the energy scanner. A dice result for any physics task that is above the modified chance at all indicates failure.

Determinate the type, intensity, and possible danger of energy picked up by the energy scanner in an area: 80%. Time required: 1 Action Round (no reduction possible)
Determinate the type of energy powering an unknown device or a non-protein based creature: 70%. Time required: 1 Action Round (no reduction possible)
Determinate the type of force or energy that caused a phenomenon (such as a blast crater or some other unobserved act of destruction): 50%. Time required: 1 hour
Determinate in advance what the application of a given force or energy might do to an object: 40%. Time required: 1 hour
Tap an energy source for use by the party: 20%. Time required: 2 hours. When attempting this task, a character uses the lower of his Physics and Energy Tech Skill Levels.
If he does not possess both of these skills, he is considered unskilled at the task. The kit that would normally be used to repair the object that the character is attempting to provide power for is also required. The character must identify the energy source (with one of the above tasks) before he may attempt to tap it. Whether or not an energy source may be tapped depends on the GM. This task is not required in order to use a common energy source, such as an electrical outlet or battery pack.

The physics skill is also required in order to attempt repair of a force field (see Energy Tech, 13.0).

**PLANETOLOGY**

**7 Levels/Limit: Intelligence**
The character is well versed in the geography, meteorology, and other general physical features that make up a world. If he is orbiting a world in a spaceship capable of carrying at least 6 pods, or that has an explorer or survey pod, he may analyze the world to gain information about its climate, atmosphere, geographical layout, and natural resource distribution. When the character wishes to analyze a world, he chooses one of the following tasks. That task, and all listed above it (if not already known), may be determined in a single analysis attempt. If the character’s analysis dice result is greater than the modified chance listed for the chosen task, analysis is still successful, but the time required is increased by 10% for each percentage point over the dice result indicated.

- **Determines hydrograph percentage and distribution of land and liquid masses on entire world:** 65%
- **Determine temperatures of all environments:** 65%
- **Determine atmosphere of world:** 65%
- **Determine general resources of world (all those resources that exist throughout two or more environments, no matter how minor):** 50%
- **Determine amount of resources available in each environment:** 50%
- **Determine the terrain of each environment individually (such as barren, forest, cranites, ice):** 40%
- **Determine the presence of general resources in all environments individually (all resources except those that exist only at a site in an environment):** 40%
- **Determine the detailed geography and geology of all environments individually, including the presence of resources found only at a site (the GM may provide the character with a detailed environ map or maps, if available):** 5%

An explorer or survey pod is required for any world analysis with less than a 40% base chance. A survey pod is required for any analysis with less than a 10% base chance. The GM may wish to reduce some of these percentages if the world has thick cloud cover, or has a side that never receives light from its star. The GM should provide the player with a world log that varies in detail, depending on how much of the world they have analyzed. Survey of a world from orbit will not reveal the exact location of any resource, and will not reveal the presence of the following resources at all: spicier, light-fiber plants, wood, edible plants, and edible game.

**PROGRAMMING**

**8 Levels/Limit: Intelligence**
The character is familiar with the dynamics and operation of computers and robots. A character with programming skill may always use a computer or robot that he owns to its full potential (no chances are assigned and no dice rolls are made). He may use a robot that he does not own in the same way, as long as he has the robot’s controller (see 16.2). If the character has access to a computer or robot owned by another person, company, or government agency, he may attempt the following tasks. When dealing with a robot, a character’s Programming Skill Level is reduced by 2 (to a minimum of 1).

- **Gain control of robot not controlled by character (without controller):** 30%. Time required: 1 hour. An electrotik or robot kit is necessary, although neither provides a Skill Level increase.
- **Call up unrestricted information in computer:** 50%.
- **Call up restricted information in computer:** 30%.
- **Call up top-level secrets in computer:** 10%.
- **Alter protected information in computer:** 10%.

A dice result for any of the preceding tasks that is above the modified chance indicates failure. A dice result that is more than ten above the modified chance may cause the computer or robot to alert its owners (openly or secretly) that the character is using the device in a way that may not be to their liking. The repercussions of such an occurrence are left up to the GM. The character must have the computer/robot tech skill in order to attempt any task not listed above that involves computer or robot hardware, or must work with a character who has the tech skill (as ruled by the GM).

**TREATMENT**

**9 Levels/Limit: Intelligence**
The character is familiar with all forms of paramedical and surgical procedures. If he has a first aid kit or a medi scanner, and successful diagnosis has been performed, the character may treat an ailing person, thus speeding his recovery or even saving his life.

- **Treat an ailing being:** 1%

Effects of treatment (whether successful or not) are explained in 12.3. A character’s Treatment Skill Level may be increased if diagnosis was successfully performed (in addition to any increase for using a medi scanner; see diagnosis, above). A character who is eligible to acquire treatment skill but has not may attempt to treat a patient. When doing so, his Skill Level (0) may be increased by successful diagnosis and use of a medi scanner (unlike most tasks performed by an unskilled character). However, treatment by an unskilled character is not as effective (see 12.3).

When attempting to treat an alien life form, a character uses the lower of his Treatment and Biology Skill Levels. If he does not possess both of these skills, he is considered unskilled at the task.

**12.1** A character who is skilled in any scientific task he is attempting adds his Intelligence Rating and the square of his Skill Level to the base chance.

An eligible unskilled character who is attempting a scientific task adds nothing (not even his Intelligence Rating) to the base chance.

**12.2** A character receives an Experience Point when attempting a scientific task as follows:

- If he rolls a 0 or 1 on either die for a chemistry, geology, or biology task.
- If he rolls a 0, 1, or 2 on either die for a diagnosis, treatment, programming or physics task.
- If he rolls a 0, 1, 2, or 3 on either die for a planetology or astronomy task.

**Note:** A character that is unskilled at a scientific task receives an Experience Point for attempting the task only if it is successful and fulfills the preceding requirements.

**12.3** The rate at which a character heals from wounds incurred depends on his Endurance Rating and the quality of treatment he receives.

- A wounded character who receives no treatment or who receives unsuccessful treatment from an unskilled character regains lost Physical Characteristic points at the rates indicated on the Treatment Results Table (see page 51).
- A wounded character who receives successful treatment from an unskilled character has the time required to regain each characteristic point divided by one and one half his full Endurance Rating (rounded down). Thus, a character with a full Endurance Rating of 6 (regardless of his current rating) who had lost five points from his Strength Rating would regain one point every two days.
- A wounded character who receives unsuccessful treatment from a skilled character has the time required to regain each characteristic point reduced as follows: the number of percentage points below the modified treatment chance the dice result shows is added to the full Endurance Rating of the character. The time required for the character to regain each characteristic point is then divided by this sum. Example: A character with a full Endurance Rating of 6 has lost 5 points from his Strength Rating. A skilled character that is treating him with a 60% chance of success rolls a 40 (a difference of 20). The base time required to regain each lost point (6 days) is divided by 26, so that one point is regained approximately every 5 hours.
- A character that is regaining points lost from more than one characteristic must regain points for each characteristic as evenly as possible. Thus, a character that has lost
points from his Endurance and Agility must remain a point in each before regaining a second point in either (until one or the other has returned to its full rating).

If one or more of a wounded character's Physical Characteristics are at 0, a check must be made every game hour to determine if permanent, untreatable damage occurs. Every hour (beginning one hour after the character incurred the wounds) he rolls percentile dice for each characteristic at 0. If the dice result is 10 or less, the full rating for the characteristic is permanently reduced by 1. If the Endurance Rating is currently at 0, and the dice result is a 01 or 02, the character dies. These checks are made every hour until all Physical Characteristics are increased above 0 by healing. As long as a character's Endurance Rating remains at 0, he is considered unconscious (see 30.2). If this healing time is reduced by treatment begins healing at the new rate when the time required for treatment has passed.

[13.0] Technical Skills

Technical skills allow a character to repair weapon, robots, vehicles, and other equipment damaged during play.

When a device is damaged (as a result of weapon fire, other combat actions, or accident) the GM secretly determines the extent of damage (superficial, light, heavy or partially destroyed; see 30.5) and informs the players how the damage appears to them, whether the act places them know the category of damage. Any character may volunteer to repair a damaged device, but unless he has the appropriate Tech Skill, he will rarely be able to repair anything more than superficial damage to small items.

A character with a Tech Skill is familiar with the technology, materials, and operation of all devices related to the area of his skill. Aside from repair work, the GM may allow a character's Tech Skill to come into play in such other situations, as the party is inspecting unknown equipment or, if the proper materials are available, when the character is attempting to build a device related to his Tech Skill.

A party may attempt to repair an item only if it has the requisite kit. A basic repair kit usually allows repair of superficial damage to any item smaller than a large ground vehicle, and superficial or light damage to any item that may be held by a character. Certain exceptions to this rule, and the type of kits required for repair of more extensive damage, are listed with the appropriate Tech Skill description. Certain kits may increase a character's Tech Skill Level for purposes of a given repair attempt.

In such instances, the increase is applied to the Skill Level before any reductions are made for especially difficult repair jobs (as noted in certain Tech Skill descriptions). Detailed explanations of the attributes of all kits can be found in 22.2.

COMPU/ROBOT TECH

9 Levels/Limit: Intelligence

The character may repair all types of computers, portable and installed. He may also repair robots with a reduction of two to his Skill Level (to a minimum of 1). An electrokit is required for repair of a computer that has incurred more than superficial damage. A robot kit is required for repair of a robot that has incurred more than superficial damage.

CONSTRUCTION

8 Levels/Limit: None

The character is familiar with the construction of houses, shelters and buildings sealed from harsh environments. He may repair any such structure. Building materials (made available at the GM's discretion) are required for repair of any small structure (survival hut, storage shed) that has incurred more than superficial damage, and any large structure (office building, barracks) that has incurred any damage. Certain kits may be used in specialized repair of structures (such as an armor kit for a damaged pill box).

ELECTRO TECH

8 Levels/Limit: Dexterity

The character may repair all types of handheld, non-combat devices, including scanners, portable labs, cameras, holographers, radios, and all other types of small electronic equipment. The electro tech skill may not be used to repair interstellar commlinks, psionic equipment, or computer systems. A character's Electro Tech Skill Level is reduced by 2 (to a minimum of 1) when repairing or inspecting any Civil Level 8 device. An electrokit is required to repair any of these items that has incurred more than light damage. Electro Tech also allows a character to operate a two-way radio skillfully.

ENERGY TECH

8 Levels/Limit: Dexterity

The character is familiar with all types of power systems. He may repair heating and cooling systems, electrical systems, air systems, and all non-combustion drive systems (including spaceship engines). The kit required for repair depends on the type of system undergoing repair. An electrokit would be used for most portable systems, a vehicle kit for damage to a vehicle climate-control system or engine, and a spaceship kit would be used for damage to any other spaceship system. A basic repair kit may not be used to repair power systems at all.

The character may also attempt to repair a damaged force field. When doing so he uses the lower of his Energy Tech and Physics Skill Levels. If he does not possess both of these skills, he may not attempt repair. An electrokit is required to repair a personal force field. A vehicle or spaceship kit (as appropriate) is required to repair a larger force field.

PSION TECH

8 Levels/Limit: Dexterity

The character may repair interstellar commlinks, psionic rigs, and other psionic equipment. He may also repair psionic navigation equipment in the jump pod of a spaceship with a reduction of 2 to his Skill Level (to a minimum of 1). An electrokit is required to repair psionic navigation equipment that has incurred any damage.

SPACESHIP TECH

9 Levels/Limit: Intelligence

The character may repair damage incurred by spaceship hulls and pods (including battlecruiser). Each damaged part of a spaceship must be repaired separately. When repairing damage to spaceship engine or to spaceship armor, the character's Skill Level is reduced by 2 (to a minimum of 1). Psionic equipment may not be repaired with the spaceship tech skill. Repair of superficial damage requires a Civil Level 6 spaceship kit, light damage a Civil Level 7 spaceship kit, and heavy damage a Civil Level 8 spaceship kit. A partially destroyed part of a spaceship may only be repaired at a Class 4 spaceport.

SUIT TECH

8 Levels/Limit: Dexterity

The character may repair all types of protection suits, respirators, respirator helmets, and body armor. He may also repair armor on small vehicles. However, when repairing armor his Skill Level is reduced by 2 (to a minimum of 1). A character that is repairing body armor may declare that he is repairing punctures only. If he does so, his Skill Level is not reduced, but any reductions to the projectile and beam defense strength of the armor may not be repaired. A suit kit is required to repair an expedition suit or body armor that has incurred more than superficial damage. A suit kit may not be used to repair the projectile and beam defense strength of armor. An armor kit is required to do full repair work on body armor and vehicle armor.

VEHICLE TECH

8 Levels/Limit: Dexterity

The character may repair all types of vehicles listed in 21.0. When he is repairing a military vehicle, an air vehicle, or armor on any vehicle, his Skill Level is reduced by 2 (to a minimum of 1). A vehicle kit is required in order to repair a small vehicle that has incurred light damage, or a large vehicle that has incurred any damage.

WEAPON TECH

8 Levels/Limit: Dexterity

The character is familiar with the workings of projectiles and beam weapons, both handheld and mounted. He may repair any type of weapon listed in 19.0. He may also repair artillery and spaceship missile, laser and particle fire systems with a reduction of 2 to his Skill Level (to a minimum of 1). A weapon kit is required to repair any hand-held weapon that has incurred more than light damage and any larger weapon that has incurred more than superficial damage. A spaceship kit is required to repair any damage incurred by spaceship weapon systems.

[13.1] One character may attempt to repair an item that is damaged, whether or not he possesses the appropriate Tech Skill. When a character declares that he wishes to do so, and announces the type of kit he is using, the following steps are undertaken:

1. The GM secretly determines the base repair chance, depending on the type of damage incurred by the item, as indicated in the Damage Repair Table (see page 51).
2. The GM secretly determines the maximum repair time by multiplying the Basic Repair Time (listed in the description of the item under repair or in the summary on page b) by the appropriate Repair Time Multiplier listed on the Damage Repair Table.
3. The GM determines the actual repair chance using the following formula: Base Repair Chance + Tech Skill Level + Intelligence Rating. A character's Tech Skill Level may be increased (but not decreased) for this purpose if the appropriate kit is being used. The actual repair chance may exceed 100%. 

4. The character attempting repair rolls percentile dice. If the dice result is greater than the actual repair chance, the attempt fails; conduct A, below. If the dice result is equal to or less than the actual repair chance, the attempt succeeds; conduct B, below.

A. The GM determines how much time is spent in the futile attempt to repair the item. He divides the maximum repair time (as calculated in Step 2) by the character's Tech Skill Level (plus any increase the kit allows) squared, or by his Intelligence Rating (not squared), whichever is higher. The amount of time spent in this calculation passes as the party waits for the repairer to realize that he cannot do the job. If this period of time is long, an encounter may even occur.

B. The GM determines how much time is spent successfully repairing the item. The dice result obtained in Step 4 is subtracted from the actual repair chance. The difference is applied as a percentage reduction to the maximum repair time to determine the actual repair time. **Example:** The actual repair chance to repair an item with a maximum repair time of 24 hours is 70%. The player rolls a 30, which is less than the actual repair time by 40 (this can also be expressed as 60% of the maximum repair time). The actual repair time is then 14 hours.

If the dice result in a successful repair attempt is less than the actual repair chance by more than 50%, the maximum repair time is reduced by 90% only.

A character without the appropriate Tech Skill may only attempt to repair superficial or light damage to an item. When doing so, his repair chance is equal to the base repair chance. He receives no adjustments for his Intelligence Rating or the kit he is using.

The GM may implement the passage of time when a character is attempting to repair an item in one of two ways: he may announce the amount of time at the outset and skip directly to the point in time that repair is accomplished or failure is realized; or he may allow time to pass normally and not reveal the result of the repair attempt until the moment of realization is reached. If he chooses the latter, and repair is successful but lengthy, he should inform the players that the attempt will be successful and how long it will take before the repair is accomplished. The amount of time that passes before revealing successful repair may be calculated as in Step A above. For example, if the GM announces success instead of failure.

[13.2] A character who rolls a 0, 1, or 2 on either die when attempting repair receives an Experience Point.

The GM may also give a character an Experience Point if, for example, the character is rolling percentile dice for some other use of his tech skill.

---

[13.3] A damaged item that the characters are unable to repair may be taken to a repair service.

A town or suburb area on a planet is considered to have services for repairing any item of a Civ Level equal to or less than that of the planet. An urban area is considered to have services for repairing any item of a Civ Level up to 1 greater than that of the planet. **Exception:** Spaceships and spacecraft parts may be repaired only at a spaceport. A Class 2 spaceport has facilities for repair of superficial and light damage, a Class 3 spaceport for heavy damage, and a Class 4 spaceport for partially destroyed spacecrafts. Psionic equipment may be repaired only at a psionic institute (see 10.5).

An item taken to a repair service is automatically repaired. The repair time is always equal to the Base Repair Time multiplied by the Repair Time Multiplier. This product, when expressed in hours, also represents the cost to repair the item in 100's of Milis. Thus, an item with a Base Repair Time of 1 hour has suffered 600 Milis from damage that would take 24 hours of work time to repair and the job would cost 2400 Milis (24 Trans). The price of repair service may not be haggled over.

---

[14.0] Interpersonal Skills

Interpersonal skills are used by the character when dealing directly with society, in business, leisure, legal, and communications matters. More so than with other skills, the GM should determine the client’s actual interplay with NPC’s or authorities when using one of these skills. For example, a character may have a high Diplomacy Skill Level, but if the player bluntly insults the individual that he is conversing with, the skill should not do him much good.

DIPLOMACY

6 Levels/Limit: Empathy

The character is experienced in all manners of official communication and negotiation, and is generally well-spoken and tactful. He will be most effective when dealing with those from the local establishment or a higher social standing (see 5.7).

When a character is acting as party spokesman, he may use his streetwise and/or diplomacy skill to aid the establishment of friendly communications with an NPC or group of NPC’s (see 29.7). During Step 4 of the NPC Encounter Procedure, the chance of successful communication is calculated by the GM: To the base chance of 40% is added twice the spokesman’s Empathy Rating. The spokesman declares whether he is using his streetwise or diplomacy skill. If he declares use of the skill that the NPC’s social standing responds to, the square of the Skill Level is added to the chance. If he declares the skill that the NPC’s social standing does not respond to, the Skill Level (not squared) is added to the chance. If the spokesman is unskilled in both streetwise and diplomacy, his Empathy Rating (not doubled) is added to the base chance only. The GM rolls percentile dice and applies the outcome to the NPC Reaction Table (28.8) in terms of shifts, as explained in the NPC Encounter Procedure.

In addition to the communications task, the GM should take a character’s streetwise and/or diplomacy skill into account when the character is participating in any sort of extended dialogue with NPC’s. These skills do not aid a character in financial negotiations (the trading skill is used for money matters).

A character who rolls a 0, 1, or 2 on either die when using his streetwise or diplomacy skill receives an Experience Point.

---

DISGUISE

8 Levels/Limit: Dexterity

The character can control his voice, mimic a wide variety of postures, and alter his facial appearance through the use of make-up, latex, skin injections and dyes. It is assumed a character with this skill possesses the requisite materials to alter his appearance; however, accessories such as clothing and insignia must be acquired by the character when necessary. The base time required to prepare a disguise is four hours. The character’s Dexterity Rating and the square of his Skill Level are added to the base chance of the following tasks.

TP: Disguise self to gain anonymity: 60%.

TP: Disguise self to resemble person that has been extensively observed: 40%.

TP: Disguise self to resemble person that has been seen briefly or in pictures only: 25%.

The GM rolls percentile dice secretly and compares the dice result to the modified chance: **Result under chance by more than 20:** The disguise fools all except those intimately familiar with the subject. If the character is unmasked, the next outcome is used instead.

**Result equal to or under chance by 20 or less:** The disguise fools those who do not have everyday contact with the subject.

**Result over chance by 30 or less:** Anyone who gets a good look at the disguise, or hears the character say more than a few words will not be fooled. If the character is skilled, he is informed of this fact. If he is not skilled, he is told that the disguise looks fine.

**Result over chance by more than 30:** The character fails his attempt and is told that it will not work.

A character that rolls a 0, 1, or 2 on either die when attempting disguise receives an Experience Point.

ECONOMICS

8 Levels/Limit: Intelligence

The character understands the complex economic systems of the future; how the resources, shipping schedules and laws of supply and demand on the worlds of the federation affect the value of any item from place to place. If he has a business computer, the character may attempt to predict the price of any item in his possession at a declared location. If the location is another star system, he must have access to an interstellar commlink. The base time required for price prediction is 12 hours.

**Determine price of an item at a declared time and location:** 60 milis for each day, week, or month of weeks (or fraction thereof) in the future the price is requested for. The character’s Intelligence Rating and the square of his Skill Level are added to the base chance.

The GM rolls percentile dice. If the dice result is equal to or less than the modified chance, the attempt succeeds; the GM im-
mediately uses the Actual Price Table (18.0) to determine the price and announces it to the character. A dice result above the modified chance indicates failure (after 12 hours have passed). If a failing dice result is even, the character is told that the prediction is unsuccessful. If a failing dice result is odd, the GM reads the player a random result from the Actual Price Table as if it were a correctly predicted price.

A character who rolls a 0, 1, or 2 on either die when attempting to predict a price receives an Experience Point.

FORGERY/COUNTERFEITING
8 Levels/Limit: Dexterity
The character is experienced in the art of forging documents used for identification, shipping, and other business and government transactions. If he has the requisite materials (as determined by the GM) and a model to work from, the character may attempt to copy a document or piece of currency. The character’s Dexterity Rating and the square of his Skill Level are added to the base chance of the following tasks. The time required for each task is determined by the GM, depending on the complexity of the document.

TForge commercial document: 50%.

TForge world or local government document: 30%.

TForge federal document: 10%.

TCounterfeit 100 Mil note: 25%.

TCounterfeit 1 Tran note: 0%.

The GM rolls percentile dice secretly and compares the result to the modified chance:

Result under chance by more than 20: The document passes all inspections (visual and electronic). Exception: If the character is unskilled and/or the world has a Law Level of 4, the next outcome is used instead.

Result equal to or under chance by 20 or less: Document passes all visual inspection. 50% chance that the document will be found false one time it undergoes electronic inspection.

Result over chance by 30 or less: Document found false by any electronic inspection. When undergoing visual inspection, the GM rolls percentile dice; if the result is less than or equal to the inspector’s Intelligence Rating plus the square of his Forgery/Counterfeit Skill Level, the document is found false.

Note: A character with forger/counterfeit skill may attempt to detect false documents made by others in the same way.

Result over chance by more than 30: Document will not fool anybody. If the forger is skilled, he is told of this fact.

Any repercussions of character’s forged documents being found out are left up to the GM.

A character who rolls a 0, 1, 2 or 3 on either die when attempting forgery receives an Experience Point.

GAMBLING
8 Levels/Limit: Intelligence
The character is familiar with all common games of chance. If he is at a casino, some other gaming establishment, a bar or inn with an informal game, or with another character or NPC who wishes to play against him, the character may gamble. He must state his bet size (if playing against another character or NPC, both agree on a bet size). The bet size is not the total amount to be risked, but rather an amount that will be continuously risked over the four or five hour period that each gambling attempt represents. The character’s Intelligence Rating and Gambling Skill Level (not squared) are added to the base chance.

TGamble at a casino or established gambling house: 35%. Minimum bet size: 10 Mills; Maximum bet size: 1 Tran.

TGamble at an informal gathering in public place: 40%. Minimum bet size: 1 Mill; Maximum bet size: 100 Mills.

If the dice result is less than the modified chance, character wins an amount equal to the difference multiplied by the bet size. If the dice result is greater than the modified chance, the character loses the amount.

When gambling against another character or NPC, both individuals roll percentile dice separately, adding their Intelligence Rating and Gambling Skill Level to the dice result. The difference between the dice results is multiplied by the bet size, and the character with the higher result must pay the product to the character with the higher result.

A character may declare that he is cheating in any gambling attempt. If he does so, his Skill Level is doubled, but if his dice result is even, the GM checks for detection by his opponent. He rolls two dice. If the result is less than the opponent’s Intelligence Rating plus his Skill Level, minus the cheating character’s Skill Level, the character’s cheating is revealed. A casino is considered to have a combined Intelligence and Gambling skill of 15, and an informal gathering of 15 for this purpose. The consequences of revealed cheating and/or a character’s inability to pay a gambling debt are up to the GM.

A character who rolls a 0 or 1 on either die when gambling receives an Experience Point.

LAW
8 Levels/Limit: Intelligence
The character is learned in the structure of most federal and local laws and judicial systems. He is a skillful speaker and is eligible to practice law in court. The character may attempt any of the following tasks, adding his Intelligence Rating and the square of his Skill Level to the base chance. The chances of all these tasks assume that a basically honorable legal system is being dealt with; the GM should apply modifiers if the system is corrupt.

TBribe authority to ignore trespassing, illegal possessions or other criminal act: 20% plus 1 for every 100 Mills offered, minus 10 x the Law Level of the world. In addition, the GM should seriously reduce the chance by anywhere from 0 to 50, based on the loyalty of the individual being bribed toward his employer or government. For example, 50 would be subtracted for an elite federal soldier with no loyalty guard might cause no subtraction at all.

TConvince authority that a criminal act is not illegal or that the party is exempt: 10% minus the authority’s Intelligence Rating and minus 10 x the Law Level of the world.

TSuccessfully defend innocent party in court: 35% plus 10 x the Law Level of the world.

TSuccessfully defend guilty party in court: 35% minus 10 x the Law Level of the world.

Any dice result equal to or less than the modified chance indicates success. Any dice result over the modified chance indicates failure. If a bribery attempt fails by more than 10 percentage points, the authority will either accept the bribe and report the party anyway, or will report the party’s bribe attempt as well as their original transgression, at the discretion of the GM.

A character who rolls a 0, 1, or 2 on either die when attempting a law task receives an Experience Point. An unskilled character may not defend a party in court.

LINGUISTICS
8 Levels/Limit: Intelligence
The character is fluent in other languages other than Universal. He may write in a number of additional languages equal to his Skill Level. A character that receives the linguistics skill during character generation should choose any languages from among those listed in 1.0 and note them on the back of his Character Record. Exception: A language written in a non-roman alphabet may not be chosen until Skill Level 3 is reached. All characters are considered fluent in Universal.

When the party must speak with an NPC in an unknown language, a skilled character may attempt to comprehend the NPC and make himself understood. A translator (see 23.3) is not required to use the linguistics skill, but the device does increase the user’s Skill Level (even if he is unskilled). A translator does not increase the number of languages a character may speak.

The chance of successful communication equals the sum of the NPC’s Intelligence Rating, the character’s Intelligence Rating, (if skilled) and the square of the character’s Skill Level. The GM rolls percentile dice and compares the result to the chance:

Result under chance by more than 20: All information that the NPC and characters wish to exchange is understood.

Result equal to or under chance by 20 or less: Simple direction, numerical and identification information is exchanged.

Result over chance by 20 or less: Names and small numbers may be exchanged only.

Result over chance by more than 20: Absolutely nothing is understood by either party or, if the GM wishes, one side totally misunderstands the information or intent of the other.

The linguistics skill may also be used to attempt communication with certain creatures, once the desire to communicate has been established. See 28.6, Procedure CC.

A character who rolls a 0 or 1 on either die when attempting to communicate in an unknown language receives an Experience Point. Each time a character attains a new level in linguistics he may learn one more language. The new language should be one he attempted to use since his last Skill Level
increase. A character never receives an Experience Point for a language he already understands.

RECRUITING
6 Levels/Limit: Empathy
The character is skilled in the administrative and personnel side of business. When the party seeks NPC’s to aid in any venture they are undertaking, the character may attempt to hire individuals with good qualifications. The character declares how many NPC’s he wishes to hire and the pay he is offering. Two hours must be spent recruiting for each NPC declared, with a minimum time of 6 hours. The character’s Empathy Rating and the square of his Skill Level are added to the base chance.

T> Hire NPC’s in a starport or urban area: 50%
T> Hire NPC’s in a suburban area or town: 35%

The GM may modify the base chance, depending on the pay offered, skills requested, and the nature of the job, and the means of seeking new employees (working through an employment agency would be helpful). A decent weekly salary for an individual is 100 Mils x the Civil Level of the equipment he will be dealing with. If the job is dangerous, the pay should be increased by 500 Mils to 1 Tran per week. An average individual for hire possesses a Mental Power of 1 and an Aggression of 6. His other characteristics are average. He has a skill level of 3 in his home environ, of 1 in his home gravity, and has eight Skill Points distributed among all other skills by the GM.

If the dice result is equal to or less than the modified chance, the declared number of NPC’s are found. The attributes of the NPC’s may be improved by the GM as follows: For every percentage point below the modified chance, the result indicates, each NPC is improved by one Skill Point of one Characteristic Point. The GM should apply these increases to characteristics and skills that would be helpful in the upcoming job. If the dice result is greater than the modified chance, fewer NPC’s than requested are found and/or their attributes are reduced, at the discretion of the GM.

A character who rolls a 0, 1, 2 or 3 on either die when attempting to recruit receives an Experience Point. Only one recruitment attempt is allowed in a single area for a given purpose.

STREETWISE
6 Levels/Limit: Empathy
The character is up on the slang and friendly expressions used among the common folk throughout the federation. He will be most effective when dealing with those from the skid row class or a lower social standing. The streetwise skill is used for the communications task (see diplomacy skill description).

TEACHING
6 Levels/Limit: Empathy
The character has experience teaching and/or tutoring and is able to pass knowledge he has acquired onto others. He may attempt to aid another character (hereafter called the student) increase his expertise in any skill that the teacher possesses at a higher level than the student. One week of both characters’ time is required to teach a skill. This time may not be reduced but may be increased as explained below.

When the teacher and student have declared the particular skill they wish to study together, the chance of successful teaching is calculated: To the base chance of 30% is added the student’s Intelligence Rating, the teacher’s Empathy Rating and the square of the teacher’s Teaching Skill Level. The teacher rolls percentile dice. The student receives 1 Experience Point in the studied skill for every 10 percentage points (or fraction thereof) below the modified chance the dice result indicates (for example, if the modified chance were 95% and the teacher rolled a 31, the student would immediately gain 3 EP’s for the declared skill). However, a student may never increase a Skill Level by more than 1 in a single “study session” (any excess EP’s are lost). If the dice result is no more than 10 above the modified chance, the student gains 1 EP and the teaching time is increased by 10% for each percentage point over the chance the result indicates. A result that is more than 10 above the modified chance indicates failure; one week is expended and the student gains no EP’s.

No more than one student may be taught at a time, and any equipment necessary to use the skill being taught must be available (a weapon, vehicle tech kit). A teacher may attempt to teach a specific student a specific skill once only. An unskilled character may attempt to teach (using the base chance of 30% only); however, the student may receive no more than 1 EP from the study session. A psionic skill may be taught only if both the teacher and the student possess a Mental Power Rating of 4 or higher and the student has or is eligible to acquire the skill. A character with teaching skill may charge any fee he can get for his teaching services. Conversely, the GM may have an NPC offer to teach a character a skill as a favor or for pay.

A character who rolls 0, 1, or 2 when attempting to teach receives an Experience Point.

TRADING
6 Levels/Limit: Empathy
The character is a skilled bargainer. He can get the most out of a transaction through his understanding of commerce and his ability to negotiate. When the GM is using the Actual Price Table (18.0) to determine the price of an item or service that a character is attempting to purchase or sell, the character may attempt to alter the price in his favor by bargaining. Any purchases from a federal establishment may not be bargained; such prices are set.

The base chance of successful bargaining is 20%. To this is added the character’s Empathy Rating and the square of his Skill Level. The character rolls percentile dice. If the dice result is greater than the modified chance, the attempt fails; 10 is added to the GM’s Actual Price roll. If the dice result is less than the modified chance, the difference is subtracted from the GM’s Actual Price roll.

One character should check for bargaining each time such a situation arises. If the character is unskilled, nothing is added to his base chance.

A character who rolls a 0 or 1 on either die when bargaining receives an EP.

[15.0] Environmental Skills

AGRICULTURE
8 Levels/Limit: None
The character is skilled at farming tillable soil and in the science of hydroponics (growing without soil). Breakthroughs in fertilizers and genetic research also enable the growth of crops to be greatly accelerated. When working with a hydroponic farm, 2 is subtracted from the character’s skill level (to a minimum of 1). A skilled character may always grow any plant (as long as he has the proper shoots or seeds) in an environment with arable land or in an established hydroponic garden. If the character wishes to grow a plant in a more exotic location or wishes to accelerate the growth of a crop, the GM should assign a base chance to the declared task. The character’s Intelligence Rating and the square of his Skill Level are added to the base chance. As a guideline, the simplest of agriculture tasks would have a base chance of 95% while an attempt to grow a fruit tree in an arctic environment with a poisonous atmosphere would have a base chance of 5%.

A character who rolls a 0, 1, or 2 on either die when attempting an agriculture task receives an Experience Point.

ASTEROID MINING
6 Levels/Limit: None
As explained in character generation, each character receives positive or negative Skill Levels in all 33 environs shown on the Environ Skill Display. A character’s Skill Level in the environment he is in is used during an encounter for the following: Twice the highest Environ Skill Level among the characters in the party is subtracted from the awareness chance during a creature or NPC encounter (see 28.2).

The character chosen as the party’s leader during an Action Round (see 19.1) adds his Environ Skill Level to his initiative die roll. A character’s Environ Skill Level is added to his chance to perform an ambush task (see the ambush skill, 9.0).

The Experience Point system explained in 8.0 is not used to improve Environ Skill Levels. Instead, the GM “hands out” Environ Skill Level increases. If a character spends one week (give or take a day, at the GM’s discretion) adventuring in a particular environment away from urbanized areas, the GM should reward him with a Skill Level increase of one in that environment. No single environment skill may be increased beyond Level 6.

GRAVITY
6 Levels/Limit: None
As explained in character generation, each character receives positive and negative Skill
Levels in all four gravity types shown on the Gravity Skill Display. A character's Skill Level in the gravity type he is in is added to his Action Route Movement Rate (see 29.2).

A character's Gravity Skill Level also affects his chance of avoiding a gravity-related accident (see 38.0).

Experience Points are not used to improve Gravity Skills Levels. If a character spends eight weeks (give or take a week, at the GM's discretion) adventuring in a particular gravity type, the GM should reward him with a Skill Level increase of 1 in that gravity type. No single gravity skill may be increased beyond Level 6.

MINING
6 Levels/Limit: None

The character is familiar with the business and technique of planetary mineral and metal mining and processing. After a minable resource has been found in an environment (see the geology skill, 12.0), the character may attempt to separate a quantity of it from the ground in raw form. Simple digging tools, a rock blaster or a robot with a miner system are required. The latter two items provide the character with a Skill Level increase. After raw ore has been mined, the character may refine it if he has a robot with a miner system (the Skill Level increase applies). The character's Intelligence Rating and the square of his Skill Level are added to the base chance.

Mine raw ore from an identified source: 25%.

Refine previously mined raw ore: 0%

Each of these tasks requires 12 hours to attempt. This time may be reduced if the attempt is successful (see the task procedure in the chapter introduction). For every percentage point over the modified chance the dice result indicates, the amount of ore mined or processed is reduced by 5% (the time required is not increased). If the dice result is greater than the chance by 20 or more, the attempt fails completely.

The GM determines the quantity of ore that a character may mine in a single attempt as follows: locate the ore on the World Resource Table (25.8) and note the number of environs the Table states that the ore may appear in (if the ore is abundant on the world, double this number). The square of the number represents the number of kilograms of refined ore that may be mined in a single attempt (its actual weight in its raw form will be considerably more). Exception: If the World Resource Table states that the ore exists at a site only, one gram of the ore may be mined in a single attempt.

These tasks are not used when the character is dealing with larger mining facilities. In such a case, his Skill Level would effect the overall labor and the efficiency with which it operates.

A character who rolls a 0, 1 or 2 on either die when attempting to mine or process ores receives an Experience Point.

SURVIVAL
5 Levels/Limit: Intelligence

The character is experienced in "living off the land" and staying alive with a minimum of supplies in the wild. If the character is in a party that has exhausted its supply of food and water, he may attempt to forage for the basic necessities to sustain himself and his comrades. The survival skill will not aid a party that has exhausted its oxygen supply. A survival task takes 6 hours to conduct and is successful, lasts for one full day (including the time spent foraging). The character chooses the most favorable task listed below that applies to the party's situation. He adds his Survival Skill Level to the highest Environment Skill Level in the party and squares the sum (a negative sum is considered 0 for this purpose). The result of this calculation and his Intelligence Rating are added to the base chance.

Survive in environment with edible game and/or plants: 90%.

Survive in environment with arable land: 60%.

Survive in environment with any type of vegetation: 30%.

Survive in environment that contains water: 0%.

Survive on world that contains water: -50%.

Survive on world that contains no water: -150%.

For every 10 (or fraction thereof) below the modified chance the dice result indicates, one character may be kept alive and well. If the dice result is over the modified chance at all, no characters receive the basic necessities of life. The GM determines the effect of lack of food and water, depending on the party's current situation.

A character who rolls a 0, 1 or 2 on either die when using his survival skill receives an Experience Point.

URBAN
6 Levels/Limit: None

A character may receive an Urban Skill Level during character generation. A character's urban skill is used and improved when the character is in a built-up area (an area where the natural features have been entirely replaced with artificial structures and technology) exactly as an environment skill is used and improved.

IV. Robots

Robots may function as either mechanical aids and/or thinking companions for characters. Robots may be used to increase characters' Skill Levels when performing a given task, and sometimes they can replace a character for minor jobs. They will often be able to provide information to the characters which would otherwise be unavailable.

Within society, robots are regarded with little overt concern, yet doubts exist over the degree of independent thought which they should be given. Therefore, some legal restrictions have been placed on the actions and available systems of all robots, to avoid any problems with these thought systems. Robots with artificial intelligence occasionally go "insane"; and the GM may implement an incident of this kind when an accident is generated on the Encounter Table (see 27.0). The specific descriptions of robot thought systems detail the likelihood of breakdowns such as these.

[16.0] Robot Attributes

Robots are controlled by their owners, but others may illegally gain control through use of programming and compu/robot tech skills. When purchased, a robot consists of a chassis, a variable number of systems of the owner's choice, and two controllers: a handset and a hand-held version.

The GM and the players should record each robot's characteristics and systems on an index card for use during play.

Robots may be purchased with a one-week waiting period at the prices listed on a world of a Civ Level equal to or higher than the Civ Level of the robot. Upon placing the order for the robot, a character must declare which systems it wants.

If attempting to purchase a Civ Level 8 robot on a Civ Level 1 world, the price is doubled; on a Civ Level 6 world, the price is multiplied by 10. Below Civ Level 6, Level 8 robots would be very scarce and only available through the black market. These price relationships hold true for purchasing a Civ Level 7 robot on lower Civ Level worlds.

The names given on the Robot Chassis Chart are model names only; the characters should invent individual names for their robots.

A robot chassis with no systems may move and pick up and carry objects. It can see and hear as well as a human, but cannot synthesize the information it receives, and will reveal this information in an absolutely non-analytical manner. It will remember nothing, and will only do something when commanded. It will attempt to do whatever it cannot possibly do without any hesitation.

Each chassis comes complete with whatever systems the owner wishes and which can fit into the unit. The chassis are rated for both Hardware Points and Software Capacity, and the systems are given point and size ratings. A chassis cannot contain more hardware or software than its capacity in either area.

The owner controls a robot through vocal commands or through a controller (see 16.2). These controllers are to every robot as keys are to an automobile; thus, the controller for robot A cannot be used to command robot B. Through these controllers the owner's voiceprint is placed in the robot's central processor, and thereafter the robot will only answer its owner's voice. Civ Level 8 robots may have three other voices encoded in addition to the owner, but will always give the owner's voice priority. This programming of the additional voices is accomplished via the controller itself.

When in audible range, the robot may be commanded verbally without the use of
the controller. The robot will answer and speak to the owner in a normal vocal range. The volume can be altered with the controller.

Robots will never object to being turned off by anyone, which is a simple matter of flipping a switch on the controller. A chassis may operate for 2 weeks before exhausting its energy. The batteries then need replacement or recharging. Any vehicle with a range of 2,000 km or greater may be used to recharge a robot's battery, and any city will have recharging facilities. A normal fee for this service is 100 Mils. Extra batteries may be purchased for 500 Mils per battery.

A chassis has a standard vocabulary, and understands the meaning of all distance and time measurements.

[16.2] A controller is a device used to operate a robot.

This device allows communication with a robot's central processor. Controllers come in three configurations: hand-held (pocket calculator size), headset (fits inside a respirator helmet), and wristmount (twice the size of a normal watch). The hand-held, headset, and wristmount versions all have a TV screen, transceiver, and -- except the headset -- a keypad. The TV screen allows the user to see exactly what the robot sees while the transceiver allows verbal two-way communication. The keypad is used to transmit coded commands to the robot and can at any time be used to operate the robot without verbal communication. The keys are not marked, and only the owner knows which keys issue which commands. This information can be shared with anyone the owner wishes, and this is the only way anyone whose voiceprint is not in the robot's memory may operate it. Anyone with a programming skill may attempt to gain access to a robot through the controller's keypad. If successful, the robot may be given new voiceprints and the keypad new coding.

A controller's range is 10 km, and subject to line-of-sight interference. The hand-
held and headset versions (both Civ Level 7) come with the robot, while the wristmount (Civ Level 8 robots only) cost 5 Trans extra.

[16.3] A robot may be engaged in combat.

A robot with a weapon may fire it at a specified target by receiving an order to do so. It must have a weapon target system and a weapon system to engage in fire combat. The robot may fire as many times in an Action Round as a human could. If a robot is firing a recoil weapon, it does not suffer adverse modifications due to the recoil. A robot will not fire a weapon (unless malfunctioning) without a specific command.

To engage in close combat, the robot must have a close attack system and be ordered to engage. Exception: A robot with a creative thought system may engage in close combat by its own choice.

Movement of robots in an Action Round is detailed in 29.2. A robot may travel a number of kilometers per hour equal to its Agility Rating, and it is affected by terrain as detailed in 26.4. Note: This means a robot with an Agility Rating less than 5 cannot keep up with humans traveling on foot.

[16.4] The Robot Chassis Chart lists the various types of robots and their characteristics.

See page 51.

[17.0] Robot Systems

Robot systems are self-contained units which augment the physical or logical capacities of the robot. Each system details what abilities if confers on the robot, how much it costs (if purchased independent of a robot), and how many Hardware Points or how much Software Space it occupies. Hardware adds to the physical capabilities of a robot; Software contributes logic systems which allow various thought processes. Certain systems are available to Civ Level 8 robots only.

When deciding upon systems for a robot, the total Hardware Points and/or Software Sizes may not exceed the capacity of the robot. Extra systems may be purchased, but may only be interchanged by a skilled individual who has access to and can operate the robot's controller. An individual with the same programming skill can interchange one Software Point in half an hour; an individual with compu/robot tech may interchange one Hardware Point in half an hour.

All systems that include a weapon are bound by the same safety regulations governing ownership of firearms by humans (see 19.0).

The following list of systems includes the abilities the system confers, their cost, and their Hardware Point total and Software Size.

Anti-Bio. Includes all attributes of the bio system, plus stun pistol, needle pistol, and a full supply of drugs and poison for use against creatures. Weapon target system for those weapons only also included. Price: 40 Trans. Hardware: 2. Software: 1.

Aquatic. Allows robot to swim above and beneath water. Robot's speed in an Action Round is twice its Agility in hexes; long distance movement is twice Agility in kilometers per hour. Maximum depth is 50 meters. Price: 35 Trans. Hardware: 2. Software: 0.

Arc Gun. Includes arc gun and weapon target system that may be used only for that weapon. Price: 30 Trans. Hardware: 1. Software: 1.

Close Attack. Allows robot to engage in close combat during an Action Round. The robot's Close Combat Strength is determined by adding together its Strength, Dexterity, and Agility Ratings. If any of these is greater than its Strength, that rating is considered equivalent to its Strength in this sum. A robot which does not have this system may never attack in close combat and, if defending, uses its Strength Rating only. Unless a robot possesses the creative thought system, it will never attack unless commanded to do so. Price: 50 Trans. Hardware: 0. Software: 1.

Compu/Robot Tech. Federation prohibits robots with this system.

Creative Thought. Includes all features of self-activation, information, language, and learning systems. The robot can interact with humans in all manner of conversation and intellectual activity. An always operating logic sub-system allows the robot to make conclusions and connections concerning any data it has in its memory. The robot may make observations the origins of which may elude the characters. The robot always speaks in deference to humans, but does not like being shut down. Movement is greatly improved by this system; if a robot's movement in an Action Round is 0 or less, it may always move one hex (like a character). Note: Robots with this system may suffer mental malfunction due to a common, rare, or unique accident. This system may only be mounted on Civ Level 8 robots. Price: 100 Trans. Hardware: 2. Software: 5.

Driver. Functions in all respects as a character with a vehicle Skill Level of 4; generic vehicle type (military, ground, air, or marine) must be chosen by the purchaser who must also allocate 10 Sub-Skill Points to specific vehicle types. Price: 30 Trans. Hardware: 0. Software: 1.

Force Field. Robot has a force field. Unless robot also has a self-activation system, it must be commanded to turn on the field. Any one character standing immediately next to the robot is also included in the field; both robot and character are subject to normal force field restrictions. Price: 65 Trans. Hardware: 2. Software: 0.

Grenade Launch. Functions in all respects as a character with grenades Skill Level of 5. Requires weapon target system to fire. Includes two dozen grenades of any kind; refills must be provided by owner. Price: 15 Trans. Hardware: 1. Software: 0.

Highlighted Vision. Robot can see twice as far as a human and may see in the dark (at normal range) as if it were light. **Price:** 15 Trans. **Hardware:** 0. **Software:** 1.

Holographer. Equips robot with holographer. If robot also has self-activation system, it does not take up any Software Space. **Price:** 15 Trans. **Hardware:** 1. **Software:** 1.

Information. Enables robot to remember all data which it is exposed to. The robot will not analyze or draw any conclusions from this data; will discuss anything it knows impartially and uncreatively. The robot's memory is an open book; it will build a library of knowledge once activated. **Price:** 30 Trans. **Hardware:** 0. **Software:** 1.

Language. Allows the robot to communicate in additional languages besides Universal. In Civ Level 7 robots, one additional language; in Civ Level 8 robots, four additional languages. If all languages are not chosen and the robot is exposed to a new one, it will rapidly learn it and store it in its memory. **Price:** 30 Trans. **Hardware:** 0. **Software:** 1.

Learning. Enables robot to gain Experience Points for using any of its systems which involve a Skill Level. A robot may never exceed the maximum Skill Level obtainable by a character. This system includes all features of the information system. **Note:** Robots with this system may suffer mental malfunction due to a rare or unique accident. This system may be mounted only on Civ Level 8 robots. **Price:** 75 Trans. **Hardware:** 0. **Software:** 2.

Medical. Aids a character with diagnosis or treatment skills. Adds 3 to his Skill Level and includes attributes of a Civ Level 8 medi-scanner with a full complement of drugs and medicines. **Price:** 50 Trans. **Hardware:** 1. **Software:** 2.

Miner. Aids character with miner skill. Adds 2 to his Skill Level. Includes mining laser (equivalent to Civ Level 6 laser pistol), scoop/digger, rock blaster, and ore refiner. This system is required to refine ore. **Price:** 25 Trans. **Hardware:** 2. **Software:** 0.

Missile Guidance. Functions in all respects as a character with a missile guidance Skill Level of 6. **Price:** 50 Trans. **Hardware:** 0. **Software:** 2.

Pilot. Functions in all respects as a character with a pilot Skill Level of 6. **Price:** 55 Trans. **Hardware:** 0. **Software:** 2.

Recorder. Equips robot with a VTR unit. Enables it to make an audio/visual recording of whatever is in front of it. **Price:** 10 Trans. **Hardware:** 1. **Software:** 0.

Self-Activation. Enables robot to take actions without commands. The robot will use any of its abilities and equipment as the owner wishes without specifically commanding it to. **Note:** Robots with this system may suffer mental malfunction due to a rare or unique accident. This system may be mounted only on Civ Level 8 robots. **Price:** 75 Trans. **Hardware:** 0. **Software:** 2.

Spaceship Tech. Functions in all respects as a character with a spaceship tech Skill Level of 7 with repair capabilities of a Civ Level 8 spaceship kit. **Price:** 110 Trans. **Hardware:** 3. **Software:** 1.

Suit Tech. Functions in all respects as a character with a suit tech Skill Level of 7 with repair capabilities of a Civ Level 7 armor kit. **Price:** 30 Trans. **Hardware:** 1. **Software:** 1.

Valet/Secretary. Enables robot to perform all functions of a gentleman's gentlemen, combined with a live-in maid. **Price:** 30 Trans. **Hardware:** 0. **Software:** 1.

Vehicle Tech. Functions in all respects as a character with a vehicle tech Skill Level of 5 with the repair capabilities of a Civ Level 8 vehicle kit. **Price:** 35 Trans. **Hardware:** 2. **Software:** 1.

Weapon. Functions in all respects as a character with a weapon Skill Level less than the maximum allowed for the weapon with which the robot is equipped. Weapon choices include shriek gun, laser pistol, rifle, submachine gun, machine gun (owner must choose which). Requires weapon target system to fire. A Civ Level 7 robot takes as much time to reload as a human; a Civ Level 8 robot can reload in the same Action Round it fires. The system includes the chosen weapon; a robot may be equipped with more than one weapon system. **Price:** (10 + weapon cost) Trans. **Hardware:** 1. **Software:** 0.

Weapon Target. Required for fire weapon. May target any number of weapons, one at a time. **Price:** 20 Trans. **Hardware:** 0. **Software:** 1.

Weapon Tech. Functions in all respects as a character with a weapon tech Skill Level of 6 with repair capabilities of a Civ Level 8 weapon kit. **Price:** 20 Trans. **Hardware:** 1. **Software:** 1.

---

**V. Equipment**

In order to adventure on the vast and varied worlds of known space, the characters must take advantage of the technology of the federation. Equipment is a loose term encompassing all weapons, protective gear, vehicles, and scientific, technical, and personal equipment the characters may purchase or receive. Most items of equipment and their pertinent specifications are presented on the equipment charts. Additional information about particular items and other items not mentioned on the charts are included in the appropriate Sections.

The hostile environments in which characters will often operate demand the use of costly equipment. If characters do not receive what they need from their professional benefits and do not have the funds to purchase such things as an expedition suit or simple vehicle, the GM should see that they are provided with those items necessary for survival at the least (even if on loan from an employer).

**[18.0] Economic Guidelines**

The basic costs of every piece of equipment are listed on the equipment charts. These prices may vary, depending on many factors.

If the price of an item is 1 Tran or less, the basic price is used when purchasing the item on a world that has the same (or a higher) Civ Level than the item. If the item's Civ Level is one higher than the world of purchase, the price of the item is doubled and the item will be available only in urban areas (concentrated population of 200,000 or more). If the item's Civ Level is two higher than that of the world of purchase, the price is multiplied by 10 and the item will be available only in urban areas, if it is available at all. In such a case, the GM rolls one die; if the result is 4 or less, the item is available in that area. A separate check may be made for each distinct urban area on the world.

If an item costs more than 1 Tran, the **Actual Price Table** (see page 51) is used to determine the price of the item on a given world. The table lists modifiers that are applied to the percentile dice roll. These include a modifier based on whether the item is exported, manufactured, or not manufactured on the world (see World Resources Table and Resource Development, 25.8). Each product falls into one of these three categories on each world. **Example:** The price of a Translator (Resource Development CC) has a -30 modifier if silicon is abundant and iron is limited on the world, no modifier if silicon is limited on the world, and a +30 modifier if there is no silicon on the world. Other modifiers take into account the world into account. A character may use his trading skills to modify the Actual Price Table dice results (see 14.0). The general availability of an item costing more than 1 Tran that is of a higher Civ Level than the world of purchase is subject to the same restrictions as items costing less than a Tran.

An item with a Civ Level of more than two above the Civ Level of a given world is illegal on that world. If the item can be found at all (at the GM's discretion), its cost is multiplied by 10 times the Law Level of that world. A weapon that is classified as military is illegal (see 19.0). A weapon that is classified as restricted is illegal unless the purchaser has received a permit from the authorities (perhaps he was going to an area populated with dangerous creatures, for example). The GM may make an illegal weapon available to the characters, but if he does so, he should multiply its price by the Law Level of the world (and should also apply modifiers based on the Civ Level and the other variables discussed above).

Even though robots and spaceships are not included in this Chapter, their price is affected by all these variables. The GM should always use the Actual Price Table and these modifiers for a character that is buying or selling large amounts of goods or resources (such as a merchant or interstellar trader). A character may use his economics skill to determine the price of items or resources that he wishes to buy or sell on other worlds at a future time (see 14.0). The base price for all types of resources in bulk are listed on the World Resource Table.

The basic costs of living are not discussed in detail. As a guideline, a week's room and board of mediocre quality in a spaceport or city costs 300 Mills (50 Mills per day). A day's travel rations (tang and spacefood
[19.0] Weapons

Personal weapons range from a simple dagger to the arc gun, a duo-laser beam military assault weapon. The federation prohibits the ownership of military weapons by the general public. Other weapons are available with permit, for scientific use and personal protection (if cause can be shown to authorities). Archaic personal weapons may be owned by anyone. The following list of weapons is divided into three categories (open, restricted, and military). All information necessary for the use of each weapon is provided on the Weapon Chart (see page 54). Some of this information includes:

- **Rate of Fire.** The maximum number of shots fired per minute.
- **Hit Strength.** The force which a single shot from the weapon strikes a target.
- **Base Hit Chance.** The percentage chance of a single shot from the weapon hitting a target. This chance varies depending on how many hexes away the target is (range in hexes). A hex equals 5 meters. The Terrain Value of the area is multiplied by the Terrain Multiplier (which varies with the range); this product also affects the Base Hit Chance. See also 29.6.

No cost or availability is given for ammunition used in these weapons. Aside from the time required to reload during Action Rounds (see 29.5), it is assumed that a character with a weapon has plenty of ammunition. If the GM wishes to keep track of ammunition, he should have the players note the expenditure of one clip each time they fire a number of shots equal to the weapon's Fire Rate (cumulative from Action Round to Action Round). The GM is responsible for determining the price, weight, and availability of each type of clip if he is keeping track of ammunition.

OPEN

Musket, short bow, long bow, crossbow, dagger, and sword.

RESTRICTED

**Paint Gun** (Civ Level 6). A rifle-shaped laser weapon using a low intensity laser as an aiming device. Once the target is spotted, the intensity is increased. This version is very bulky due to the aiming mechanism.

**Laser Pistol** (Civ Level 6). A single shot laser weapon. Requires reloading after each shot.

**Stun Pistol** (Civ Level 7&8). A pistol shaped weapon emitting a subsonic pulse temporarily de stunning the target's nervous system, stunning it (see 30.4). Does not work in a vacuum.

**Needle Rifle** (Civ Level 5 & 7). A longarm which fires needles; the needles do no damage, but any substance they contain may (see 30.7).

Also, rifles, smoke grenades, illumination grenades, and gas grenades.

**MILITARY**

**Paint Gun** (Civ Level 8). Same as Civ Level 6 version except with improved rate of fire and much less bulky power source.

**Arc Gun** (Civ Level 8). A rifle shaped twin beam weapon with a sighting mechanism similar to a single lens reflex camera. The energy beams are harmless except at the point of intersection, which is adjusted by a slider on the barrel. The beams are not activated until the trigger is depressed. The gun is effective for fighting inside spaceships due to its exact targeting. Requires a great deal of skill to use.

**Plastic Pistol** (Civ Level 6). Made of a high-density synthetic resin, this weapon is constructed entirely of non-metal parts and will not register on a metal detector if unloaded.

**Needle Pistol** (Civ Level 8). Similar to the needle rifle, but in a pistol configuration.

**Laser Pistol** (Civ Level 8). These power packs will allow three shots.

**Fragmentation Grenade** (Civ Level 4). The hit strength is applied to the target hex and every surrounding hex. Also, pistols, machine guns, submachine guns, and carbines.

[20.0] Protective Equipment

The Protective Attire Chart (see page 54) summarizes the attributes of suits, body armor, and other devices the characters may wear to protect themselves when in a hostile environment and/or when involved in combat. Some of the attributes listed on this chart are:

- **Price.** Certain prices include a waiting period between the time the item is purchased and it is ready for use. The item is being contoured to fit the wearer's body during this time.

**Air Supply.** After the listed time, the oxygen supply must be replenished. This may be done from any vehicle or structure with its own oxygen supply. Oxygen produced by a chemical synthesizer may replenish the supply at a rate of 1 hour's oxygen for every 10 minutes of use.

**Embarkance.** A quantification of how much the suit impedes the wearer's movement; the higher the rating, the slower the wearer may move. An Embarkance Rating may be overcome by the wearer's EVA or Body Armor Skill Level. Certain types of body armor are augmented; the outfit is powered and may increase the strength and mobility of a wearer with body armor skill. The effects of embarkance and augmentation are detailed in 26.4, 26.5, and 29.2.

**Projectile and Beam Armor Defense Ratings.** Used in combat to defend against enemy fire, as explained in 30.6. The Projectile Defense Rating may also protect the wearer from blasts and accidental impact.

**Hit Strength.** Used to attack or defend in close combat (see 29.9).

The following material features additional information about the items on the chart and other items not listed.

**Armor Vest.** Protects the chest, trunk, and groin like body armor. When the wearer is hit, check Hit Table die roll. If the unmodified roll is 4, 5, 6, or 7, the Armor Defense Ratings of the vest are used.

**Battle Sleeve.** Protects and increases the strength of the wearer's hand, arm, and shoulder. Its Hit Strength is used in close combat. When the wearer is hit by fire, check the Hit Table die roll. If the unmodified toll is 1 or 2, the Armor Defense Ratings of the sleeve are used.

**Body Armor.** Suit constructed of high-impact metals and ceramics. Includes all attributes of an expedition suit (see following). May withstand most corrosive atmospheres. Various production methods make some body armor more effective against projectiles (impact armor) and others more effective against beams (reflective armor). Much practice is required to use augmented armor, which electronically accentuates all movement by the wearer.

**Expedition Suit.** Provides complete protection from a vacuum, water, or contaminated or poison atmosphere. Contains two-way headset in radio in helmet. Audio system allows wearer to hear and speak normally.

**Filter Mask.** Filter covering the mouth and nose, providing complete protection from contaminated atmospheres. Must be replaced after 10 days' use. Civ Level: 6. Weight: Negligible. Price: 40 Mils.

**Force Field.** Wire rig worn about the shoulders. When activated, an energy field surrounds the wearer providing excellent protection from projectiles and any other solid objects. Does not stop light. Wearer may not attack or be attacked in close combat. Energy pack allows one hour of continuous protection. Pack costs 1 Tran to replace.

**Respirator.** Filter mask connected to oxygen tank (worn on the back). Allows character to function underwater, in a contaminated atmosphere, and in some poisonous atmospheres. Civ Level: 6. Weight: 3 kg. Price: 1 Tran. Air Supply: 12 hours.

**Respirator Helmet.** Covers the head, shoulders, and upper chest. Includes all attributes of a respirator (see preceding). Contains two-way headset radio. Audio system allows wearer to hear and speak. When wearer is hit by fire, check Hit Table die roll. If the unmodified roll is an 8, 9, or 10, the helmet's Armor Defense Ratings are used.

[21.0] Vehicles

In addition to travelling between worlds and stars, characters will need to traverse the surface of worlds. On land, above or beneath the surface, vehicles are needed for transportation. The vehicles listed on the charts and those detailed in this Section do not represent all the vehicles of the universe. They are intended as a guide from which the GM should be free to invent or devise.

The vehicle charts detail important data for each individual vehicle type, including the following information:

- **Range in 100 km.** Maximum range vehicle can travel before refueling. Refueling costs: (Range in 100 km) x Mils.
- **Performance Modifier.** A quantification of the vehicle's responsiveness and structural integrity. Applied to the chance to avoid an accident, in accordance with 11.2.
• Repair Time in Days (or Hours). Base time required to repair the vehicle (see 13.1).

Every vehicle Civ Level 6 or higher which carries more than one person comes equipped with a planetary short wave radio. All vehicles with an air lock come with an oxygen supply equal to twice the vehicle's Civ Level in days. An airlock holds one or two people at a time (GM's discretion). Civ Level 8 vehicles may, at the GM's discretion, come equipped with an oxygen synthesizer which will recycle breathable air for a period of three months, at which time the system must be cleaned and recharged at a cost of 1 Tran.

[21.1] Land vehicles are used to traverse the solid surface of a world.

The Land Vehicle Chart (see page 55) lists various land vehicle types. Listed for each is a Terrain Value Limit and a Terrain Value Modifier. The Terrain Value Limit indicates the maximum Terrain Value the vehicle may traverse (see Terrain Effects Chart). The Terrain Value Modifier affects the actual speed with which a vehicle may travel through a terrain. To calculate this speed, add the Terrain Value Modifier to the Terrain Value of the environ. If the sum is less than 1, treat it as 1. Divide the listed speed in km/hour or hexes per Action Round by the sum (round down). This is the maximum number of km or hexes the vehicle may move in that terrain. Treat a road as having a Terrain Value of 1; a trail as having a Terrain Value of 2 (when in a higher Terrain Value). The car, horse cart, and tractor all are similar to vehicles the players and GM are familiar with. The others are detailed below:

Scout Car. A small non-enclosed vehicle using caterpillar treads for movement; petroleum powered. No air lock.

Crawler. An enclosed ATV using either balloon tires or telescoping legs for movement; nuclear powered. No air lock.

Rover. A non-enclosed ATV with balloon tires and dynamic suspension for ease of movement; nuclear powered. No air lock.

Mobile Lab. A three-sectioned ATV, withnombre in each section. Each section is independent of the others and connected (like train cars) by accordion bags. The first section is for the driver and crew; the second is the lab; the third is for holding creatures and can adapt its atmosphere to match those suitable to its occupants. The whole lab is enclosed and air tight; nuclear powered. An air lock connects sections 2 and 3; another connects section 1 with the outside.

Amphibian. Truly an all-terrain vehicle, this ATV can travel on land, on the surface of water, or submerge. Uses semi-balloon tires for land movement and is propeller-driven in water. Enclosed and air-tight; has an air lock. Applicable driver’s skill depends on mode of operation. Maximum depth in water of 75 meters.

Van Rig. A large truck with sleeping quarters for the driving team; designed for continuous travel. Enclosed and air-tight; nuclear powered. Has an air lock.

AutoSled. Uses skis and treads to propel it through snow and over ice; petroleum powered and not enclosed.

Half-Track. Uses treads in rear and wheels in front; not enclosed. Petroleum powered.

Armored ATV. An armored ATV using treads for movement; armed with a machine gun. Enclosed, air tight, and petroleum powered. Has an air lock.

Tank. Similar to tanks the players know except uses sophisticated laser aiming to achieve accurate fire of either anti-personnel or armor-piercing shells. Petroleum powered, not air tight.

Self-Propelled Artillery. An artillery gun on treads; not enclosed; petroleum powered.

[21.2] Marine vehicles are used to travel either on or under the surface of water.

A sailing ship and all other types of wind or man powered watercraft are familiar to the players and the GM, and are among those summarized on the Marine Vehicle Chart (see page 54). Others include:

Mini Submarine. A propeller driven submersible with a maximum depth of 100 meters. Petroleum powered; has an air lock.

Flexicraft. Traverses the surface with an eel-like motion; uses no propellers. Enclosed with an air lock; nuclear powered.

Reef Walker. Much as its name implies, this submersible has a set of telescoping legs for travel along the bottom of the ocean. Nuclear powered, it has a maximum depth of two kilometers.

Water Scooter. A propeller driven one-seater; not enclosed. Runs on electric batteries similar to a robot's.

Amphibian. See land vehicles (21.1) for details on this vehicle.

[21.3] Air vehicles are used to fly above the surface of a world.

All propeller driven and jet planes are familiar to the players and the GM, and are among those summarized on the Air Vehicle Chart (see page 55). Others include:

Dragonfly. A small man-powered craft with wings which are driven by the arms and legs; very light and fragile. Weighs 20 kg.

Ornithopter. A large flying vessel using the actual beating of its wings for lift. Enclosed, air tight, and with an air lock, the example given is the largest and most powerful of its type. Nuclear powered.

Air Car. The common man’s transportation; powered by an electrical turbine which uses the atmosphere as a propellant. Powered by batteries similar to a robot’s.

Levitator. An anti-gravity craft using magnetic monopoles to repel the gravity field; maximum altitude is one kilometer. Enclosed with an air lock.

Float. Similar to a levitator with a maximum altitude of 500 meters.

Skimmer. Similar to levitator and float except it has no air lock and cannot rise above 5 meters in altitude.

Sailboat. Similar to the shuttle of the 1980’s except it needs no rocket boosters (lifts off like an airplane) and is nuclear powered.

[22.0] Personal Equipment

Representative personal scientific equipment, tech kits, communications gear, and miscellaneous equipment is summarized on the Personal Equipment Chart (see page 56).

[22.1] Scientific equipment enables a character to undertake specific scientific tasks.

Three kinds of equipment are available: labs, which require a piece of the item to be analyzed; scanners, which allow remote analysis up to a certain distance; and synthesizers, which require input of raw material to produce usable substances.

Geo Lab. Allows geology analysis tasks only (see 12.0).

Geo Scanner. Allows any geology task; has a range of 50 times its Civ Level in kilometers. Will give direction of item being scanned if task is successful; gives distance only if item is within 50 km.

Medi Scanner. Allows diagnosis and treatment tasks. Must touch the being to be activated.

Bio Scanner. See biology skill, 12.0. Must be within 5 meters of the entity being scanned in order to operate.

Neuro Scanner. Can detect the electromagnetic waves emitted by any living thing within 300 meters. Will reveal the number and type of every living thing within range and also their general direction. If the population is very dense, this scanner is virtually useless. No skill required for use. See 28.2.

Chem Lab. Allows chemistry analyze sample tasks (see 12.0).

Chem Synthesizer. Allows chemistry synthesis tasks. Amount synthesized will be small (one kilo for simple compounds, one gram for complex compounds). Synthesis of a gas (oxygen, for example) will yield abundant amounts.

Energy Scanner. Used for all physics tasks except energy tapping. Range is 100 meters.

[22.2] Tech kits enable a character to attempt to repair various types of damage to specific equipment.

The kits include replacement parts, troubleshooting equipment, tools, and other items of repair. Unless otherwise stated, a kit may be used to repair any type of damage to the appropriate item (even if the item is partially destroyed).

Basic Repair Kit. Allows repair of superficial damage to any item smaller than a large vehicle, and of light damage to any item weighing less than 15 kg.

Suit Kit. Allows repair of environment suits and respirators. Also allows repair of punctures to body armor.

Armor Kit. Allows repair of environment suits, body armor, and all other items listed
on the Protective Attire Chart, except the force field. May repair projectile and beam armor on body armor, vehicles, and armored structures. The Civ Level 7 kit does not allow repair of a partially destroyed item.

**Weapon Kit.** Allows repair of all weapons except those mounted on a spacecraft. The Civ Level 6 kit does not allow repair of a partially destroyed item.

**Electro Kit.** Allows repair of all types of small electronic equipment (scanners, labs, etc.). Partially destroyed equipment weighing more than 15 kg may be repaired only with the Civ Level 8 version of the kit.

**Robot Kit.** Allows repair of all types of damage to all robots.

**Vehicle Kit.** Allows repair to all types of vehicles. Does not repair any damage done to the armor of these vehicles. The Civ Level 6 version of this kit will not repair a partially destroyed vehicle.

**Spaceship Kit.** Allows repair to all facets of spaceships, one compartment at a time. No spaceship kit will repair anything that is partially destroyed.

**Communications gear allows characters to converse over distances or translate speech.**

Any communications device relying on the transmissions of radio waves will be subject to the normal vagaries of that medium. The GM should feel free to allow occurrences such as solar flares, magnetic deviations, and signal jamming to interfere with the characters' transmission. Amongst other communication devices, there are:

- **Headset Radio.** Installed inside a respirator helmet, this has a range of 10 km.
- **Planetary Shortwave.** Allows communication anywhere on any world and also into orbit, if the two radios are on the same side of the world.
- **Interplanetary Radio Dish.** Allows communication anywhere within a star system.
- **Interstellar COMMlink.** Psionic device available to the psionic allowing instantaneous communication between star systems that contain a psionic institute (see 10.5). Puts character in contact with psion who will transmit short message anywhere in settled space. In addition to purchase cost, there is a charge for each use of 50 Mils plus 5 Mils per light year message is sent. **Exception:** No charge for thinker or psionic navigator.

**Translator.** Aids in communication with beings who speak a foreign language. The Civ Level 7 version simply translates what the other being is saying; the Civ Level 8 version may allow the character to speak in that language also. In this version, it will yield a phonetic version of the phrases to be uttered.

**Miscellaneous equipment includes recording equipment, cages, vision equipment, and any other devices the characters may use.**

- **Supersolid Camera.** Produces a holographic still image; all developing is done within the camera. Price of the film (20 images) is 20 Mils.
- **Holographer.** Produces a holographic still or moving picture; developing is done in the camera. Price of the film (one hour of images) is 50 Mils.
- **Force Cage.** A cage used to hold creatures utilizing a force field instead of bars. One force cage may hold a large creature. Force cages may be joined together to hold larger entities.
- **Night Glasses.** Allow vision in the dark through infrared emissions. The item resembles binoculars.
- **Rocket Flare.** A flare which, when shot from any pistol, rises to a height of 1 km and explodes, sustaining the light for ½ hour, floating on a small set of rockets.
- **Super Cage.** A non-metallic, entirely sealed container. Buffed walls protect fragile life-forms.
- **Anaeorobic Torch.** Hand-held, electrical/chemical light source. Provides daylight in 20 meter radius for 100 hours. Works in any atmosphere or a vacuum.

**Computer Time.** Available to characters in any urban environment of Civ Level 5 or above. **Library data time** will be found at a Data Center, and most unclassified information concerning the world, star system, and federation will be easily found. It is very rare that information of a classified nature will be obtainable (even through use of programming skill) at a terminal of this type. One hour of time costs 10 times the Civ Level of the world in Mils. The sophistication of the information obtained increases with the Civ Level of the computer used.

**Programming time** is obtained differently. This includes all official commercial use of computers by the characters. All small business and record keeping procedures the characters may wish to carry out can be accomplished on a small portable business computer. Often, however, the GM will decide the task which the characters need to accomplish will require a larger machine. One hour of time is available through large corporations at a cost of 20 times the Civ Level of the world in Mils.

**Audio Sealed Case.** An attachable case with the fingerprint of the owner encoded within the locking mechanism. Also has projectile Armor Rating of 2. Price: 15 Trans. Weight: 10 kg. Civ Level: 7.

**Plastic Explosives.** Produces explosions of varying intensities; the GM must adjudicate their effects. Price: 1 Trans. Weight: 1 kg. Civ Level: 5.

This list by no means exhausts all the equipment the characters will wish to purchase. The GM must create these items within the framework of the guidelines shown in this Section; he should feel free to be as creative as he desires. This particular area will personalize a GM's campaign more than any other.

---

**VI. World Generation**

Once the GM has introduced the players to the game with the enclosed adventure, he must create other star systems. The world generation system is designed to provide the GM with only as much information about a world as he wants, and the process is accordingly punctuated with convenient stopping places.

If, while creating a world, the GM decides to finish the details himself without rolling dice, he is encouraged to do so. This chapter is intended as a guide for the creation of a world; the GM need not let the dice determine his universe. Logic and creativity, in proportions, should be injected into this system.

Generating each star system may yield planets, with each planet's size, type, and position determined. Moons may be similarly generated. At this point, the GM will have a graphic layout of the whole system and enough information to give the players if they are examining the system from above or below the ecliptic. It is up to the GM to name the stars and worlds. The names of the stars listed on the Stellar Display are sometimes very dry and technical; the GM should feel free to invent interesting names.

Generating the geographic features of each world yields the atmosphere, mean temperature, hydrographic percentage, distribution of land and water, and the specific gravity of each environment. At this point, the GM will have an actual map of each world to show the players if they are in orbit around the world.

Generating the population and technology of each world yields the total population, type of settlement, Law Level, Spaceport Class, Civ Level, distribution and development of resources, and the distribution of the population. At this point the GM will have enough information to refere any adventure involving the world.

**Glossary**

The following terms are used throughout this chapter:

- **Binary or Trinary Star.** Two or three stars revolving around a common center of gravity; may limit the number of possible planets.
- **Biosphere.** The most habitable zone (for humans) of a star system; affects the type of planet or moon within it.
- **Civilization (Civ) Level.** A number from 1 to 8 measuring a world's economic contribution to the federation.
- **Environment.** One of a variable number of areas on a world's surface. Each environment is a
square 4,000 km to a side. An environ may be drawn at a scale of 100 km per hex on an Environ Hex Map.

Hostile Zone. The most inhospitable zone (for humans) of a star system; affects the type of planet or moon within it.

Law Level. A number from 1 to 5 measuring the quality and degree of law enforcement on a world.

Moon. A body which orbits a planet; also referred to as a world.

Neutral Zone. The area of a star system not in the biosphere or hostile zone; affects the type of planets or moons within it.

Planet. A body orbiting a star; also referred to as a world.

Resource. A natural feature of value found on a world.

Settlement Status. A term summarizing the type and extent of human settlement on a world.

Site. A small location within an environ of special interest; natural sites are not usually noticeable without extensive exploration.

Spaceport Class. A number from 0 to 5 measuring the quality of facilities available at a spaceport.

Spectral Class. A standard astronomical term quantifying a star’s luminosity. Used in Universe to determine a star’s likelihood of having planets.

Star System. A star with its orbital bodies, including planets, moons, asteroids, and comets. Graphically represented in Universe on a Star System Log.

World. Any planet, moon, asteroid belt, or other heavenly body on which an adventure may take place; graphically represented on a World Log.

[23.0] Star Systems

The GM is responsible for choosing a star to generate. The Interstellar Display shows every known star within 30 Light Years of Sol, each star’s Spectral Class, and whether it is able to support planets. Some stars form binary or trinary systems; their peculiarities are detailed in 23.2. The Star System Log is used to record the information concerning the star and its planets. To generate a complete star system, the GM conducts the following steps:

1. Choose a star from the Interstellar Display. Note the star’s coordinates, its distance from Sol, and its Spectral Class on the Star System Log.
2. Determine the number and positions of the planets in the system, and record them on the Log.
3. Determine the size and type of each planet in the system.
4. Determine the number of moons for each planet and record the results on the Log. The size and type of each moon are determined, and that information is also recorded.
5. Note the gravity of each world.

[23.1] The GM chooses a star from the Interstellar Display.

Each star listing includes its cartesian coordinates (X, Y, Z), its name, Spectral Class, and whether or not it can sustain planets. When choosing a star system to generate, the GM should keep in mind that the farther a star is from Sol, the less its chance of having a highly developed civilization and quality interstellar trade routes. Also, the farther away from Sol the greater the chance of undiscovered resources and life forms. The Spectral Class affects the number of planets and the habitability of each planet. The GM would do well to spend time examining all the charts and tables detailed in this Chapter before picking a star.

[23.2] The binary and trinary star systems contain abnormalities.

These systems have exceptions to the normal distribution of planets. The anomalies are due to a number of factors including the stars’ Spectral Classes and the distance between the stars. The types of restrictions limit the planet positions that can be rolled (for example, 1-7 indicates that the first seven positions can be rolled for). Star systems restricted in this manner are listed in the Binary/Trinary Star System Summary (see page 58).

[23.3] The GM should familiarize himself with the use of the Star System Log.

Space is given on this log to record the star’s Spectral Class, name, and distance from Sol. Also listed are the biospheres, neutral zones, and hostile zones for all five Spectral Classes. Each planetary position (12 in all) gives the Planet Size Modifier and the distance from the star in Astronomical Units (AU’s).

The GM records the information concerning the star on the Log. As each planet is generated, he notes the name, size, type, and number of moons for the planet. Below these listings is additional space to note detailed information about the worlds (both planets and moons).

The log is also used to record general information concerning the system itself, such as interworld and interstellar trade routes, government, and a point count of federal intervention. This information is derived from 25.0, 32.0, and 33.0.

[23.4] The GM determines the number of planets in the system.

Refer to the Planet Creation Table (see page 57) and roll two dice for each possible planet position shown on the Star System Log. If the result matches the range listed, a planet exists at the position. If a planet does not exist, put an X through the circle at the position. The circles of all the existing planets are left blank for the time being. A total of 12 dice rolls are made (unless using a restricted binary or trinary system).

If a position has no planet, this does not mean there is no world of any kind there; but that there is no world of any interest there. The GM is free to place dead worlds (gas giants, volcanic worlds, etc.) wherever he wishes in order to fill out a star system.

[23.5] The GM determines the size and type of each planet.

For each existing planet, refer to the Planet Size and Type Table (see page 57). Roll one die twice to determine the planet’s size, habitability, and resource category. One or both die results may be modified, as listed on the table and on the Star System Log. For each Spectral Class listed in the upper left-hand corner of the log, there is a line reading across the planet listing indicating which positions for that Spectral Class are within the biosphere, neutral zone, or hostile zone. The biosphere gives a +2 modifier, and the neutral zone a +2, both to the second die only. The hostile zone indicates the second die is not rolled; the roll is treated as a 10 and that row is used to locate the result. Record all attributes derived from the table on the log. The GM should invent a name for each planet and record it on the log.

The abbreviated attributes are defined as follows:

E: Earth-like; similar to Earth in most natural features.
T: Tolerable; can be inhabited with a certain amount of technological aid.
H: Hostile; habitation is very difficult and very expensive.
A: Asteroid belt; possibly a broken up planet such as exists in the Sol system. Treated as a size 4 planet for purposes of resource determination.
r: Resource rich; abundant resources in easily accessible locations.
p: Resource poor; resources are either scarce or very inaccessible.
1 through 9: Planet size; affects gravity (23.3), number of environments, and determines which World Log is used.

[23.6] The GM determines the number of moons for each planet.

Use the Moon Creation Table (see page 56 for each planet created; size 1 and 2 planets cannot possess moons. Cross reference one die roll with the planet size to find the number of the planet’s moons; record the number on the System Log. Determine each moon’s size and type using the Moon Type Table and Moon Size Table. The concepts used in this procedure are similar to those in 23.5. The GM should realize here the only distinction for game purposes between a planet and a moon is the body around which they orbit. Also, it is possible to generate a size 0 moon, but a size 0 planet cannot be generated.

[23.7] The gravity of each world is determined by the size of the world.

On each World Log, the gravity is listed for that size world. Gravity is expressed in G’s, with Earth’s gravity equalling 1.0G. The gravity types range from none to 2.5; see World Gravity Table, page 57, for summary. On worlds with a “trace” gravity, objects will slowly settle to the surface. However, any object propelled with a velocity equal to or greater than that of a pitched baseball will escape the gravitational field.

[24.0] Geographical Features

The generation of geographical features for a world will yield not only factual information but an actual pictorial representation of the world as it would be seen from orbit. This is accomplished by use of the indicated World Log, which is a graphic layout of the world as viewed from the poles. The information
generated in Section 23.0 and the features determined in this Section are recorded on this log. It is recommended that the GM use colored markers or pencils when drawing the world map. To generate the geographical features, the GM conducts the following steps and records the information generated on the World Log corresponding to the appropriate world size:

1. Determine the world's atmosphere.
2. Determine the world's mean temperature.
3. Determine the hydrograph percentage.
4. Note the number and type of land/water enivrons for the world and distribute them amongst the envirows of the World Log.
5. Draw in the land masses and water bodies on the world map, creating continents, oceans, rivers, islands, etc.
6. Determine the enterf type for each eniron on the log. Record this information or draw out the enterf type using markers or pencils.
7. Determine the day length (optional).

There are, in this booklet, 10 World Logs, which represent various sized worlds. Each World Log is a graphic representation of a world as it is viewed from the poles. The size 0 Log has only one view due to its small size. These views are divided into enivrons, which represent areas on the surface 4,000 km across. Each environ is numbered, and each ring of enivrons represents a different temperature ring on the world. Each ring contains a temperature modifier which is applied to the mean temperature generated for the world to determine the mean temperature of that ring.

Each Log has space to list the world’s name, type, atmosphere, temperature, hydrograph percentage, day length, population, Civ Level, Law Level, Spaceport Class, and resources. The size and gravity of each world is listed at the top.

The map of the world is divided into enivrons. The GM should examine the Log carefully to note which enivrons are adjacent to one another. Special attention should be paid to the borders which form the outer circumference of the north and south views connect with each other.

The GM should create two logs, one containing all the fine detail for himself, and one which is mainly pictorial in nature for the players. Record all the raw data on a piece of scrap paper or an extra copy of the log and make the final copy only after all information has been determined. For each environ, the land/water distribution, environ type, resources, and population must be recorded.

[24.2] The GM determines the atmosphere for the world.

Using the World Temperature Table (page 57), the GM rolls one die and applies modifiers listed on the table. The result is cross referenced with the world type and the temperature is recorded on the World Log. This temperature is the mean for the entire world; the actual temperature varies from one environ ring to another. All temperatures are in Fahrenheit.

Each World Log lists the temperature modifiers for each ring of enivrons on the world. This modifier is added to the mean temperature of the world to determine the average temperature of all enivrons in that ring. For example, a size 4 world has a mean temperature of 50°. Reference to the World Log shows environs 1 and 14 will have a temperature of 25°; 2 through 5 and 15 through 18 will have a temperature of 50°; and 6 through 13 will have a temperature of 75°. The specific temperature of an environ is used with the Environ Type Table when determining the nature of an environ.

When creating a world with an odd axial tilt (for instance, pointing toward the star) or with no rotation, the GM should change the distribution of the temperature modifiers on the World Log and/or widen the range of modifiers. The modifiers are designed for a world with an axis nearly perpendicular to the plane of the star system ecliptic and with axial rotation. The GM should feel free to alter them to fit the individual pattern.

[24.4] The GM determines the hydrograph percentage of the world.

The GM refers to the World Hydrograph Table (page 59). Using the world's size and mean temperature to ascertain which column to look in, the GM rolls one die and records the hydrograph percentage on the World Log. Note that worlds which possess no atmosphere or whose temperature is below 0° or above 125° automatically have no free-standing water.

The GM then refers to the Land and Water Distribution Chart (page 59). Seven types of land-water distribution which might exist in an environ are listed across the top of the chart (see explanation following). Using the line which corresponds to the world size and hydrograph percentage, the GM reads across to find how many enivrons of each type exist on the world. Note the total of all the numbers on a single line equals the number of enivrons on the world. The following seven types are included:

Water. All liquid with no land.
Water with Minor Islands. 90 percent water with scattered small islands.
Water with Major Islands. 75 percent water with islands or land masses possibly connecting to a larger land mass out of environ.
Water with Land. 50 percent water and land masses.
Land with Major Water. 75 percent land with water; such as a coast line or major lake within the land mass.
Land with Minor Water. 90 percent land with small water; a small part of a coastline, a river network, small lakes, etc.
Land. Land with no bodies of water.

These descriptions are intended as guides only; the GM should decide what elements make up the distribution type. See the Adventure Guide for visual examples of these distributions.

The GM should actually draw these enivrons on the log, assigning them to whichever environ seems consistent, logical, or aesthetically pleasing. Many water-only environments could be combined adjacent to form a large ocean. Coastlines from enivron to enivron should be contiguous, and the GM should be constantly aware of which enivrons are actually adjacent although graphically separated on the log. This drawing process should be done roughly in pencil at first, with a final colored version executed when all decisions are finalized.

[24.5] The GM determines the terrain feature and contour of each environ.

Using the Environ Type Chart (page 58), the GM determines the topography of each environ with some land. He locates the column containing the correct land/water distribution and the correct temperature of the environ (remembering that temperatures vary from enivron to enivron, see 24.3). The GM rolls percentile dice and reads down the column until locating the numerical result which most nearly equals the dice result without being less than the roll. The environ type corresponding to the numerical result is the predominant terrain feature and contour of that environ (for example, a roll of 24 on the first column would yield a result of barren/peaks). Repeat this procedure for every environ on the world until all have been determined. The GM should graphically depict in each environ the predominant terrain feature and contour.

After generating each environ's type, the GM should look at the world and feel free to juggle enivrons around to form a cohesive whole. For example, if ice is generated in a non-polar environ and there is no ice at the
UNIVERSE, PAGE 32

When the GM has finished drawing out the world on the log, he will have a picture he may show to his players which will represent the world as they might see it through their viewers.

[24.6] The GM may determine the world’s day length

This procedure is optional as there will be complications caused by having worlds with different day lengths. The GM refers to the World Day Length Table (page 56) and locates the column which matches the world type. He then rolls one die and records the result on the World Log.

If the GM wishes a simpler solution, he may ignore the table and assume all worlds have a 24-hour day. The effects of having days of differing lengths must be judged before such a decision can be reached. Many game systems are designed to measure their time expenditures in terms of hours. Thus, if the world’s hour does not match the character’s hours, two separate tracks must be kept to measure time. Also, the GM must be ready to apply the physical and psychological effects of daylight and night to the character in order to simulate the problems encountered. One possible answer is to measure all time expenditures according to the spaceship’s clock, and let the world’s day vary as it might.

[24.7] The GM may decide to create an Environ Hex Map

When it becomes desirable to enlarge an environ and reproduce it on a hex map, the GM should use the hex map provided with the game. This map is drawn at a scale of 100 km per hex, and on it the GM creates the major land masses and water bodies of the environ as he has indicated on the World Log. The terrain features and contours are added, but in much greater detail than before. The GM may place sites on this map in particular hexes. A site indicates a small location not apparent on the World Log of special interest to the area. Sites the GM might wish to consider include the following:

Rain Forests Roads
Swamps Trails
Beaches Cities
Rivers Mines
Caves Raw mineral deposits
Alien Ruins Lakes
Old Settlements Ponds
Glaciers Cliffs
Meteor Craters Volcanoes
Psionics Institutes Lava Fields
Abymes Towns

When drawing in the details of the environ type on the hex map, not only that type should appear. The GM should refer to the Environ Skill Display on the Character Record and locate the box corresponding to the predominant environ type; the eight adjacent boxes indicate environ types which may also occur in the environ. The GM should cover about two-thirds of the Environ Hex Map with details of the predominant environ type, and the rest may be divided up as he sees fit. He may also place terrain features along the edges of the hex map that match those of neighboring environs on the World Log.

During the character generation process, a home environ skill is determined for every character in a particular environ type. It is to be assumed the character came from an environ in which that type was predominant. The GM may place the character’s home on a world which contains the appropriate environ type and has some form of settlement. Due to the detail with which the character would know this environ, the GM may desire to create an Environ Hex Map of that environ and possibly show it to the player, depending how much information the player desires.

Refer to the Adventure Guide for an example of an Environ Hex Map.

[25.0] Population and Technology

The final details of a world include the elements of population and technology. These items will breathe life into an otherwise colorless world. The GM is encouraged to use the information available in this section as a springboard from which he may fully realize a world’s potential for enjoyable play. Each world will be given general indications of total population, Law Level, Spaceport Class, Civic Level, resources available, locations of those resources, and the effects of those resources on prices and economy. These indications should be utilized to guide the GM in reaching his own final conclusions about the world, its inner workings, and how each settlement and citizen fits into the whole.

The GM conducts the following steps to determine a world’s population and technology:

1. Determine the settlement status, population total, Law Level, Spaceport Class, and Civic Level.
2. Determine the amount and type of resources and their availability on the world.
3. Assign the resources to various environs.
4. Assign the population to sites in the various environs.

[25.1] The GM uses the World Development Table to determine the settlement status, human population, Law Level, Spaceport Class, and Civic Level.

As explained on the table, the GM determines the Development Value based on the world’s size, atmosphere, temperature, and hydrographic percentage. The GM rolls two dice and adds the Development Value to the result. He then locates this sum on the table and records the listed information on the World Log. For example, a resource rich Size 6 world with a thin atmosphere, 75° temperature, hydrograph of 40% that is 20 light years from Sol would have a Development Value of 11. Rolling a 15 on two dice and adding the Development Value of 11 would yield a result of 26, which indicates a minor state, a population of 1 billion, a Law Level of 4, a Spaceport Class of 3, and a Civic Level range of 6-8. The GM should choose an appropriate Civic Level from the range given.

[25.2] World Development Table See page 39.

pole, the GM should swap the environs to make up for the anomalies created by the random dice system.

For each environ type listing, the first feature is the terrain feature, and the second is the contour.

CONTOURS:
Flat. Land is perfectly flat and provides no cover whatsoever.
Hills. Gently rolling hills, very little hindrance to travel; provides some cover at long range.
Mountain. Heights which erosion has smoothed over, some hindrance to travel; cover fairly easy to find except at extremely close range.
Peaks. Jagged mountains with precipices, travel almost impossible; cover is available virtually everywhere.

TERRAIN FEATURES:
Volcanic. Active volcanoes exist throughout the environ; travel is possible with care; cover varies. Note that it is impossible to have volcanoes in a flat environ.
Crater. Land is churned up, travel is difficult; cover is easy to find.
Barren. Totally featureless cracked dry earth; no hindrance to travel; no cover.
Light Vegetation. Sparse grass, lichen, brush; travel unaffected; no cover.
Woods. Widely dispersed trees with undergrowth; travel possible with care; no cover except at long range.
Forest. Dense trees with undergrowth; travel slowed; cover easy to find.
Jungle. Land is choked with foliage and undergrowth; travel except on foot is nearly impossible; cover very easy to find.
Marsh. Bits of vegetation; some trees and undergrowth; travel slowed greatly; some cover available on occasion.

ICE ENVIRON:
Ice/Flat. Treat as barren/flat; travel with care is possible; no cover.

Ice/Hills. Very jagged ice formations; travel almost impossible; cover available at all except close range.

The following environ types are included in the World Logs in the Adventure Guide. Refer to them for possible methods of drawing and coloring them.

On the Planet Titus:

n02 Water with minor islands; woods/hills.
n03 Land/water; light veg/mountains; n05 Water with minor islands; volcanic/hills; n09 Water with major islands; woods/mountains.
n12 Water with major islands; jungle/mountains.
n20 Land/water; barren/mountain.
s01 Water; ice/flat. s03 Water with major islands; marsh/hill. s07 Water with major islands; barren/peaks.

On the Planet Kryo:

n01 Land/water; ice/hill. n03 Land with major water; woods/mountains. s05 Land with major water; light veg/flat. s04 Land with minor water; barren/peaks.

On the Planet Laidley:

n01 Land only; barren/mountain. n05 Land only; crater/flat. s02 Land only; volcanic/mountains.
[25.3] The settlement status and population indicate the general extent of human presence in the world.

The human settlement of a world may be in any of the following states:

- **Uncharted.** Never mapped; unnamed.
- **Unexplored.** Charted, but not traversed.
- **Explored and Abandoned.** Surface has been traversed, but colonization never occurred; GM’s discretion as to why not.
- **Abandoned Pioneer Colony.** Colonization was started, but environment proved too harsh or resources dried up.
- **Active Exploration.** Extant investigation by one or more groups; no governmental structure as yet.

**Pioneer Colony.** Just beginning to establish permanent population and develop resources; federation begins to take notice.

**Subsided Scientific Colony.** Taking in much more raw material than it produces, but interest in the world’s secrets and potentials make the output of knowledge a sufficient payoff. Federal presence exists.

**Subsided Working Colony.** Takes in more than it produces, but shows promise of becoming a profitable commercial venture. Federal presence.

**Self-Sufficient Colony.** Stands on its own economically and accordingly draws the attention of the federation consistently.

**Full Tech Colony.** Commercial hub of a few systems, but has not yet been recognized as a minor state; the federation has not released the control it exercises.

**Minor State.** Commercial hub of a few systems, but federation has relinquished control to the point where the system operates more or less on its own.

**Major State.** Major commercial center of many systems. Federation does little except keep a watchful eye open.

The GM should use the human population figure as a guide. The total number of humans indicated is an approximate figure which the GM should adjust as he sees fit. This population may be divided into any social and political factions which are consistent with the world’s settlement status.

The languages which any population may speak are chosen by the GM. As is mentioned in 1.0, there are a variety of languages, and this choice should be integrated into the overall flavor of the settlement.

It is to be assumed that any official federation representatives will speak Universal, as will most local law enforcement and governmental officials.

[25.4] The degree to which the federal laws are enforced is indicated by the Law Level of the world.

Throughout the universe, the laws have remained the same. The actions which are criminal in one sector are criminal to the same degree in another. What varies is the intensity and quality of enforcement and the way punishment is meted out. The Law Levels and their effects follow:

1. **A cavalier attitude toward justice; the maximum punishment for capital offenses is incarceration for a short time. Very often a fine is the only penalty prescribed. Illegal weapons or weapons of mass destruction confiscated. Very few enforcement agents are present.**

2. **The quality of justice varies with the individual agent. The maximum punishment for capital offenses is heavy fining and incarceration. Illegal weapons or items may result in imprisonment. The number and quality of law enforcement agents rises.**

3. **The judicial system is fair and reasonably accurate. The maximum punishment for capital offenses varies in proportion to the illegal act. Illegal weapons or items will result in imprisonment. Enforcement agents are seen regularly.**

4. **The search for truth and justice supercedes all else. Maximum punishment for capital offenses is death. Illegal weapons or items will result in long term imprisonment. Highly intelligent enforcement agents abound.**

5. **Strict adherence to judicial codes, and practices results in accurate justice meted out swiftly. Maximum punishment for capital offenses is death. Possession of illegal weapons or items may be classified as a capital offense. Enforcement is of the highest quality and training. This level occurs only in Class 4 Spaceports and on Earth.**

The Law Level of a world also influences the distribution of encounters concerning law enforcement agents. The **Enforcer Encounter Table** (page 59) indicates how often an encounter should be with a local law enforcer of some type.

These agents represent local authorities who will be inspecting parcels, luggage, equipment; looking out for trespassers; protecting the rights of citizens; apprehending criminals; and so forth. See 27.0 and 36.0.

[25.5] The Spaceport Class represents the sophistication of facilities available for spaceship maintenance.

Spaceports orbit around the world they serve, acting much in the same fashion as the 20th Century airport. Worlds with a Spaceport Class of ½, however, have no orbital station; rather, they have a landing strip on the surface. Thus, ships which are not streamlined cannot land there. Orbital stations have a shuttle service to the world’s surface; the number of flights per day equals the area of the Spaceport Class.

The Spaceport Class also affects the degree of trade and commerce a world can engage in. The Spaceport Classes are:

0. **No facility whatsoever.**

½. **Landing strip on the world surface. Energy for emergency use only. No security force stationed. Administered by one or two people. No repair service at all.**

1. **Energy is sometimes (50% chance) available. No repair service. A small federal detachment administers (10-15 people).**

2. **Energy is usually (85%) available. May repair superficial or light damage to pods and spaceships; a few used ships and pods may be available. No hyperjump maintenance. A full federal customs and security detachment (50-150 people). If it is the major port in the system, it includes an Astroguard patrol squadron.**

3. **Energy is always available. May repair superficial, light, or heavy damage to spaceships or pods; many standard ship types and pods are available. Hyperjump maintenance available at a Psionic Institute (see 10.5). Reinforced federal customs and border agents. A fleet of 200-500 people. Astrogard patrol squadron present. If the major port in a system, it also includes a federal naval force.**

4. **Energy always available. May repair any type of damage; full ship construction available. Hyperjump maintenance available at a Psionic Institute (see 10.5). It is the center of federal activity; endless customs, security, and administrative forces (500-2,000 people). Astrogard command post and federal naval command (fleet headquarters).**

5. **Earth. Same as Class 4, but also includes the federal headquarters from which all military forces are administered.**

If a spaceport is the highest class in a world, it is also considered the center of the federal administration of the system itself. The population of a world includes the population inhabiting the spaceport.

The Spaceport Class affects the type of trading route existing between the world and other worlds within the system, and between the system and other star systems (see Chapter VIII).

[25.6] The Civ Level of a world indicates the degree of that settlement’s contribution to the federation.

The Civ Level of a world corresponds roughly to centuries in Earth’s past and indicates the level of industrial output of the world. It does not necessarily indicate the sophistication of the population, nor does it reflect the intelligence of the individuals living on the world. A scientific colony, for instance, would have all the latest equipment, but would not be able to survive if the equipment broke down; they need their technology imported.

The Civ Levels and their corresponding Earth Centuries are:

- Level 1 (1600 AD)
- Level 2 (1700)
- Level 3 (1800)
- Level 4 (1900)
- Level 5 (2000)
- Level 6 (2100)
- Level 7 (2200)
- Level 8 (2300)

Any experimental equipment or scientific breakthroughs developing during play would be considered Civ Level 9.

Most individuals found on any world will be aware that high-tech items exist, and such items may be found on those worlds. However, in order to maintain or produce those items, the world must be of an equivalent or higher Civ Level.

[25.7] The GM uses the World Resource Table to determine the world’s resources and then assigns them to various environments.

The GM rolls percentile dice the number of times indicated and applies any modifiers indicated on the Table. Every resource generated should be recorded on the World Log, along with the number of resources in which the resource appears. Note that rolling a resource twice indicates that resource is...
abundant; rolling it once indicates the resource is limited. A resource cannot be rolled more than twice; if one is generated a third time, the dice are re-rolled. Rolling a 1 on a die equals one, enivron listing.

After the correct number of rolls have been conducted for the world, the resources are placed in the various environs of the world or at sites as indicated. All placements are the province of the GM. Once the resources are placed, the lettered results of each resource generated are examined. Every lettered result for the world's C iv Level and all lower C iv Levels apply for that resource on this world. These lettered results are explained on the World Resource Table. If no letters exist for a resource at a given C iv Level, that resource has not been discovered.

Example: One of the 13 rolls on an Earthlike size 5, resource rich world results in chromium existing in one environ. The C iv Level of the world is 5, so the lettered results A, S, R, and D apply to chromium there.

The GM should use the explanation of the lettered results as both factual information and as guidelines concerning the industrial output of the world, in terms of what the world does and does not produce. The explanations will guide the GM in general, and do imply specific incidents in the history of the world. Logic should rule all ambiguous situations, and the world's consistency should be maintained.

For example, using the world generated above, chromiuim lettered results indicate the resource has been discovered in every environ in which it occurs (as per result A); the D result is superceded by the A result; chromium has been refined in every environ in which it occurs (result R). Also, if iron is available, chromium has been used to manufacture Level 5 impact armor (result S). If the world's population has the ability to refine chromium, for example, the GM would have to decide how much (if any) impact armor is being manufactured and whether the armor can be repaired there. Given the nature of a subsidized scientific colony, the answer might be that enough is manufactured for repair only.

The resources and C iv Levels on a world affect what products are available on the world and what prices are asked for those items (see 18.0). The World Resource Table lists prices for all resources in a refined state. For trading purposes, it is wiser to sell products or resources to worlds where their availability is limited or nil. Prices for resources in a raw state are one-half to onequarter their price in a refined state.

25.8] World Resource Table
See page 60.

25.9] The GM assigns portions of the population to various environs on the world.

The GM assigns population to the environs of the world in any way he sees fit, so long as the total population assigned to all the environs equals the population as indicated on the World Development Table. The population of an environ is recorded by placing a number from 0 to 8 in the environ. This number represents a power of 10. Thus, a 5 was recorded in a space, its population would be 100,000. A population level between one exponent and the next may be recorded by writing a multiple before the exponent. Thus, 3/8 would represent 300,000.

While assigning populaition to a world, the following restrictions must be adhered to:

- No more than 100 people may be placed in an environ with no vegetation and no water.
- No more than 1,000 people may be placed in a 100% water environ.
- No more than 100,000 people may be placed in a water with minor land masses environ.
- No more than 10 million people may be placed in a water with major land masses environ.
- No more than 100 million people may be placed in a 100% water environ.
- No more than 1 billion people may be placed in a land with major water environ.
- No more than 10 million people may be placed in a land with minor water environ.
- No more than 10,000 people may be placed in a land with vegetation but no water environ.

The GM should relate the population centers on the world to various resource concentrations of sites of interest in a logical, consistent fashion.

VII. Character Action

Once the players have generated characters and the GM has created at least one star system (or has studied the star system he has), the adventure may be played. The GM must provide some method for the characters to meet and, once gathered, must provide them with a common purpose, enemy, or goal, so that they will be enticed to work together and enter the world created by the GM. A group of characters that are setting out together on an adventure are called a party, and this term is used in these rules in reference to all the players' characters.

An adventure usually consists of a series of encounters, or unusual situations that the GM places the characters in. An encounter provides the party with a source of information, mystery, personal gain, amusement, or straight-forward combat against creatures or non-player characters. Through the imaginative use of encounters, the GM weaves an ever-expanding story, written with the help of the characters' actions in those encounters.

The adventure in Chapter X serves as an example of how an adventure may be created and played.

[26.0] Travel and Record Keeping

As the adventures the GM has created are played, he will have to keep track of the players' actions and positions at all times. This is done to keep an accurate accounting of time passage and to place and resolve encounters.

The GM will need to keep track on his own map of the characters' progress while travelling and record the passage of time in whatever method he finds most convenient. For this purpose, the GM will need to create maps of various scales as needed arises. Often a specific site will have to be mapped out at an extremely small scale to facilitate detailed exploration and interaction.

[26.1] The GM keeps track of the party's location on the World Log, on an Environ Hex Map, or on a map of his own devising showing part of the environ in more detail.

A map or log should always be available for the players to refer to, although it may contain much less information than the GM's version of the map.

When the party is travelling through an environ that is not of particular importance to the adventure, the GM need not provide a hex map; the terrain and contour features are considered the same throughout the environ (except for the shape of any land or liquid masses). Remember, each environ represents a square area 4,000 km to a side.

When the party is travelling through an environ with specific points of interest and varying terrains and contours, the GM provides the players with an Environ Hex Map (created in accordance with 24.8). Each hex on the map represents an area approximately 100 km across. When the party is in a particular hex of the map, the contour and terrain features of that hex are used for all game purposes, instead of the overall features of the environ.

If the GM wishes to provide the players with a map that shows a specific hex or site within a hex in great detail, he may use a blank Environ Hex Map. Often an incident within an adventure will involve a building, campsite, spacestation, cavern, spaceport, or other small-scale location. The map of this location should be drawn at a small enough scale to allow easy transfer to an Action Display should any combat need to be resolved. Buildings and other rectilinear structures may be drawn easier on four squares to the inch graph paper and then transferred to the Action Display.

[26.2] The GM is responsible for keeping time during play.

The passage of game time while the characters are on an adventure is measured in three different scales, depending on the needs of the situation.

Action Rounds. Each Action Round represents about 15 seconds. Often a specific task during a combat situation will take a certain amount of time (a 60-second fuse on a timebomb, for instance), and the GM must keep track of the number of Action Rounds elapsed to measure time and apply these effects.

Hours. Travel overland or in planetary space often requires keeping track of time in hours. This measurement allows calculating movement as well as air supply, repair time, healing time, and other game functions.
Days. Interplanetary travel, supply expenditure, power availability (robotic batteries, for instance) all require keeping track of time in days elapsed.

The GM must inform the players at the beginning of an adventure how much time has elapsed since the resolution of the last one. This does not apply if the preceding adventure was left "frozen" to be picked up later. Letting the players know this allows them to calculate any expenses they might have incurred, any healing which needed to be done, and whether any equipment or robots they might have ordered are ready. It is recommended the GM allow at least one week (of game time) to pass between adventures for these purposes.

[26.3] The party will usually travel on the surface of a world in a vehicle.

The vast distances and hostile environments on most worlds make long distance travel on foot nearly impossible, especially when scientific or military equipment is also carried. If the party is provided with a vehicle by their sponsor for an adventure, they should be given the means to purchase, lease, or borrow one by the GM.

A vehicle travels at a rate of 10 kilometers per hour. The speed of a ground vehicle is affected by the Terrain Value of the terrain it is travelling through (see the Terrain Effects Chart, 21.1). Many vehicles are prohibited from entering heavily vegetated and/or mountainous areas. Often while travelling, the party will come to an area they wish to investigate that their vehicle cannot traverse. The vehicle then becomes a base from which the characters venture, exploring and adventuring, returning for supplies.

[26.4] When the party is travelling by foot, they may traverse 50 kilometers in one day's travel under ideal conditions.

One day's travel is roughly equal to 12 hours of marching, interrupted by a short break, followed by 12 hours of relaxation and rest. If the party wishes to march for a longer period without rest, or wish to march at a faster rate, the GM may allow this. However, he should penalize the party's subsequent actions. For example, an exhausted party would be much more likely to be unaware of a creature or NPC that they might encounter.

The party's daily movement rate is reduced by the Terrain Value of the environment they are travelling through and the gravity of the world. Refer to the Terrain Effects Chart to find the Terrain Value of the environment. Multiply the Terrain Value by the gravity (in Gs) of the world to determine the character's movement rate (rounded to the nearest five kilometers, for ease of play). Thus, a party that is travelling through lightly vegetated mountains on a Size 7 world (1.7 Gs) can move about 17 km in one day.

A character wearing an expedition suit or body armor may be slowed down by its Encumbrance Rating (or he may move faster if in augmented body armor). The suit/armor modifies in 29.2 apply.

Note: For purposes of calculating daily movement rates, a Size 1, 2 world is considered to have a gravity of 0.4G (like that of a Size 3 world). Thus, movement through the same environment on a Size 1, 2, or 3 world is conducted at an identical rate.

[26.5] The number of kilograms of equipment and accoutrements that a character can carry is limited by his Strength Rating.

A character may move unhindered when carrying a number of kilograms equal to or less than his Strength Rating. The movement of such a character is not affected during long treks or during an Action Round.

A character may move, but is hindered, when carrying a number of kilograms equal to or less than 4 x his Strength Rating. The daily movement rate of such a character is divided by two. He may move a maximum of one hex on the Action Display during a single Action Round.

A character may lift, but may not move, with a number of kilograms equal to or less than 10 x his Strength Rating.

All calculations which are divided by the gravity (in G's) of the world the character is on. There is no limit to the number of kilograms a character in a weightless environment or on a size 1 world may carry. However, the GM should consider the bulk of the items the character wishes to carry; would the character actually be able to hold all those things?

The weight of a character's expedition suit or body armor is considered when determining how much he may carry. Exception: If the character's Body Armor or EVA Skill Level is equal to or greater than the Encumbrance Rating of the suit or armor (see Protective Attire Chart), the weight is not considered. If a character wearing augmented body armor possesses a Body Armor Skill Level that is greater than the Encumbrance Rating of the armor, the difference is added to his Strength Rating when determining how much he can carry.

[26.6] The positions of the characters relative to each other and to any creatures, NPC's, or landmarks they encounter are shown on the Action Display.

Any hex grid map may be used as the Action Display; one is not provided with the game (although the spaceship combat maps will suffice if nothing else is available). A sheet with 19mm or 25mm hexes is recommended. The Action Display has a scale of 5 meters per hex.

Any available cardboard counters or miniature figures may be used to represent the characters and other individuals in the adventure. Those pieces representing the characters may be deployed in the hexes of the display at the beginning of the adventure to show their march order; i.e., if the party is on foot, the order in which they will be walking. Each time the party stops to rest or changes their march order, the players alter the relative position of their characters to show their new deployment. When the characters are not afoot, for example, the GM places a piece or pieces on the display to show their position in relation to the characters.

If an encounter results in the conduct of an Action Round, the involved characters, creatures, and NPC's are moved through the hexes of the Action Display by the players and the GM according to 28.0 and 29.0.

The GM may show specific features (such as a crater edge, building, or dense patch of vegetation) on the Action Display by placing additional pieces on it or by drawing on it.

[27.0] Creating Encounters

As the characters travel through the GM's worlds, they will encounter creatures, non-player characters, and other interesting or dangerous situations. The Encounter Table provides the GM with a wide source of encounters he may place the characters in, depending on their current location. Results from the table provide the GM with a type of encounter (spaceship, federal accident, etc.). The specific nature of the encounter is determined in accordance with this Section and/or Chapter IX.

[27.1] The GM uses the Encounter Table three times per game day (once every eight hours).

Exception: When the characters are travelling in a spaceship, the Encounter Table is used once per day (every 24 hours).

The GM secretly rolls percentile dice and uses the result in the column of the Table corresponding to the current location of the characters. The type of encounter corresponding to the dice result is then carried out. Certain encounters are treated as no encounter if the conditions detailed on the table are fulfilled.

Each creature encountered is listed on the table is assigned a Creature Value ranging from 1 to 8, which affects the chance of the encounter occurring in each environment type. If the Creature Value listed with the encounter is equal to or greater than the Creature Value of the environment (see the Terrain Effects Chart, 27.7), a creature is encountered. If the encounter result Creature Value is less than the Creature Value of the environment, no encounter occurs. Thus, the lower the Creature Value of an environment, the more chance of a creature encountering in that environment. The Creature Value of a given environment is increased by 1 if the party is travelling faster than 20 km per hour. The GM may reduce the Creature Value of an environment by assigning the entire world a Danger Level of 1 or 2. The Danger Level of a world is subtracted from the Creature Value in every environment on the world. A world without an assigned Danger Level has a Danger Level of 0.

Example: The party is travelling through a woods/hill environ (Creature Value of 2) in an ATV at a speed of 25 km/hour. The Danger Level of the world is 2; thus, the Creature Value is considered 2 (3 + 1 - 2). If the GM rolls a creature encounter result with a Creature Value of 2 or higher, an encounter will occur.

The Creature Value and Danger Level have no affect on any types of encounters other than creature encounters.

An encounter need not be put into play the moment it is rolled. The GM may wait until an opportunistic or logical situation arises within a few game hours of the roll. In fact, if the GM makes his use of the Encounter Table
too predictable, the players will always be ready for a possible encounter.

[27.2] The Encounter Table is used to determine if the party has an encounter. See page 62.

[27.3] Spaceship encounters may occur in planetary space or in deep space. Planetary space is defined as all space within 300,000 km of any world (this equals 15 DeltaVee hex maps). Deep space is all space outside planetary space. While hyperjumping, a spaceship travels across no space at all, so no encounters will occur while a ship moves in this manner.

When a spaceship encounter occurs, the GM refers to 37.0 and chooses a common, rare, or unique spaceship encounter (as indicated by the Encounter Table) appropriate to the situation. The few examples given in no manner approach the varied number of different ships which ply the space lanes, and the GM will need to create many others.

The GM should rationalize every ship which might fit an encounter; space travel is still not an easy task, and any ship encountered will have some good reason for being there. This reason need not be obvious to the player characters; indeed, many ship captains will be hesitant to let every passer-by in on his business. Most of the time the ships the characters encounter have simple, logical reasons for going where they are going (resource trade, scientific missions, etc.). Occasionally a ship will have business to conduct it wishes to keep secret (whether or not this business is illegal) and the GM might utilize this kind of encounter to rouse the players’ curiosity.

[27.4] Non-player character encounters may occur wherever the player characters find themselves.

When an NPC encounter occurs, the GM refers to 36.0 and chooses a common, rare, or unique NPC (as indicated by the Encounter Table) appropriate to the situation. The encounters cannot possibly cover all the varied types of people the characters would encounter while living in a futuristic society, and the GM should create NPC’s of his own.

The GM does not have to create all NPC’s in the detail of those in 36.0; most people the characters will meet become mere memories soon thereafter and are never again heard from. This type would include most officials, men-on-the-street, etc., and these should be created as the need arises on the spur of the moment and discarded when the encounter is finished. Others, however, will have a lasting effect, be constantly encountered, or used as a character’s companion, and these should be fully fleshed out.

The GM may create these using the character generation procedure or dream them up out of what the characters believe he wishes. NPC’s should be varied in ability and background, and form a group of both enemies and friends the player characters come to know.

NPC’s need not follow the skills, professions, or areas of study player characters must; their development should fill in the characters’ social gaps. Player characters do not. There are and will be many more non-adventuring individuals with mundane skills in society and the NPC’s should reflect this fact.

It is not necessary for the GM to fill out a Character Record for every NPC he fleshes out. This file of NPC’s will grow and of the characters gain better handled by using 5 X 7” index cards and a card file, filling out the NPC’s characteristics, skills, possessions, and any other pertinent information on the card.

[27.5] A federal encounter may occur in a spaceport, urban area, or suburban area.

Federal encounters are the major means by which the GM may trouble characters that have committed crimes or that are carrying illegal weapons. A federal encounter may take the form of a customs agent in a spaceport, a civil inspector and entourage on the surface of an underdeveloped world, or a detachment of rangers or spacetroopers operating in a restricted or dangerous area. If the characters possess any objects that are two or more in sophistication above that of the world, a civil inspector may question them as to the source of the items. If the characters cannot account for their possession, the inspector may confiscate.

The Law Level of a world affects the nature of federal encounters. If the Law Level is 0 or 1, no federal presence exists and the encounter is considered “no encounter.” If the Law Level is 2 or higher, the characters will be badgered with an increasing degree of determination. Illegal weapons that are discovered by a federal agent will always be confiscated if official cause cannot be given for their possession. Fines and/or incarceration will vary depending on the Law Level.

If a character is foolish enough to kill a federal agent (a capital crime), any future federal encounters should be geared toward bringing the character to justice.

Federal encounters do not include planetary authorities, which are considered non-player characters.

[27.6] A creature encounter may occur in any environment with a high concentration of wildlife.

When a creature encounter occurs, the GM consults the Creature Location section of the Terrain Effects Chart (27.7). Cross-referencing the type of encounter (common, rare, or unique) with the environment the party is in will yield a group of numbers. Each number corresponds to one of the creature descriptions in 35.0. The GM chooses one of the listed creatures to use as the encounter. Additional restrictions may be placed on a creature (such as temperature or gravity ranges) by its description, and these should be considered when choosing a creature. The meaning of all the creature descriptions and explanations of any special powers they may possess are detailed in 35.0. Once a creature is chosen, the encounter is played out in accordance with 28.1.

The creature list in 35.0 is by no means intended as a comprehensive bestiary of known space. The manner in which the creatures are described, and the way that their powers may be mixed and matched, makes it easy for the GM to modify the listed creatures and to design his own creatures. When the GM has a good grasp of how the creatures work in play, he may create creatures in the same format. The general explanation of the creature descriptions should be used as a guideline; it details the meaning of each part of the creature description and how each is used in play.

[27.7] The Terrain Effects Chart summarizes the effect that each environ type has on movement, combat, and creature encounters. See page 62.

[27.8] An accident may occur in any location listed on the Encounter Table.

When the GM rolls a common, rare, or unique accident encounter, he refers to the list of accidents in 38.0 and chooses one that fits the character’s current situation. The list presents two types of accidents (either of which may be chosen). An avoidable accident is actually a dangerous situation that the characters may attempt to overcome by using their skills. An unavoidable accident is an occurrence that the characters are powerless to prevent.

An avoidable vehicle accident is resolved as described in 11.2. That procedure may also be used to resolve a spaceship accident (using pilot skill). However, any damage incurred by a spaceship would be applied using the DeltaVee hit system (see DV 8.0).

An avoidable expedition suit, body armor, or jetpack accident is resolved as follows:
1. The base chance to avoid the accident is determined (see 38.0). If the character is skilled, his Agility Rating and the square of his Skill Level is added to the chance.
2. The endangered character rolls percentile dice. If the dice result is less than or equal to the modified chance, no accident occurs. If the result is greater than the modified chance, proceed to Step 3.
3. The GM subtracts the modified chance from the dice result and locates the difference on the Hit Table (30.9) to determine both the damage incurred by the involved equipment and the hits incurred by the character. If armor is involved, its Projectile Defense Rating may protect itself and the character, as described in 30.6.

When an unavoidable accident indicates that damage has occurred to equipment, the extent of damage is determined by rolling two dice and referring to the Hit Table, adding 3 to the dice result for a common accident, 11 to the result for a rare accident, or 20 to the result for a unique accident.

The GM need not limit accident checks to encounters. If a character declares that he wishes to attempt something especially risky, the GM may use these procedures, applying the appropriate skill, to see if the character comes through safely.

[27.9] The GM may replace a “no encounter” result on the Encounter Table with a result of his own devising. Any event not covered by the Encounter Table results that the GM wishes to use in an adventure may be assigned a space on the Table occupied by a “no encounter” result. Such events might include the discovery of an alien artifact or structure, the discovery of abandoned equipment, news of an occur-
rence that may or may not affect the characters, or some event that may only occur in a specific location or at a specific time. See 42.4 of the Adventure Guide for an example. If the GM wishes that such an event definitely occur, he should forego use of the Encounter Table and automatically implement his event instead.

[28.0] Creature and NPC Interaction

Once the GM has determined that the party has encountered a creature or NPC, the encounter is played out, either verbally or on the Action Display. The appropriate encounter procedure (there are two; one for creatures and one for NPC's) is undertaken to determine how the two sides become aware of each other and react to each other and, if called for, how hostilities are initiated.

The GM is not required to use these procedures if he has provided the creature or NPC with a specific purpose and strategy. However, the step-by-step structure of the procedures will prove helpful in resolving all types of creature and NPC encounters.

[28.1] When the party encounters a creature, the GM undertakes the following procedure:

1. Secretly determine all the attributes of the creature at the ready (done).
2. Make sure the characters are properly deployed on the Action Display.
3. Secretly roll percentile dice to determine the awareness of the creature and the party and place the creature on the Action Display in accordance with the awareness result. If the creature is unaware of the party, read its sight description to the characters and skip step 4. If both are aware of each other, read the warning description to the party. If the party is unaware of the creature, read nothing.
4. Use the Creature Reaction Table to secretly determine the creature's reaction to the party. If the party is unaware of the creature, and the creature chooses to attack or flee, conduct the interaction indicated on the Creature Interaction Matrix.
5. If the sight description of the creature has already been read to the characters, allow them to attempt perception of the creature. Then ask the characters to declare their strategy (see 28.4). Cross-reference the character's strategy with the creature's reaction on the Creature Interaction Matrix and carry out the indicated interaction.

Step five is repeated after each interaction to determine the next Interaction. The character's are read the sight description of a creature at the beginning of the second conduct of step 5 in a given encounter (if they have not heard it before). The GM may change a creature's reaction to a party at the end of any Interaction or Action Round. If he chooses to do so, the Interaction Matrix is referred to again.

[28.2] The awareness of the party and the creature they encounter determines the initial deployment of the creature.

GAMESMASTER'S GUIDE, PAGE 37

and the initial information received by the party.

The creature's Initiative Percentage is multiplied by the Terrain Value of the encounter area to determine the chance. The attributes of the party modify this chance as follows:

- Subtract twice the highest Environ Skill Level in the party.
- Subtract the highest Battlefield Skill Level in the party. If the encounter is with an NPC, subtract the square of the highest Battlefield Skill Level.
- Subtract ten if the party possesses an operating neuroscanner and the creature is protein-based or more terran-like.
- Subtract 20 if the party possesses a robot with a bio system and the creature is protein-based or more terran-like. This subtraction may not be combined with the neuroscanner subtraction.
- Subtract the square of the highest Life Sense Skill Level in the party.
- Subtract the square of the highest Mental Power Rating in the party if the creature is intelligent.
- Add 20 if the party is resting without a watch.
- Add a variable amount if the party has exceeded the movement rate recommended in 26.4.

The GM rolls percentile dice. If the result is equal to or less than the modified chance, the party is unaware of the creature. If the creature's Aggression Rating is 7 or higher, place a creature in a hex of the Action Display from which it could attack one character (determined at random) without moving (often this will be in the same hex as a character). The creature is not committed to an attack at this point. If the Aggression Rating is 6 or less, place the creature in a hex at the edge of the party's sight (see 28.3).

If the result is greater than the modified chance by 30 or less, the party and the creature are aware of each other. Place the creature in a hex at the edge of the party's sight and read the creature's warning description to the party.

With some alterations, the GM may use this procedure to check for character NPC awareness, if an encounter occurs in which one side might wish to ambush or elude the other. The NPC's Ambush and Environ Skill Levels should be taken into account (instead of the Initiative Percentage). If the party is unaware of an NPC, place him in the same hex as a character (if the NPC is unarmed) or four hexes away with a clear line of fire (if the NPC is armed).

[28.3] The maximum range at which a being may be seen (and thus fired at) is 200 meters or 40 hexes.

The maximum range in any given encounter is divided by the Terrain Value of the encounter area (see the Terrain Effects Chart). Thus, in a Forest Mountain area (Terrain Value of 4) the maximum range is 50 meters or 10 hexes. When the GM is placing a creature or NPC on the Action Display for an encounter, it should be placed in a hex at the maximum range from one of the characters (unless the characters are unaware, see 28.2). When a creature or NPC has moved beyond the maximum range from all characters the GM should remove it from the Display and conduct its actions secretly, keeping track of its position until at least one character has reestablished sight (by moving back within maximum range).

If the encounter is taking place in darkness, add three to the Terrain Value up to a maximum of six. Exception: A creature with heightened vision or a character with night glasses is not affected by darkness. The GM may impose other additions to the Terrain Value when determining maximum range in the case of dust, fog or other non-terrain visual obstructions.

[28.4] A creature's reaction to the party, and the party's strategy determines how an encounter will be resolved.

Unless the GM has chosen a reaction for the creature, he secretly rolls one die and adds the creature's Aggression Rating to the result. He locates the modified die result on the Creature Reaction Table to determine one of the following creature reactions:

- Flee. Terrified of the party; will leave the area quickly as possible.
- Leave Slowly. Bothered by the party; will amble off.
- Watch Warily. Suspicious of the party but has not yet decided what to do about it.
- Ignore. Totally unconcerned about the party and its actions.
- Protect. Will attack to defend itself if provoked.
- Attack. Angered or hungry; will attempt to kill or capture (depending on the creature type).
- Communicate. Intelligent; will attempt to establish contact with the party.

If the party is aware of the creature, the GM asks them to choose one of the following strategies:

- Attack. The party plans to fight weapons, strike the creature, or take any other hostile action against the creature.
- Maneuver. The party plans to move towards and around the creature without taking hostile action.
- Watch Warily. The party will hold its ground, watching and recording the creature's actions.
- Ignore. The party will disregard the creature.
- Flee. The party will move away from the creature as quickly as possible.
- Communicate. The party will attempt to establish contact with the creature.

The GM secretly cross-references the creature's reaction with the character's strategy on the Creature Interaction Matrix and carries out the indicated Interaction. Each possible Interaction is explained with the table and may call for the conduct of an Action Round, may allow maneuver by one
side or the other, or may indicate some other activity. The GM should return to Step 5 of the Creature Encounter Procedure after conducting an Interaction, unless otherwise stated in the Interaction description. When it becomes obvious that the party will not be changing its strategy and the creature will not be changing its reaction (especially when combat has been initiated by one or both sides), the GM should stop using Interactions. Instead, Action Rounds are conducted until the encounter is resolved.

Note: Any reaction result calling for movement by an immobile creature is considered a Watch Wardly reaction. However, the creature will “close up” if possible.

[28.5] The GM uses the Creature Reaction Table to determine a creature's attitude toward the party. See page 63.

[28.6] The GM uses the Creature Interaction Matrix to determine the interaction between a creature and the party. See page 63.

[28.7] When the party encounters an NPC, the GM undertakes one of two procedures, depending on the type of encounter he envisions.

The GM secretly determines all the attributes of the NPC (if not already done) and assesses the party's situation. If he feels that combat would precede any vocal interaction (in silent ambush or battlefield situation), the following steps are conducted:

1. Make sure the characters are properly deployed on the Action Display.
2. The GM secretly rolls percentile dice to determine the awareness of the NPC and the party (see 28.2). Place the NPC(s) on the Action Display in accordance with the awareness result.
3. Conduct an Action Round. If one side is unaware of the other, the aware side has the automatic initiative; and step 4 of the Action Round is skipped. Continue conducting Action Rounds until the combat is resolved or both sides choose to cease hostilities. After the first Action Round, both sides are considered aware of each other.

If the GM does not feel that combat would be immediately initiated and wants to allow interaction between the party and the NPC (conversation and reaction) the following steps are conducted (unless the GM has chosen a distinct attitude for the NPC):

1. The GM secretly rolls percentile dice and compares the dice result to the NPC’s Aggression Rating times ten. This comparison will yield a positive or negative reaction number. Example: An NPC's Aggression Rating of 4 multiplied by 10 equals 40. Percentile dice are rolled and the result is 76. Comparing the rolled 76 with the roll of 76 yields a reaction number of +36.
2. The GM locates the reaction number on the NPC Reaction Table (28.8) and makes a mental note of the indicated NPC reaction. The party may now choose one character among them as their spokesman. If no spokesman is chosen, skip Steps 3 and 4 and proceed to Step 5.
3. The spokesman rolls one die. If the result is less than his Empathy Rating, the GM reads the Key Word of the NPC reaction to the party, as an indication of the NPC's apparent intentions. If the die result is equal to or greater than the spokesman's Empathy Rating, the Key Word is not revealed.
4. The spokesman may perform the communication task; see the streetwise and diplomacy skill descriptions (14.0). For every 10 (or fraction) below the modified chance for the task the dice result indicates, the party receives a friendly shift of one line towards 0 on the Reaction Table. For every 10 above the modified chance, the party receives a hostile shift of one line away from 0.
5. The GM checks the list of Reaction Shifts (listed with the Reaction Table) to determine whether any shifts are applied (in addition to any applied as stated in Step 4). Any verbal interaction by the players may also be considered. Apply the shifts in the direction indicated.
6. After all shifts are applied, the GM locates the new line on the NPC Reaction Table. He reads or paraphrases the Key Word and the NPC reaction to the players (if he thinks it would be obvious) and the result is enunciated as it applies to the situation.

[28.8] The GM uses the NPC Reaction Table to determine the attitude of an NPC towards the party in an encounter. See page 64.

[29.0] Action Rounds

Action Rounds are used to resolve combat between characters, NPC’s and creatures. When a possible combat situation arises, the GM and the players prepare the Action Display as described in 26.6, the Creature Encounter Procedure (28.1) and the NPC Encounter Procedure (28.7).

During a creature encounter, an Action Round is undertaken when called for by an Interaction (see 28.4). Some Interactions call for the conduct of one Action Round, and then another Interaction is determined. Others call for the repeated conduct of Action Rounds until combat is resolved (one side or the other is incapacitated or escapes).

During an NPC encounter, an Action Round is undertaken if either the characters or NPC’s wish to initiate combat. Action Rounds are repeated until combat is resolved or both sides choose to cease hostilities.

ACTION ROUND PROCEDURE:
1. If not stated in the Encounter Procedure or Interaction, determine which side has the initiative (see 29.1).
2. Every individual which is not stunned, passed out or restrained on the side with initiative must, first and/or perform other actions. Each individual conducts his actions one at a time; that is, one performs actions, then the next, and so on. The order in which individuals perform their actions is up to the players (if characters) or the GM (if NPC’s or creatures). If an enemy individual is attacked or fired upon, the effects are implemented immediately.

3. Every individual on the side without initiative that was fired at in Step 2 must conduct a willpower check. Those individuals that fail the check must now perform a rash or protective action.

4. Every individual on the side without initiative may perform actions as described in Step 2. Exception: An individual that was attacked in close combat during Step 2 or that failed a willpower check in Step 3 may not perform any actions at all. This step is skipped if the side without initiative is unaware or is ignoring the side with initiative.

5. The GM may check the NPC’s or creatures to determine if their reaction to the characters changes. The characters may also change their strategy. If one or both sides wishes to continue combat, return to Step 1 of this procedure. However, if one or both sides changes their strategy during a creature encounter, check the appropriate interaction to see how the next Action Round will be conducted (if at all).

Throughout this section, any references to abilities and options of the characters also applies to NPC’s.

[29.1] The players and the GM determine which side has the initiative at the beginning of each Action Round.

The players use the one character in their party that has the highest Initiative Value, determined as follows: Add together the character’s Leadership Rating (if the enemy is a creature, Intelligence may be used instead), his Envirion Skill Level, and his Battlefied Skill Level (if the characters are fighting NPC’s, double the Battlefied Skill Level). The highest sum obtained by one character is the party’s Initiative Value and that character is considered the party’s leader.

The GM secretly determines the Initiative Value of the enemy force. If a creature, its initiative is called its Initiative Value. If NPC’s, the Value is determined in the same way as for characters. One side’s Initiative Value may be increased in accordance with a creature interaction (see 28.6).

The player controlling the character being used for initiative rolls one die and adds the result to his Initiative Value. The GM secretly does the same for the enemy force. The side that achieves the higher sum receives the initiative this round, and performs actions first.

If one side is unaware in the first Action Round of a combat, they are considered aware in all the following Rounds. However, until the initially unaware side actually gains the initiative in an Action Round, 3 is subtracted from all their initiative die rolls.

A character or NPC that is currently stunned, unconscious may or that failed a willpower check in the previous Action Round may not be used to determine the Initiative Value.

Close Combat Initiative. If a character is engaged in close combat with an NPC or creature (see 29.9), the GM should have the character and his enemy check for initiative in
A character may move a number of hexes equal to his Agility Rating in a single Action Round, with the following modifiers:

- Add the Terrain Movement Modifier for the environment (see the Terrain Effects Chart).
- Add the Gravity Movement Modifier for the world (see the world log).
- Add the character's appropriate Gravity Skill Level.

Example: A character with an Agility Rating of 7 in a woods/hill environ (−4) on a size 4 world (−2) who has a Light Gravity Skill Level of +1, would be able to move up to 6 hexes in a single Action Round.

The number of hexes a character may move may be increased or decreased if he is wearing an expedition suit or body armor. Subtract the character's EVA or Body Armor Skill Level (whichever is higher) from the Encumbrance Rating of the suit or armor. If the result is greater than one, divide the character's movement rate by the result (rounding to the nearest whole number). If the result of the subtraction is one or less, the character's movement is not affected. Exception: If a character using his Body Armor Skill is wearing augmented armor, and the subtraction result is −2 or less, multiply the character's movement rate by the absolute value of the result.

Example: Assuming the character in the above example is wearing Civ Level 7 Impact Armor (Encumbrance Rating of 3, augmented) and does not have the EVA or Body Armor Skill, he would be able to move only two hexes per Action Round (6 − 3). If he had a Skill Level from 2 to 4, he could move up to six hexes. If he had a Body Armor Skill Level of 5 (or 6) he could take advantage of the armor's augmentation and move 12 or 18 hexes.

Unless a character's Agility Rating is 0 (which indicates that he may not move at all) or he is restrained, he may always move at least one hex, even if his calculated movement is 0 or less.

The movement rate of a robot is calculated in the same manner as that of a character (robots have no Gravity Skill Levels). However, if a robot's calculated movement rate is 0 or less it may not move at all (unless it has a creative thought system).

The movement rate of a creature is equal to its Agility Rating (see Agility Rating). The effects of gravity and the environs are already included in its Agility Rating.

When a character is eligible to move, he may perform other actions before, after or instead of moving.

An action a character performs during an Action Round that movement may reduce the number of hexes he may move in that Round or may prevent him from moving altogether. Unless otherwise specified, actions may be performed before moving, after moving, or instead of moving. They may not be performed before and after moving and may not interrupt movement. Thus a character may perform actions and then move, or he may move and then perform actions, or he may perform actions only. If a single action would reduce a character's movement rate below 0, he may still perform the action but may not do anything else in the Action Round.

Fall prone. No reduction. May be performed after move only.

Get up. −1 hex. Performed before move if prone.

Open or close door. −1 hex.

Pick up object. −2 hexes.

Pass through narrow opening. −2 hexes.

Load weapon. One Action Round.

Fire weapon. No reduction (however, see 29.6).

Draw weapon. −1 hex.

Exit enemy-occupied hex. −2 hexes. May not be performed in close combat. May be performed before move only.

Attack in Close Combat. −3 hexes. May be performed after move only. A character may conduct no more than one close attack in a single Action Round.

Break off from Close Combat. Movement rate reduced to 1 hex. Character must have the initiative and may not break off if restrained. May be performed before move only.

Pressurize or Depressurize in Airlock. Two Action Rounds.

Emplace Machine Gun. Two Action Rounds (a machine gun mounted on a structure or vehicle in considered emplaced).

Jump over object. −3 hexes. May be performed after move only, although the jump may include an additional forward momentum of one hex. A character may jump a number of feet equal to one half of his total movement rate for the Action Round.

Perceive Creature without Bioscanner. No reduction.

Perceive Creature with Bioscanner. One Action Round.

Jet Pack Movement. A skilled character wearing a jetpack may move (fly) a number of hexes equal to twice his Agility Rating, plus his Gravity Skill Level, plus the Gravity Movement Modifier, plus the square of his Jetpack Skill Level. No modifier for terrain is considered. An unskilled character may move a number of hexes equal to his Agility Rating plus his Gravity Skill Level plus the Gravity Movement Modifier (the GM may wish to check for an accident when an unskilled character is using a jetpack). Jetpack movement is halted (towed up) if a character is taking off or landing before or after the move. A character using a jetpack cannot take off and land in 1 Action Round.

The movement rates of vehicles (in hexes per Action Round) are listed on the appropriate vehicle chart. As long as a vehicle is being driven, it may move at its listed movement rate (as modified by the Terrain Value of the environs [see 21.1]). A character that wishes to switch from driving a vehicle to moving on foot (or vice versa) must spend one Action Round shutting down (or starting) the vehicle.

A character that is controlling a robot's actions in an Action Round may not himself move, fire a weapon or perform any other actions in that Round (unless the robot has a self-activation system).

The size of an individual or object determines how much space it occupies in a hex. The size classifications are: Minuscule (smaller than a coin), Very Small (the size of a book), Small (the size of a small child), Man-size, Large (the size of a large horse), One-hex, Two-hex, and so on. There is no limit to the number of minuscule or very small objects or individuals that may occupy a hex. Twenty small, 10 man-size, or three large objects or individuals may occupy a hex. The size of an object or individual affects weapon fire in the form of a modifier applied to the Hit Chance (see the Fire Modifier Chart).

When eligible to move, a character may fire a loaded weapon he possesses at any target within his sight.

He may fire the weapon up to a number of times equal to the weapon's Fire Rate (listed on the Weapon Chart). However, if he fires more than three times greater than half the weapon's Fire Rate, the weapon becomes unloaded and may not be fired again until loaded (an action listed in 29.3). Thus, a weapon with a Fire Rate of 1 must be reloaded after each fire. As long as a weapon is fired a number of times equal to or less than half its Fire Rate, the character need not pause to reload. A character that is not skilled with a weapon may only fire it once in an Action Round.

For each fire he wishes to conduct, the character declares his intended target and conducts the following steps:

1. Referring to the Weapon Chart, cross-reference the type of weapon being fired with the column corresponding to the number of hexes away the target lies to find the Base Hit Chance. This range is counted by including the target hex but not the firing character's hexes.

2. Multiply the Terrain Value in the environs by the Terrain Multiplier (listed with the range on the Weapon Chart) and subtract this product from the Base Hit Chance. If the target is prone, double the subtraction.

3. If the firing character is skilled with the weapon, add his Dexterity Rating and the square of his Skill Level to the Hit Chance.

4. Consult the Fire Modifier Chart to see if any other additions or subtractions are applied to the Hit Chance, depending on the situation. Certain Hit Chances for manual weapons indicate that the characteristic's Strength Rating is also added to the Hit Chance (see the Weapon Chart).

5. The table rolls percentile dice. If the dice result is equal to or less than the modified Hit Chance, he hits the target; refer to the Hit Table to determine the damage incurred by target in accordance with 30.0. (Exception: If a target is fired at more than once, damage is determined after all fires are conducted). If the dice result is greater than

GAMEMASTER'S GUIDE, PAGE 39
the chance, he misses the target; the GM may check to see if the fire hits a likely target (see 29.7).

A character may fire at any number of different targets in a single Action Round (within the limit of his weapon’s fire rate). However, a reduction (listed on the Fire Modifier Chart) is applied to all fires if he does so. A reduction is also applied to all fires when firing a weapon with recoil more than once in an Action Round (even if firing at the same target).

A character in a hex occupied by an enemy capable of movement may only fire at a target in that hex.

[29.6] The Fire Modifier Chart lists all the modifiers that may be applied to the Hit Chance when firing a weapon. See page 64.

[29.7] If a fire misses its intended target, the GM may check to see if a likely target is hit instead.

The GM locates the difference between the dice result and the modified Hit Chance on one of the following likely target results. If one or more points above the likely target suffer the effects of the fire.

1-30. No other object hit. Exception: If the target is engaged in close combat, the fire hits the target’s adversary.

31-50. Fire hits an object or individual other than the intended target in the target hex or in a hex that the fire passed through (including hexes beyond the target). 51 or more. Fire hits an item or individual in a hex adjacent to any hex in the above result.

The GM determines which likely target is hit if more than one is eligible. Any fire that does not hit its target or a likely target always hits a wall (if present) behind the intended target (this could be very dangerous if a vacuum or a hostile atmosphere exists beyond a pressurized chamber). Exception: A skilled character firing an arc gun will never hit an object, individual or wall behind his intended target. If the dice result is greater than the modified chance when throwing a grenade, the grenade strikes one hex away from the target hex for every 10 percentage points (or fraction thereof) over the chance the dice result indicates. The GM randomly determines which direction from the target the grenade goes.

[29.8] A character without initiative must conduct a will power check if he is fired upon and does not incur damage.

The character rolls one die; if the result is equal to his Aggression Rating, he passes the check. The character may add or subtract a number up to his Mental Power Rating or his Battlefield Skill Level (his choice) to or from the die result. Thus, a character with an Aggression of 7 and a Mental Power of 2 must roll a 6, 7, 8 or 9 to pass a willpower check. If the character has a Battlefield Skill Level of 3, he must roll a 4 through 10 to pass the check.

A character that passes a will power check may participate in Step 4 of the Action Round. A character that fails a will power check may not do anything in Step 4; instead, he must immediately perform one of the following:

- A character that fails a will power check by rolling too high must immediately fall prone in the hex he occupies or any adjacent hex that is further away from the source of fire (his choice). A character that is already prone does nothing.

- A character that fails a will power check by rolling too low must perform a rash action. He must immediately move into the hex occupied by the individual that attacked him (or as close to this hex as possible if his movement rate is insufficient). If the character is able to conduct a close attack or fire his weapon after moving he must do so (his choice if able to do both). If a rash character is firing his weapon, he must conduct as many fires as possible. He may not fall prone after his rash action.

Creatures never conduct willpower checks. A character on the side with initiative does not conduct a willpower check when fired upon. A character does not conduct a willpower check when attacked in close combat.

[29.9] A character or creature may attack an enemy in the same hex by using close combat, instead of firing a weapon.

Once close combat is initiated, the two participants are considered engaged until one or the other is stunned, passes out, dies or breaks off. An individual without initiative that is engaged in close combat may not perform any actions at all in step 4 of the Action Round. An individual with initiative that is engaged may only conduct a close attack or attempt to break off (see 29.3) during Step 2 of the Action Round. A character is not required to initiate close combat when an enemy-occupied hex; if he is not engaged, he may fire a weapon at a target in the hex instead.

The close combat strengths of the attacker and defender depend on how each individual declares he will fight; unarmed, with a blade or in body armor. An individual may declare any one of the three types for which he is eligible.

Attacking or defending unarmed.

The character’s Dexterity, Strength or Agility Rating (his choice) is added to the square of his Unarmed Combat Skill Level. If the character is not skilled, he uses one half (rounded up) of one of his Ratings only.

Attacking or defending with a blade.

The character’s Dexterity or Agility Rating (his choice) is added to the Hit Strength of his blade (see the Weapon Chart) and the square of his Blade Skill Level. If the character is not skilled, he uses the Hit Strength of his blade only.

Attacking or defending in body armor.

The character’s Strength Rating is added to the Hit Strength of his armor and the square of his Body Armor Skill Level. If the character is not skilled, he uses the Hit Strength of his armor or his Strength Rating only. Note: A character in body armor may declare that he is attacking or defending unarmed if he wishes.

Creature (attacking or defending): The creature’s Combat Rating is multiplied by one half (rounded down) of his Agility Rating. Thus, a creature with a Combat Rating of 6 and an Agility Rating of 7 would have a close combat strength of 18.

After determining the close combat strength of the attacker and defender, resolve the combat by subtracting the defender’s close combat strength from the attacker’s close combat strength to determine the differential (a negative number is possible). The attacker rolls one die and adds the die result to determine the differential.

- If the sum of the differential and the die result is 4 or greater, divide the sum by two (rounding down) and locate the halved sum on the Hit Table to determine hits incurred by the defender (see 30.1).
- If the sum of the differential and the die result ranges from -3 to 3 the attack has no effect.
- If the sum of the differential and the die result is -4 or less, divide the absolute value of the sum by two (rounding down) and locate the halved sum on the Hit Table to determine hits incurred by the attacker (see 30.1).

Before resolving a close combat, the attacker (only) may declare that he is attempting to restrain his enemy. If this is declared, reduce any hits received in the combat by his enemy by three. If the adjusted number is 0 or higher, his enemy is considered restrained (suffering the adjusted number of hits) and remains restrained until the attacker releases him, or is stunned, passes out, or dies. A restrained individual may not perform any actions at all. An individual that is restraining an individual may not perform any actions other than movement (however, see 26.5), unless it is a creature that possesses the multiple attack power or has restrained its adversary in webs.

[30.0] Hits and Damage

A character, creature, or NPC may suffer hits of fire and a vehicle, machine, or other piece of equipment may suffer damage, as a result of weapon fire, close, combat, or an accident. Hits against an individual reduce his Physical Characteristic Ratings. Points lost from Physical Characteristics are regained by healing (see 12.3 and the Diagnosis and Treatment skill descriptions). Damage to equipment may puncture the object and/or render it inoperable until repaired (see 13.1 and the tech skill descriptions).

The Hit Table is used to determine all types of hits and damage, although its use changes depending on the situation.

[30.1] When an individual is hit by weapon fire, the character who fired the weapon uses the Hit Table to determine the number of hits his target receives.

He rolls one die and adds the Hit Strength of the weapon to the die result. The modified result is located on the Table to find which physical characteristic is affected and how many points are subtracted from that characteristic.

If an individual is hit by more than one fire from the same weapon in a single Action Round, the Hit Strength of the weapon is
multiplied by the number of times the target was hit. One die is rolled and the result is added to this product to determine the one result that will be applied to the Hit Table. Thus, the Hit Strength of a paint gun that hits one target three times in one Action Round is 24 (3 x 8).

The die is not rolled when referring to the Hit Table after a close combat. The number of shots fired, added to the die result (see 29.9) is applied directly to the Table to determine hits received.

When a creature is hit, the GM should secretly conduct the Hit Table die roll and apply any reductions to the result. [30.2] Hits suffered by an individual are applied as reductions to his Physical Characteristics.

When a creature is hit, a hit result, the listed number of points are immediately subtracted from the listed Characteristic Rating. This is done by recording the reduced Characteristic Rating next to the original rating on the Character Record (do not erase the original number). Until healed, the character uses the reduced rating for all game purposes. When a character’s Endurance Rating is reduced to 0, he immediately passes out and until healed increases his Endurance to 1. When a character’s Agility is reduced to 0, he may not move at all (he may use his hands to operate a small device or weapon). If a character’s Strength is reduced to 0, he may hold nothing and fire no weapon (he may still move). There is no immediate effect of a character’s Strength being reduced to 0. However, if a character’s Strength and Endurance are reduced to 0, he dies.

A Characteristic Rating may never be reduced below 0. If a hit result calls for a greater reduction to a characteristic than is possible to apply, the excess reduction is applied to the next characteristic listed down on the Hit Table (the number of hits received is not increased). Example: A character with an Endurance Rating of 6 receives a hit result of 8 (Endurance, the result 16); his Endurance Rating is reduced to 0 and his Strength Rating (the next characteristic listed on the table) is reduced by 2. Exception: If the 38 or more result is incurred on the Hit Table, use the next characteristic up (Strength) after applying reductions to endurance.

When applying hits to a creature, treat its Combat Rating as its Strength and Endurance Rating (for purposes of using the Hit Table) and treat its Agility Rating as its Agility and Dexterity Ratings. When a creature’s Combat Rating is reduced to 0, it passes out. When its Combat and Agility Ratings are reduced to 0, it dies. [30.3] Each time a character or NPC suffers one or more hits, he must immediately conduct a check.

The hit character rolls one die. If the die result is equal to or less than his Mental Power Rating, he is unaffected. If the die result is greater than his Mental Power Rating, the character immediately drops whatever he may be holding and falls down; he may perform no actions at all for the remainder of the current Action Round and the entirety of the following Action Round. After the Action Round, he is no longer affected. Note that a character with a Mental Power Rating of 0 will always fail a check. A character that passes out or dies when hit does not conduct a check. Creatures never perform check.

[30.4] An individual that is hit with a stun pistol pulse does not suffer any hits but may black out briefly.

The Hit Table is not used. Instead, the GM rolls one die and adds the Stun Strength of the weapon (either 8, 9, or 16) to the die result. This could be compared to the sum of the target’s Endurance and Mental Power Ratings. For every point above the sum the modified result indicates, the individual is stunned for one Action Round. Thus, a character with a combined Endurance and Mental Power Rating of 12 that suffers a modified stun result of 17 is stunned for 5 Action Rounds. A stunned individual immediately drops whatever he is holding and falls down; he may perform no actions at all until the requisite number of Action Rounds has passed. The count of Action Rounds for stun duration does not include the Action Round in which the individual is hit. The GM decides to conceal the duration of a stun result from the characters, informing them only when the affected individual comes to.

The strength of a stun weapon is halved (before adding a die roll) if the target is wearing any type of full body armor or is on an expedition suit. A robot is not affected by stun weapons.

When checking for the result of a stun pulse against a creature, use its Combat Rating (only). Certain creature powers may render a stun pulse ineffective or alter its effects (see 35.0). In addition, the GM may choose to make creatures that have no central nervous system (in the GM’s opinion) immune to stun weapons. [30.5] Damage to a robot, vehicle, or other piece of equipment hit by fire or involved in an accident ranges from superficial damage to complete destruction of the object.

The Damage column on the Hit Table is used to determine whether the object suffers superficial, light, or heavy damage, or becomes partially or totally destroyed. An object that suffers more than superficial damage is rendered inoperable until repaired (see 13.0; the exact nature of the problem is up to the GM). An object that is totally destroyed may not be repaired.

When an object is hit by weapon fire, the damage result is determined as described in 30.1, using the Damage column instead of the Physical Characteristic column. A vehicle or robot that is hit by fire may be protected by its armor Defense Rating (see 30.6). Whenever an object in an accident is assessed in accordance with 11.2 and 27.8. If a vehicle has a Projectile Armor Rating, the armor may protect the vehicle from damage. Note that any damage in a vehicle that incurs damage may suffer hits as a result.

Damage suffered by body armor and other protective attire is not determined using the Damage column of the Hit Table. Instead, the Armor columns are used, as explained in 30.6.

[30.6] A character wearing body armor or any other attire with a Projectile Defense Rating and/or Beam Defense Rating receives protection from hits.

The Protective Attire Chart (20.0) lists a Projectile Defense Rating (use for protection from projectile weapons, close combat, and accidents) and a Beam Defense Rating (use for protection from laser pistols, paint guns, arc guns, and other beam weapons).

When a character incurs a result on the Hit Table due to any type of combat or mishap, he checks the Armor Result listed with the hit result.

• If the Armor Result is less than the appropriate Defense Rating of the character’s armor, the character and the armor are not harmed at all.

• If the Armor Result is equal to the Defense Rating of the armor, the character is not harmed, but the armor suffers superficial damage and both of its Defense Ratings are reduced by 1.

• If the Armor Result is greater than the Defense Rating of the armor but less than the total Defense Rating and the character receives hits. The Defense Rating of the armor (before the current hit) is subtracted from the number of hits the character receives, and the appropriate Physical Characteristic is reduced by this adjusted amount. If the Armor Result is greater than the Defense Rating by 1, the armor suffers light damage and both Defense Ratings are reduced by 1. If the Armor Result is greater than the Defense Rating by 2, heavy damage is suffered, and both Defense Ratings are reduced by 2. If greater by 3, the armor is partially destroyed, and both Ratings are reduced by 3. If greater by 4 or more, the armor is totally destroyed. An Armor Defense Rating may never be reduced below 0.

There are four columns of Armor Results on the Hit Table. When hit by weapon fire, use the column corresponding to the total number of fires that the target was hit by. When involved in a close combat or an accident, use the 2 Fires column of the Table.

All vehicles possess Armor Ratings which are used in the same way as personal armor to protect the machine from damage. Certain creature powers provide a creature with natural armor (with specific ratings given in the power descriptions), used in the same way as character armor.

[30.7] The Toxic Effects Matrix is used to determine how an individual hit by a treated projectile is affected.

When an individual is hit by a needle from a needle pistol or rifle, or is exposed to toxic gas from a grenade, the GM cross-references the type of hit in used with the composition of the target to determine the effects of poison. All character and NPC targets use the Human row of the matrix. A creature target uses the row that corresponds to its composition (only known by the GM, unless the characters have examined the creature, see 35.0).

A number from the matrix is treated as a Hit Strength; roll one die, adding the number to the die result, and determine the hits suffered by the individual as explained in 30.1.
and 30.2. A letter result obtained from the matrix affects the target as explained (see matrix).

In addition to its toxic qualities, a needle has a Hit Strength of 1. This applied to the target before determining the effects of the toxin. If the needle does no harm to the target, the toxin has no effect either.

[30.8] The Toxin Effects Matrix explains the effects that various toxins have on beings of various compositions.

See page 63.

VIII. Space Travel

There are two distinct methods of travelling between worlds. Hyperdrive uses the Mental Power of a psionic navigator to travel instantaneously from star system to star system. Unfortunately, hyperdrive will not work when a spaceship is within the gravity well of a star system. Thus, slower-than-light reaction drive (fission) is used to travel from planet to planet within a star system. A character conducting a hyperjump uses his navigator skill (this skill is not used to navigate a spaceship through interplanetary space). Pilot skill is used to control a spaceship through interplanetary space.

All the spaceships in Universe are composed of a hull and a variable number of pods. The hull determines the ship's size and overall performance. The pods are attached to the hull and give the ship a specific character: military, scientific, merchant, passenger, etc. This concept is more fully explained in DeltaVee Sections 1.0 through 5.0. The gamemaster creates spaceships from the various hulls and pods and introduces them into play so that the characters may travel in them, encounter them and, if wealthy enough, purchase them.

The astronomical terms are used in this Chapter:

Astronomical Unit (AU). A standard measure of distance in interplanetary space. One AU equals 149 million km, the distance from Sun to Earth.

Ecliptic. The plane formed by a star and the orbital paths of all the planets around it. The mass of the worlds scattered around the ecliptic create a flattened sphere of gravity wells that may not be entered when hyperjumping.

[31.0] Hulls and Pods

Spaceship hulls and pods are manufactured on worlds with Class 3 and 4 spaceports, and in orbiting factories attached to such spaceports. Like all other manufactured goods, spaceship parts come in a variety of Civ Levels (6.7,8) and will only be readily available on a world of an equal or higher Civ Level. Spaceships are far beyond the financial means of most people and, thus, the characters will be little concerned with the economics of spaceship construction and purchase. However, the characters will be able to book passage in commercial spaceports and during an adventure will sometimes receive free transport by an employer or may even be loaned a ship for the completion of a specific mission.

The GM uses the list of hulls and pods in this Section and the additional information in the DeltaVee rules (especially concerning military spaceports) to create spaceships suited to his adventures. The hull/pod system allows the GM to design a wide variety of ships with a minimum of trouble. When constructing a new ship, the GM should keep in mind the specifications of each hull and pod, especially their availability, Civ Level, and crew requirements, so that, when assembled, the ship may be logically (and legally) used by the characters.

[31.1] Every class of spaceship hull contains the following:

Each hull has a sub-light engine (using radioactives as its energy source, see 30.0), a control bridge with basic navigation and communication equipment, a docking port leading out of the ship, a paging network for rendezvous with other craft, and all the attributes listed in DV4.0 (especially DV4.9, the Spaceship Attribute Chart, page 47).

Additionally, a list is included with each spaceship hull description in 31.2. This information includes the following:

Availability (open, restricted, or military). An open spaceship is available for purchase by anyone who has the funds. A restricted spaceship is available only with permission from the federation or an independent nation. Such ships, equipped with quality defensive gear and light weapons, are preferred by merchant mariners and government agencies operating in dangerous areas. A military spaceship is designed specifically for combat and is available only to the federal navy, the Astroguard forces, and the transport branches of military ground forces.

Crew Required. The minimum number of crew members required to keep the spaceship running and trouble-free, excluding gunner for the ship's burster or any crew necessary to service any pods the ship possesses.

Passenger Capacity. The maximum number of people the spaceship may accommodate when no pods are attached. Accommodations are basic: shared sleeping quarters, galley, and first aid station (fulfills equipment requirement for diagnosis and treatment tasks, provides no Skill Level increase). Any crew required to run the ship takes up passenger space.

Cargo. The maximum metric tonnage of cargo that the spaceship can transport. Cargo space may be increased by 0.1 ton per passenger beyond passenger capacity carried. The cargo hold will not sustain life.

Cost. Price in Trans for the spaceship hull when new if purchased on a world of the same or higher Civ Level as the hull. Price may fluctuate as described in 18.0.

Performance Modifier (PM). A quantification of the ship's responsiveness and structural integrity. Applied to the chance to avoid an accident, in accordance with 11.2.

[31.2] The following spaceship hulls are the classes most common throughout the federation.

- Corco Zeta. One of the oldest commercial vessels; still widely used in safe areas. Availability: Open. Crew Required: 4.
**Passenger Capacity**: 20. **Cargo**: 5. **Cost**: 6,400. **PM**: 20.

- **Coco Iota**. Economical, well-defended trading vessel designed for government-sponsored commerce. **Availability**: Restricted. **Crew Required**: 4. **Passenger Capacity**: 25. **Cargo**: 10. **Cost**: 17,500. **PM**: 0.

- **Coco Mu**. Common large freighter and passenger vessel. **Availability**: Open. **Crew Required**: 5. **Passenger Capacity**: 30. **Cargo**: 15. **Cost**: 14,500. **PM**: 10.

- **Coco Omega**. Emergency craft launched from escape/EVA pod of a large spacecraft. Contains burn-out hyperjump engine (see 31.1). **Velocity Rating**: 1. **Maneuver Rating**: 3. **Energy Capacity**: 10. **Energy Burn Rate**: 1. Not streamlined; has no burster, armor, force field, or targeting program. **Civ Level**: 7. **Availability**: Open. **Crew Required**: 1. **Passenger Capacity**: 4. **Cargo**: 0.2. **Cost**: 1,100. **PM**: 15.

[31.3] The GM may design additional spacecraft hulls to use during play.

Any hull designed should be given ratings and attributes comparable to those found on the Spaceship Attribute Chart (DV4.9, page 47) and in 31.2. The spaceship may be made capable of carrying any number of pods. The Energy Burn Rate of a spaceship should be 20% to 50% greater than the number of pods it may carry. The cost of a spaceship hull is calculated by adding together the costs of all the following attributes:

- **200 Trans x Velocity Rating x Number of pods**
- **100 Trans x Maneuver Rating x Number of pods**
- **100 Trans x Passenger capacity of hull**
- **10 Trans x Energy capacity of hull**
- **10 Trans for a class 1 burster; 1,000 Trans for a class 2 burster**
- **Armor Class 1: 100 Trans x Number of pods**
- **Armor Class 2: 1,000 Trans x Number of pods**
- **Force Field Class 1: 200 Trans x Number of pods**
- **Force Field Class 2: 1,000 Trans x Number of pods**
- **Target Program: 500 Trans for every subtraction of 1**
- **Cargo: 100 Trans per ton of capacity**

If the spaceship is streamlined, increase all the preceding by 50%. These costs are based on the number of pods the ship is capable of carrying, not the number it is actually carrying at any particular time.

[31.4] Each spaceship may carry a variable number of pods, each containing a system that specializes or improves the ship's operation.

The concept of how pods work and details on combat abilities of certain pods can be found in DV1.0 and DV3.0, especially in DV1.9 (Spaceship Attribute Chart, page 47). The following pods are the types most commonly used on spacecrafts. Each description includes the pod's availability, its requisite crew, passenger capacity, cargo capacity, and cost. These attributes are similar to those in 31.1. Unless a pod is assigned a specific Armor Class by the Pod Attribute Chart, it is considered to be Armor Class 0. An additional cost of 50 Trans, a pod may be purchased at Armor Class 1. At an additional cost of 400 Trans, it may be purchased at Armor Class 2. Any crew required to run a pod without passenger capacity must be housed elsewhere on the spaceship.

- **Arsenal**. See DeltaVee. **Availability**: Military. **Crew Required**: 1. **Passenger Capacity**: 0. **Cargo**: 0. **Cost**: 5,000.

- **Augmented Jump**. Allows spaceship to hyperjump. **Navigation required**. Jump engine never requires overhaul. **Skill Level** of navigator increased by 2 during hyperjump. **Availability**: Restricted. **Crew Required**: 3 (including navigator). **Passenger Capacity**: 1 (private cabin for navigator, includes interstellar commlink). **Cargo**: 0. **Cost**: 2,500.

- **Battlecraf**. Docking, refueling, and maintenance facilities for a Terrillerick 5000 or X. Does not come with battlecraf. See DeltaVee. **Availability**: Open. **Crew Required**: 1. **Passenger Capacity**: 0. **Cargo**: 500. **Cost**: 300. **Civ Level**: 7.

- **Battle Communications**. See DeltaVee. **Availability**: Military. **Crew Required**: 8. **Passenger Capacity**: 1 (cabin suitable for the needs of the ship's commander). **Cargo**: 0. **Cost**: 3,000.

- **Buffered Cargo**. Pressurized, temperature-controlled cargo hold. Facilities for fragile or organic (but not living) items included. **Availability**: Open. **Crew Required**: 1. **Passenger Capacity**: 0. **Cargo**: 20. **Cost**: 350. **Civ Level**: 7.

- **Bio-Research**. Complete research laboratory for the study of alien life forms. Contains chambers for keeping living specimens in their natural environment conditions and computer library of all known life forms. Fulfills equipment requirements for biology, geology, physics, chemistry, and treatment tasks. Provides Skill Level increases of 1 when performing any of the above tasks (Skill Level increase of 3 for biology tasks). **Availability**: Open. **Crew Required**: 1. **Passenger Capacity**: 1 (cabin/study for scientist). **Cargo**: 2 (contents of environment chambers). **Cost**: 1,800. **Civ Level**: 8.

- **Crew**. Basic accommodations for crew of a spaceship. Shared sleeping quarters and galley. **Availability**: Open. **Crew Required**: 1. **Passenger Capacity**: 40. **Cargo**: 0.5. **Cost**: 900. **Civ Level**: 6.

- **Energy**. Capable of holding and processing 144 Energy Units of radioactives. **Availability**: Open. **Crew Required**: 0. **Passenger Capacity**: 0. **Cargo**: 0. **Cost**: 140 (excluding energy). **Civ Level**: 7.

- **Escape/EVA**. Contains assortment of expedition suits, propulsion devices, and tethers for zero-G maneuver outside the ship. Has three airlocks and four launch tubes, each capable of holding a Coco Omege lifeboat (not included). **Availability**: Open. **Crew Required**: 0. **Passenger Capacity**: 0. **Cargo**: 0. **Cost**: 400. **Civ Level**: 7.

- **Explorer**. Combines certain elements of a survey pod and a bio-research pod, designed for small exploration missions. Contains a burn-out hyperjump engine (see 32.1). Fulfills equipment requirements for biology, geology, physics, planetology, and chemistry tasks. Provides Skill Level increase of 1 when performing an astronomy or planetology task. Provides Skill Level increase of 2 when performing a biology task. Contains chambers for keeping living specimens in their natural environment conditions. **Availability**: Open. **Crew Required**: 2 (including navigator). **Passenger Capacity**: 0. **Cargo**: 0.5 (contents of environment chambers). **Cost**: 1,800. **Civ Level**: 8.

- **Heavy Weapon**. See DeltaVee. **Availability**: Military. **Crew Required**: 48. **Passenger Capacity**: 0. **Cargo**: 0. **Cost**: 3,000.

- **Hunter**. See DeltaVee. Contains burn-out hyperjump engine (see 32.1). **Availability**: Military. **Crew Required**: 2 (including navigator). **Passenger Capacity**: 0. **Cargo**: 0. **Cost**: 2,000.

- **Lander**. Contains airlocks, docking, refueling, and maintenance facilities for surface landing vessel (a modified Terrillerick 5000 or Piccolo). Lander not included in cost of pod. **Availability**: Open. **Crew Required**: 0. **Passenger Capacity**: 0. **Cargo**: 0. **Cost**: 300. **Civ Level**: 7.

- **Light Weapon**. See DeltaVee. **Availability**: Restricted. **Crew Required**: 2. **Passenger Capacity**: 0. **Cargo**: 0. **Cost**: 1,700.

- **Living Cargo**. Contains 50 independently pressurized and heated compartments for holding all types of living cargo from plants to pets to alien life forms. Requisite life support systems included. Compartments range in size from 0.5 cubic meter to 30 cubic meters. **Availability**: Open. **Crew Required**: 5. **Passenger Capacity**: 15. **Cargo**: 0.5. **Cost**: 1,500. **Civ Level**: 7.

- **Luxury Cabin**. Spacious single and double occupancy staterooms for first class passengers. Includes recreational, bar, and dining areas; galley and crew quarters. **Availability**: Open. **Crew Required**: 5. **Passenger Capacity**: 15. **Cargo**: 0.5. **Cost**: 1,500. **Civ Level**: 7.

- **Medical**. Fully equipped medical laboratory/computer. Fulfills equipment requirements for all biology, diagnosis, and treatment tasks. Provides Skill Level increase of 1 when performing a biology task. Provides Skill Level increase of 3 when performing a diagnosis or treatment task. Alternatively, the computer may diagnose and treat a patient by itself, with diagnosis and treatment Skill Levels of 6. **Availability**: Restricted (medicines and drugs require an accredited doctor). **Crew Required**: 1. **Passenger Capacity**: 5 (four sickbeds and one cabin/study for doctor). **Cargo**: 0. **Cost**: 2,000. **Civ Level**: 8.

- **Robot and Equipment**. Storage and maintenance facilities for robots and equipment used by the crew and passengers. Fulfills equipment requirements for all computerized robots and equipment. **Availability**: Open. **Crew Required**: 0. **Passenger Capacity**: 0. **Cargo**: 0. **Cost**: 400. **Civ Level**: 7.
any such item brought into the pod. Alternatively, the maintenance system may repair an item by itself, with a tech Skill Level of 6. (Exception: The system may not repair a robot by itself.) This pod does not add the construction, psion tech, and spaceship tech skills. Availability: Open. Crew Required: 1. Passenger Capacity: 0. Cargo: 2 (items under repair). Cost: 1,200. Civ Level: 8.

- **Survey.** Complete research center for studying a world being orbited or approached. Contains computer library on all known planetary phenomena. Provides Skill Level increase of 2 when performing an asteroid mission and a Skill Level increase of 3 when performing a planetary task. Availability: Open. Crew Required: 1. Passenger Capacity: 1 (cabin/study for astronomer or planetologist). Cargo: 0. Cost: 1,600. Civ Level: 8.

### [32.0] Interstellar Travel

A psionic navigator conducts and controls instantaneous interstellar travel, or hyperjumping, by manipulating magnetic monopoles with his mind. A hyperjump occurs when the thought patterns of a psionic mind concentrating on a remote destination are encoded into a plate of monopoles. The mental image and the power of the navigator's mind force the perpetually unidirectional particles to reverse their polarity, causing a shift or jump to the point matching the monopole pattern. This inexplicable phenomenon is the key to both humankind's galactic expansion and the psionic community's continued economic well-being.

Failure of a navigator to wrest the monopoles to his mental command often results in a jump error and/or psychic damage to the psion. Gravitational fields increase this risk by disrupting the stability of the monopole screen that the navigator projects his mind onto. Because of this, spaceships must travel to the outskirts of a star system by conventional propulsion before a jump may be conducted. Conversely, the destination of a jump must be outside the gravity wells of the system so that the navigator's mind and the integrity of the ship will not be destroyed by monopoles reacting to forces other than his own thoughts. The point outside a star system that is closest to a given planet and yet far enough away from all gravitational fields in the system to conduct a safe hyperjump from is called that system's jump point. It is to this point that a navigator will bring a spaceship as the result of a perfect jump.

### [32.1] A spaceship must have a hyperjump engine in order to travel between stars.

A standard jump pod, an augmented jump pod, a hunter pod, and an explorer pod each contains a jump engine. Any spaceship with one of these pods may hyperjump. Exception: The engine in a hunter or explorer pod may not be used when attached to a ship capable of carrying more than 3 pods. The Corco *Omega* lifeboat also contains a jump engine. A jump engine does not consume energy; however, with the exception of the augmented jump pod, all hyperjump engines lose their stability after a time. A standard jump pod must be serviced as described in 31.4. The hunter pod, the explorer pod, and the *Omega* each contains a burn-out hyperjump engine. After a few jumps, such an engine must be entirely replaced. A hunter pod engine must be replaced after three jumps at a cost of 500 Trans. An explorer pod engine must be replaced after two jumps at a cost of 375 Trans. A Corco *Omega* engine must be replaced after one jump at a cost of 200 Trans.

### [32.2] A spaceship that is at a safe jump point and that has a psionic navigator aboard may hyperjump.

A jump point for departing or arriving at a given planet lies above or below the plane of the elliptic for the star system, such that a line drawn from the point to the planet would be perpendicular to the elliptic. See diagram below.

The length of this line depends on the Spectral Class of the planet's star and the distance between the planet and the star. Subtract the distance (in AU's) between the planet and the star from one of the following numbers:

- **Spectral Class A:** 180
  - **K:** 60
  - **F:** 130
  - **M:** 41
  - **G:** 90

The result of this subtraction is the minimum distance (in AU's) from the planet a spaceship must be to go into or come out of a jump. For example, the minimum jump point for a planet that is 7 AU's from a Class K star is 63 AU's. This distance would have to be traversed using normal propulsion and could take as long as five weeks (for a Class A star); see 33.0.

**Note:** A spaceship must be stationary (at 0 velocity) at the moment of hyperjump, and will thus be stationary when it comes out of hyperjump.

A hyperjump is conducted using the Hyperjump Table (32.3) in accordance with the navigation skill description (see 10.0).

### [32.3] The Hyperjump Table is used to resolve the outcome of a hyperjump.

See page 65.

### [32.4] A character without a spaceship may travel between stars by booking passage on a commercial vessel.

Commercial hyperjump voyages occur with a varying degree of regularity between many stars. The frequency and reliability of a commercial voyage between two stars depends on the distance between them and the highest Spaceport Class of a world orbiting each star. Commercial interstellar travel always begins and ends at the world in a star system with the highest Spaceport Class (by federal law). If two or more worlds in a system share the highest class, the GM chooses one as the interstellar terminal.

The Interstellar Route Chart is used to determine the type of route (if any) that exists between any two stars. The highest Spaceport Class in the destination star system is cross-referenced with the highest Spaceport Class in the system of departure to yield three numbers, each defining the maximum distance (in light years) at which a given type of route exists.

A **green** jump route is a well-travelled commercial lane with passenger and freight service occurring daily (or more often). If a character or party wishes to travel this route, roll percentile dice to determine how many hours he must wait for a ship with available space.

An **amber** jump route is an infrequently travelled commercial lane traversed by freighters and an occasional passenger vessel. Roll two dice to determine how many
days a character must wait for available space on this route. A red jump route is a rarely travelled course traversed by a few exploratory and resupply ships. Roll percentile dice to determine how many days a character must wait for available space on this route.

When using the Hyperjump Table for a spaceship that a character has booked passage on, assume the ship's navigator has a Skill Level of 7, a Mental Power Rating of 6, is in a standard jump pod, and either frequents or has previously visited both star systems at some time.

The price of standard passage on a commercial interstellar spaceship is calculated with the following formula:

$$\text{(Distance in LY's} \times 100 \text{Milo}) + \text{(Distance in AU's to and from each world's jump point} \times 20 \text{Milo})$$

Standard passage includes a small room shared with two or three other passengers, a common recreation-dining area, and a baggage allowance of 100 kg. The price of a standard passage on a red jump is increased by 50%.

A character travelling a green jump (only) may book luxury passage at 2.5 times the standard fare. A luxury passenger receives a private room (single or double occupancy, as requested) with private bath, a common recreation-bar-dining area featuring entertainment and gourmet dining, and a baggage allowance of 500 kg.

The total time of an interstellar voyage equals the time to travel from the world of departure to its jump point, and from the destination world to its jump point, in accordance with 33.0. The actual hyperjump takes no time.

[32.5] Interstellar Route Chart
See page 65.

[33.0] Interplanetary Travel
Travel between the worlds of a single star system, or between a world and its jump point is conducted at slower than light speeds. The most common sub-light spaceship engine is a reaction drive, using radioactive elements as fuel.

In an interplanetary journey, a spaceship accelerates at a constant rate to the journey's mid-point and then decelerates at the same rate until it reaches its destination. Thus, the longer the journey, the higher the velocity the ship will attain at its "turn over" point. All interplanetary distances are measured in AU's. The time required for the journey depends on the spaceship's rate of acceleration. A constant acceleration/deceleration of 1G is the usual travel speed for a spaceship. The travel time using this speed is calculated with the following equation:

$$\text{Time (in hours)} = \frac{68 \sqrt{d}}{d = \text{distance in AU's}}$$

A spaceship without special equipment manned by a healthy crew may travel at a constant acceleration/deceleration as high as 2.5G. This speed equals an acceleration or deceleration of 1 per turn in DeltaVee. Travel time using this speed equals:

$$43 \sqrt{d}$$

A high performance spaceship (Velocity Rating of 2 or 3) may be used by a crew who all have internal gravity webs may travel at a constant acceleration/deceleration as high as 5G. The speed is often used in long range military pursuit and equals an acceleration or deceleration of 2 per turn in DeltaVee. Travel time using this speed equals:

$$30 \sqrt{d}$$

[33.1] The distance between two planets in a star system varies widely due to their orbital paths.

This distance may be as little as the difference in their distances from the star, or as great as the sum of their distances from the star (if the two planets are on exact opposite sides of the star). For example, the 11th and 12th planets on the Star System Log could be as close to each other as 15 AU's and as far apart as 65 AU's. Unless the GM wishes to determine the length of each planet's orbital year and set up an everchanging orbital model, he should use the following simple relation to determine planetary distances: The distance between two worlds equals the distance from their star to the world of the two that is furthest from the star. Thus, the distance between the planets mentioned above would be 40 AU's.

For purposes of calculating interplanetary distances, a moon is considered to occupy the same position as its planet. The distance between a planet and any of its moons is equal to the distance from the Earth. At a constant 1G acceleration/deceleration, it would take 3.5 hours to travel from the Earth to the moon.

[33.2] As a spaceship travels through interplanetary space, it consumes fuel in the form of Energy Units and/or Energy Blocks.

An Energy Unit for a reaction drive engine costs one kilogram of radioactive and costs 300 MIL. Thus, it would cost 43 Trans to "fill up an energy pod capable of carrying 144 Energy Units. Energy is always available at a Class 3, 4, or 5 spaceport; Energy is available at a Class 1 or 2 spaceport; see 25.5. Any spaceport orbiting a world that contains radioactive as a resource will always have space up to.

As explained in DeltaVee, the number of Energy Units a spaceship expends to maneuver depends on its Energy Burn Rate, which corresponds to the number of Energy Units in one Energy Block for that ship. The same concept applies to long-range interplanetary travel. A spaceship that is travelling at a constant acceleration/deceleration of 1G must expend an Energy Block every 24 hours or fraction thereof. A ship that is travelling at 2.5G must expend an Energy Block every 6 hours. A ship that is travelling at 5G must expend an Energy Block every hour. A spaceship that is lifting off from the surface of a world must expend an additional number of Energy Blocks equal to the size of the world (in AU's). Lift-off does not increase the voyage time.

The GM must make sure that any spaceship he enters into play possesses the requisite energy to complete any voyage planned for it. Sometimes two or three energy pods will be required for a large ship travelling to and from jump points.

[33.3] Any person in a spaceship undergoing high G forces must have an internal gravity web.

A gravity web contains and protects a person's organs and arteries during the strain of high G acceleration and deceleration. The web is inserted throughout the person's body in a complex series of operations. All star sailors are provided with a gravity web, as are many members of the Astroguards. A character may undergo an operation for gravity web implantation on any world with a CIV Level of 7 or higher. The operation costs 15 Trans and the character will be in the hospital for 7 days.

A character without a gravity web cannot survive an extended period of acceleration or deceleration greater than 2.5G.

When playing DeltaVee, a character without a gravity web cannot survive a velocity change of more than 2 (5G) in a single Command Phase.

[33.4] A character without a spaceship may travel between worlds in a star system by booking passage on a commercial vessel.

The frequency of commercial voyages between two worlds depends on the class of their spaceports. The Interplanetary Route Chart is used to determine the type of route (if any) that exists between any two worlds in the same system. The Spaceport Class of the destination world is cross-referenced with the Spaceport Class of the world of departure to yield the type of route: course green, course amber, or course red. The frequency and quality of service on these routes correspond to those of the jump routes of the same color designations in 32.4.

The price of standard passage on a commercial interplanetary spaceship equals the difference in the voyage (in AU's) multiplied by 40 MIL. If the spaceship must lift off from the surface of a world (Spaceport Class 3 or 4) the fare is increased by 50%. In any case, the minimum cost for any interplanetary voyage is 250 MIL (including a voyage from a planet to one of its moons, and vice versa).

A character travelling on a course green voyage of at least one AU may book luxury passage at 2.5 times the standard fare. He receives the comforts of luxury passage described in 32.4.

A commercial vessel always travels at a constant acceleration/deceleration of 1G.

[33.5] Interplanetary Route Chart
See page 65.

[34.0] Space Combat
When the characters are in a spaceship that encounters another spaceship, combat may occur. If possible, the characters should avoid spaceship combat: it is deadly. However, situations will certainly arise where combat is inevitable. When this happens, the GM and the players use the DeltaVee tactical space combat system to resolve the battle. DeltaVee is complete unto itself and may be
used as is, if the characters are in a ship that they are not controlling. The following rules modify the system, allowing characters to participate directly in the conduct of combat.

Combat burns up energy at a much faster rate than steady, uninterrupted travel. Conserving enough energy during battle so that the ship may get somewhere if it survives should be as much on the characters’ minds as victory.

[34.1] The GM sets up the tactical maps and the spaceship counters.

Keeping in mind that each hex on the map is 20,000 km across, the GM may arrange the maps in any configuration and may place planets, asteroids, the characters’ spaceship, and any spaceships encountered on the maps to match the situation he is describing. Unless the spaceships are near a world or jump point that they are travelling to or from, they will be travelling much faster than the velocities in DeltaVee. In this case, the Velocity markers assigned show their velocities relative to each other. The slowest ship should be assigned a 0 Velocity marker, and the others should have markers indicating their velocities in comparison with the slowest ship. If the GM wishes, he may use markers of his own devising to show velocities above 9.

[34.2] Before beginning battle, each character declares which part of the ship he is in.

When in the bridge or certain pods of a spaceship, a character may use his space combat skills, as described in 9.2. At the beginning of any friendly Command Phase during space combat, a character may declare that he is moving to another part of the ship. If he does so, his skills may not be used at all for that Command Phase and the next friendly Fire Phase. At the beginning of the following friendly Command Phase, the character may again use his skills (as allowed by his new location). Unless the GM determines Skill Levels for the crew manning a spaceship that the characters encounter, he should use the DeltaVee system unmodified for their maneuvers, commands, and fires.

[34.3] A character in a compartment of a spaceship that is hit by spaceship fire may suffer hits.

A character in a compartment that becomes vulnerable is not harmed. A character in a compartment that becomes damaged must use the Hit Table, as if struck with a Hit Strength of 6 (see 30.1). A character in a compartment that is destroyed must use the Hit Table, as if struck with a Hit Strength of 20. If he survives this injury, and he does not pass out, he may immediately move to any other compartment. If he passes out as a result of the injury, he dies.

Spaceship armor in DeltaVee uses a different classification system than personal and vehicle armor in Universe. If a situation should arise where a spaceship’s armor is hit by forces other than spaceship weaponry, the Armor Classes of each pod and compartment can be translated into projectile and beam Defense Ratings as follows: Armor Class 0: 2/2; Armor Class 1: 4/4; Armor Class 2: 6/6. A spaceship’s force field may never be pierced by any projectile weapon.

UNIVERSE, PAGE 46

ACCIDENT PROCEDURE SUMMARY

A possible accident may occur if an accident event is derived from the Encounter Table (see 27.0) or if a character declares that he is attempting a task that the GM considers risky. The following summary covers procedures detailed in 11.2, 27.8, and 38.0.

If character driving a land, marine, air, or space vehicle:

1. GM determines base chance to avoid accident:
   - Common accident, easy task: 75%
   - Rare accident, difficult task: 50%
   - Unique accident, formidable task: 25%

2. Add applicable modifiers to chance:
   - If character has appropriate vehicle skill (Pilot skill if spaceship): Dexterity + Sub-skill Level
   - Performance Modifier of vehicle (from 21.1, 21.2, 21.3, or 31.2)
   - Character’s Environ and/or Gravity Skill Levels (optional)

3. Involved player rolls percentile dice:
   - If dice result equal to or less than modified chance, no accident occurs.
   - If dice result greater than modified chance, GM subtracts modified chance from dice result and locates difference on Hit Table (30.9) to determine type of damage vehicle incurs. If heavy damage (or worse) incurred, characters aboard may be hurt; see 11.2, step 3 for details.

If character wearing equipment suit, body armor or jet pack:

1. GM determines base chance to avoid accident:
   - See step 1, above.

2. Add applicable modifiers to chance:
   - If character has EVA, Body Armor or Jet Pack skill (as appropriate, Body Armor or EVA skill may be used in expedition suit): Agility + Skill Level
   - Character’s Environ and/or Gravity Skill Levels (optional)

3. Involved player rolls percentile dice:
   - If dice result equal to or less than modified chance, no accident occurs.
   - If dice result greater than modified chance, GM subtracts modified chance from dice result and locates difference on Hit Table to determine type of damage equipment and character incur

Notes:
The optional modifiers listed above for gravity and environ skill levels are not required for play and are not mentioned in the rules themselves. Their use will increase the players’ feeling for the natural adaptability of their characters at the expense of additional calculation. If the GM wishes to use these modifiers, he should state this at the beginning of play and they should be used regularly.

If a character is involved in a possible accident when not using any equipment, either of the following sets of modifiers may be added to the base chance.

If character is attempting agility related task:
- Agility Rating
- (Gravity Skill Level + Environ Skill Level) Exception: if sum is negative, do not square.

If character is attempting dexterity or strength related task:
- Dexterity or Strength Rating
- Gravity Skill Level Exception: if negative, do not square.

BASE REPAIR TIME SUMMARY (in Hours)

Robot (Civil Level 7): 3
Robot (Civil Level 8): 6
Weapons (Civil Level 1-6): 1
Weapons (Civil Level 7, 8): 2
Body Armor: 3
Expedition Suit: 2
Spaceship Bridge: 24
Spaceship Engine: 24
Spaceship Pod: 12
Spaceship Forcefield: 12
See the equipment charts on pages 54, 55, and 56 for other repair times.

MONETARY SUMMARY

One Transfer (Tran) = 1000 Millitransfers (Mils)

One Tran is the equivalent of 500 1980 dollars. One Mil is the equivalent of 50 cents. Any amount of money may be carried by a character using a federal credit card, encoded with the current balance of the individual’s account. The card is as good as cash on any world with a Civ Level of 5 or higher and at any spacecraft. Cash comes in a variety of coin denominations, including coins representing one half and one quarter mil each.
**DeltaVee**  
Tactical Space Combat for *Universe*

The space combat system for *Universe* is explained in a separate game, *DeltaVee*, available at hobby and game stores. For those players who do not have a copy of *DeltaVee*, the following charts and explanations for that game summarize information about spaceships necessary to the play of *Universe*. This information does not allow players to execute space combat.

**Note:** A non-streamlined spaceship hull may carry two Energy pods using only one point of pod capacity.

### SPACESHIPS

The 12 common spaceship classes vary widely in size and quality. Four industrial concerns produce the spaceships:

- **Terwillicker Spaceworks, Inc.** manufactures the *Terwillicker-5000*, a high-quality two-person craft; and the *Terwillicker-X* fighter, an innovative adaptation of the 5000 designed for military use.
- **Blades Research Institute** produces military craft under long-term contract. The *Dagger*, *Sword*, and *Spear* Class ships are their most successful models.
- **Harmonics, Inc.** specializes in finely crafted ships for government and high-level corporate use. The *Piccolo*, *Flute*, and *Clarinet* represent the top of their line.
- **The Corco Group** manufacture a large line of commercial vessels, often sacrificing performance for economy. The *Gamma*, *Zeta*, and *Mu* Classes are well-suited for transport in safe regions. The *Iota* is designed to appeal to merchants working in dangerous areas.

### PODS

A pod is a compartment serving a specific function that is attached to or enclosed in a spaceship hull. The number of pods a ship possesses and the nature of those pods make each ship in *Universe* distinct.

### CHART TERMS

- **Number of Pods** that the hull may carry.
- **Energy Units** the hull carries. The *Universe* energy units, however, are not the same as those used in other games. Each unit is worth 1000 points of energy.
- **Energy Burn Rate** is the number of Energy units expended when the hull expends one Energy block.

- **Streamlined** craft are capable of entering an atmosphere and landing on a world.
- **Civ Level** of a hull or pod indicates its sophistication and availability.

- **Firearm Class** indicates the quality of a hull’s basic laser weaponry. All hulls possess some kind of firearm.
- **Armor Class** and **Forcefield Class** range from 0 (no protection) to 2 (excellent protection).
- **Laser/Particle Weapons** (in addition to the hull’s firearm) are included in some pods.
- **Missiles** (unguided, guided, intelligent, and MIMS missiles) are provided in some pods. If so, their number is indicated.

- **Velocity Rating**, ** Maneuver Rating**, **Target Program**, **Battle Commands**, and **Number of Fires** are used in space combat only; see *DeltaVee*. 
UNIVERSE

Charts & Tables

Note that pages 49 through 65 contain all the Charts and Tables required by the Gamesmaster to run a game of Universe. Duplicate copies of many of these Charts and Tables, suitable for use by the players during a game, can be found on pages 99 through 106.

[5.1] CHARACTER HERITAGE
Potential Multiplier and Study Points

<table>
<thead>
<tr>
<th>DIE</th>
<th>POTENTIAL MULTIPLIER</th>
<th>SUMMARY OF POTENTIAL MULTIPLIERS</th>
<th>STUDY POINTS RECEIVED</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>½ (Poor)</td>
<td>4 or fewer</td>
<td>6</td>
</tr>
<tr>
<td>2-3</td>
<td>1 (Below Average)</td>
<td>4½ to 6½</td>
<td>5</td>
</tr>
<tr>
<td>4-6</td>
<td>2 (Average)</td>
<td>7 to 9½</td>
<td>4</td>
</tr>
<tr>
<td>7-9</td>
<td>3 (Above Average)</td>
<td>10 to 11½</td>
<td>3</td>
</tr>
<tr>
<td>10</td>
<td>4 (Exceptional)</td>
<td>12 or more</td>
<td>2</td>
</tr>
</tbody>
</table>

To determine potential multiplier for physique, coordination, intellect, and social background, use one die and locate the result under “Potential Multiplier.” After all four potentials are determined, add all four multipliers together to determine how many Study Points the character receives under the “Study Points Received” column.

<td>200 Trans</td>
<td>−3</td>
</tr>
<tr>
<td>21</td>
<td>Wealthy dilettante</td>
<td>200 Trans</td>
<td>−4</td>
</tr>
</tbody>
</table>

See 5.6 for explanation of use.

### [6.6] CHARACTERISTIC GENERATION TABLE

<table>
<thead>
<tr>
<th>PERCENTILE DIE RESULT + MODIFIER</th>
<th>CHARACTERISTIC RATING</th>
</tr>
</thead>
<tbody>
<tr>
<td>7 or less</td>
<td>1</td>
</tr>
<tr>
<td>8–15</td>
<td>2</td>
</tr>
<tr>
<td>16–24</td>
<td>3</td>
</tr>
<tr>
<td>25–34</td>
<td>4</td>
</tr>
<tr>
<td>35–57</td>
<td>5</td>
</tr>
<tr>
<td>58–83</td>
<td>6</td>
</tr>
<tr>
<td>84–96</td>
<td>7</td>
</tr>
<tr>
<td>97–108</td>
<td>8</td>
</tr>
<tr>
<td>109–119</td>
<td>9</td>
</tr>
<tr>
<td>120–129</td>
<td>10</td>
</tr>
<tr>
<td>130–139</td>
<td>11</td>
</tr>
<tr>
<td>140 or more</td>
<td>12</td>
</tr>
</tbody>
</table>

When generating the Mental Power Rating, divide rating by 2 (rounding fractions down). An Agility Rating of less than 5 is considered a 5. See 6.4 for explanation of use.

### [5.8] INITIAL SKILL POINTS

IF THE MODIFIED RESULT IS: 0 or less 1–3 4–6 7–9 10 or more
THE CHARACTER RECEIVES: 1 Initial Skill Point 2 Initial Skill Points 3 Initial Skill Points 4 Initial Skill Points 5 Initial Skill Points

Roll one die and add the Initial Skill Point Modifier (listed with character's social standing on the Social Standing Table) to the die result.

### [6.5] CHARACTERISTIC MODIFIER CHART

<table>
<thead>
<tr>
<th>CHARACTERISTICS</th>
<th>STRENGTH</th>
<th>ENDURANCE</th>
<th>INTELLIGENCE</th>
<th>INTELLECT</th>
</tr>
</thead>
<tbody>
<tr>
<td>Theoretical Science</td>
<td>0 0 0 0 8 2 0 0 0</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Applied Science</td>
<td>0 0 4 0 8 0 0 0 0</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Business</td>
<td>0 0 0 0 0 0 2 0 4</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Humanities</td>
<td>0 0 0 0 6 2 0 4 15</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>The Mind</td>
<td>0 2 0 0 4 6 0 0 25</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>The Body</td>
<td>8 4 4 4 0 0 0 0 15</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>The Military</td>
<td>4 5 0 4 0 0 5 0 25</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>General</td>
<td>1 1 1 1 1 1 1 1 1</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Modifiers are applied to the percentile dice roll for the listed characteristic if the character studied the listed field. All applicable modifiers for a single characteristic are added together. Then the total is multiplied by the Potential Multipliers that apply to that characteristic. See 6.4 for further explanation.

### [7.8] PROFESSION TABLES

#### Employment Table

<table>
<thead>
<tr>
<th>DECLARED YEARS OF EMPLOYMENT</th>
<th>DIE</th>
<th>4</th>
<th>8</th>
<th>12</th>
<th>16</th>
<th>20</th>
</tr>
</thead>
<tbody>
<tr>
<td>1–2</td>
<td>4–8</td>
<td>12</td>
<td>20</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>3–5</td>
<td>4–8</td>
<td>12</td>
<td>16</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>6–8</td>
<td>4–8</td>
<td>12</td>
<td>16</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>9–10</td>
<td>4–8</td>
<td>12</td>
<td>16</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

A character in the thinker or colonist profession does not use this table. See 7.3 for explanation.

### Effects of Age Table

<table>
<thead>
<tr>
<th>DIE + AGE</th>
<th>PHYSICAL CHARACTERISTIC POINTS LOST</th>
</tr>
</thead>
<tbody>
<tr>
<td>34 or less</td>
<td>0</td>
</tr>
<tr>
<td>36, 38</td>
<td>1</td>
</tr>
<tr>
<td>39, 40</td>
<td>2</td>
</tr>
<tr>
<td>41, 42</td>
<td>3</td>
</tr>
<tr>
<td>43, 44</td>
<td>4</td>
</tr>
<tr>
<td>45, 46</td>
<td>5</td>
</tr>
<tr>
<td>47 or more</td>
<td>7</td>
</tr>
</tbody>
</table>

See 7.4 for explanation.

### Skill Point Table

<table>
<thead>
<tr>
<th>MODIFIED DIE RESULT</th>
<th>YEARS OF EMPLOYMENT</th>
</tr>
</thead>
<tbody>
<tr>
<td>2–5</td>
<td>4 8 12 16 20</td>
</tr>
<tr>
<td>6–9</td>
<td>2 5 7 8</td>
</tr>
<tr>
<td>10–13</td>
<td>2 6 8 9</td>
</tr>
<tr>
<td>14–17</td>
<td>3 6 8 10</td>
</tr>
<tr>
<td>18–21</td>
<td>3 7 9 11</td>
</tr>
<tr>
<td>22–26</td>
<td>4 7 10 12</td>
</tr>
<tr>
<td>27–32</td>
<td>4 8 11 13</td>
</tr>
</tbody>
</table>

Roll one die and add the character's Intelligence Rating and the Skill Point Modifier for his profession to the die result. See 7.5 for explanation of use.

### Benefits Table

<table>
<thead>
<tr>
<th>1 DIE + ACTIVE YEARS IN PROFESSION</th>
<th>BENEFIT LEVEL</th>
</tr>
</thead>
<tbody>
<tr>
<td>5–10</td>
<td>A</td>
</tr>
<tr>
<td>11–14</td>
<td>B</td>
</tr>
<tr>
<td>15–18</td>
<td>C</td>
</tr>
<tr>
<td>19–23</td>
<td>D</td>
</tr>
<tr>
<td>24–28</td>
<td>E</td>
</tr>
<tr>
<td>29–30</td>
<td>F</td>
</tr>
</tbody>
</table>

Explanation of each result is listed in appropriate profession. See 7.7 for explanation of use.
[10.4] **PSIONIC BACKLASH TABLE**

<table>
<thead>
<tr>
<th>PERCENTILE DICE RESULT</th>
<th>EFFECT ON PSIONIC CHARACTER</th>
</tr>
</thead>
<tbody>
<tr>
<td>+ 10 or less</td>
<td>No effect.</td>
</tr>
<tr>
<td>+11 to +20</td>
<td>Shock check (see 30.3).</td>
</tr>
<tr>
<td>+21 to +30</td>
<td>Character is automatically shocked.</td>
</tr>
<tr>
<td>+31 to +40</td>
<td>Character is shocked; loses one die roll of points from his Endurance Rating.</td>
</tr>
<tr>
<td>+41 to +55</td>
<td>Character passes out; Endurance Rating reduced to 0. Psionic rig suffers superficial damage.</td>
</tr>
<tr>
<td>+56 to +70</td>
<td>Character passes out; Endurance Rating reduced to 0. Mental Power Rating reduced by 1 (see 10.3). Psionic rig suffers light damage.</td>
</tr>
<tr>
<td>+71 to +85</td>
<td>Character passes out; Endurance Rating reduced to 0. Mental Power Rating reduced by 2 (see 10.3). Psionic rig suffers heavy damage.</td>
</tr>
<tr>
<td>+86 to +100</td>
<td>Character passes out; Endurance Rating reduced to 0. Mental Power Rating reduced to 1 (see 10.3). The character may use no psionic skills until cured (see 10.5). Psionic rig partially destroyed.</td>
</tr>
<tr>
<td>+101 or more</td>
<td>Character is dead. Psionic rig destroyed.</td>
</tr>
</tbody>
</table>

*When checking for psionic backlash after a hyperjump attempt, roll percentile dice and add the modifier from the Hyperjump Table to the dice result. See 10.3 for detailed explanation of use.*

[12.3] **TREATMENT RESULTS TABLE**

<table>
<thead>
<tr>
<th>TOTAL POINTS LOST</th>

**MODIFIERS:**
- -30 if good is abundant on world or is exported from world.
- +30 if good does not exist or is not manufactured on world. (See the World Resource Table, pages 48 and 49, for explanation of above modifiers.)
- +50 if item is one Civ Level higher than that of the world.
  - Multiply percentage by 10 if item is two Civ Levels higher than that of the world.
  - Multiply percentage by the Law Level of the world if item is illegal (or restricted, if purchaser does not have permit).
  - Variable modifier may be applied when using trading skill.
SKILL SUMMARY

Skill: How the skill is used. Related equipment/EP gain.

MILITARY SKILLS

T> Move secretly, enemy unaware: (15 × Terrain Value)%
T> Move secretly, enemy aware: (5 × Terrain Value)%
T> Close combat, enemy unaware: 30%
T> Ranged fire, enemy unaware: 50%
None/0, 1.

Artillery: BC – 1 per 100 meters distance from target + IN + SL.
Mounted Gun/0, 1.

Battlefield: Initiative = Die Roll + SL (doubled if NPC);
Willpower Check = May use SL instead of Mental Power;
Encounter + SL modifies Awareness Check (see 28.2).
None/0 (Initiative roll only), GM assigns point for successful battle plan.

Blades: Close Combat Strength = DX or AY + SL — Weapon Hit Strength Thrown Weapon BC + DX + SL.
Dagger or sword/0.

Body Armor: All EVA attributes included in this skill; ability to use augmented body armor (see 29.2);
Close Combat Strength = ST + Hit Strength of Armor + SL.
Protective Attire/0, 1 (accident); 0 (close attack).

Demolitions: BC + DX + SL. Explosives/0, 1, 2.

EVA: Encumbrance Rating of attire is reduced by SL (26.4, 29.2);
Avoid a Suit/Armor Accident = BC + AY + SL.
Protective Attire/0, 1 (accident).

Jet Pack: Avoid a Jet Pack Accident = BC + AY + SL (27.8, 29.3).
Jet Pack/0, 1 (accident).

Unarmed Combat: Close Combat Strength = DX or AY + SL (reduce Level by 1 when fighting a creature).
None/9, 0.

Gun: BC + DX + SL.
Gun/0.

Bows: BC + DX + SL.
Short Bow, Long Bow, or Cross Bow/0.

Handguns: BC + DX + SL.
Pistol, Needle Pistol, Laser Pistol, or Stun Pistol/0.

Grenades: BC + DX + SL (ST, when throwing great distance).
Any grenade type/0.

Laser/Stun Pistol: BC + DX + SL.
Laser or Stun Pistol/0.

Longerme: BC + DX + SL.
Musket, Carbine, or Needle Rifle/0.

Machine Guns: BC + DX + SL.
Submachine Gun or Emplaced Machine Gun/0.

Paint Gun: BC + DX + SL.
Paint Gun/0.

Gunnery: See 9.2.
Burster, Hunter Pod, Weapon Pod, or Arsenal Pod/1.

Missile Guidance: See 9.2.
Hunter Pod, Weapon Pod, or Arsenal Pod/see 9.2.

Pilot: See 9.2.
Space Ship, Shuttle, or Battlecraf t/see 9.2.

Space Tactics: See 9.2.
Space Ship/see 9.2.

PSIONIC SKILLS

Life Sense: SL subtracted from awareness chance during encounter.
T> Perception of a creature’s IN is 20% + SL.
None/9 (awareness), 0 (perception).

Mind Control: 10% + MP + SL — target’s MP.
Psionic Rig increases range/0, 1.

Spaceship with hyperjump engine; Standard Jump Pod (+1);
Augmented Jump Pod (+2)/0, 1, 2, 3.

Psionic Communications: Communication Chance = 10% + MP + SL — receiver’s MP + receiver’s SL.
Psionic Rig increases range/0.

Psionic Boost: SL + MP + SL.
Psionic Rig (+2)/0.

Psychokinesis: BC = 10% — World Size + MP + SL.
Psionic Rig increases effectiveness/0.

Psion Tech: BC + IN + SL.
Electrokits increases Skill Level; see 22.0/0, 1, 2.

ALL VEHICLE SKILLS

BC to avoid accident (25%, 50%, or 75%) + Vehicle Performance Modifier + DX + SL.
See 11.0/0, 1 (accident check or after 30 hours driving).

SCIENTIFIC SKILLS

All: BC + IN + SL.

Astronomy: T> Locate unexplored planet (when in system space): 90%.
T> Locate uncharted planet (when in system space): 70%.
T> Locate own position after minor jump error: 60%; after major jump error: 40%; after randomized jump: 20%.

Civ Level 8 SpaceShip (+4), Explorer Pod (+1), Survey Pod (+2)/0, 1, 2, 3.

Biology: SL is reduced by 2 when dealing with non-carbon based life (to a minimum of 1).
T> Perceive during a creature encounter: 10%.
T> Perceive with a bioscanner: 20%.
T> Examine with a bioscanner (requires one hour): 30%.
Civ Level 7 Bioscanner, Civ Level 8 Bioscanner (+1), Medical Pod (+1), Explorer Pod (+2), Robot Biosystem (+2), Bio Research Pod (+3)/0, 1.

Chemistry: T> Find abundant chemicals: 70%.
T> Find abundant and trace chemicals and complex compounds: 25%.
T> Synthesize simple compound: 20%.
T> Synthesize complex compound: 5%.
Civ Level 5 Chem Lab, Civ Level 6 Chem Synthesizer, Explorer Pod, Civ Level 7 Chem Lab (+1), Bio Research Pod (+1), Civ Level 8 Chem Synthesizer (+2), Robot Chemical System (+2)/0, 1.

Diagnosis: T> Diagnose ailment being: 90% – (% number of hits patient received).
If result is above Chance, diagnosis has failed; 0 to 20 less, successful diagnosis; 21 to 40 less, successful and treatment SL + 1; 41 to 70 less, successful and treatment SL + 2; 71 or more less, successful and treatment SL + 3.
First Aid Kit, Spaceship, Civ Level 6 Mediscanner (+1), Bio Research Pod (+1), Civ Level 8 Mediscanner (+2), Medical Pod (+3), Robot Medical System (+3)/0, 1, 2.

Geology: T> Find abundant minerals and resources: 70%.
T> Find abundant and trace minerals and resources: 30%.
T> Scan for three minerals or resources with a geoscanner: 60%.
T> Scan for all minerals and ores more than 3 meters or more wide: 50%.
T> Scan for volcanic activity: 60%.
T> Scan for all tunnels and fissures: 20%.
Geo Lab, Civ Level 6 Geoscanner, Explorer Pod, Bio Research Pod (+1), Civ Level 8 Geoscanner (+2), Robot Geo System (+2)/0, 1.

Physics: T> Determine type, intensity, danger of energy with energy scanner: 80%.
T> Determine energy powering device or non-organic creature: 70%.
T> Determine energy or force type which caused effect: 50%.
T> Determine possible effect of energy or force beforehand: 40%.
T> Tap an energy source: 20% (use lower of Physics or Energy Tech SL).
Energy Scanner, Explorer Pod, Bio Research Pod (+1)/0, 1, 2.

Planetology: T> Determine hydrography % and locate land and liquid masses: 85%.
T> Determine temperature of environments: 75%.
GAMESMASTER'S GUIDE, PAGE 53

Determine atmosphere: 65%.
Determine general resources: 50%.
Determine contours: 40%.
Determine dominant feature by environ: 20%.
Determine general resources of environs: 10%.
Determine detailed geography and geology of all environs including sites: -5%.
Survey or Explorer Pod needed for task with 40% or less BC.
Survey Pod needed for task with 10% or less BC. A single dice roll applies to the choice of tasks with a higher %.
Spaceship with at least 4 pod capacity, or with Explorer Pod (+1), or with Survey Pod (+3)/0, 1, 2, 3.
Programming: Skill reduced by 2 with a robot (to a minimum of 1). 
Gain control of robot without controller: 30% (requires Electrokit or Robot Kit).
Call up unrestricted information in a computer: 90%.
Call up restricted information in a computer: 30%.
Call up top-level secrets in a computer: 10%.
Alter protected computer information: 10%.
Computer or Robot/0, 1.

Treatment:
Treat an ailment being: 1%
See Diagnosis and 12.3/0, 1, 2.

TECHNICAL SKILLS
All: BC+IN+SL/0, 1, 2.

Compu/Robot Tech: -2 to Skill Level when repairing robots.
Basic Repair Kit, Com Level 7 Electrokit (for computers, +1), Com Level 8 Electrokit (for computers, +2), Robot Kit (+1), Robot and Equipment Pod (+3).

Construction: See 13.0.
Electro Tech: -2 to Skill Level when repairing Com Level 8 item.
Basic Repair Kit, Com Level 7 Electrokit (+1), Com Level 8 Electrokit (+2), Robot and Equipment Pod (+3), Radio.

Energy Tech: See 13.0.

Spaceship Tech: -2 to Skill Level when repairing spaceship engine or armor.
Com Level 6 Spaceship Kit (superficial damage), Com Level 7 Spaceship Kit (light damage), +1, Com Level 8 Spaceship Kit (heavy damage, +2).

Suit Tech: -2 to Skill Level when repairing armor.
Basic Repair Kit, Suit Kit, Com Level 7 Armor Kit (+1), Com Level 8 Armor Kit (+2), Robot and Equipment Pod (+3).

Vehicle Tech: -2 to Skill Level when repairing military or air vehicle, or armor on any vehicle.
Basic Repair Kit, Com Level 6 Vehicle Kit (+1), Com Level 7 Armor Kit (+1), Com Level 8 Vehicle Kit (+2), Com Level 8 Armor Kit (+2), Robot and Equipment Pod (+3).

Weapon Tech: -2 to Skill Level when repairing artillery and spaceship weapons.
Basic Repair Kit, Com Level 6 Weapon Kit (+1), Com Level 8 Weapon Kit (+2), Robot and Equipment Pod (+3), Spaceship Kit required to repair spaceship weapons.

INTERPERSONAL SKILLS

Diplomacy: Used for communications tasks; see 14.0.
None/0, 1, 2.

Disguise: BC+DX+SL/2.
Disguise to gain anonymity: 60%.
Disguise to resemble extensively observed person: 40%.
Disguise to resemble person briefly seen or in pictures only: 25%.
Disguise materials/0, 1, 2.
Economics: Price prediction requires 12 hours.
Determine price of an item: 35% - number of future weeks predicted +IN+SL.
Business Computer, Computer time, Interstellar Commlink/0, 1, 2.

Forgery/Counterfeiting: BC+DX+SL/2.
Forge commercial document: 50%.
Forge world or local government document: 30%.
Forge Federal document: 10%.
Counterfeit 100 Mil note: 10%.

Counterfeit 1 Tran note: 0%.
None/0, 1, 2, 3.

Gambling: BC+IN+SL/2.
Gamble at casino/gambling house: 35%, minimum bet 1 Mil, maximum bet 1 Tran.
Gamble at informal gathering in public place: 40%, minimum bet 1 Mil, maximum bet 100 Milis.
See 14.0 for betting and payoff procedures.
None/0, 1.

Law: BC+IN+SL/2.
Bribe authority to ignore criminal act: 20% (+1 every 100 Mils offered) -(10xLaw Level) (secret GM reduction for loyalty).
Convince authority that a criminal act is legal or that party is exempt: 10% - authority's Intelligence -(10xLaw Level).
Successfully defend innocent party: 35% + (10xLaw Level).
Successfully defend guilty party: 35% -(10xLaw Level).
None/0, 1, 2.

Linguistics: Knows number of languages equal to Skill Level. Chance to communicate during an NPC encounter is NPC's IN+character's IN+SL.
See 28.6, Procedure CC for communications with creatures.
Com Level 7 Translator (+1), Com Level 8 Translator (+2)/0, 1.
Recruiting: BC+EM+SL/2.
Hire NPC's in spaceport or urban: 50%.
Hire NPC's in sub urban or town: 30%.
Minimum time is 6 hours. See 14.0 for NPC pay and attributes.
None/0, 1, 2, 3.

Streetwise: Use for communications tasks; see Diplomacy, 14.0.
None/0, 1, 2.

Teaching: BC+EM+SL/2 student's IN.
See 14.0 for procedure.
None/0, 1, 2.

Trading: Chance of a successful bargaining: 20% + Empathy + SL.
None/0, 1.

ENVIRONMENTAL SKILLS

Agriculture: BC+IN+SL/2 (-2 when working with hydroponics).
Robot Agriculture System (+2)/0, 1, 2.

Asteroid Mining: BC+IN+SL/2.
Rock Blaster (+1), Robot Miner System (+2), Robot Geo System (+2)/0, 1, 2.

Enviros/Urban: Twice SL is subtracted from awareness chance during creature or NPC encounter. SL is added to initiative die roll. SL used in Ambush task.
None/1 SL increase per 8 weeks in environ.
Gravity: SL added to Action Round Movement Rate (see 29.2) and affects gravity-related accident (see 38.0).
None/1 SL increase per 8 weeks in gravity type.

Mining: BC+IN+SL/2.
Mine raw ore from an identified source: 25%.
Refine raw ore: 0%.
Rock Blaster (+1), Robot Miner System (+2), Robot Geo System (+2)/0, 1, 2.

Survival: BC+IN+(Survival SL+Enviro SL)/2. Survive in environs w/ the following:
Edible game and/or plants: 90%.
Arable land: 60%.
Any type of vegetation: 30%.
Water in environ: 0%.
On world with water: -50%.
On world with no water: -150%.
None/0, 1, 2.

Kay: Skill: How the skill is used. Related Equipment/EP Gain. BC:
Basic Chance. SL: Skill Level. This summary does not take precedence over sections 8.0-15.0. Related Equipment: Devices that are required to use the skill and/or that aid in using the skill are listed. Skill Level increases provided by various items of equipment are listed in parentheses. EP (Experience Point) Gain: If a die or dice roll conducted when the skill shows the listed digit on either die, one Experience Point is gained.

<td>-75 and below</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Results represent average temperature of the world; all temperatures are expressed in °F. See 24.3 for explanation.

**Die Roll Modifiers:**

- If the planet is closer to the star than the star’s biosphere, subtract 6 from the die roll.
- If the planet is further from the star than the star’s biosphere, add 6 to the die roll.

</table>

**How to Read the Result:** Roll percentile dice and locate the column corresponding to the Land/Liquid/Temperature combination of the environ. Read down the column until you locate the result which most nearly equals the percentile roll without being less than the roll. For example, rolling a 34 in the first column would yield an environ type of Barren/Peaks. See 24.5 for detailed explanation of use.

**Note:** All environs of the same water and temperature type which have not yet been assigned an environ type will be the type determined by the next percentile roll. 1-1: Environ type impossible; proceed down the column. Peaks: If the world size is 7 or greater, treat as Hill. Mountains: If the world size is 8, treat as Flat. If the Land/Liquid distribution is water only, this table is not used. However, if the GM wishes to check for ice in a water-only environ, roll using the water with minor islands column and ignore all non-ice results.

### [23.2] BINARY/TRINARY STAR SYSTEM SUMMARY

### Procedure

Take the appropriate number from each of the columns and add them together. If the world is resource rich, double this total. **Exception:** If the total is negative and the world is resource rich, divide the total by three (rounding toward zero). Subtract the world's star's distance from Sol from this new total. The result is the Development Value. Roll two dice and add the Development Value to the roll, and apply this result to the Table. **Exception:** A resource poor asteroid belt has a Development Value of 1; a resource rich asteroid belt has a Development Value of 6 (minus the LY distance from Sol). Remember that a modified die roll result that is less than zero is treated as zero.

## World Hydrograph Table

Results represent percentage of the world's surface covered with water. This table is not used for worlds which possess no atmosphere, or possess average temperatures below 0 or above 125. Such worlds automatically have no water. See 24.4 for detailed explanation of use.

## Land and Water Distribution Chart

[Diagram of land and water distribution chart]

</table>

**Modifiers:** Add 25 if world is Tolerable; add 50 if world is Earth-like. Roll a number of times equal to the World size if resource poor; roll a number of times equal to the World size +8 if resource rich.

**Price:** Given in Trans per refined gram, kilo, or ton. **Top/T:** Price fluctuates from that figure, down 50%. **Variable:** Price varies extremely, depending on availability on world.

**Notes:**
1. These include such metals as adamantane, beryllium, erbium, gadolinium, lead, manganese, mercury, nickel, potassium, rubidium, strontium, tin, and zinc. 2. These include such non-metals as argon, barium, chlorine, cobalt, fluorine, helium, iodine, krypton, sulfur, and xenon. See 25.7 for detailed explanation of use.
RESOURCE DEVELOPMENT

If a resource is not rolled, it does not exist on the world; if rolled once, the resource is in limited supply on the world; if rolled twice, the resource is in abundant supply on the world; if rolled more than twice, reroll the extra rolls.

After the resources of a world are determined, the Civic Level of the world is used to determine the development of those resources. Any letter codes listed under the Civic Level and lesser Civic Levels apply to the resource; locate the applicable letter codes below and note the information in the World Log.

Many letter code results indicate that a specific type of product is manufactured on the world. Such results do not automatically mean that all products of that type are readily available; the Civic Level of product must still be less than or equal to the Civic Level of the world. Result: Example: G indicates that simple aircraft are manufactured; however, if the Civic Level of the world was less than 6, a Dragonfly glider would not be manufactured there. Also, many results indicate that more than one resource is required to manufacture a product.

All types of equipment, robots, spaceship vehicles are covered in these results, individually or in groups. Each result indicates that a product is manufactured or exported (that is, manufacture exceeds local demand) if the requisite resources are in limited or abundant supply. A product that is not manufactured on a world will generally cost more there than its base price (a +30 modifier is applied to the Actual Price Table, 18.0). A product that is manufactured will generally cost the same as its base price (no modifier is applied to the Actual Price Table). A product that is exported will generally cost less than its base price (a -30 modifier is applied to the Actual Price Table). If the players are selling or buying large quantities of resources, the Actual Price Table may be used in the same way. If the resource does not exist on the world, apply a +30 modifier; if the resource is limited, apply no modifier; if the resource is abundant, apply a -30 modifier.

A. The resource has been discovered in every environment and site in which it exists on the world (ignore result D).
B. Vegetables and Fruit. Manufactured if edible plants or arable land limited. Exported if edible plants abundant.
C. Chemistry Equipment (Chem Labs and Chem Synthesizers). Manufactured if platinum limited. Exported if platinum abundant and iron limited (or abundant).
D. The resource has been discovered in about half the environments and/or sites in which it occurs; specific locations are up to the GM.
E. Psionic Equipment (Psionic Rigs, Jump Pods, Augmented Jump Pods, Hunter Pods and Explorer Pods). Psionic Rigs manufactured if magnetic monopoles limited. Psionic Rigs exported and psionic pods manufactured if magnetic monopoles, other metals, and iron limited. Psionic pods exported if magnetic monopoles, other metals, iron abundant.
F. Energy for sub-light spaceship drives and fusion power plants. Manufactured if radioactive limited. Exported if radioactive abundant.
H. Holographic Equipment (Superoid Camera, Holographer, Robot Holographer System). Manufactured if other non-metals or cesium limited. Exported if iron, other non-metals, and cesium limited (or abundant).
J. Jet Aircraft (Jetpack, Jet, Air Car, Shuttle). Manufactured if titanium and iron limited. Exported if titanium and iron abundant.
K. Fertilizers. Manufactured if ammonia limited. Exported if ammonia abundant.
M. Tech Kits (all those listed in 22.0 and Rock Blaster). Manufactured if iron limited. Exported if iron abundant and any resource required to manufacture product repaired by kit abundant.
N. Unarmed Spaceship Hulls and Pods. Manufactured if iron and other metals limited. Exported if iron and other metals abundant. Available only on worlds with Class 3, 4, or 5 spaceships.
P. Recording Equipment (Audio Recorder, Still Camera, Robot Recorder System). Manufactured if silver limited. Exported if silver abundant and iron limited.
R. Facilities exist to refine resource wherever it has been discovered. If iron is refined, simple tools, bows, blades and metal cages are manufactured, but not others.
T. Textiles and clothes. Manufactured if light fiber plants limited. Exported if light fiber plants abundant.
V. Robot Systems (except those in H, P, BB). Manufactured if magnetic monopoles or other non-metals limited. Exported if magnetic monopoles, other non-metals, and iron limited.
W. Artillery and heavy ammunition (spaceship weapons and missiles). Manufactured if phosphorous and iron are limited. Exported if phosphorous, radioactive, and iron are abundant.
X. Robot Chassis. Manufactured if copper and iron limited. Exported if copper and iron abundant, and other iron limited.
Y. Armed Spaceship Hulls and Pods. Manufactured if iron and titanium limited. Exported if iron, titanium and other metals abundant. Available only on worlds with Class 3, 4, or 5 spaceships.
Z. Armored Land Vehicles (all vehicles in 21.1 with an armor rating above 4). Manufactured if iron and titanium limited. Exported if iron, titanium, and aluminum abundant.
AA. All Body Armor (all armor in 20.0). Manufactured if gold and iron limited. Exported if gold limited, iron limited, and chromium limited.
BB. Computer systems (Business Computer, Audio-sealed Case, and all robot systems composed only of software). Manufactured if other non-metals limited. Exported if other non-metals abundant and iron limited.
CC. Communications equipment (Identity and False Identity papers, all communications equipment in 22.0). Manufactured if silicon limited. Exported if silicon abundant and iron limited.
DD. Meat. Manufactured if edible game limited. Exported if edible game abundant.
EE. Scientific Equipment (all labs and scanners in 22.0 except Chem Labs and Synthesizers). Manufactured if Germanium limited. Exported if Germanium abundant and iron limited.
FF. Fossil Fuels. Manufactured if woodlike plants or organic chemicals (carbon) limited. Exported if woodlike plants and organic chemicals (carbon) abundant.
GG. Grain. Manufactured if arable land or edible plants limited. Exported if edible plants abundant.
HH. Explosives and Ammunition (plastic explosives, all grenades, projecticle bullets, needle bullets). Manufactured if organic chemicals (nitrogen) limited. Exported if organic chemicals (nitrogen), phosphorous and iron limited.
JJ. Projectile Weapons (Pistol, Needle Pistol, Machinegun, Submachinegun, Rifle, Carbine, Needle Rifle). Manufactured if iron limited; exported if abundant.
KK. Force Fields (Sun Pistol, Force Cage, Personal Force Field and energy pack, Spaceship Forcefield). Pistols, Cages and Personal Fields manufactured if copper or other metals limited. Pistols, Cages and Personal Fields exported, and Spaceship Fields manufactured if copper, other metals and iron limited. Spaceship Fields exported if copper, other metals and iron abundant.
LL. Medicines, drugs and poisons. Manufactured if exotic spices or ammonia limited. Exported if exotic spices or ammonia abundant.
MM. Beam Weapons (Paint Gun, Arc Gun, Needle Pistol, energy packs for same). Manufactured if other non-metals or crystals limited. Exported if other non-metals, crystals and iron abundant.
NN. Expedition Suits. Manufactured if chromium limited. Exported if chromium abundant and iron limited.
PP. Direct Lift Aircraft (Levator, Floater, Skimmer). Manufactured if magnetic monopoles and iron limited. Exported if magnetic monopoles limited, aluminum limited and iron abundant.

| No Encounter | 13+   | 31+   | 77+   | 76+   | 68+   | 66+   | 71+   | 82+   |

**Note:** Common, R: Rare, U: Unique. Note that creatures are subdivided into Creature Value categories which affect their likelihood of occurrence (see 27.1). Treat as no encounter if the characters are not involved in controlling or maintaining the spaceship, or if within the planet space of a world that has no human population. Treat as no encounter if the Law Level is 0 or 1. Treat as no encounter if the party is in an envion with no known human population, or if the party is travelling faster than 20 km per hour and have declared that they are not interested in passers-by. Treat as no encounter if the party has declared no interest in the wildlife of the area, or if there is no known life on the world. Treat as no encounter if the characters are travelling in a vehicle which they do not control.

</tbody>
</table>

**Terrain Value:** Affects daily and hourly movement rates of characters and vehicles (see 26.4). Action Round movement rates of vehicles (see 21.9), range of vision (28.3), and Hit Chance of weapon fire (29.5).

**Action Round Movement Modifier:** Affects movement rate of characters in an Action Round (see 29.2).

**Creature Value:** Affects likelihood of a creature encounter (see 27.1). **Creature Location:** Identifies creatures by number which may be encountered (see 27.6). **Terrain:** A terrain on water surface ranges from 1 to 3, depending on choppy or smooth face. Terrain Value when submerged ranges from 1.5 to 5, depending on depth and opacity of liquid. A Terrain Value of 1 is considered 0 when calculating Hit Chance of weapon fire.

</table>

See 28.4 for explanation of use.

A. Conduct Action Rounds until one side or the other is dead, captured, or escaped (thus concluding the encounter). B. Conduct an Action Round. The characters have the initiative but may not attack the creature in any manner. C. Conduct an Action Round, adding five to the creature’s initiative die roll. D. Conduct an Action Round. The creature has the initiative. Skip Step 4 of the Action Round. Each character may move as far as he would be allowed in one Action Round (see 29.2). Then, conduct an Action Round, adding eight to the creature’s initiative die roll. F. Conduct an Action Round. The creature has the initiative. G. Each character may move as far as would be allowed in one Action Round (see 29.2). Then, conduct interaction H. H. If the creature is able to attack without moving, conduct an Action Round, adding five to the creature’s initiative die roll. Otherwise, return to Encounter Step 5. I. If the creature is able to attack without moving, conduct interaction F. Otherwise, return to Encounter Step 5. J. The encounter is over (the creature, the characters, or both have left the area). K. The GM rolls one die and adds the creature’s Intelligence Rating (if any) to the result. If the modified die result is less than the creature’s Aggression Rating, conduct interaction F (the creature has mistaken the character’s actions for an attack). Otherwise, after time passes without incident, return to Encounter Step 5. L. Conduct an Action Round, adding five to the party’s initiative die roll. M. Each character may move as far as would be allowed in one Action Round (see 29.2). N. Time passes as neither side takes any action. P. The characters’ communication efforts seem to have no effect. If the creature has no Intelligence Rating, or the following check is not successful, time passes without incident; return to Encounter Step 5. The GM rolls percentile dice. If the result is less than the creature’s Intelligence Rating plus the highest Empathy Rating of those characters attempting communication, roll one die and refer to the Creature Reaction Table to see if the creature changes its reaction (the party retains the communicate strategy). If the creature possesses psionic powers, the square of one character’s Psionic Communication Skill Level may be used instead of an Empathy Rating. Q. Conduct an Action Round. The party has the initiative. Skip Step 4 of the Action Round. R. The creature shows no interest as time passes; return to Encounter Step 5. Exception: If the characters are attempting to communicate with a creature that is unaware of them, and the GM feels that the creature has been made aware by the character’s actions, he may roll one die and refer to the Creature Reaction Table to determine the creature’s reaction (the party retains the communicate strategy). S. Move the creature two hexes away from the characters. Then conduct an Action Round, giving the characters the initiative. T. Each character may move as far as would be allowed in one Action Round (see 29.2). At some point during the character’s movement, move the creature two hexes away from them. U. Move the creature two hexes away from the party. V. The party’s communication efforts have no effect. If the creature has no Intelligence Rating, or if the following check is not successful, it wanders away and the encounter is over. The GM rolls percentile dice. If the result is less than the creature’s Intelligence Rating plus the highest Empathy Rating of those characters attempting communication, roll one die and refer to the Creature Reaction Table again to see if the creature changes its reaction (the party retains the communicate strategy). If the creature possesses psionic powers, the square of one character’s Psionic Communication Skill Level may be used instead of an Empathy Rating. W. Move the creature away from the characters a number of hexes equal to its Agility Rating. Then conduct an Action Round, giving the characters the initiative. X. Move the creature away from the characters a number of hexes equal to its Agility Rating. Then each character may move as far as would be allowed in one Action Round (see 29.2). Finally, move the creature again (as above). Y. Move the creature away from the characters a number of hexes equal to its Agility Rating. Z. Conduct Interaction Q. Before returning to Encounter Step 5, roll percentile dice. If the result is equal to or less than the highest Intelligence or Empathy Rating among the characters, inform them that the creature has attempted communication. If the creature possesses psionic powers, the square of one character’s Mental Power Rating may be used instead of an Intelligence or Empathy Rating. AA. Each character may move as far as would be allowed in one Action Round (see 29.2). Then check to see if the characters become aware of the creature’s communication attempt in accordance with Interaction Z. Before returning to Encounter Step 5, roll two dice. If the result is less than the highest Intelligence or Empathy Rating among the characters, inform them that the creature is attempting to communicate. If the creature possesses psionic powers, the square of one character’s Mental Power Rating may be used instead of an Intelligence or Empathy Rating. OC. The party and the creature are attempting to communicate. Multiply the creature’s Intelligence Rating by the highest Linguistics Skill Level among the characters (minimum of one) or, if the creature has psionic powers, multiply its Intelligence Rating by the highest Psionic Communication Skill Level plus the highest Mental Power Rating possessed by one character. Roll percentile dice. If the result is equal to or less than the product calculated above, a successful means of communication has been established; the GM should play the creature as an NPC. If the dice result is greater than the product, return to Encounter Step 5. Only one dice roll is allowed per attempt, but as long as both sides choose to continue communicating, one die roll may be made each time. However, the chance of success is reduced by 10 percentage points for each additional attempt (this is cumulative). The passage of about three hours should be noted for each attempt.
### NPC Reaction Table

<table>
<thead>
<tr>
<th>Roll Difference</th>
<th>Key Word</th>
<th>NPC Reaction</th>
</tr>
</thead>
<tbody>
<tr>

<td>Tries to hide from party.</td>
</tr>
<tr>
<td>+71 to +80</td>
<td>Flee</td>
<td>Moves quickly away from party.</td>
</tr>
<tr>
<td>+81 to +90</td>
<td>Flee</td>
<td>Runs frantically away from party.</td>
</tr>
</tbody>
</table>

If the actions of the party cause a shift into Flee or Attack reaction from a less extreme reaction, the NPC receives the Initiative in the first Action Round. Upon reaching 0 (Friendly), no further shifting can occur for the party's benefit. If the die roll matches the NPC's Aggression x 10 exactly, interpret it to mean extreme interest, and sexual attraction if possible. A party can ruin this reaction by taking harmful actions. See 28.7 for explanation of use.

### Friendly Shifts (Towards 0)
- No weapons showing. Shift 2
- Character has military rank and NPC was/is in military. Shift 1
- Party spokesman's social standing within +1 of NPC's A. Shift 1
- Characters are disguised as allies or are allies. Shift 2
- Characters have correct papers/ID or forgeries which pass inspection. Shift 1
- NPC party outnumbers characters. Note a
- Characters adopt friendly attitude toward NPC's C. Shift 1
- Characters adopt helpful attitude toward NPC's C. Shift 2

### Hostile Shifts (Away from 0)
- Weapons showing. Shift 1
- Weapons ready. Shift 2
- Weapons aimed. Shift 4
- Party spokesman's social standing beyond ± 1 of NPC's A. Shift 2
- Characters' disguise is seen through. Shift 2
- Characters' false papers/ID are discovered. Shift 3
- Characters appear to be the enemy or are the enemy. Shift 4
- Characters outnumber the NPC party. Note a
- Characters cannot speak the NPC's language. Shift 2
- Characters adopt an angry or disdainful attitude. Shift 1
- Character(s) revealed as psionic; no NPC's psionic. Shift 2
- Characters actually threaten NPC's C. Shift 2

a. If the characters have not designated a spokesman, these shifts are ignored. B. The GM should shift 1 for every two characters or NPC's, rounding fraction up. C. These actions are verbally enacted by the players in their interplay with the GM.

---

### Fire Modifier Summary

**Chance to Hit Target...**

Base Hit Chance minus
- (Terrain Value x Terrain Multiplier) plus
- Character's Dexterity Rating (if skilled) plus
- Square of character's Skill Level

Any of the following modifiers that apply are also considered and are cumulative.

**Modifier if the Firing Character...**
- 20... moves on foot in same Action Round.
- 30... is driving a vehicle.
- 40... is in a moving vehicle.
- 50... is firing at more than one target in the same Action Round. Apply modifier to all fires for each target beyond one (e.g., if 3 different targets are fired at, all hit chances are reduced by 20).
- 60... is firing more than one shot with a recoil weapon in the same Action Round. Apply modifier to all fires for each fire beyond one (e.g., if 4 fires are made, reduce all hit chances by 15).

**Modifier if the Target is...**
- 40... Very small
- 30... Small
- 20... Large
- 40... One hex
- 20... Immobile

**Double Terrain Value...**
- Prone (Hit Impossible...)
- Miniscule

The GM may apply further subtractions if the target is partially obstructed by a distant object (remember, natural terrain features are accounted for by the Terrain Value and Multiplier). The Base Hit Chance and the Terrain Multiplier are listed on the Weapon Chart. The Terrain Value is listed on the Terrain Effects Chart. See 29.4 for additional weapon fire restrictions.

Non-Carbon Ne 10s R 10c P

Number results indicate Hit Strength (see 30.1 and 30.2). Ne: No effect. R: Creature raging; will attack for remainder of current Action Round and entire of next Action Rounds with its Combat Rating doubled. D: Creature dazed; blacks out for a number of Action Rounds equal to the roll of one die. When the creature regains consciousness, it will be raging (result R). P: The individual loses one point from his Endurance Rating (Combat Rating, if creature) each Action Round. When the rating reaches 0, he loses one point from his Strength Rating (Agility, if creature) each Action Round. When that rating reaches 0, the individual is dead. a: Apply any hits received to creature's Combat Rating only. b: Treat as stun strength (see 30.4) c: Apply hits in accordance with Hit Table. However, after a number of minutes (four Action Rounds apiece) equal to the roll of one die, the effects of the hits disappear (unless the individual dies as a result of the hits). See 30.7 for explanation of use.

### [32.3] HYPERJUMP TABLE

<table>
<thead>
<tr>
<th>PERCENTILE</th>
<th>HYPERJUMP CHANCE</th>
</tr>
</thead>
<tbody>
<tr>
<td>40 or less</td>
<td>No</td>
</tr>
<tr>
<td>39 - 20</td>
<td>Perfect jump; perpendicular to the plane of the system elliptic, directly above destination planet at the closest safe jump point.</td>
</tr>
<tr>
<td>19 - 0</td>
<td>Perfect jump; as above.</td>
</tr>
<tr>
<td>11 - 20</td>
<td>Perfect jump; as above.</td>
</tr>
<tr>
<td>10 - 30</td>
<td>Good jump; as above plus one die roll AU's beyond closest jump point.</td>
</tr>
<tr>
<td>21 - 30</td>
<td>Good jump; as above plus two dice roll AU's beyond closest jump point.</td>
</tr>
<tr>
<td>31 - 40</td>
<td>Minor jump error; as above plus percentile dice roll AU's beyond closest jump point.</td>
</tr>
<tr>
<td>41 - 50</td>
<td>Major jump error; a perfect jump to the star nearest the destination star with the same Spectral Class letter.</td>
</tr>
<tr>
<td>51 - 60</td>
<td>Major jump error; the GM uses one die to determine the random destination. The destination star is used as the zero point.</td>
</tr>
<tr>
<td>61 - 70</td>
<td>Jump randomized; the GM uses two dice to determine the random destination. Sol is used as the zero point.</td>
</tr>
<tr>
<td>71 - 80</td>
<td>Jump failure; the hyperjump does not occur and the spaceship's jump engine suffers heavy damage.</td>
</tr>
<tr>
<td>81 - 90</td>
<td>Jump randomized; the GM uses percentile dice to determine the random destination.</td>
</tr>
<tr>
<td>91 or more</td>
<td>Jump disaster; within the gravity wells of the destination star system. Use the Equipment Damage column of the Hit Table (30.9) to check for spaceship damage; roll two dice and add 15 to the dice result.</td>
</tr>
</tbody>
</table>

See 10.0 and 32.2 for explanation of use.

**Random Destination:** The GM secretly rolls the indicated die or dice three times to determine three coordinates. The first roll determines the X coordinate; the second roll the Y coordinate; and the third roll the Z coordinate. If the result of a roll is an even number, the coordinate is positive; if the result is an odd number, the coordinate is negative. The GM secretly locates the three coordinate results on the Interstellar Display and informs the characters that they are lost in space. A character may attempt an astronomy skill task to determine their location (see 12.0). If it is possible that a random destination will lie off the Interstellar Display.

### [32.5] INTERSTELLAR ROUTE CHART

<table>
<thead>
<tr>
<th>DESTINATION STARPORT</th>
<th>½</th>
<th>1</th>
<th>2</th>
<th>3</th>

<td>2/10/25</td>
<td>10/25/35</td>
<td>20/30/45</td>
<td>30/40/50</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

If the distance (in light years) is equal to or less than the first number, a green jump route exists. If the distance is greater than the first number but less than or equal to the second number, an amber jump route exists. If the distance is greater than the first and second numbers, but less than or equal to the third number, a red jump route exists. See 32.4 for details.

**Interplanetary Routes**
- Kryo to Titus
- Titus to Kryo

**Capital World**
- Kryo

**Federal Fleet**
- Astroguard Squadron

**Spacesports**
- Kryo (Class 2); Titus (Class ½)
The Adventure Guide provides an extensive treatment of the encounters that are likely — or unlikely — to occur in Universe. Some 80 creature and Non-Player Character encounters, as well as 10 spaceship encounters, are fully detailed and ready for the Gamesmaster's use. In addition, the Adventure Guide section features a complete, ready-to-play adventure, Lost on Laidley, which makes use of the Orionis Star System Log (see facing page) and four-page, full-color World Logs inserted elsewhere in this book. Note that other adventures, supplements, and accessories for Universe are published by SPI and available at your adventure game shop.

Lost on Laidley World Logs .................................................. Insert
The Universe Adventure Guide is divided into two distinct parts.

Encounters is used by the GM as a continuing source of creatures, non-player characters, spaceship encounters, and accidents that may be used from adventure to adventure. The players should not be allowed to see Chapter IX, Encounters, at all. Although they will eventually run out, the encounters presented will continue to be a source of inspiration and ideas for the imaginative GM.

Lost on Ladley is a single self-contained adventure, intended to be played once by the GM and the players during their first session of Universe. The Chapter presents a completely generated star system that serves three purposes. It is the setting for Lost on Ladley; it is a comprehensive example of world generation; and it may be the backdrop for adventures created by the GM. The players should be allowed to see only Sections 39 and 40 of the adventure. The contents of the remaining Sections will be revealed to them during play. After the adventure has been played, the format of Lost on Ladley and the ideas presented within it will continue to guide the GM in the conduct of his own adventures.

IX. Encounters

The following creatures, non-player characters, spaceships, and accidents are used by the GM when the appropriate encounter occurs (see 27.0). These lists should not serve as the sole source of encounters; after the GM has run a number of adventures, the supply will dwindle and the GM should start to develop his own encounters (although he may continue to get many ideas from these encounters). Federal encounters are not described in this chapter; they occur in accordance with 27.4.

[35.0] Creatures

The GM should choose one of the following 40 creatures when a creature encounter occurs. He consults the appropriate columns (usually a creature of average toughness) of his Creature Location Chart (27.6) to quickly find which creatures (by identity number) are eligible to appear in the party’s environ, and makes the selection from that group. An item-by-item explanation of the creature descriptions follows and detailed explanations of all creature powers are included in this section on page 73.

If a creature description indicates that more than one creature is present, the GM should roll one die, two dice or percentile dice (as seems appropriate to the situation) to determine how many creatures there are.

Each creature description provides the GM with a set of fixed and variable explanations of the creature’s attributes and is organized as follows:

- Identity Nr. Identifies the creature when referring to the Creature Location Chart.
- Restrictions. Aside from a creature’s environment location, additional restrictions may be placed on the creature’s environment, gravity, and water availability in which the creature may exist. Specific sites for the creature may also be suggested (see the list of sites in 24.8).
- Combat Rating. A quantification, ranging from 1 to 15, of the creature’s brute strength and endurance. Certain creatures are incapable of combat (represented by na). The creature’s strength when attacking (or defending in close combat) is equal to its Combat Rating times one half of its Agility Rating (rounded down). When a creature’s Combat Rating is reduced to 0, it passes out.
- Agility Rating. A quantification, ranging from 1 to 15, of the creature’s speed and nimbleness. Certain creatures are immobile (represented by na). A creature may move a number of hexes equal to its current Agility Rating each Action Round.

- Aggression Rating. A quantification, ranging from 1 to 12, of the creature’s self-preserving and aggression instincts. A creature’s Aggression Rating is used to determine the creature’s reaction to the party (28.4).

- Intelligence Rating. Some creatures have intelligence comparable to man’s, listed in such cases as a range of 1 through 12. Most creatures have no intelligence (marked na).

- NOTE: The preceding four ratings are listed as a range of three or four possible ratings for each creature, to allow variety when using the same creature type more than once. The GM should choose specific ratings from these ranges for each creature he uses.

- Initiative Percentage. A number, from 1 to 20, representing the creature’s awareness and ability to get the jump on its adversaries. Multiplied by the Terrain Value to determine the base awareness chance at the beginning of an encounter.

- Composition. The basic stuff of life that the creature is composed of. Types include humanoid, mammalian, terran-like, protein, carbon, and meta. Each creature has a primary composition and a secondary composition (followed by a percentage chance). The GM may roll percentile dice to see if the creature consists of the secondary composition; otherwise, the primary composition is used. Composition determines how a creature will be affected by drugs and toxins (30.7).

- Size. A category matching the target size categories in 29.7. These include very small, small, man-sized, large, one-hex, two-hex, and so on. An additional category, mini-scale, is used for bugs, microorganisms, and other creatures too small to fire a weapon at.

- Powers. A list of one to five powers the creature may possibly possess, with a percentage chance for each. Upon choosing a creature, the GM rolls percentile dice for each listed power to see if the creature has it. The powers and their variable availability give each creature a unique and ever-changing modus operandi. The GM may “mix and match” powers as much as he desires.

- Warning. A visual or sensory description to be read to the characters if they and the creature are aware of each other at the moment of encounter. A warning allows the characters to choose a strategy while knowing very little about the appearance and nature of the creature.

- Sight. A visual description to be read to the characters if they are aware of a creature that is itself not aware at the moment of encounter, or when they get their first good look at the creature later in the encounter. Sight describes a creature in objective visual terms, but reveals nothing that would not be immediately obvious. A character may not fire at a creature until he has heard this description.

- Perception. An analytical description read to the party if a character successfully perceives. Once sight has been established, the party may attempt the perception tasks listed in the life sense skill (10.0) and for the perception tasks listed in the biology skill (12.0). If the creature has a non-organic composition, the GM may allow a perception task using a scientific skill other than biology. Perception may reveal vulnerable areas of the creature, its intentions towards the party, its method of propulsion, attack, defense, and ingestion, and other information that will aid the party in dealing with the creature.

- Examination. A physiological description read to the party if a character successfully conducts examination (see the biology skill, 12.0). Examination may only be attempted if the creature is dead, unconscious or safely restrained. Examination may reveal strange fluids in the creature’s interior systems, entirely unique interior systems, valuable chemicals, drugs or poisons in the creature, and whether or not it is edible.

- NOTE: Warning, sight, perception, and examination may also reveal any powers possessed by the creature. Each power in Examination of Creature Powers lists one of these four categories and should be revealed to the party when they are read that category description (if they have not been made aware of the power by the creature’s actions). The GM may always alter or elaborate upon the wording of a description to better fit the situation. Many creatures do not possess all four description categories; such a creature possesses no attributes of interest that would be revealed in the category.

Certain creatures with bizarre attributes have special procedures for their use listed at the end of their description.

None of the creatures is given an actual name. If the characters are encountering a creature that they already know exist in the area, the GM should provide a name. If they are encountering a previously undiscovered creature, the GM should allow the party to agree upon a name.
CREATURE No. 1: Man-size
Restrictions: Light vegetation; woods; forest. Non-corrosive atmosphere. Gravity of 0.6 to 1.6. Temperature between 20° and 100°. Combat: 2–3
AY: 3–6
AG: 1–3
IN: na
Initiative: 2%
Composition: Mammalian; terran 10%
Power: Edible 5%; camouflage 5%; heightened smell 30%
Warning: You see a group of large four-legged entities which seem to be busy grazing on the local flora.
Sight: Each entity is two meters long and stands almost two meters high at the shoulder. They look like terran swine, but have elongated pointed snouts (about 10 to 16 meters long). They appear stupid and harmless.
CREATURE No. 2: Small
Restrictions: Light vegetation; woods; forest; marsh. Must have non-corrosive atmosphere. Gravity between 0.4 and 1.4. Temperature between 20° and 100°. Near water.
Combat: 1–3
AY: 1–2
AG: 2–3
IN: na
Initiative: 2%
Composition: Mammalian; terran 40%
Power: Dart shooting 100%; edible 10%; heightened hearing 30%; poison attack 35%; camouflage 5%
Warning: You hear a crashing and rooting in the nearby undergrowth.
Sight: A meter-long hedgehog-like entity covered in 15–20cm long quills. Locomotion is by slithering on belly since creature is legless.
Perception: Entity has anteater-type mouth and single eye. Shoots quills at threatening objects or entities if frightened.
Examination: Belly is not coated with quills. Entity is helpless if turned on back since powerful locomotive muscles are on its underside only.
CREATURE No. 3: Miniscule
Restrictions: Marsh; jungle. Must have non-corrosive atmosphere. Gravity between 0.4 and 2.0. Temperature above 50°. Combat: na
AY: 8–10
AG: 10–12
IN: na
Initiative: 15%
Composition: Terran; protein 20%
Power: Camouflage 100%; flight 100%; poison attack 100%; radar sense 60%; swim mind 30%
Warning: You notice that members of your party not wearing body armor are acting strangely, as if they are suffering from some illness, though the exact nature of the problem is not clear.
Perception: The illness will be diagnosed as a type of poison (viral, viral, paraletic, or psychotic, but not a spore) and will be connected with a one-inch long insect present in great numbers.
Examination: Insect has powerful quarter-inch sting in tail containing poison.
CREATURE No. 4: 2-hex
Restrictions: Light vegetation; woods; marsh; forest; jungle. Normal atmosphere only. Gravity of 0.6 to 2.5. Temperature between 50° and 150°.
Combat: 8–10
AY: 6–8
AG: 9–12
IN: na
Initiative: 15%
Composition: Terran; protein 10%
Power: Chitinous carapace 90%; tunneling 65%; entrapment 35%; poison attack 80%; regeneration 20%
Warning: You see segmented centipede-like entity 8 meters or more in length and 2 meters thick.
Sight: The entity has 8 to 10 body segments, a score of triple-jointed legs (with broad softly padded feet) and a set of mandibles.
Examination: The padded feet can be used as scoops to assist in rapid tunneling. Mandibles are the prime weapon.
CREATURE No. 5: Small
Restrictions: Light vegetation; woods; marsh; forest; jungle. Non-poisonous, non-corrosive atmosphere. Gravity of 0.6 to 1.6. Temperature between 100° and 175°. Combat: 4–6
AY: 4
AG: 3–5
IN: na
Initiative: 3%
Composition: Protein; terran 5%
Power: Adhesive secretion 100%; poison 100%; radar sense 20%; regeneration 5%; edible 60%
Warning: You observe an odd, cactus-like form of vegetation.
Sight: Vegetation is less than a meter tall and 20 centimeters in diameter and appears to be entirely smooth-skinned.
Examination: Plant has sweet center favored by local fauna who are induced to steer clear of it only by its defenses, a sticky substance that makes mouths adhere to it and a poison which it then secretes.
CREATURE No. 6: Man-sized
Restrictions: Light vegetation; woods. Any atmosphere other than thin. Gravity of 0.4 to 1.2. Temperature between 75° and 150°. Water must be readily available.
Combat: 4–7
AY: 8–10
AG: 3–5
IN: na
Initiative: 2%
Composition: Mammalian; terran 20%
Power: Swarm mind 100%; edible 10%; poison attack 80%
Warning: You observe a small herd (6–18) of what appear to be four-legged lizards. They are grazing on local flora.
Examination: Two additional legs (total of 6) partially retractable and tipped with sharp claws as main defense. Stands one meter tall and about 2 meters in length. Forked tail.
Perception: Entity is very fast for herbivore.
Examination: Entity is omnivore (not herbivore) with retracting fangs for tearing meat. Herd group moves and acts as one. Usually eats only flora and carrion, but will attack for meat if starving.
CREATURE No. 7: Very small
Restrictions: Light vegetation; woods; forest; marsh; jungle. Normal or poisonous atmosphere. Gravity of 0.6 to 1.2. Temperature between 50° and 200°. Combat: 1–2
AY: 10–12
AG: 4–6
IN: na
Initiative: 5%
Composition: Terran; protein 30%
Power: Edible 5%; swarm mind 60%; poison attack 5%; flying 100%
Warning: You hear a low droning buzz.
Sight: A score of 20-centimeter long insectile creatures much like dragonflies.
Perception: Entities are slightly territorial, but herbivorous.
CREATURE No. 8: Large
Restrictions: Woods; forest. Non-poisonous atmosphere. Gravity of 0.6 to 1.6. Temperature of 50° to 100°. Must be near water source.
Combat: 7–12
AY: 8–10
AG: 10–12
IN: na
Initiative: 15%
Composition: Mammalian; terran 30%
Power: Heightened vision 90%; heightened smell 100%; camouflage 80%
Warning: You have a feeling that you are being watched.
Sight: Hairless, otherwise wolf-like 3-meter-long entity with prehensile tail. Has long "whiskers" or feelers around eyes.
Perception: Mouth contains large sharp fangs. Entity is carnivorous. Will not flee or otherwise leave.
Examination: "Whiskers" are sense organs used to smell prey. Entity has no "nose" in terran sense...just bare organs.
CREATURE No. 9: Man-sized
Restrictions: Volcanic; crater; barren; light vegetation. Thin atmosphere only. Gravity of 0.2 to 0.8. Temperature less than 200°. Combat: 6–8
AY: 6–8
AG: 7–10
IN: na
Initiative: 20%
Composition: Mammalian; terran 15%
Power: Radar sense 100%; poison attack 100%; poison 10%
Warning: You hear a horrible sucking sound originating nearby.
Examination: Entity is toothless. Instead, strong muscles crush foreign matter in throat while poisonous secretion breaks down fibres. Carnivorous. Retractable claws for pinning prey on front and rear legs.
CREATURE No. 10: Small
Restrictions: Water. Lake or pond only. Must have atmosphere. Gravity between 0.4 and 1.6. Temperature between 75° and 150°. Combat: 5–8
AY: 8–10
AG: 3–5
IN: na
Initiative: 1%
Composition: Terran; protein 20%
Power: Heightened hearing 100%; poison 90%; reflective carapace 10%
Warning: You observe a small blur of red out of the corner of your eye.
Sight: Small amphibious saurian about a meter long with 8 legs, tail, and featherly ridges along back. Covered in iridescent red scales.
Perception: Entity is omnivorous, timid, and elusive.
Examination: Featherly ridges are sense organs. Feet are webbed with clear membranes.
CREATURE Nr. 11: Large
Restrictions: Crater; barren; light vegetation. Non-corrosive, non-poisonous atmosphere. Gravity of 0.4 to 1.6. Temperature between 75° and 200°. Usually found near water.
Combat: 2-4 AG: 1-3 AG: 8-10
IN: na Initiative: 5%
Composition: Terran; protein 20%
 Powers: camouflage 50%; edible 30%; heightened vision 40%; poison discharge 80%
Warning: You observe a large, bird-like entity approximately 4 meters high.
Sight: Entity appears to be watching party. Has short wings, feather-like skin, four legs, and large comb.
Perception: Size of wings indicates that entity is flightless. Teeth in beak-like mouth indicate carnivore or omnivore.
Examination: Reveals poem discharge as gaseous cloud from anal orifice (where appropriate).

CREATURE Nr. 12: 19-hex
Restrictions: Water. Temperature between 50° and 150°. Large body of water only. May be submerged or on surface.
Combat: 12-15 AG: 12-15 AG: 10-12
IN: na Initiative: 20%
Composition: Protein; terran 20%
 Powers: Adhesive secretion 30%; radar sense 50%; regeneration 40% (not center hex); ink discharge 30%
Warning: A large undulating mass under your party is rising rapidly toward you.
Sight: A collection of squid-like tentacles joined at the center and about 25 meters in diameter.
Perception: Has 30-12-meter long suckered tentacles. No body at center point, but lidless eyes and sharp beaks are at the tip of each tentacle. Presents man-sized target in each hex occupied (due to open structure). Obviously very dangerous.
Examination: Small, powerful heart-like organ at center. Nerve collections at end of each tentacle form brain of sorts.

CREATURE Nr. 13: Small
Restrictions: Air. requires non-corrosive atmosphere and moisture. Gravity of 0.2 to 1.0. Temperature between 50° and 200°.
IN: na Initiative: 10%
Composition: Protein; carbon 40%
 Powers: Poison discharge 100%; multiple attack 100%; kinetic absorption 10%; unknown propulsion 5%; poison 15%
Warning: What appears to be windblown puff-balls are headed in your direction.
Sight: Each ball is 50 centimeters in diameter. Balls have fuzzy appearance.
Perception: Balls are loose aggregations of seedpods which are discharged when in presence of energy source (including body heat). Entity itself is a floating plant.

CREATURE Nr. 14: Large
Restrictions: Barren; crater; light vegetation. Must have atmosphere. Gravity of 0.4 to 2.0. Any temperature. Sunlight.

CREATURE Nr. 15: Large
Restrictions: Air. Normal atmosphere only. Gravity of 0.2 to 1.0. Temperature above 100°.
Combat: 4-7 AG: 10-11 AG: 5-7
IN: na Initiative: 15%
Composition: Protein; terran 45%
 Powers: Unknown propulsion 100%; multiple attack 100%; radar sense 60%; balance disruption 10%
Warning: You hear a rushing noise and a flapping of wings.
Sight: A 15-meter long "flying" reptile-like entity. Wings are used mostly to guide entity, seldom flapped. Span of 5 meters.
Perception: Two orifices on leading edge of wings near junction with torso. Two retracting talons on underside.
Examination: Orifices are actually biological "supercharger" used to maintain speed and altitude. Entity is carnivore with large needs since energy for "supercharger" is provided by body.

CREATURE Nr. 16: Large
Restrictions: Woods; flat; woods; flat; vegetation flat; flat; vegetation hills; ice flat; ice hills. Any non-poisonous atmosphere. Gravity of 0.8 to 1.6. Temperature between 0° and 90°.
Combat: 3-6 AG: 3-5 AG: 3-5
IN: na Initiative: 5%
Composition: Protein; terran 40%
 Powers: Edible 80%; heightened smell 90%; invisibility 100%
Warning: You observe a group of herd animals (between 10 and 200) grazing on the local vegetation. Each entity weighs about one ton and approaches and measures close to 2 meters in length. They appear to be antelope-like, but are six-legged and not horned.
Sight: Entities will always become invisible when frightened.

CREATURE Nr. 17: Man-sized
Restrictions: Any environment. Gravity between 0.2 and 1.2. Must have non-poisonous, non-corrosive atmosphere. Temperature between 0° and 75°.
Combat: 7-9 AG: 6-9 AG: 9-12
IN: na Initiative: 20%
Composition: Protein; terran 40%
 Powers: Entrapment 100%; heightened vision 60%; poison attack 70%; reflective carapace 10%; adhesive secretion 80%
Warning: You notice a camouflaged pit 5 meters deep and covered with a sticky web-like film. If unaware, one random member of the party falls into the pit.
Sight: The inside of the pit is covered with a sticky substance. Bottom contains three tunnels (each one meter in diameter). Sound of skittering in darkness.

Perception: Occupant is a 2-meter long insect-like-apppearing entity much like a wingless wasp or hornet.
Examination: Creature inhabits tunnels created by some departed life-form. Uses as both home and trapping device. Will leave tunnels if it thinks it can make a kill.

CREATURE Nr. 18: Man-sized
Restrictions: Any environment. Found only in poisonous or corrosive atmosphere. Gravity of 0.2 to 0.8. Temperature between 50° and 150°.
Combat: 6-8 AG: 2-4 AG: 5-7
IN: na Initiative: 2%
Composition: Carbon; non-carbon 40%
 Powers: Radar sense 20%; acid 100%; adhesive secretion 40%; unknown propulsion 20%
Warning: You see a jellyfish-type creature 2 meters in diameter. It is transparent and the internal organs are clearly visible.
Sight: Entity's spherical shape is broken by two pseudopods, each about 2 meters long. Each pseudopod has a ring of black dots on it. Entity glistens as if wet.
Perception: Black dots appear to be sense organs of some sort. They are coated with some sort of secretion.

CREATURE Nr. 19: Very small
Restrictions: Woods; forest; marsh. Non-poisonous, non-corrosive atmosphere. Gravity of 0.4 to 1.2. Temperature between 50° and 100°. Only found near water (large pond or small lake).
Combat: 1-2 AG: 7-9 AG: 4-5
IN: 5-7 Initiative: 15%
Composition: Protein; terran 50%
 Powers: Camouflage 100%; radar sense 10%; edible 20%; mind control 90%; psionic communication 5%
Warning: A character with a Mental Power of 4 or greater feels that he is being observed.
Sight: The source of the emanations appears to be a small (1-foot long) rod-like entity which is barely discernible. Entity has three legs, skin which changes color to blend with surroundings. Appears to have tufted antennae along backbone.

CREATURE Nr. 20: Small
Restrictions: Woods; forest; marsh. Non-corrosive atmosphere. Gravity of 0.4 to 1.0. Temperature between 75° and 125°.
Combat: 7-11 AG: 9-12 AG: 10-12
IN: 1-3 Initiative: 20%
Composition: Mammalian; terran 30%
 Powers: Entrapment 85%; camouflage 100%; heightened smell 90%
Warning: You hear a rustling noise from the trees above.
Sight: A 1½-meter tall monkey-like entity with two long tentacles (2 meters each) instead of arms, a circular, sharp-toothed mouth, single central eye. Hairless. Skin appears to change color.

CREATURE Nr. 21: 4-hex
Restrictions: Volcanic hills; volcanic mountain; crater hills; crater mountain; crater flat; barren flat; barren hills; barren mountain. Must have atmosphere. Gravity of 0.2 to 0.8. Temperature between 60° and 200°.
ADVENTURE GUIDE, PAGE 71

Combat: 12-15 AY: 9-12 AG: 9-12
IN: na Initiative: 20%
Composition: Protein; carbon 5%

Powers: Tunneling 100%; entrapment 40%; poison attack 100%; camouflage 50%; regeneration 30%

• Warning: The earth begins to rumble and lose solidity.
• Sight: A gigantic (20-meter long, 7-meter thick) entity with highly veined eyes. Segmented, 5-meter maw at one end contains ridged muscles for crushing prey or defense.
• Perception: Maw also has poisonous digestive juices secreted from sacs inside muscle ridges. Heavily-lidded visual sensor located inside maw (protected by muscle).

CREATURE Nr. 22: 2-hex
Restrictions: Water. Must have some atmosphere. Gravity of 0.6 to 2.5. Temperature between 50° and 125°.
Combat: 6-8 AY: 7-9 AG: 4-6
IN: na Initiative: 15%
Composition: Protein; terran 20%

Powers: Radar sense 80%; energy ingestion 100%; balance disruption 100%; acidic circulation 70%; camouflage 15%;

• Warning: You experience a sense of disorientation and your sensors begin to give off “jangled” readings indicating a large power source nearby.
• Sight: A 9-meter long by 2-meter thick eel-like entity without apparent head or tail. Glows slightly.
• Perception: Entity “eats” and stores energy (like a large battery). Retractable eye stalks at both ends used for guidance.

CREATURE Nr. 23: Large
Restrictions: Barren flat; barren hills; light vegetation flat; light vegetation hills; crater flat. Non-poisonous, non-corrosive atmosphere. Gravity of 0.6 to 1.0. Temperature between 20° and 80°.
Combat: 4-7 AY: 7-10 AG: 4-6
IN: na Initiative: 6%
Composition: Protein; terran 5%

Powers: Radar sense 80%; poison 100%; camouflage 5%; psionic communication 60%; web shooting 5%

• Warning: You observe a large, many-legged entity skittering away from you.
• Sight: Entity appears to be a giant spider-like being, with a dozen legs meeting in a smooth, round body. Each leg is about 3 meters in length.
• Perception: Entity is actually two species. Spider-like entity has low-level nervous system. Higher level system is provided by symbiotic mass growing on body. Moss is poisonous. “Spider” is herbivore.

CREATURE Nr. 24: Man-sized
Restrictions: Any environ containing a large body of water nearby (ocean, lake, or large pond). Must have atmosphere. Gravity of 0.4 to 1.4. Temperature between 50° and 150°.
Combat: 4-6 AY: 5-8 AG: 3-5
IN: 1-3 Initiative: 10%
Composition: Protein; terran 5%

Powers: Capture 80%; ink discharge 40%; poison attack 10%; camouflage 100%

• Warning: A scaled humanoid appears before you.
• Sight: Entity has webbed feet, gills, bluish scales, and is 3 meters tall.
• Perception: Entity is adapted to both surface atmosphere and water. Hands have retractable claws. Teeth indicate entity is a carnivore.

CREATURE Nr. 25: Large
Restrictions: Found only in the absence of atmosphere.
Combat: 10-12 AY: 8-10 AG: 6-8
IN: 5-7 Initiative: 20%
Composition: Carbon; non-carbon 40%

Powers: Unknown propulsion 75%; energy drain 100%; energy blast 30%

• Warning: You see a floating, red, pulsing light with a radius of about 3 meters. It gives off a constant discharge of heat (350°) and radiation.

• Perception: All equipment being drained of power by entity.
• Examination: Entity views energy sources as “life.” Draws no distinction between man and machine. Will neither attack nor flee.

• Agility is “na” if entity does not have unknown propulsion.

CREATURE Nr. 26: Small
Restrictions: Air. Any atmosphere. Gravity between 0.2 and 0.8. Temperature less than 200°.
Combat: na AY: 4-7 AG: 2-4
IN: 3-5 Initiative: 5%
Composition: Carbon; protein 30%

Powers: Unknown propulsion 100%; radar sense 30%; psionic communication 20%; poison discharge 50%; heightened hearing 70%

• Warning: You see a balloon-like object in the distance.
• Sight: Object is living entity composed of gasbag body and half a dozen 2-foot trailing tendrils grouped on underside.

• Perception: Being maintains altitude via gases produced by body and stored inside entity. Same gases can be vented out underside as means of protection having same effects as poison.
• Examination: Tiny tendrils are sensors and manipulative appendages at the same time. Entity is simple-minded floating plant which converts air and sunlight into gases to feed itself.

CREATURE Nr. 27: Large
Restrictions: Volcanic; crater; barren. Must have some atmosphere. Gravity of 0.6 to 1.6. Temperature between 50° and 250°.
Combat: 8-10 AY: 4-6 AG: 9-12
IN: 2-4 Initiative: 20%
Composition: Non-carbon; carbon 20%

Powers: Camouflage 100%; entrapment 40%; armored carapace 65%; tunneling 100%; acid 0%

• Warning: You catch a movement out of the corner of your eye.
• Sight: Movement generated by nearby rock. Appears to be somewhat animated. Rock is 3 meters in diameter by 1 meter high.
• Perception: Rock is living entity capable of disappearing by burrowing into and eating rock.
• Examination: Entity secretes acid which “digests” rock. Entity is apparent creator of nearby tunnel system.

CREATURE Nr. 28: Small
IN: na Initiative: 0%
Composition: Carbon; non-carbon 30%

Powers: Swarm mind 100%; energy absorption 100%; energy ingestion 5%; energy drain 10%; kinetic absorption 100%

• Warning: The air is increasingly filled with sticky scraps of some diaphanous membrane.
• Sight: Membrane is crossed with tiny silver filaments that catch sunlight.

• Perception: Scraps are sometimes blown apart or together by the wind. Larger scraps pulse with light. Appear to absorb energy.
• Examination: The membranes are cells which separate are harmless, if annoying. When the number which blow together reaches a critical mass (several thousand), they form a single entity which may even develop an rudimentary intelligence.

CREATURE Nr. 29: Man-sized
Restrictions: Any land environ. Gravity of 0.2 to 0.6. Non-corrosive atmosphere.
Combat: 6-8 AY: 6-9 AG: 8-10
IN: 2-4 Initiative: 10%
Composition: Terran; mammalian 20%

Powers: Heightened visual sense 60%; adhesive secretion 70%; flying 100%

• Warning: You observe a large bat-like creature about 2 meters tall with a wingspan of 4 meters.
• Sight: The entity has a somewhat humanoid torso and face, but no arms and long (2 meter) tendrils instead of legs. The initial bat-like appearance is a result of the large leathery wings.
• Perception: Entity has compound eyes, is carnivorous, aggressive, and seemingly intelligent.

CREATURE Nr. 30: Miniscule
Restrictions: Any environ except water. Must have atmosphere. Only encountered if party are not wearing expedition suits or one or more such suits have been punctured.
Combat: na AY: na AG: 7-8
IN: 8-10 Initiative: 20%
Composition: Protein; terran 10%

Powers: Unknown propulsion 100%; radar sense 80%; psionic communication 40%; mental attack 10%; mind control 100%

• Warning: One or more party members begin to behave erratically, picking fights with others in the party, breaking equipment, and so forth.
• Perception: Disturbed party members infected by foreign organism.
• Examination: Attacking organism identified as almost microscopic tick-like entity of malevolent intent. Never attacks. Uses mind control instead.

• Entity will possess intelligence only if psionic communication is possessed.
CREATURE Nr. 31: Man-sized
Restrictions: Any eniron. Only thin atmo-
sphere or no atmosphere. Any gravity. Any temperature.
Combat: 10-13    AY: 9-12    AG: 5-8
IN: na    Initiative: 5%
Composition: Carbon; non-carbon 50%

Powers: Unknown propulsion 100%;
ergy ingestion 100%; energy blast 20%;
ergy drain 60%; radar sense 100%

• Warning: A sphere of plasma appears. It
glows intensely from inner light.

• Sight: The sphere is perfectly rounded and
undulates slightly as it moves. It has a
diameter of 2 meters. Floats several cen-
timeters from earth. Rotates slowly
clockwise.

• Perception: Area within 5 meters of entity
is very hot (in terms of both thermal and
radiation effects).

• Examination: Radiation lingers over area
after passage.

CREATURE Nr. 32: Small (pod)
Restrictions: Light vegetation; woods.
Non-poisonous, non-corrosive atmosphere.
Gravity of 0.6 to 1.8. Temperature less than
200°.
Combat: 6-8    AY: 5-7*    AG: 9-12
IN: 5-7    Initiative: 10%
Composition: Protein; carbon 40%

Powers: Unknown propulsion 10%;
swarm mind 80%; mind control 100%; psionic
communication 90%; multiple attack 100%

• Warning: Character with Mental Power of
4 or greater will experience a premonition of
evil so strong as to be a physical force.

• Sight: A patch of tangled plants containing
watermelon-like pods about a meter long.
Plants are knee high.

• Perception: Psions will perceive this as
the source of the "evil" emanations.

• Examination: Pods weigh 35 pounds.
Clear skin reveals seed-like forms inside.
Pods attack by bursting and squirting seeds 3
meters in all directions. "Seeds" fold out
upon leaving pod and take on a manta ray
form. Attach to spinal column from whence
they can control the entity to which they are
affixed.

• Agility refers to "seeds" only.

CREATURE Nr. 33: Large
Restrictions: Woods; forest; jungle. Must
have atmosphere. Gravity of 0.6 to 1.2.
Temperature between 50° and 100°.
Combat: 9-13    AY: 9-13*    AG: 11-12
IN: 6-8    Initiative: 20%
Composition: Protein; terran 20%

Powers: Heightened smell 100%;
adhesive secretion 80%; edible 10%; psionic
communication 20%; vegetation control 5%

• Warning: You see what appears to be a
giant mushroom about 3 meters tall. A
character with a Mental Power of 4 or greater
will experience a feeling of being watched.

• Sight: Object pulses slightly and is covered
with secretion.

• Perception: Tentacle or appendage hidden
within broad head.

• Examination: Appendage is eating orifice
on neck-like muscle which leaps out to
devour prey. Appendage range is 5 meters
(one hex).

• Refers to neck orifice only; the plant itself is
not mobile.

CREATURE Nr. 34: Small
Restrictions: Light vegetation; woods;
forest. Non-corrosive, non-poisonous atmos-
tphere. Temperature between 30° and
100°.
Combat: 5-8    AY: 4-7    AG: 6-8
IN: 8-12    Initiative: 20%
Composition: Humanoid; mammalian 5%

Powers: Invisibility 100%; illusions 90%;
mind control 60%; psionic communication
90%; mental attack 30%

• Warning: A character with Mental Power of
4 or greater feels that he is being watched.

• Sight: When visible, appears to be a tiny
humanoid one meter tall with large (8-inch
long) pointed ears. Has two tentacles instead
of arms.

CREATURE Nr. 35: Large
Restrictions: Woods; forest; jungle; marsh.
Non-poisonous, non-corrosive atmosphere.
Gravity of 0.6 to 2.6. Temperature between
50° and 100°.
Combat: 9-12    AY: 4-6    AG: 6-8
IN: 2-4    Initiative: 10%
Composition: Mammalian; terran 20%

Powers: Heightened smell 60%; tunneling
80%; radar sense 90%

• Warning: You feel as though you are being
watched.

• Sight: A gigantic, 3-meter tall shaggy teddy
bear-like creature with 6 arm-like append-
ages (also serving as legs). Has large, toothy
fangs. Eyeless.

• Perception: Shape of teeth indicates that
entity is omnivorous.

• Warning: One or more members of your
party have strangely disappeared from sight.

• Sight: In own shape, entity is 2-meter tall
humanoid covered with long silken fur. Head
features pointed ears, muzzle (with rows of
sharp teeth) and whisker-like sensors much
like cat whiskers. Long tail emanates from
lumbar region. Hands and feet are partly ten-
called, partly clawed (retractable).

• Examination: Entity is carnivore which
will stalk party, adopting forms of members
already killed until all are dead. Entity will
then return to kills, eating some and stashing
others. Entity is unable to communicate
unless psionic communication is possessed
and will have only the physical appearance of
an object it is simulating, not its mental
powers.

CREATURE Nr. 36: 2-hex
Restrictions: Land environs only. Non-
corrosive atmosphere. Gravity 1.2 to 2.6.
Temperature 100° to 250°.
Combat: 11-13    AY: 1-3    AG: 6-9
IN: 9-12    Initiative: 5%
Composition: Terran; protein 30%

Powers: Armored carapace 40%; mind con-
trol 5%; heightened vision 5%

• Warning: A large shape moves at the edge
of the party's sight.

• Sight: You observe a large humanoid ap-
proximately 12 meters high. Though the tor-
sor, head, and arms seem terran enough, the
entity has four legs radiating from its torso in
a spider-like manner. Primitive clothing
covers the torso.

• Perception: Clothing hides the fact that
torso structure is somewhat arachnid and
features carapace.

Creatures will always communicate on an "ig-
gnore" result.

CREATURE Nr. 37: Small
Restrictions: Air. Must have atmosphere.
Gravity 0.2 to 1.2.
Combat: na    AY: 12-15    AG: 6
IN: 10-12    Initiative: 10%
Composition: Carbon; non-carbon 20%

Powers: Unknown propulsion 100%; psionic
communication 60%; heightened hearing
30%; immaterial 100%

• Warning: One character cannot get an
unknown tune out of his hed.

• Sight: You see a murky gas cloud from
which emanates a strange, almost musical
sound.

• Perception: Gas cloud is non-hostile entity
composed of energy.

• Examination: Entity dissipses if stunned.

CREATURE Nr. 38: Man-sized
Restrictions: Non-volcanic land environ.
Non-corrosive, non-poisonous atmosphere.
Gravity of 0.4 to 1.6. Temperature between
40° and 120°.
Combat: 8-12    AY: 10-12    AG: 10-12
IN: 2-4    Initiative: 5%
Composition: Humanoid; mammalian 40%

Powers: Chameleon 100%; illusions 80%;
heightened smell 90%; mind control 10%;
psionic communication 20%

• Warning: Any land environ. Any type
of atmosphere. Gravity of 0.4 to 1.0.
Temperature between 50° and 250°.
Combat: 2-3    AY: 11-12    AG: 5-8
IN: 7-10    Initiative: 15%
Composition: Protein; carbon 5%
ADVENTURE GUIDE, PAGE 73

Power: Swarm mind 100% psionic communication 60%; mental attack 25%; mind control 80%; poison discharge 100%

Warning: You are seeing a glowing dust cloud hanging in the air.

Sight: Cloud is filled with sparkling lights. Appears gaseous.

Perception: Lights are actually tiny fire-fly sized insectile entities which flit about within a cloud of gases that they discharge in flight. Gases are poisonous.

Examination: If a character with a Mental Power of 4 or greater is within 5 meters (same hex) of the cloud, one or more of the entities which make up the cloud will land on him and lay its eggs. Treat eggs as acidic.

EXPLANATIONS OF CREATURE POWERS

A power improves or specializes a creature's attributes, giving it advantages when interacting with characters.

The GM secretly determines which powers a creature will possess by rolling percentile dice once for each power listed in the creature's description. The GM may use any of these powers in a logical manner when designing his own creatures. The GM may introduce new powers of his own devising to the already existing creatures. Certain powers provide a creature with psionic skills, like those available to the characters. A creature that uses such powers may also suffer psionic backlash (see 10.3). Explanations of all creatures powers follow, in alphabetical order. Each power lists one of the four creature description categories (warning, sight, etc.). Unless the power is used in such a way that it is immediately obvious to the players, it is revealed to them when they are read the listed description.

Acid (Perception). Substance on some part of creature's exterior will eat through expedition suit in one Action Round and, at the GM's discretion, through armor at a slow rate. May be combined with poison (see below).

Acidic Circulatory Fluid (Examination). Identical to acid; released if creature is punctured.

Adhesive Secretion (Perception). Skin, suckers, or web strands contain sticky substance which easily restrains any individual the creature attacks. Hit received by a character attacked by a creature with adhesive secretion and capture are not reduced as listed in the capture description.

Armored Carapace (Perception). Armor with a projectile Defense Strength ranging from 3 to 5.

Balance Disruption (Examination). Ambient energy emissions that scramble the human sense of balance. Roll one die; every character with a Mental Power Rating less than the die result immediately suffers the effects of shock (see 30.3). This is not considered an attack; it occurs automatically during the creature's turn of the Action Round.

Camouflage (Sight). The creature may only be seen at half the normal range or less. Add $10 to the creature's Initiative Percentage.

Capture (Perception). When attacking a character, reduce any hits received by the character by 3. If the adjusted number is 0 or higher, the character is considered restrained by the creature (reducing the adjusted number of hits), and remains restrained until the creature is stunned, passes out or dies.

Chameleon (Perception). The creature may assume the form of any living entity within its sight. If the party is unaware of the creature, it may appear to the party as one of their own when they see it. The creature's Combat and Agility Ratings are halved when assuming another form. One Action Round is required for the creature to change shape (it may not attack or move while changing).

Chitinous Carapace (Perception). Armor with a projectile Defense Strength ranging from 3 to 5 and with a beam Defense Strength of 1.

Dart Shooting (Perception). May attack by projecting quills or other natural projectiles. Its range (in hexes) equals one half of its Combat Rating (rounded down). The Hit Strength of a dart equals half the creature's Combat Rating times its range.

Edible (Examination). Fit for consumption by humans.

Energy Absorption (Examination). Stun weapons and beam weapons have no effect on the creature.

Energy Blast (Perception). Emits powerful blasts of heat, electricity or radioactivity. The creature may attack one character at a range (in hexes) equal to its Combat Rating. The attack is resolved by subtracting the range from the creature's Combat Rating (only). Roll one die, add the modified rating to the result, and locate the sum on the Hit Table to determine the hits received by the character. Armor may be used to aid defense.

Energy Drain (Perception). The creature lives off the surrounding electrical energy. At the beginning of each Action Round, one item belonging to the party that is within a number of hexes of the creature equal to or less than its Combat Rating immediately loses all its power. This will affect beam weapons, scientific equipment, and any other electrical devices. The creature will always move toward such items.

Energy Ingestion (Perception). The Combat Rating of the creature is increased by the number of hits it receives. The Agility Rating is reduced normally. The first time the creature ingests energy, its Aggression Rating is increased to 12. The creature is killed if it is attacked with a stun weapon.

Entrapment (Perception). The creature has constructed or is able to construct simple traps to capture unwary passers by. A creature with tunneling creates camouflaged pits. A creature with web shooting creates a net or large web. If the party is unaware of such a creature, the GM should have one character (determined at random) fall into one of the traps.

Flight (Sight). The creature is winged and capable of flight. When flying, its Movement Rate is three times its current Agility Rating. Its normal Agility Rating is always used when calculating its strength. If the creature's Agility Rating is reduced to less than half its original value, the creature can no longer fly.

Heightened Hearing/Smelling (Examination). The creature may see twice as far as humans can. It sees as well in darkness as humans do in the light. The creature is never unaware during an encounter and no character may successfully perform an ambush skill task against it.

Illusions (Perception). May create im material, harmless but entirely convincing visual illusions of anything within its sight. The creature may not move or attack while doing so.

Immaterial (Perception). The creature possesses no solid form and is not affected by projectile fire, beam fire, poisons, or close attack. It is visible and may suffer the effects of a stun weapon. The GM may allow it to pass through solid objects.

Inky Discharge (Examination). Emits opaque substance that creates total darkness. Emission counts as the creature's attack for one Action Round. The discharge spreads one hex in every direction each Action Round (two hexes in Round of Emission). Usually restricted to underwater use.

Invisibility (Perception). The creature is not perceived on the Action Display. The GM notes the position and movement of the creature in his mind, informing the characters when the creature performs any visible actions. The creature is not immaterial; it may be affected by attack and may not move through solid objects.

Kinetic Absorption (Perception). Projectile weapons and blasts have no effect on the creature.

Mental Attack (Perception). If the creature is not moving, it may attack by directing a blast of psionic energy at one character. Roll one die. If the result is greater than the character's Mental Power Rating, the character is stunned for a number of Action Rounds equal to the difference. Exception: If a 10 is rolled, the character's Endurance Rating is immediately reduced to 0 (he passes out). If a 1 is rolled, roll percentile dice, locate the result on the psionic Backlash Table (10.4) and apply the outcome to the creature.

Mind Control (Examination). The creature possesses this skill at a level ranging from 6 to 10 and a Mental Power Rating of 4 to 7 (see 10.0).

Multiple Attack (Perception). May attack each and every character within its range once during its turn of the Action Round.

Poison (Examination). Skin or other exterior area is coated with a toxin (to humans at least). If the character touches a poisoned area with his bare skin, the GM should implement one or more of the following:

- Virulent. The character loses one point from his Endurance Rating each Action Round. When that reaches 0 (and the character passes out), he loses one point off his Strength Rating each Action Round. When that reaches 0, the character is dead.

- Viral. Same effects as virulent poison. However, the unit of time that it is counted is increased to one minute, one hour or one day, at the GM's discretion.

- Paralytic. The character's Dexterity and Agility Ratings are immediately reduced to 0.
Non-Player Characters

The GM should choose one of the following non-player characters when an NPC encounter occurs. Being careful not to disrupt the adventure in progress (unless the GM wishes to do so), these NPC's are extremely useful in spicing up an otherwise slow-moving section of the adventure or to set up plot lines which the players might want to follow up in the future.

These NPC's are presented in a format which gives the GM enough information to play them on the spur of the moment, yet does not restrict the GM by being too specific. The GM is free to use these listings as he sees fit; he should change whatever does not suit his taste.

The Characteristic Ratings of each NPC are given as letters which represent ranges for each characteristic. Before actually placing the NPC's into play, the GM should choose a value for each characteristic from the range indicated in the following table.

<table>
<thead>
<tr>
<th>LETTER</th>
<th>ALL CHARACTERISTICS EXCEPT MENTAL POWER</th>
<th>MENTAL POWER</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>Poor (1, 2)</td>
<td>0</td>
</tr>
<tr>
<td>B</td>
<td>Mediocre (3, 4)</td>
<td>1, 2</td>
</tr>
<tr>
<td>C</td>
<td>Average (5, 6)</td>
<td>3</td>
</tr>
<tr>
<td>D</td>
<td>Good (7, 8, 9)</td>
<td>4, 5</td>
</tr>
<tr>
<td>E</td>
<td>Exceptional (10, 11, 12)</td>
<td>6</td>
</tr>
</tbody>
</table>

An NPC's Environ Skill Level is for the environ in which he is encountered. If in a spaceport, the GM chooses a home environ for the NPC. All other Environ and Gravity Skill Levels for the NPC are determined in accordance with 5.4.

Some NPC encounters involve a group of NPC's. In such a case, the GM rolls one die to determine how many there are. The Aggression Ratings listed for each NPC are indications of his/her overall reaction to combat situations and may need to be modified to fit the attitude indicated in the GM's description, which is intended to guide the GM in that particular encounter only. If the NPC is enlisted to join the party, the listed Aggression Rating should be used thereafter.

### Common NPC's

#### NPC Nr. C1: Drug Dealer

**Spaceport**

ST(B) EN(C) DX(C) AY(B) IN(C) MP(B) EM(A) LD(B) AG(C) SS: Lower middle class

**Skills:** Urban 2; Graa HY-1; Temp HO; Environ 2; Trading 2; Transport Econ 4; Handguns 2; Law 1; Ambush 1.

**Possessions:** Plastic pistol.

### Additional NPC Characters

- **First Description:** As the characters are preparing to leave on their voyage, they are approached by a man who asks if he could talk to them in private.
- **GM's Description:** This individual is attempting to get past customs officials with a great deal of illegal drugs. He has such a vast amount he cannot get all of them on his ship. Without telling the party what the shipment is, he asks them if they would help him deliver an overorder of material. He will pay them handsomely and asks their discretion. If the party shows any inclination to turn down the offer, the man will withdraw, not wanting to arouse suspicion.

#### NPC Nr. C2: Diplomat

**Spaceport**

ST(B) EN(B) DX(C) AY(B) IN(D) MP(C) EM(E) LD(C) AG(A) SS: Skilled tech

**Skills:** Urban 3; Graa EX-1; Temp HO; Environ 4; Diplomacy 8; Linguistics 8; Law 4; Streetwise 2; Laser pistol 1.

**Possessions:** Audio-sealed case, laser pistol, translator.
**NPC Nr. C3: Scholar**

**Spaceport**

ST(B) EN(A) DX(C) AY(A) IN(D)
MP(B) EM(C) LD(A) AG(A)
SS: Family dominates planet

**Skills:** Urban 2; Grav LT-1; Temp NL; Environ 1; Economics 5; Mining 4; Geology 3; Physics 1.

**Possessions:** Camera.

**First Description:** As the characters load or unload their ship in port, they see someone taking pictures of them.

**GM's Description:** This is a scholar on vacation who has chosen this planet to visit. The character's ship looked interesting, and he wanted a picture.

**NPC Nr. C4: Smuggler**

**Spaceport**

ST(B) EN(C) DX(C) AY(B) IN(C)
MP(B) EM(B) LD(C) AG(D)
SS: Independent trading family

**Skills:** Urban 2; Grav LT-1; Temp CD; Environ 2; Handguns 2; Automobile 1; Forgery/Counterfeiting 1.

**Possessions:** Stun gun.

**First Description:** The characters see a person shoving large boxes down a waste disposal chute.

**GM's Description:** The person is a smuggler whose partner is downstairs at the other end of the chute waiting for the contraband. This individual is very jumpy and will not hesitate to fire upon the party if approached too closely.

**NPC Nr. C5: Trader**

**Spaceport**

ST(B) EN(B) DX(C) AY(B) IN(D)
MP(B) EM(C) LD(C) AG(C)
SS: Independent trading family

**Skills:** Urban 2; Grav NW-1; Temp CD; Environ 2; Trading 6; Economics 3; Handguns 2; Pilot 2; Streetwise 3; Diplomacy 2; Shuttle 1; Pilot 3; Economics 4.

**Possessions:** Stun pistol, portable computer, geoscaner, expedition suit, camera, trade stuffs.

**First Description:** As the characters are talking to the booking agent at the starport, a distinguished looking person approaches them and asks for a minute of their time.

**GM's Description:** This person is an important interstellar trader who has overheard the players state their next port of call. He may ask them to deliver something; find their ship valuable for a separate trip after the next; ask them to pick something up and deliver it on another; etc. He is what he appears to be.

**NPC Nr. C6: Reporter**

**Spaceport, Urban**

ST(B) EN(B) DX(C) AY(C) IN(C)
MP(B) EM(C) LD(A) AG(C)
SS: Fallen on hard times

**Skills:** Urban 2; Grav LT-1; Temp NL; Environ 2; Automobile 2; Direct-lift 1; Disguise 1; Streetwise 4; Diplomacy 3; Linguistics 1.

**Possessions:** Automobile, camera, audio recording equipment.

**First Description:** While the party is in the spaceport, they are witness to an important incident of the GM's creation (a murder, the arrival of a celebrity, an escaped criminal). They are then accosted by an individual asking them a lot of questions.

**GM's Description:** This reporter works for a planetary news service and will press the characters for all the information they have to give and then some. It will become very annoying very quickly as this individual is both tenacious and intimidating.

**NPC Nr. C7: Religious Fanatics (one die)**

**Spaceport, Urban**

ST(B) EN(B) DX(B) AY(A) IN(A)
MP(B) EM(C) LD(A) AG(A)
SS: Poor colonial family

**Skills:** Urban 1; Grav LT-1; Temp NL; Environ 2; Recruiting 1; Streetwise 2; Diplomacy 1.

**Possessions:** None.

**First Description:** The characters are approached by a group of people who begin to talk about the party's obvious lack of belief.

**GM's Description:** These apparent fanatics are actually a front for a political organization skirting taxes by using a religious front. The group will try to sell the party books or buttons or some worthless junk for exorbitant prices. They will give the party a hassle if nothing is purchased. If the party refuses any offers at all, the GM must determine whether this group becomes unruly.

**NPC Nr. C8: Robbery Victim**

**Urban, Suburban**

ST(B) EN(B) DX(B) AY(B) IN(C)
MP(A) EM(B) LD(A) AG(A)
SS: Local establishment

**Skills:** Urban 1; Grav LT-1; Temp NL; Environ 2; Law 1; Automobile 1.

**Possessions:** An automobile.

**First Description:** The characters find the unconscious body of a male lying in an alleyway.

**GM's Description:** The man has been mugged and robbed. He is a lawyer who might have been carrying valuable papers (GM's discretion) which were snatched. At first he will be groggy with a small chance of mistaking the characters for his assailants. After fully awakening, he will need the characters' help to reach the authorities.

**NPC Nr. C9: Fence**

**Urban**

ST(B) EN(B) DX(C) AY(C) IN(D)
MP(A) EM(B) LD(C) AG(C)
SS: Lower middle class

**Skills:** Urban 2; Grav LT-1; Temp NL; Environ 2; Streetwise 4; Gambling 2; Disguise 3; Forgery/Counterfeiting 3; Handguns 3.

**Possessions:** False identity, plastic pistol, various stolen items

**First Description:** As the characters are strolling downtown, they are approached by an individual who tries to entice them to buy some goods.

**GM's Description:** At first, the items offered by this individual will be typical: camera, watches, jewelry, etc. If the characters express enough interest, the fence will begin to offer harder to find high-tech items for very low prices. The fence is not hostile and will back off if threatened.

**NPC Nr. C10: Street Person**

**Urban, Suburban**

ST(B) EN(B) DX(B) AY(C) IN(A)
MP(A) EM(B) LD(B) AG(C)
SS: Unfortified orphan

**Skills:** Urban 1; Grav HY-1; Temp HO; Environ 2; Streetwise 4; Gambling 2; Automobile 1; Ambush 1.

**Possessions:** None.

**First Description:** The party is spoken to by a figure in a shadowy doorway as they travel through the streets.

**GM's Description:** This figure could be any number of things: a beggar asking for money; a drug seller hawking his wares; a hustler looking for an easy mark in a card game; a pimp. How far the street person will go to engage the party is up to the GM.

**NPC Nr. C11: Sanitation Engineer**

**Urban, Suburban**

ST(A) EN(A) DX(B) AY(B) IN(A)
MP(A) EM(B) LD(A) AG(A)
SS: Lower middle class

**Skills:** Urban 1; Grav LT-1; Temp NL; Environ 1; Streetwise 1.

**Possessions:** None.

**First Description:** The characters see a person walking down the street next to a moving truck.

**GM's Description:** This is a sanitation engineer collecting garbage. If this has already been played, the person could be something else in disguise — a lawyer, perhaps, or a spy.

**NPC Nr. C12: Thieves (one die)**

**Urban, Suburban**

ST(B) EN(C) DX(B) AY(B) IN(C)
MP(A) EM(B) LD(C) AG(C)
SS: Oppressed minority

**Skills:** Urban 1; Grav LT-1; Temp NL; Environ 2; Streetwise 1; Automobile 3; Laser Pistol 2; Blades 2; Ambush 2; Unarmed Combat 1.

**Possessions:** Automobiles, laser pistols, knives.

**First Description:** As the party travels in their vehicle down a semi-deserted street in a city, they are sideswiped by another car and stopped. As they get out, another vehicle pulls up behind them.

**GM's Description:** These individuals are part of a highly organized auto theft ring. The will pull out their weapons, order the party to stand against the wall, and drive off with the party's vehicle, also taking any equipment inside. If the party puts up no
resistance, there will be no cause for combat. The party is willing to engage in a quick firefight and then escape in their vehicles.

NPC Nr. C13: Thieves (one die)
Urban
ST(B) EN(B) DX(C) AY(B) IN(B) MP(A) EM(A) LD(C) AG(D)
SS: Poor colonist family
Skills: Urban 3; Grav LT-1; Temp NL; Environ 3; Streetwise 2; Battlefield 2; Jetpack 2; Handguns 2; Blades 2; Ambush 3; Unarmed Combat 1.
Possessions: Pistols, daggers, stun guns.
• First Description: The first description in this case may be a hit on the head; the group of thieves will attempt to ambush and rob the party.
• GM’s Description: Basically the same as preceding; the thieves will not kill the party except in open combat. If the party gives in, no one will be seriously harmed.

NPC Nr. C14: Travelling Doctor
Road
ST(A) EN(B) DX(C) AY(A) IN(C) MP(B) EM(C) LD(A) AG(A)
SS: Skilled tech
Skills: Urban 1; Grav LT-1; Temp NL; Environ 2; Diplomacy 2; Chemistry 1; Diagnostics 3; Treatment 2; Biology 1; Programming 1; Comp/Robot Tech 1.
Possessions: ATV (Civil Level 6), robot with medical systems (Civil Level 7).
• First Description: As the party travels along, they are hailed by a man and his robot by the side of the road. Their vehicle is parked nearby.
• GM’s Description: This doctor’s vehicle has broken down and he cannot fix it. He roams the countryside helping the populace and keeping them fit. He needs the party for either help or transportation to the local town. He will offer money or services if the party seems hesitant.

NPC Nr. C15: Recalcitrant Farm Boys (two dice)
Small settlement
ST(B) EN(B) DX(C) AY(B) IN(A) MP(B) EM(B) LD(B) AG(C)
SS: Communal colony
Skills: Urban 0; Grav LT-1; Temp CD; Environ 4; Blades 2; Longarms 1; Unarmed Combat 2; Agriculture 4.
Possessions: Horse cart, farm equipment, truck, rifle.
• First Description: The party comes upon a small farming community which is in obvious need of some new equipment. They are greeted by some of the locals.
• GM’s Description: These are a bunch of very proud people. They separated themselves from the rest of the population to prove their project could be done without assistance. If the party tries to leave and get them help, or suggests they do that, the farmers, led by the young men, will hinder the party from leaving. They do not want the knowledge they are actually struggling to leak out. Depending on the circumstances, violence is not impossible.

NPC Nr. C16: Land Owner
Environ
ST(B) EN(B) DX(A) AY(A) IN(B) MP(A) EM(B) LD(D) AG(D)
SS: Local establishment
Skills: Urban 0; Grav LT-1; Temp NL; Environ 3; Trading 2; Agriculture 3; Geology 1; Longarms 1.
Possessions: Truck, rifle, short wave radio.
• First Description: The party sees a sign stating “No Trespassing” followed shortly by a man in a truck pulling up behind them.
• GM’s Description: The man is a loner who has retreated to his tract of land hidden from society and deeply resents intrusions by anyone. If the party does not leave (as he will insist they do) he will not hesitate to fire on them. He is a bit nuts.

NPC Nr. C17: Colonist
Environ
ST(B) EN(C) DX(B) AY(A) IN(B) MP(B) EM(B) LD(B) AG(B)
SS: Poor colonist
Skills: Urban 0; Grav HY-2; Temp HO; Environ 4; Trading 2; Life Support 2; Shuttle 1; Agriculture 2; Mining 2; Glider 1.
Possessions: Glider, knife, expedition suit, respirator helmet.
• First Description: As the party travels across-country, they find a person sitting on a rock looking very dejected.
• GM’s Description: This person is very tired of being a colonist and wants to leave. He will attempt to convince the characters to take him along anywhere they are going. If they refuse, he will not get violent, just more depressed.

NPC Nr. C18: Miner
Mountains
ST(B) EN(C) DX(C) AY(B) IN(D) MP(A) EM(C) LD(C) AG(C)
SS: Lower middle class
Skills: Urban 0; Grav HY-1; Temp NL; Environ 5; Planetology 4; Trading 3; Sledd 4; Mining 3; Geology 6; Handguns 1; Laser Pistol 3.
Possessions: Jetpack, expedition suit, sled, laser pistol, rifle, stun gun, short wave radio, geoscanner, chemanalysis lab, mining robot.
• First Description: The party stumbles upon a very small mining operation with a few people and robots.
• GM’s Description: This trader has discovered a very rich gem deposit which he slowly mines, using the gems for barter to receive supplies. He will claim he mines a low-yield ore deposit which barely pays for itself. He is hiding the real information because he likes living relatively alone and independent.

NPC Nr. C19: Lawman
Road
ST(C) EN(C) DX(D) AY(C) IN(B) MP(A) EM(B) LD(D) AG(D)
SS: Skilled tech
Skills: Urban 0; Grav LT-2; Temp NL; Environ 4; Machine Gun 2; Longarms 2; Handguns 4; Helicopter 3; Battlefield 2.
Possessions: Helicopter, machine gun, needled pistol, impact armor, short wave radio.
• First Description: As the party drives along a road, they are hailed and told to stop by an individual in a helicopter.
• GM’s Description: The person is a lawman looking for a group who stole a vehicle like the one the party is riding in. If the party’s papers and ID’s are in order, they will not be hindered; otherwise the lawman will detain and possibly arrest the party, depending on how suspicious the party is.

NPC Nr. C20: Villagers (two dice)
Jungle, Forest
ST(C) EN(C) DX(B) AY(B) IN(B) MP(A) EM(A) LD(B) AG(C)
Skills: Urban 0; Grav LT-1; Temp HO; Environ 5; Animal Drawn 4; Bows 4; Blades 2; Survival 4; Ambush 2.
Possessions: A blade weapon, a bow weapon, arrows.
• First Description: As the characters are foraging through the undergrowth, they run into a group of backward natives, who are very curious about these strange looking individuals.
• GM’s Description: The villagers are harmless unless provoked, in which case they will fight to kill. They have valuable information concerning the area (flora, fauna, gaudy mineral deposits) and, if communication is possible, they will serve as guides and helpers given good treatment by the party.

[36.2] Rare NPC’s

NPC Nr. R1: Psion
Spaceport
ST(B) EN(B) DX(B) AY(C) IN(D) MP(D) EM(B) LD(A) AG(C)
SS: Independent trading family
Skills: Urban 4; Grav NW-3; Temp CO; Environ (all) –4; Handguns 1; Pilot 1; Navigation 6; Psionic Boost 4; Mind Control 3; Psionic Comm 4; Psion Tech 2; Life Sense 2; Glider 1.
Possessions: Expedition suit, stun gun, internal gravity web, propulsion gun.
• First Description: During the course of riding over between trips, the characters meet a psion who has just had a falling out with her old ship and crew.
• GM’s Description: The psion is a very beautiful woman who was relieved of her duties due to an ill-fated liaison with the pilot. Her career is checkered with this kind of behavior; her love affairs affect her performance too much. She will attempt to hide this as she needs work, and will try to sell herself just on her skills, which are impressive.

NPC Nr. R2: Stowaway
Spaceport (just before or after leaving)
ST(C) EN(C) DX(B) AY(C) IN(D) MP(A) EM(B) LD(B) AG(B)
SS: Lower middle class family
Skills: Urban 1; Grav LT-1; Temp NL; Environ 2; Programming 6; Chemistry 4; Geology 3; Asteroid Mining 2; Planetology 1; Laser Pistol 1.
Possessions: None.
• First Description: In a pressurized part of the ship, the characters discover a stowaway. He is unarmed, with little inclination to fight.
• GM’s Description: This human is trying to
escape from an insane asylum. He has determined the planet which the characters are leaving is in danger of a huge seismic shock which will cause great damage. The authorities locked him up to prevent panic; they think he is crazy; the GM should decide for himself.

NPC Nr. R3: Stowaway

Spaceport

ST(A) EN(B) DX(B) AY(B) IN(C)
MP(A) EM(B) LD(A) AG(A)
SS: Local establishment
Skills: Urban 0; Gra夫 LT-1; Temp HQ; Environ 3; Streetwise 1; Glide 1; Blades 1.
Possessions: None.

First Description: In a state room, the characters find a lovely young girl attempting to hide in a closet. She is very docile and very nervous.

GM'S Description: The girl is running away from her parents who treat her fairly well. She simply has never been in space and wants to see what it's all about.

NPC Nr. R4: Clergyman

Spaceport, Urban

ST(B) EN(B) DX(C) AY(B) IN(B)
MP(B) EM(B) LD(B) AG(C)
SS: Skilled tech family
Skills: Urban 1; Gra夫 LT-1; Temp HQ; Environ 2; Streetwise 2; Disguise 4; Forgery/Counterfeiting 2; Blades 1.
Possessions: Knife.

First Description: The party is approached by a man wearing odd clothes but with a strange smile on his face.

GM'S Description: This individual will claim to be part of a local religion whose purpose is to try to convince people to stay home rather than wander around the galaxy. He will engage the characters in conversation for as long as they will listen. During this time, he will pick their pockets. If caught, he will feign amnesia (or some other malady) and plead for the party's sympathy. If it looks as if he will be turned in, he will fight, but only to free himself and run away.

NPC Nr. R5: Lawmen (one die)

Spaceport, Urban

ST(B) EN(C) DX(C) AY(B) IN(B)
MP(A) EM(B) LD(C) AG(C)
SS: Communal colony
Skills: Urban 1; Gra夫 LT-1; Temp NL; Environ 2; Streetwise 1; Laser Pistol 3; Automobile 2; Body Armor 1.
Possessions: Laser pistol, stun pistol,needie pistol, reflective armor.

First Description: As the characters are strolling through the starport, a figure rushes by them followed shortly by other figures obviously chasing the first one.

GM'S Description: These lawmen are chasing an escaped criminal and will enlist the aid of the characters if they wish. This will be done by asking the crowd in general to help stop him. If the party aids and the criminal is apprehended, the lawmen will be extremely grateful and offer to assist the party in any logical way they can.

NPC Nr. R6: Entertainer

Urban, Town

ST(A) EN(B) DX(C) AY(C) IN(B)

GM'S Description: As the characters are exploring ruins (or possibly just passing the time) they notice a woman carefully picking her way through some rocks.

GM'S Description: She is an archeologist looking for information concerning elder civilizations. She is convinced man explored this part of the galaxy in a previous generation; these are the ruins of that exploration. She will calmly present her evidence to the party. She is totally wrong.
UNIVERSE, PAGE 78

NPC Nr. U4: Local Doctor
Town
ST(B) EN(B) DX(B) AY(B) IN(C)
MP(A) EM(C) LD(B) AG(C)
SS: Skilled tech family
Skills: Urban 1; Temp LT-1; Temp HD; Environ 2; Teaching 1; Diagnosis 3; Treatment 2; Handguns 1; Chemistry 1.
Possessions: Medical scanner (Civ Level 8), chemanalysis lab (Civ Level 6), chemsynthesis lab (Civ Level 7), plus various laboratory items such as flasks, microscope, etc.

First Description: As the party enters a small settlement out in the wilderness, they are introduced to the local doctor who, they are told, is also the mayor.

GM's Description: This individual has discovered rare trace elements in the drinking water which, when augmented with additives of his own creation, cause the local populace to become very docile. He is in semi-retirement and wishes nothing more than to remain here with the adulation of this town. He is not dangerous and will give up his dream if he is threatened.

NPC Nr. U5: Art Dealer
Urban, Suburban
ST(A) EN(A) DX(A) AY(A) IN(A)
MP(B) EM(B) LD(A) AG(A)
SS: Family dominates planet
Skills: Urban 1; Temp LT-1; Temp NL; Environ 1; Diplomacy 1; Trading 1; Forgery/Counterfeiting 1.
Possessions: Outside of his shop and clothing, none.

First Description: The party sees an interesting work of art in the window as they walk into an art shop.

GM's Description: The work of art has been created to cover a masterpiece which was thought lost ages ago. The exact type of piece is left up to the GM. If the players are enticed to purchase the item, examination with a chemlab will give information as to the existence of the hidden work. The store owner will be very affable and will not push the item, which he believes to be a worthless piece of junk.

NPC Nr. U6: Slaver
Farmland
ST(B) EN(C) DX(B) AY(B) IN(C)
MP(A) EM(A) LD(C) AG(D)
SS: Lower middle class family
Skills: Urban 0; Temp NW-1; Temp NL; Environ 3; Agriculture 6; Animal Drawn 1; Tractor 1; Truck 1; Trading 4; Longarms 2.
Possessions: A hydroponic farm, farm equipment, rifle, slaves.

First Description: The party happens upon a huge hydroponic farm with many workers, and their owner approaches them.

GM's Description: This farm owner is also a slaver, the workers all being owned by him. On this planet there is no law preventing humans from owning others, and he has made such an arrangement economically feasible. He will hide the fact that he owns the workers for as long as possible and, if found out, will evict the characters from his land. He will fight if provoked.

NPC Nr. U7: Artist
Hills, Mountains
ST(A) EN(B) DX(D) AY(C) IN(C)
MP(C) EM(C) LD(B) AG(B)
SS: Oppressed minority
Skills: Urban 0; Temp LT-1; Temp NL; Environ 2; Glider 1; Teaching 2; Survival 2.
Possessions: Foodstuffs and sculpting tools.

First Description: As the characters round a bend on a backwoods road, they see an incredible edifice; it reflects light in all directions and seems unhollow.

GM's Description: This is a piece of sculpture created by a hermit artist who lives in a hut to the back of the area. He retreated away from society to create this masterpiece; even to the untrained eye it is beautiful. It is so large that moving it would be impossible without heavy equipment. Thus, there is little the party can do to help the artist, although the characters take hostile action, the artist will hide, confident his work will remain after the party has left.

NPC Nr. U8: Disease Carrier
Jungle, Forest, Woods
ST(B) EN(B) DX(B) AY(B) IN(B)
MP(B) EM(C) LD(B) AG(B)
SS: Poor colonist family
Skills: Urban 0; Temp NW-1; Temp CD; Environ 3; Agriculture 4.
Possessions: Farm tools.

First Description: As the party forages through the brush, they come upon a small farm growing wild exotic tubers.

GM's Description: The farmer and his family all are carriers for a dread disease (the exact type is left up to the GM). They are immune because they eat the tubers daily. If the characters take some of the food (which the farmer will offer), they will avoid getting ill until the supply runs out.

[37.0] Spaceship Encounters
A spaceship encounter may occur when using the Deep Space or Planet Space column of the Encounter Table. The following encounter descriptions indicate whether they occur in deep or planet space and are divided into common, rare, and unique categories. Remember, when the party is travelling in a spaceship, an encounter check is conducted once per day (24-hour period).

[37.1] Common Spaceship Encounters
1. Deep Space. While heading out of the system, the characters are hailed by a trading vessel heading into the system with some renown for the settlements. The vessel is the Corco Mu, and the voice on the radio is friendly.

GM should decide where this vessel is from and what world it is heading to. It poses no threat to the party.

2. Planetary Space. The party's vessel is approached by a Digger bearing federal ID and hailing the party to stop. This is a federal ship calling for routine inspection of the goods and material the ship is carrying. They will inspect carefully and will hand out fines and arrest guilty parties if such items are found.
3. Planetary Space. While in orbit, the party finds that a Piccolo has gained rapidly on them and hails them to slow up and prepare to be boarded.

This is the Astroguard needing to ascertain where the party's vessel came from, where it is going, and with what purpose.

4. Deep Space. The party's ship passes a Corco Gamma heading out of the system.

This is a Biological Survey Mission heading for a new system. The presence of habitable worlds has just been confirmed and this is the first survey mission to go there to collect specimens. There is a suspicion of danger, and the ship has brought along some weaponry to defend itself. The crew is hopeful no danger will be present.

5. Planetary Space. At the first radar indicates and then visual sightings confirm a Ter·

Willicker 3000 is rapidly tumbling end over end toward the party's vessel.

A collision is imminent unless the pilot can avoid the accident. Make a check for collision, using the accident procedure (see 27.8). The rationale for this out-of-control spacecraft is left up to the GM.

[37.2] Rare Spaceship Encounters

1. Deep Space. As the party heads into a system from the jump point, they notice a Corco Zeta heading toward them at a brisk clip. No radio contact can be made, and there is no possibility of collision.

The ship has been disabled by a meteor strike and cannot hail the party's ship nor maneuver in any fashion. If the party does not attempt to change course and catch them (a maneuver the GM should play out), they will drift helplessly into interstellar space. If it appears the party will not stop to help, the Zeta will attempt to gain their attention by firing their burster.

2. Deep Space. Near the jump point into the system, the party encounters a Corco Gamma drifting slowly.

If the party jumps to raise the ship by radio, they will receive a brusque reply indicating that all is well. Actually, on board that vessel an argument is taking place between the navigator and the captain concerning the fact they have jumped to a system they did not wish to. The psion on the Gamma will attempt to contact the psion on the party's vessel to ask for help.

This is a scientific mission carrying supplies to a colony on a far-off star. The colony is new and needs all the help it can get. The Clarinet's communications officer asks if any on the party's ship are interested.

[37.3] Unique Spaceship Encounters

1. Deep Space. A Piccolo, obviously damaged, is drifting out near the jump point.

The crew of 10 are criminals and wish to hijack the party's vessel. Their maneuver power is gone, but they can still fight. They will feign innocence and will try to get on board the other vessel armed and try for a take-over. They are unhinged into this system escaping from authorities.

2. Planetary Space. A ship of totally unknown design is in a slow elliptical orbit around a moon.

This ship is either (a) a old space probe or (b) a wrecked alien craft. The GM should decide for himself, as he should also decide why it is derelict. This encounter may need a great deal of time to play out.

[38.0] Accidents

The accidents listed fall into two categories: those the characters can prevent and those they cannot. The GM may choose from either category. The accidents they can prevent will involve a check which determines whether their skill has avoided the unfortunate occurrence. When any incident occurs in which equipment becomes damaged, the characters' tech skills may be called upon to effect repairs.

The procedure for effecting the repair of an item is detailed in 13.1. See 27.8 for additional information on accidents.

The base chance to avoid a common (C) accident is 75%; a rare (R) accident, 50%; and a unique (U) accident, 25%. Each of the following accident types can occur in any one of the three possible degrees indicated (C, R, or U).

[38.1] Avoidable Accidents

Vehicle Accidents

(C) A rut in the road causes possible loss of control. (R) An underground stream has caused a sink hole to appear just in front of the vehicle; try to avoid getting stuck. (U) A landslide threatens to bury the vehicle.

(C) While travelling near a marsh, the ground begins to sink away; try to avoid being mired. (R) A sudden seismic tremor causes possible loss of control. (U) A sudden increase in volcanic activity causes magma to spurt toward the vehicle; try to avoid it.

(C) While travelling along a cliff, a wheel slips toward the edge; try to avoid becoming stuck. (R) Brakes begin to act sporadically while rolling down a hill; try to avoid possible accident. (U) Earthquake causes large fissure to form in road; try to avoid falling in.

(C) In a city, another vehicle ignores a traffic signal and heads directly toward your vehicle; try to avoid it. (R) While driving by a construction site, a beam has broken loose; try to avoid it falling on you. (U) A crazed pedestrian steps right out in front of your vehicle; try to avoid running him over (an NPC encounter may result if you succeed).

Suit/Armor Accidents

(C) If character's Gravity Skill Level is less than 1, a fall is possible. (R) The character has wedged his boot into a crevice; try to extricate it without causing damage. (U) A violent wind storm has sprung up carrying with it debris and small rocks; try to reach cover without being pummeled.

(C) A boulder comes rolling down a hill; try to avoid being struck. (R) Ice cracks open in front of you; try to avoid falling in. (U) Jet·

pack is blown over; try to land safely.

Air Vehicle Accidents

(C) Downdraft threatens to pull craft off course; try to regain control. (R) Electrical storm causes instrument loss; try to land safely. (U) Violent hail storm forces an emergency landing.

Marine Vehicle Accidents

(C) Large swells cause difficulty in reaching land; try to return safely. (R) Violent storm threatens to swamp vessel. (U) Huge creature collides with vessel and possibly capsizes it.

Outer Space Accidents

(C) As you try to land your shuttlescraft, unexpected terrain threatens to cause landing problems. (R) As your ship comes out of hyperjump, you encounter a meteor storm; try to avoid collision. (U) Flying through the tail of a comet causes instrument malfunction; the ship must be flown manually.

(C) Near the spacecraft, a shuttle loses control and heads for your craft; try to avoid collision. (R) Some unexplained disturbance causes your orbit to decay; try to avoid falling into atmosphere before gaining control. (U) Shuttle landing gear fails; try to avoid crash.

[38.2] Unavoidable Accidents

Common

- If in a poison or corrosive atmosphere, a scanner will stop giving correct readings.
- If in a thin atmosphere, a chemsynthesizer will stop cold.
- If in any star system other than an “M” spectral class, star flares cause photographic equipment to malfunction.
- If in a contaminated atmosphere, any radio will not work.
- If in a vacuum, any holographic equipment will not work.
- A violent storm brews up and any exposed equipment is damaged.
- A mild seismic quake topples any exposed equipment.
- If in a temperature zone above 100°, any cooling system will malfunction.
- If in a corrosive atmosphere, any air system will shut down.
- The ignition for any ship drive system fails.
- Computer freezes up.

Rare

- Any character in a temperature type (CD or HO) 2 removed from his home type contracts a disease.
- A captured creature destroys its cage and attempts to escape.
- A robot stop following commands.
- A meteor strikes ship causing damage.
- In a stressful situation, any force field overloads.

Unique

- If in a corrosive atmosphere, any equipment exposed will deteriorate.
- Any hand-held energy weapon explodes.
- Any grenade explodes.
- Any spaceship pod begins to leak.
- Any computer will not allow access to information.
- Any Ciw Level 8 robot attacks its owner.

As with the other lists, this one is intended to guide and inspire the GM, not limit him. Feel free to invent your own accidents.
X. Adventure: Lost on Laidley

This chapter presents a complete star system and adventure for use by the GM and a suggested five players. It is recommended that this adventure be played before the GM starts designing his own worlds and adventures, so that all concerned get a good grasp of the many game systems and opportunities that are available. Before beginning the adventure session, the GM should read all the Sections of the Chapter. He should allow the players to see Sections 39.0 and 40.0, the Orionis Star System Log, the three World Logs, and the Environ hex map only. The GM should have a good grasp of the rules in the GM Guide and the players should at least be aware of the importance of their characteristics, skills and equipment.

The adventure takes place in the Orionis star system (see 39.0). However, use of the system Log is not needed for this adventure. The GM may wish to begin his own adventures in this system or borrow ideas from it when creating his own systems. The Orionis system was generated in exact accordance with the rules of Chapter V and serves as an example when learning the world generation system.

[39.0] The Orionis System

The GM and the players should look over the Orionis Star System Log and the three World Logs included in this booklet. All the basic information about the system is explained on the logs. Historical information and additional details can be found in this section. With the exception of some undiscovered resources on Laidley, all the information would be known by the characters.

Orionis is an F6 type star (yellow-white) 26 light years from Sol. It is the most distant system to be extensively colonized by the federation. Eighty years ago (in 2251), exploration and colonization of the system opened with the arrival of an expedition financed by a South American conglomerate. Its efforts to colonize Titus were soon overshadowed by the arrival of a Scandinavian coalition on Kryo. The Nordic settlers quickly turned their small, cool planet into the center of activity in Orionis. The system is peaceful, and federal control is thus light. A volunteer Astroguard squadron operates out of the Kryo spacecraft, and a federal research brigade bivouacs in New Oslo (with a battalion detached to Titus). If necessary, federal naval and trooper forces will hyperjump in from sector headquarters.

Aside from the information on the System Log, no details are provided for Acorpus, a huge, hostile world. If the GM wishes to use the planet or its moons for an adventure, he should complete the procedures outlined in 24.0 and 25.0 of World Generation.

[39.1] Titus is a large, humid planet with 20,000 settlers living on its scattered islands.

When colonization of the Orionis system began, Titus was considered the prime candidate for system supremacy. However, the lack of high value resources and its restrictive escape velocity retarded development; Kryo became the center of Orionis commerce. Titus has a spectacular set of rings and, orbiting further out, a small moon (1HP, not shown). A small spacecraft is located in Titus, the planet's capital and largest town, with limited freight service to Kryo, but no interstellar facilities. The colonists generally live in a manner similar to life in 1900 — some industrialization combined with heavy agriculture. The major resource of Titus is its delicious high-protein fruits, found in great abundance throughout the temperate climates. Demand for this fruit keeps merchants coming to Titus to take the delicacies to other worlds (where they are sold at exorbitant prices). Surface shipping is the main form of transportation on the calm seas of Titus, and most of the settlements hug the coastlines.

The following environs of Titus are of special interest. Titusian fruits exist in each environment and in edible plants.

- **n02 Edible plants**
- **n03 2,000 people, iron, edible plants**
- **n06 Edible plants**
- **n09 9,000 people (including 6,000 in Orion and a federal ranger battalion), edible plants, cesium, iron**
- **n12 3,000 people, edible plants, copper**
- **n18 Iron**
- **n20 Helium**
- **n23 1,000 people, copper**
- **n05 Edible plants**
- **n03 Chlorine**
- **n13 Edible plants**
- **n12 Edible plants**
- **n10 Edible plants**
- **n09 Edible plants, 5,000 people**

[39.2] Kryo, the capital world of the Orionis system, is a small cool planet with 10 million inhabitants.

A coalition of Scandinavian countries began colonization of Kryo soon after Titus was settled. Taking advantage of the planet's slight gravity and its abundance of natural resources, the colonists quickly set up a viable industrial base. Kryo's major exports include precision machine tools, tech kits, light weaponry, and high-quality optical equipment. Kryo is prevented from full financial independence by its lack of resources necessary to manufacture armor, spaceships, medicines, and related goods. These things and such basics as wood and fertilizers must be imported. Kryo's orbiting spacecraft provides freight service and limited passenger service to and from Sol and a few nearby systems. The installation is small, supporting an Astroguard squadron, light repair facilities, and a combined Kryo/Federal staff of 60. A shuttle service flies between the spacecraft and New Oslo twice daily.

The environs of Kryo contain the following:

- **n01 Iron, argon**
- **n02 1 million people, edible plants, light fiber plants, carbon chemicals**
- **n03 7 million people (including 1 million in New Oslo), federal ranger brigade, carbon chemicals, edible plants, light fiber plants, iron, phosphorus**
- **n04 200,000 people, aluminum, sulfur**
- **n06 Iron, aluminum, carbon chemicals**
- **n07 Iron**
- **n05 500,000 people, nitrogen, chemicals, carbon chemicals, edible plants, iron, silver**
- **n04 Iron, aluminum**
- **n03 1.3 million people, nitrogen chemicals, edible plants, carbon chemicals, iron, silver**
- **n02 1,000 people, nitrogen chemicals, carbon chemicals, edible plants, iron**

[39.3] Laidley is an unsettled planet on which most of the adventure occurs.

As described in 40.1, Laidley recently hosted an unsuccessful exploration mission of about 100 explorers and pioneers from Kryo. One side of the planet always faces the sun, thus, temperate weather is more prevalent on the planet much more than on most worlds (see below). Although Laidley has no appreciable surface water, the warmer environs show traces of moisture. A network of small streams has been observed in a lightly vegetated area (Environ 7). The environs of Laidley have the following average temperatures and resources:

- **n01 0°, cesium**
- **n02 25°, nitrogen chemicals**
- **n03 25°, radioactives**
- **n04 25°, silver**
- **n06 25°, nitrogen chemicals, silver**
- **n06 75°, nitrogen chemicals, silver, phosphorus**
- **n07 50°, nitrogen chemicals, edible plants, adamantine**
- **n08 0°, cesium**
- **n09 50°, radioactives**
- **n10 75°, ammonia**
- **n11 50°, mercury**
- **n12 0°, silver**
- **n13 50°, nitrogen chemicals, edible plants**
- **n01 0°, germanium**
- **n05 25°, silver, germanium**
- **n04 25°, germanium**
- **n03 25°, phosphorus, germanium**
- **n02 50°, silver, nitrogen phosphorus**

Note: Many of these resources may be undiscovered. If the GM wishes, he may conceal their presence from the players. These resources have little effect on the enclosed adventure, but the GM may come up with a geological expedition to Laidley to hunt for undiscovered resources (radioactives, silver, and adamantine would certainly be finds).

[40.0] The Players and the Characters

Once the GM has assembled the players who are going to participate in this adventure, they should decide whether or not to generate their own characters. *Lost on Laidley* is designed as a learning experience for all concerned, and it might be better if each player is free to experiment with the game systems without the fear that a mistake
would cause his character's death. To facilitate this, five pre-generated characters are detailed in 40.2 through 40.6. These characters are varied in their characteristics and skills to allow many game systems to be used during the adventure. They are also designed to meet well with the mission as it stands. These characters may only be used until the end of the adventure on Laidley. After that the GM should have players generate their own.

If the players wish to generate their own characters, the GM assigns each player one character or allows them to be chosen randomly. With fewer than five players, certain players may play more than one character or the GM may play any which are not used. Once the players have their characters, the GM should examine their Character Records for completeness and accuracy.

If the players are using the pre-generated characters, the players should give their character a name. Note: The Environment Skill Level is listed for each character's Home Environment; all other environment Skill Levels should be extrapolated as explained in Case 5.4.

[40.1] The GM should read or paraphrase the following background of the adventure for the characters.

This is the story of the ill-fated expedition that Darmath Svenson, the adventure's sponsor, will present to the characters as he heard it from the expedition's commander. The characters have been hired by Svenson to go on this mission. If the players are using the pre-generated characters, their explorer character that the initial contact was made with Darmath's secretary. If the players are using their own characters, the GM should invent the connection. The characters are escorted into Darmath's personal office, located somewhere in downtown New Oslo. It is the office of a man who is president of his own trading firm, a firm which is doing very well financially. Darmath is a dashing middle-aged man in good shape. For a complete description, see 41.1. He will ask the characters to make themselves comfortable and will then relate this tale:

One year ago, a scientific expedition set out from New Oslo for Laidley (see 39.0 for information concerning the system, which should be shown to the players). The expedition was concerned with exploration and mapping of that world in preparation for possible colonization. They landed without incident, set up Laidley Base 1, and then proceeded to explore the region (Environ 13 of the World Log). Laidley proved very inhospitable, having a poisonous atmosphere and almost no water. A great deal of the expedition's time was spent synthesizing oxygen and water. Some readings seemed to indicate there was some water underground. One favorable attribute was the plant life; not only was it edible, but very flavorful as well. Another interesting item was a strange creature which the expedition called an Auroch. It was a docile herd animal, vaguely swine-like, which roamed the world. The Aurochs never threatened the expedition, being herbivores and appearing very stupid. Various sightings of other creature types excited zookeepers on Laidley, and a biological survey mission had been planned for early next year. These detailed creature reports had been sent back by the expedition's biologist, Mordaca Svenson, Darmath Svenson's sister.

After eight months of painstaking exploration and examination, the expedition was ready to give up on Laidley. There was not enough water to justify active colonization. Then one day scanning revealed traces of surface water 8,000 km west of Laidley Base 1. Mordaca was chosen to lead a small scouting party to the site to investigate. They chose a Floater to avoid the volcanic range to the west.

This scouting party consisted of 10 expedition members, all of whom disappeared. Their journey took 200 consecutive hours of flying. The trip was uneventful until the end. (At this point, Svenson will play a tape of the scouting party's last radio transmission. They had been having trouble with the ship's transmitter and the message is garbled as a result.)

"...having a...with monopole electrical...possibly...land the Floater here...water...oh, no...Cord, help steer the ship and make...".

The voice was a female, and Darmath will tell the characters the voice was Mordaca's.

Three days after the last transmission, the volcanic range became active, and the expedition's safety was in jeopardy. Because the world showed so little promise, the expedition commander (Svenson here indicates extreme disgust with the choice) chose to leave the world. Knowing the fate of the scouting party was in doubt (but fearing the worst) the commander ordered a fly-by of the area from where the party's last transmission was received. Upon seeing no trace of them, not even the wreckage of the Floater, the commander ordered a state funeral for the 10 and returned to Kryo. Questioned upon his return, the commander admitted that, because no trace at all had been spotted, there was doubt as to the fate of the scouting party. The funerals were cancelled. All investigators admitted the curious fact was the absence of any metal debris, but most concluded the party's Floater had sunk into the lake which was mentioned.

Svenson believes there were no remains because the party had landed the Floater, repaired it, and proceeded to return to Laidley Base 1. Their radio was inoperative, so they could not have radioed in, and the expedition left without them. At least, this is the hope he is clinging to. The accident occurred four weeks ago.

Svenson will supply the party with all the necessary equipment and transportation to Laidley. He will drop them off on the world at Laidley Base 1 on his way out system to complete a business deal. His ship, the Star Vision (Corco Iota class), will carry the characters, a crawler, and plenty of equipment to Laidley, and the ship's lander will provide transportation to the surface. If the missing expedition has not returned to base, the characters will have 18 days to complete their mission, for then Svenson will be returning to Kryo, and will stop at Laidley to pick them up. The characters will be able to contact the ship from anywhere on Laidley via the vehicle's radio and they will be picked up wherever they are at the moment.

Their mission is to first find out what happened to Mordaca. Svenson wishes to get the proof of one form or another; he wants to be sure of what happened to her. Second, any unusual creatures the characters can capture and bring back with them will be paid for (Svenson is not interested in the Aurochs).

The characters are offered 5 Trans apiece for completing the mission, and double that if any interesting creatures are captured. Svenson will pay triple if that concrete evidence of Mordaca's fate is brought back.

Svenson will gladly answer any questions the characters present to him, then he will urge them to prepare themselves for the mission, as he wishes to leave tomorrow.

[40.2] Character #1: Explorer

ST: 5 | EN: 4 | DX: 4 | AY: 5 | IN: 7
PM: 3 | LD: 7 | EM: 4 | AG: 8

HY(2), EXO(10); Temp HO; Environ HL/VO (4); Body Armor 4; Machine Gun 2; Paint Gun 3; Suit Tech 1; Ground Vehicles ATV(1); Laser/Suit Pistol 3.

**Possessions:** Reflect/impact armor (Civ Level 7), clothing.

**[40.5] Character #4: Doctor**

**ST:** 4; **EN:** 4; **DX:** 8; **AY:** 4; **IN:** 9; **MP:** 2; **LD:** 2; **EM:** 6; **AG:** 4; **SS:** Local Establishment.

**Age:** 36 **Money:** 4 Trans, 600 Mills.

**Skills:** Urban 2; Grav NW(1), LT(1), HY(1); EX(5); Temp NL; Environ FL/JO (2); Teaching 3; Diagnostics 4; Treatment 3; Ground Vehicles Automobiles(1); Laser/Suit Pistol 1; Electro Tech 2; Physics 1.

**Possessions:** Medi scanner (Civ Level 6), clothing.

**[40.6] Character #5: Ex-Scout**

**ST:** 4; **EN:** 3; **DX:** 4; **AY:** 4; **IN:** 6; **MP:** 2; **LD:** 3; **EM:** 7; **AG:** 5; **SS:** Skilled Tech Family.

**Age:** 24 **Money:** 1 Tran, 300 Mills.

**Skills:** Urban 0; Grav NW(1), LT(1), HY(3); EX(5); Temp HO; Environ PK/VO (2); EVA 2; Handguns 2; Pilot 2; Survival 2; Air Vehicles Gilder(1); Direct Lift(1); Treatment 1; Biology 1; Suit Tech 2.

**Possessions:** None except clothing.

**[40.7] Darmath Svenson will provide the characters with the following equipment for their use on Laidley.**

**Crawler (ATV).** See 21.1 and the Land Vehicle Chart for all specifications on this vehicle. The crawler has an oxygen synthesis system programmed to work in the poison atmosphere of Laidley. Four weeks of food and water for four are aboard. The rear of the vehicle is sealed off from the passenger compartment to provide 10 cubic meters of space to store creatures in their own atmosphere. An air lock large enough for one man separates the two compartments. Built into the crawler are a planetary shortwave and a neurosensor.

Three of the following items are loaded into the crawler: six Civ Level 7 expedition suits (character #3 will probably want to use his armor instead); one Civ Level 8 bioscanner; one Civ Level 8 chemsynthesizer; one first aid kit; one energy scanner; one basic repair kit; one suit kit; one Civ Level 8 electrokits; one Civ Level 6 vehicle kit; four force cages; one super cage (eight cubic meters); two metal cages (one cubic meter each); three Civ Level 8 laser pistols; two Civ Level 5 pistols; two Civ Level 8 stun pistols; one Civ Level 6 paint gun; one Civ Level 8 needle pistol; and binoculars.

The characters may also bring along any equipment they already own. If they wish to leave any behind, Svensson’s associates in New Oslo will watch it.

**[41.0] The Gamesmaster’s Background**

The situation as Darmath Svensson described it to the characters is accurate as far as it goes. His suppositions concerning the fate of the missing expedition are erroneous, however. Nothing of the fate of the missing explorers is known to anyone but its five surviving members, and the players should not find out any of it unless they find the explorers.

The description of Svensson is a guide as to how his part should be played by the GM. The final interpretation of his personality is up to the GM, as he is the one who will be "acting" the part of Svensson for the player’s benefit.

**The Fate of the Missing Explorers**

The floater carrying Mordecala Svensson, Cord Tenon, and their eight companions flew through the glassy surface of the icy planet. After their radio failed, they spotted the lake (1622 of the environ map) and chose to land the craft on its surface. Immediately after the floater settled on the lake, acidic agents in the water began corroding the metallic underside of the craft. The explorers threw a large liferaft in the water, correctly assuming it would float until it contacted the lake’s synthetic construction. Wearing expedition suits and carrying what equipment they could, the 10 made for the shore 500 meters away. Looking back, they saw a transparent slug-like thing (the slug-like creature was the Mordecala) drag themselves beneath the surface of the rolling lake.

Mordecal led the party away from the deadly lake northeast to a cave in hex 1522. There Cord set up their chem synthesizer to purify water from a nearby stream and to synthesize oxygen from the atmosphere. However, it soon became clear that the initial supply of oxygen in their suits and the amount the synthesizer could produce would not be enough to support more than five people after five days. They were saved from a grisly decision when the four days had been spent running away from the slug-like thing that was trying to escape. The slug-like creature was the Mordecal, which had grown up in an environment similar to the one in which its sister was lost, and also knew how to operate an ATV. A man of such qualifications could retrieve any creatures encountered and also search for anyone else. Mordecal was not sure if her sister was dead (although she feared the worst), and would not truly accept her fate without concrete proof. Her characteristic ratings are:

**ST:** 5; **EN:** 6; **AY:** 3; **IN:** 8; **MP:** 2; **LD:** 6; **EM:** 4; **AG:** 2; **SS:** Independent Trading Family.

**Skills:** Urban 2; Gravity Lt 1; Temp NL; Environ MN/WD(2); Pilot 2; Economics 4; Trading 5; Automobile 3; Shuttle 2; Motorboat 2; Gambling 2; Biology 1.

Darmath is a handsome male of Scandinavian descent; he is middle-aged, but in very good shape. He does not wish to actually risk his own skin and instructs the party as such. His little sister is close to him and resembles him slightly (enough so that the characters would notice).

**[41.2] The adventure begins as the characters board a transporter shuttle with Darmath Svensson at the New Oslo terminal to fly to the Kryo orbiting spacecraft.**

The trip to the spaceport takes about an hour. Six hours after the characters arrive at the spaceport, the Star Vision is ready to depart. While waiting, the characters will undergo a short courtesy federal inspection (Svensson is known and trusted at the Kryo spaceport). The rest of the time is the characters’ to do with what they will. The journey from Kryo to Laidley in the Star Vision takes about six days (calculated in accordance with 33.0).

**The Star Vision is a Coro Iota Class luxury freighter with the following pods: light weapon, augmented jump, energy, full complement of crew, lander, standard cargo, buffered cargo, living cargo. All pods are armament Class 1. The ship is fully crewed; the characters may relax during the voyage.**
ADVENTURE GUIDE, PAGE 83

The GM should remember that the terrain and contour of any hex the party currently occupies is considered their environment for purposes of encounters and movement, regardless of the overall nature of Environ 7.[42.2] The five surviving members of the missing expedition are encamped in a clearing in hex 1522 of the Environ 7 hex map.

Two of the survivors are Mordecal Svenson (Darmath Svenson’s sister), and Cord Tenon, the original mission’s chemist. Mordecal was the biologist, and her skill and knowledge saved the remaining members from the slug during the attack in which it killed the five others. Both Mordecal and Cord are residents of New Oslo, and knew each other as part of the ill-fated mission. They have become very close due to the fear and tension, and will try and protect each other in any pressure situation. Cord’s skill as a chemist has kept the group alive by synthesizing water and food with Mordecal’s know-how. Mordecal knows all the information concerning the slug as listed for the GM except the tunneling ability. As far as they are aware, the thing is still in the lake. Mordecal’s characteristic ratings are:

ST: 3
EN: 4
DX: 4
AY: 4
IN: 7
MP: 2
LD: 7
EM: 6
AG: 7
SS: Independent Trading Family.

Skills: Urban 1; Craft Lat 1; Temp NL; Environ MN/WD13; Laser/Star Pistol 2; Direct Lift 1; Programming 1; Biology 6; Geology 1.

Cord’s characteristic ratings are:

ST: 4
EN: 5
DX: 4
AY: 4
IN: 6
MP: 3
LD: 5
EM: 5
AG: 5
SS: Skilled Tech Family.

Skills: Urban 1; Craft Lat 1; Temp NL; Environ MN/WD2; Laser/Star Pistol 1; Handguns 2; Pilot 1; ATV 1; Chemistry 6; Programming 1; ElectroTech 1.

The possessions for the group as a whole: planetary shortwave radio; basic repair kit; expedition suits; laser pistols (Civ Level 4); submachine pistol (Civ Level 7); pistols (Civ Level 5); chem synthesizer (Civ Level 8); flare gun and 1 dozen rocket flares, life raft, sundry minor miscellaneous items (knives, personal effects).

The three other remaining members should be named and personalized by the GM, remembering that if any die (as described in 42.4), these will be the first to go. Their characteristic ratings are:

ST: 3
EN: 3
DX: 3
AY: 5
IN: 5
MP: 1
LD: 4
EM: 2
AG: 2
SS: Skilled Tech Family.

Skills: Urban 1; Craft Lat 1; Temp NL; Environ MN/WD12; Laser/Star Pistol 1; Handguns 1; Direct Lift 1; Biology 1; Geology 1; Any skills the GM sees fit 1.

[42.3] The slug is a dangerous creature that wanders the Kishiti Heights and surrounding area in Environ 7.

The slug is encountered in accordance with 42.4 and 42.5.

Size: Two Hex (large in first hex, one hex in second hex).

Combat: 14
AY: 4 (12 when in water)
AG: 11

IN: No Initiative: 10%
Composition: Carbon-based

Powers: Heightened smelling, regeneration, kinetic absorption. Dart shooting: May shoot one metal spike from above its mouth as an attack each Action Round. Chance to hit man is 80% minus 10 percentage points for each hex distant. Hit Strength and range as in power description. Acid: Teeth and mouth secrete acid for dissolving metal. Acid will not harm expedition suit. Reduce effectiveness of character’s armor by one when attacked by slug. Tunnelling: Will always have a tunnel entrance within 10 hexes each time encountered. Agility Rating doubled when in tunnel. See notes below for further information.

• Warning: A glistening trail of rusty powder leads towards a large quivering shape in the distance; or slurring sounds are heard within the entrance to a tunnel encrusted with red powder.

Eight-meter long slug-like creature covered with a sticky, rust-colored powder constantly dropping off its body and forming a trail behind it. Blue-green splooches are visible beneath the coating. Large cog-like teeth at its front end seem to make up its mouth.

• Perception: The slug’s teeth drip an organic acid capable of dissolving metals. The acid neutralizes after a few minutes in the open. The creature’s coating and trail are its perspiration and excrement, the metallic residue of its digestive process. A small orifice directly above its mouth looks as if it emits matter rather than taking it in.

• Examination: The slug lives on the metallic elements it ingests. Some of its intake is converted into small adamantine spikes that the creature shoots to break rock as it tunnels, searching for new concentrations of food. The acidic water of the lake and the streams running into the lake are the source of the creature’s power. If the creature is hurt and returns to its water before dying, it regenerates immediately (it also regenerates when out of water, at a slower rate). The creature dislikes glass and other non-metallic elements and may be easily restrained in two force cages or a sturdy, non-metallic container (if large enough).

History and Additional Information: Prior to the arrival of the stranded explorers, the slug existed in another form. It floated through a lake (hex 1622 of the environ hex map) like a jellyfish, ingesting metallic elements brought into the lake by many small streams. The slug was very similar to the lake it fostered in; they both dissolved and ingested metals using powerful acids. The creature however, had a distinct form and a mind. When the explorer’s floater settled on the lake and started to corrode, the slug went wild; never before had it received so much concentrated food at one time. Along with the floater’s hull, the slug took in the craft’s source of power, a plate of magnetic monopoles. This caused violent reactions and mutations in the creature which almost killed it. The creature died during the day after three days it slithered ashore in a new amphibian form with abilities that enabled it to travel and tunnel in its craggy environment.
Though aggressive, the creature likes to live and will flee if it is being hurt. The creature will always head for water or, if no water is nearby, to a tunnel entrance.

If the characters encounter the slug when they have the crawler, the slug will be much more interested in attacking the vehicle than the characters. If the characters leave the crawler behind when an encounter with the slug occurs, the GM may have the creature destroy the crawler, unbeknownst to the characters.

[42.4] While the characters are on Laidley, the GM uses the "100 Thousand or less" column of the Encounter Table for all encounter checks.

The procedure in 27.1 is used with the following modifications:

Common NPC: No NPC encounter. The survivors are transmitting with their radio. If the characters are in the crawler and its radio is on, they receive the message and may respond. The survivors can give the characters exact coordinates of their location.

Rare NPC: Treat as no encounter. One of the five survivors dies.

Unique NPC: Choose a unique NPC from 36.0.

Common Creature: Always treat as an encounter with a herd of Aurochs (creature #1 in 35.0). Roll percentile dice to determine how many are present.

Rare Creature: Choose an appropriate creature from 35.0. Exception: If the party is within sight of a stream on the Environ 7 hex map, they encounter the slug.

Unique Creature: Choose an appropriate creature from 35.0. Exception: If the party is within 200 km of a stream on the Environ 7 hex map, they encounter the slug.

Common, rare or unique accident: Choose an appropriate accident from 38.0.

No event: Locate the dice result among the following list of events:

82-88. If the party is within 300 km of a stream on the Environ 7 hex map, they come across a trail of rust-like powder about three meters wide (the slug's path). Following the path in one direction will lead the party to the nearest stream; the other direction will lead them to a tunnel entrance (roll percentile dice for the number of kilometers distant).

UNIVERSE. PAGE 84

89-96. The survivors shoot off a flare. If the characters are in hex 1522, they may follow the flare's trail to the survivor's camp. If the characters are within two hexes of 1522, they see a reddish glow on the horizon in the general direction of 1522. The GM should keep track of flares fired by the survivors. When 12 have been used, no more are available.

97-98. The survivors have turned their radio on for 1 hour to listen for transmissions. If the characters transmit with the crawler's radio during this time, contact is established. The survivors can give the characters exact coordinates of their location.

99. The survivors have turned their radio on for 2 hours to listen for transmissions. See above.

100. The survivors have turned their radio on for 4 hours to listen for transmissions. See above.

[42.5] The following events occur automatically if the appropriate conditions are met.

1. Each time the party comes to a stream hexside, the GM rolls two dice and subtracts the hexside's distance (in hexes) from the lake (1622) from the dice result. Locate the modified result in the following list:

0 or less: The stream is dry.

1-4: The stream is a trickle of water or puddles no more than 1/2-meter wide and 10 cm deep. The water is drinkable if boiled.

5-7: The stream is a flow of water about 2 meters wide and 1/2-meter deep. Easily traversable. The water is drinkable if purified (a simple synthesis task; refer to the chemistry skill).

8-10: The stream is a rushing brook with steep banks. Dangerous to cross on foot, no problem for crawler. The water is slightly acidic but may be made drinkable with heavy purification (advanced synthesis task; see chemistry skill).

11 or more: The stream has cut a deep wide gorge and is totally impassable. The water is very acidic and may not be made drinkable. The GM may wish to check for damage to any metallic equipment that comes in contact with the water.

Exception: A stream hexside may not have less water than a part of the same stream fork further away from the lake. For example, if a stream hexside of 0716 has a trickle of water, a stream hexside of 0918 may not be dry if encountered by the characters later on.

2. If the party comes to the shore of the lake, and the slug has not yet been killed, they automatically encounter the creature here. The water in the lake has the same properties as that in an impassable stream (see preceding).

3. If the party travels along the stream separating hex 1522 from 1623, they will encounter the survivors 200 meters from the north side of the stream (in 1522).

4. Exactly 18 days after the party is dropped off at Laidley Base, Darmaith Svenson's spaceship will be in orbit around Laidley attempting to contact them. Radio contact may be established with the crawler's radio or with the survivor's radio. Once contact is achieved, the GM rolls one die to determine how many hours will pass before the shuttle touches down to pick them up. Note: The shuttle may not land in an area with a Terrain Value above 2.

[43.0] Adventure Afterword

Lost on Laidley was designed to be a teaching adventure and an introduction to Universe for both the players and the GM. The GM must keep this in mind while running the adventure, and freely discuss any problems which he or the players might have.

The information presented in the adventure cannot cover all possible contingencies, and the GM must be prepared to flesh these areas out. If any of the players own a copy of Universe, it would be wise to insist they do not read Lost on Laidley, as it would greatly detract from their enjoyment of the adventure. In this regard, the GM may want to alter a few pertinent details to prevent any player from becoming overconfident.

The Orions system holds many interesting adventures in addition to the one presented. Perhaps the biological survey mission to Kryo could be played, for instance. The GM should use this star system to its fullest extent, thus giving himself time to set up adventures of his own and become confident in his abilities as a GM.

Once the campaign has begun, the GM should feel free to alter any details mentioned concerning the settlement and colonization of the Orions system to be consistent with his own ideas.

Page 66 contains the Star System log, and inserts containing the World logsheets and Environ Hex Map required to play "Lost on Laidley" are included, filled out and ready for use.

**NPC Record**

As noted in 27.4, the GM is responsible for the creation, interjection, and upkeep of all Non-Player Characters. Although a full character record may be used for NPC’s, it is recommended that index cards be used instead. The forms provided here may be printed on such cards, allowing the GM to maintain a file of NPC’s pertinent to his campaign. Simply take a good photocopy of the master to a quick printer and have them print it on the blank side of 3" x 5" index cards. The lined side may be used to keep additional notes about the NPC (such as his location, if he runs a shop, his history). The NPC’s listed in 36.0 (and those the GM creates) will be easier to use if transferred to these cards.

All Characteristic Ratings are abbreviated as on the Character Record. To save room on the card, only the Environ and Gravity type with the highest Skill Level are listed. All other levels would be extrapolated from these if the NPC wandered from his environment (see 5.4). If the NPC has many skills, the back of the card may be used to list the excess. Note: The Perception listing is used with an advanced skill described in the Universe First Contact supplement, published separately by SPI and available at local dealers.

**Adventure Record**

The Adventure Record (see facing page) allows the GM to have at his fingertips all the data pertinent to the characters playing in his adventure. Prior to the start of play, but after the adventure has been outlined to the players and they have chosen their characters, the GM gives a copy of the Adventure Record to the players and has them fill in the data referring to their characters. The GM then keeps the Record behind his screen for ready reference and notes. He will be able to record the passage of time, characters’ wounds, calculate accident chances and the like, without asking the players for information, and take notes about the adventure and its progress. If these records are saved, they form the core of a campaign history which will prove invaluable at later dates for reference.

When having the players fill in their Possessions, only the most important should be entered, such as weapons, tech kits, and scientific equipment. For Main Skills, only those skills which the character would use the most or are most relevant to this adventure should be entered along with their Skill Levels.

The Star System Log should be photocopied by the players before use, and the original should be preserved. SPI grants permission to photocopy this log for personal use only.
HOW THE ENVIRON NUMBERS WORK

Note that the northern (n) and southern (s) hemispheres represent a complete globe. When both hemispheres are the same size, identical numbers in the outermost band of each hemisphere are contiguous (e.g., in a Size 3 world, n02 is contiguous with s02). When the northern hemisphere is larger, the outermost northern band is identically contiguous with northern and southern bands (e.g., in a Size 4 world, s02 is contiguous with n06, n07, n08, just as n02 is contiguous with the same northern environs).

ASTEROID LOG
Gravity = None (NW) Action Round Movement: +8

It is assumed that the asteroid belt is spread out and covers an entire orbital path. This log shows the major asteroids in the belt; any number of smaller bodies should be detailed by the GM. The GM should also determine the distances between asteroids. Treat asteroids as a Size 4 world when rolling to determine resources. This log may also be used to map a world's ring. The GM should use two through six of the environs. A ring is considered a Size 1 or 2 world for purposes of determining resources.
**PLAYERS' CHARTS AND TABLES**

This set of Charts and Tables for use with *Universe* is provided for the use of the players. A complete set of all Charts and Tables, for the exclusive use of the gamemaster, can be found beginning on page 48 of this book.

To use this set of Charts and Tables, players may make photocopies for their personal use (only), either directly from the book, or after cutting carefully along the dashed lines.

<td>100 Trans</td>
<td>−2</td>
</tr>
<tr>
<td>20</td>
<td>Family influences entire federation</td>
<td>200 Trans</td>
<td>−3</td>
</tr>
<tr>
<td>21</td>
<td>Wealthy dilettante</td>
<td>200 Trans</td>
<td>−4</td>
</tr>
</tbody>
</table>

See 5.6 for explanation of use.

### [5.8] INITIAL SKILL POINTS

**IF THE MODIFIED RESULT IS... THE CHARACTER RECEIVES...**

<table>
<thead>
<tr>
<th>0 or less</th>
<th>1 Initial Skill Point</th>
</tr>
</thead>
<tbody>
<tr>
<td>1–3</td>
<td>2 Initial Skill Points</td>
</tr>
<tr>
<td>4–6</td>
<td>3 Initial Skill Points</td>
</tr>
<tr>
<td>7–9</td>
<td>4 Initial Skill Points</td>
</tr>
<tr>
<td>10 or more</td>
<td>5 Initial Skill Points</td>
</tr>
</tbody>
</table>

Roll one die and add the Initial Skill Point Modifier (listed with character's social standing on the Social Standing Table) to the die result.

### [6.5] CHARACTERISTIC MODIFIER CHART

<table>
<thead>
<tr>
<th>CHARACTERISTIC</th>
<th>STRENGTH</th>
<th>ENDURANCE</th>
<th>DEXTERITY</th>
<th>AGILITY</th>
<th>INTELLIGENCE</th>
<th>POWER</th>
<th>LEADERSHIP</th>
<th>EMOTION</th>
<th>AGGRESSION</th>
</tr>
</thead>
<tbody>

<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>The Military</td>
<td>4 5 0 4 0 0 0 5 0 0</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>General</td>
<td>1 1 1 1 1 1 1 1 1 1</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

TOTAL CALCULATED IN ABOVE COLUMN IS MULTIPLIED BY THESE POTENTIALS:

**RATIONALITY**
**COOPERATION**
**COMMUNICATION**
**COMPREHENSION**
**INTERPRETATION**
**INTERACTIVITY**
**BACKBONE**
**INTELLECT**

Modifiers are applied to the percentile dice roll for the listed characteristic if the character studied the listed field. All applicable modifiers for a single characteristic are added together. Then the total is multiplied by the Potential Multipliers that apply to that characteristic. See 6.4 for further explanation.

### [6.6] CHARACTERISTIC GENERATION TABLE

<table>
<thead>
<tr>
<th>PERCENTILE</th>
<th>GENERATION TABLE</th>
</tr>
</thead>
<tbody>
<tr>
<td>7 or less</td>
<td>1</td>
</tr>
<tr>
<td>8–15</td>
<td>2</td>
</tr>
<tr>
<td>16–24</td>
<td>3</td>
</tr>
<tr>
<td>25–34</td>
<td>4</td>
</tr>
<tr>
<td>35–47</td>
<td>5</td>
</tr>
<tr>
<td>48–58</td>
<td>6</td>
</tr>
<tr>
<td>59–69</td>
<td>7</td>
</tr>
<tr>
<td>70–80</td>
<td>8</td>
</tr>
<tr>
<td>81–90</td>
<td>9</td>
</tr>
<tr>
<td>91–100</td>
<td>10</td>
</tr>
<tr>
<td>101–110</td>
<td>11</td>
</tr>
<tr>
<td>111–120</td>
<td>12</td>
</tr>
<tr>
<td>121–130</td>
<td>13</td>
</tr>
<tr>
<td>131–140</td>
<td>14</td>
</tr>
</tbody>
</table>

When generating the Mental Power Rating, divide rating by 2 (rounding fractions down). An Agility Rating of less than 5 is considered a 5. See 6.4 for explanation of use.

### [6.8] PROFESSION TABLES

#### Employment Table

<table>
<thead>
<tr>
<th>DECLARED YEARS OF EMPLOYMENT</th>
<th>DIe RESULT</th>
</tr>
</thead>
<tbody>
<tr>
<td>16</td>
<td>4 8 12 16 20</td>
</tr>
<tr>
<td>12</td>
<td>4 8 12 16 16</td>
</tr>
<tr>
<td>8</td>
<td>4 8 12 12 16</td>
</tr>
<tr>
<td>6</td>
<td>4 8 12 16 20</td>
</tr>
<tr>
<td>10</td>
<td>4 8 12 12 16</td>
</tr>
<tr>
<td>4</td>
<td>4 8 12 16 20</td>
</tr>
</tbody>
</table>

A character in the thinker or colonist profession does not use this table. See 7.3 for explanation.

#### Skill Point Table

<table>
<thead>
<tr>
<th>MODIFIED DICE RESULT</th>
<th>YEARS OF EMPLOYMENT</th>
</tr>
</thead>
<tbody>
<tr>
<td>2–5</td>
<td>4 8 12 16 20</td>
</tr>
<tr>
<td>6–9</td>
<td>2 5 7 8 11</td>
</tr>
<tr>
<td>10–13</td>
<td>2 6 8 10 12</td>
</tr>
<tr>
<td>14–17</td>
<td>3 6 8 10 11</td>
</tr>
<tr>
<td>18–21</td>
<td>3 7 9 11 12</td>
</tr>
<tr>
<td>22–26</td>
<td>4 7 10 12 14</td>
</tr>
<tr>
<td>27–32</td>
<td>4 8 11 13 15</td>
</tr>
</tbody>
</table>

Roll one die and add the character's Intelligence Rating and the Skill Point Modifier for his profession to the die result. See 7.5 for explanation of use.

### Benefits Table

<table>
<thead>
<tr>
<th>YEARS IN PROFESSION</th>
<th>BENEFIT LEVEL</th>
</tr>
</thead>
<tbody>
<tr>
<td>5–10</td>
<td>5–10 A</td>
</tr>
<tr>
<td>11–14</td>
<td>11–14 B</td>
</tr>
<tr>
<td>15–18</td>
<td>15–18 C</td>
</tr>
<tr>
<td>19–23</td>
<td>19–23 D</td>
</tr>
<tr>
<td>24–28</td>
<td>24–28 E</td>
</tr>
<tr>
<td>29–30</td>
<td>29–30 F</td>
</tr>
</tbody>
</table>

Explanation of each result is listed in appropriate profession. See 7.7 for explanation of use.
**SKILL SUMMARY**

**Skill:** How the skill is used. Related equipment/EP gain.

**MILITARY SKILLS**

**Ambush:** BC + AY + Battlefield SL + Environ SL + SL² — (enemy Environ SL + enemy Battlefield SL²)

- Move secretly, enemy unaware: (15×Terrain Value)%
- Move silently, enemy aware: (5×Terrain Value)%
- Close combat, enemy unaware: 30%
- Ranged fire, enemy unaware: 50%

**Artillery:** BC – 1 per 100 meters distance from target + IN + SL²

**Mounted Gun:** 0/0.

**Battlefield:** Initiative = Die Roll + SL (doubled if NPC);

- Willpower Check = May use SL instead of Mental Power;
- Encounter = SL modifies Awareness Check (see 28.2).

**None:** 0 (Initiative roll only), GM assigns point for successful battle plan.

**Blade:** Close Combat Strength = DX or AY + SL² + Weapon Hit Strength

**Throw Weapon BC + DX + SL².**

- Dagger or sword/0.

**Body Armor:** All EVA attributes included in this skill; ability to use augmented body armor (see 29.2);

- Close Combat Strength = ST + Hit Strength of Armor + SL²
- Protective Attire/0, 1 (accident); 0 (close attack).

**Demolitions:** BC + DX + SL², Explosives/0, 1, 2.

**EVA:** Encumbrance Rating of attire is reduced by SL (26.4, 29.2);

- Avoid a Suit/Armor Accident = BC + AY + SL²
- Protective Attire/0, 1 (accident).

**Jet Pack:** Avoid a Jet Pack Accident = BC + AY + SL² (27.8, 29.3).

**Pack/0, 1 (accident).**

**Unarmed Combat:** Close Combat Strength = DX or AY + SL² (reduce Level by 1 when fighting a creature). None/0.

**Arc Gun:** BC + DX + SL², Arc Gun/0.

**Bows:** BC + DX + SL², Short Bow, Long Bow, or Cross Bow/0.

**Handguns:** BC + DX + SL², Pistol, Needle Pistol, Laser Pistol, or Stun Pistol/0.

**Grenades:** BC + DX + SL² + (ST, when throwing great distance).

- Any grenade type/0.

**Laser/Stun Pistol:** BC + DX + SL², Laser or Stun Pistol/0.

**Longarme:** BC + DX + SL², Muskete, Carbine, or Needle Rifle/0.

**Machine Guns:** BC + DX + SL², Submachine Gun or Emplaced Machine Gun/0.

**Paint Gun:** BC + DX + SL², Paint Gun/0.

**Gunnery:** See 9.2.

**Burster, Hunter Pod, Weapon Pod,** or Arsenal Pod/1.

**Missile Guidance:** See 9.2.

**Hunter Pod, Weapon Pod,** or Arsenal Pod/see 9.2.

**Pilot:** See 9.2.

**Spaceship, Shuttle,** or Battlecraf/see 9.2.

**Space Tactics:** See 9.2.

**Spacecraft:** See 9.2.

**PSIONIC SKILLS**

**Life Sense:** SL subtracted from awareness chance during encounter.

- Perception of a creature’s IN is 20% + SL²

None/0 (awareness), 0 (perception).

**Mind Control:** 10% + MP + SL² — target’s MP²

Psychic Rig increases range/0.

**Navigation:** Successful Jump Chance = SL² + MP² + (10×Starport Class) — distance in Light Years.

**Spaceship with hyperjump engine; Standard Jump Pod (+1); Augmented Jump Pod (+2/0), 1, 2, 3.

**Psionic Communications:** Communication Chance = 10% + MP + SL² + receiver’s MP + receiver’s SL².

Psychic Rig increases range/0.

**Psionic Boost:** 25% + MP + SL²; Psychic Rig (+2)/0.

**Psychokinesis:** BC = 10% — World Size + MP + SL².

Psychic Rig increases effectiveness/0.

**Psion Tect:** BC + IN + SL².

**Electrokit** (increases Skill Level; see 22.0)/0, 1, 2.

**ALL VEHICLE SKILLS**

**BC** to avoid accident (25%, 50%, or 75%) + Vehicle Performance Modifier + DX + Sub SL².

See 11.0/0, 1 (accident check or after 30 hours driving).

**SCIENTIFIC SKILLS**

**Alt:** BC + IN + SL².

**Astronomy:**

- Locate unexplored planet (when in system space): 90%.
- Locate uncharted planet (when in system space): 70%.
- Locate own position after minor jump error: 60%.
- After major jump error: 40%.
- After randomized jump: 20%.
- Spaceship, Civil Level 8 Spaceship (+8), Explorer Pod (+1), Survey Pod (+2/0), 1, 2, 3.

**Biology:** SL is reduced by 2 when dealing with non-carbon based life (to a minimum of 1).

- Perceive during a creature encounter: 10%.
- Perceive with a bioscanner: 20%.
- Examine with a bioscanner (requires one hour): 30%.
- Civil Level 7 Bioscanner, Civil Level 8 Bioscanner (+1), Medical Pod (+1), Explorer Pod (+2), Robot Biosystem (+2), Bio Research Pod (+3)/0, 1.

**Chemistry:**

- Find abundant chemicals: 70%.
- Find abundant and trace chemicals and complex compounds: 25%.
- Synthesize simple compound: 20%.
- Synthesize complex compound: — 5%.
- Civil Level 5 Chem Lab, Civil Level 6 Chem Synthesizer, Explorer Pod, Civil Level 7 Chem Lab (+1), Bio Research Pod (+1), Civil Level 8 Chem Synthesizer (+2), Robot Chemical System (+2)/0, 1.

**Diagnosis:**

- Diagnose ailment being: 90% + (3×number of hits patient received).
- If result is above Chance, diagnosis has failed; 0 to 20 less, successful diagnosis; 21 to 40 less, successful and treatment SL +1; 41 to 70 less, successful and treatment SL + 2; 71 or more less, successful and treatment SL + 3.

- First Aid Kit, Spaceship, Civil Level 6 Medicaster (+1), Bio Research Pod (+1), Civil Level 6 Medicaster (+2), Medical Pod (+3), Robot Medical System (+3)/0, 1, 2.

**Geology:**

- Find abundant minerals and resources: 70%.
- Find abundant and trace minerals and resources: 30%.
- Scan for three minerals or resources with a geoscanner: 60%.
- Scan for all minerals and fissures in 3 meters or more wide: 50%.
- Scan for volcanic activity: 60%.
- Scan for all tunnels and fissures: 20%.
- Geo Lab, Civil Level 6 Geoscanner, Explorer Pod, Bio Research Pod (+1), Civil Level 8 Geoscanner (+2), Robot Geo System (+2)/0, 1.

**Physics:**

- Determine type, intensity, danger of energy with energy scanner: 80%.
- Determine energy powering device or non-protein creature: 70%.
- Determine energy or force which caused result: 50%.
- Determine possible effect of energy or force beforehand: 40%.
- Tap an energy source: 20% (use lower of Physics or Energy Tech SL).
- Energy Scanner, Explorer Pod, Bio Research Pod (+1)/0, 1, 2.

**Planetology:**

- Determine hydrography % and locate land and liquid masses: 85%.
- Determine temperature of environments: 75%.
APPENDIX B, PAGE 102

T> Determine atmosphere: 65%.
T> Determine general resources: 30%.
T> Determine contours: 40%.
T> Determine dominant feature by envion: 20%.
T> Determine general resources of envions: 10%.
T> Determine detailed geography and geology of all envions including sites: 5%.
Survey or Explorer Pod needed for task with 40% or less BC.
Survey Pod needed for task with 10% or less BC.
A single dice roll applies to the chosen task and all tasks with a higher %. Space ship with at least 4 pod capacity, or with Explorer Pod (+1), or with Survey Pod (+3)/0, 1, 2, 3.

Programming: Skill reduced by 2 with a robot (to a minimum of 1).
T> Gain control of robot without controller: 30% (requires Electrokit or Robot Kit).
T> Call up unrestricted information in a computer: 90%.
T> Call up restricted information in a computer: 30%.
T> Call up top-level secrets in a computer: 10%.
T> Alter protected computer information: 10%.

Computer or Robot/0, 1, 2.

Treatment:
T> Treat an ail ing being: 1%.
See Diagnosis and 12.3/0, 1, 2.

TECHNICAL SKILLS
All: BC + IN^2 + SL^2/0, 1, 2.

Comp/Robot Tech: –2 to Skill Level when repairing robots.
Basic Repair Kit, Civ Level 7 Electrokit (for computers, +1), Civ Level 8 Electrokit (for computers, +2), Robot Kit (+1), Robot and Equipment Pod (+3).

Construction: See 13.0.

Electro Tech: –2 to Skill Level when repairing Civ Level 8 item.
Basic Repair Kit, Civ Level 7 Electrokit (+1), Civ Level 8 Electrokit (+2), Robot and Equipment Pod (+3), Radio.

Energy Tech: See 13.0.

Spaceship Tech: –2 to Skill Level when repairing spaceship engine or armor.
Civ Level 6 Spaceship Kit (superficial damage), Civ Level 7 Spaceship Kit (light damage, +1), Civ Level 8 Spaceship Kit (heavy damage, +2).

Suit Tech: –2 to Skill Level when repairing armor.
Basic Repair Kit, Suit Kit, Civ Level 7 Armor Kit (+1), Civ Level 8 Armor Kit (+2), Robot and Equipment Pod (+3).

Vehicle Tech: –2 to Skill Level when repairing military or air vehicle, or armor on any vehicle.
Basic Repair Kit, Civ Level 6 Vehicle Kit (+1), Civ Level 7 Armor Kit (+1), Civ Level 8 Vehicle Kit (+2), Civ Level 8 Armor Kit (+2), Robot and Equipment Pod (+3).

Weapon Tech: –2 to Skill Level when repairing artillery and spaceship weapons.
Basic Repair Kit, Civ Level 6 Weapon Kit (+1), Civ Level 8 Weapon Kit (+2), Robot and Equipment Pod (+3), Spaceship Kit required to repair spaceship weapon.

INTERPERSONAL SKILLS
Diplomacy: Used for communications tasks; see 14.0.

None/0, 0, 1, 2.

Disguise: BC + DX + SL^2.
T> Disguise to gain anonymity: 60%.
T> Disguise to resemble extensively observed person: 40%.
T> Disguise to resemble person briefly seen or in pictures only: 25%.
Disguise materials/0, 0, 1, 2.

Economics: Price prediction requires 12 hours.
T> Determine price of an item: 35% – number of future weeks predicted + IN + SL^2.
Business Computer, Computer time, Interstellar Comm Link/0, 0, 1, 2.

T> Forge commercial document: 50%.
T> Forge world or local government document: 30%.
T> Forge Federal document: 10%.
T> Counterfeit 100 MIl note: 10%.

Trading: Chance of a successful bargaining: 20% + Empathy + SL^2.
None/0, 0, 1, 2.

ENVIRONMENTAL SKILLS
Agriculture: BC + IN + SL^2 (–2 when working with hydroponics).
Robot Agriculture System (+2)/0, 0, 1, 2.

Asteroid Mining: BC + IN + SL^2.
Rock Blaster (+1), Robot Miner System (+2), Robot Geo System (+2)/1, 1, 2.

Environments: Twice SL is subtracted from awareness chance during creature or NPC encounter. SL is added to initiative die roll.

Gravity: SL added to Action Round Movement Rate (see 29.2) and affects gravity-related accident (see 38.0).

None/1 SL increase per 8 weeks in environment.

Light: SL added to Action Round Movement Rate (see 29.2) and affects gravity-related accident (see 38.0).

Mining: BC + IN + SL^2.
T> Mine raw ore from an identified source: 25%.
T> Refine raw ore: 0%.
Rock Blaster (+1), Robot Miner System (+2), Robot Geo System (+2)/1, 1, 2.

Survival: BC + IN + (Survival SL + Environ SL)^2. Survive in environments with the following:
T> Edible game and/or plants: 90%.
T> Arable land: 60%.
T> Any type of vegetation: 30%.
T> Water in environment: 0%.
T> On world with water: –50%.
T> On world with no water: –150%.
None/0, 0, 1, 2.

Key: Skill: How the skill is used. Related Equipment/EP Gain, BC:
Base Chance. SL: Skill Level. This summary does not take precedence over sections 8.0–15.0. Related Equipment: Devices that are required to use the skill and/or that aid in using the skill are listed. Skill Level increases provided by various items of equipment are listed in parentheses. EP (Experience Point) Gain: If a die or dice roll conducted when using the skill shows the listed digit on either die, one Experience Point is gained.

### NOTES:
1. Must be emplaced before first fire. 2. May not be fired by prone character. 3. The target may be affected by substance in needle; see 30.7. 4. The strength of weapon used to check for stun only; see 30.4 (Terrain Value considered). 5. Target hex and all adjacent hexes are filled with gas for six Action Rounds; all beings there which do not have their own air supply suffer the effects of the appropriate poison (see 30.7). 6. Hit Strength is used in close combat; Hit Strength is 3 if thrown. 7. Target hex and all adjacent hexes are treated as if it were dark for six Action Rounds. 8. Target hex and all adjacent hexes are treated as if it were light for six Action Rounds. 9. Will not be detected by metal detector. 10. Weapon produces recoil with each shot (see 29.6). 11. Strength Rating of firing (or throwing) character added to hit percentage. P: Prohibited.

**na:** Not applicable. **AR:** Activation takes one Action Round. **(a):** See 12.0 for explanation. **(b):** See 13.1 for explanation. See pages 28 and 29 for descriptions. Additional equipment includes: Psionic Rig (10.1), Jet Pack (21.3), Internal Gravity Web (33.3), Audio-sealed Case, Business Computer, Rock Blaster, False Identity, and Plastic Explosives (22.4).
[29.6] FIRE MODIFIER SUMMARY

Chance to Hit Target...
Base Hit Chance minus
(Terrain Value × Terrain Multiplier) plus
character’s Dexterity Rating (if skilled) plus
square of character’s Skill Level

Any of the following modifiers that apply are also considered and are cumulative.

(Modifier) if the Firing Character...
(-20) ...moves on foot in same Action Round.
(-30) ...is driving a vehicle.
(-5) ...is in a moving vehicle.
(-10) ...is firing at more than one target in the same Action Round. Apply modifier to all fires for each target beyond one (e.g., if 3 different targets are fired at, all hit chances are reduced by 20).
(-5) ...is firing more than one shot with a recoil weapon in the same Action Round. Apply modifier to all fires for each fire beyond one (e.g., if 4 fires are made, reduce all hit chances by 15).

(Modifier) if the Target is...
(-45) ...Very small (-30) Small (+20) ...Large
(+40) ...One hex (+20) ...Immobilized
(Double Terrain Value) ...Prone (Hit impossible) ...Miniscule

The GM may apply further subtractions if the target is partially obstructed by a distinct object (remember, natural terrain features are accounted for by the Terrain Value and Multiplier). The Base Hit Chance and the Terrain Multiplier are listed on the Weapon Chart. The Terrain Value is listed on the Terrain Effects Chart. See 29.4 for additional weapon fire restrictions.

</tr>
<tr>
<td>15 or more</td>
<td>24 Days</td>
</tr>
</tbody>
</table>

The time required for a character to heal may be reduced, depending on his Endurance Rating and the quality of treatment he receives. If one or more of a character's Physical Characteristics has been reduced to zero, he may suffer permanent damage that may not be healed. See 12.3.
INDEX

The following index is an alphabetical listing of skills, professions, charts, tables, and general rules areas are distinguished by **bold** type. Note that, in many cases, charts and tables appear in both the Gamesmaster’s set and in the players’ set, as indicated by a second, parenthesized page number.

Accidents, 79
*Accident Procedure Summary*, 46

Zero-G Miner, 11
NAME: Laidley
Type: Tolerable
Moons (incl.): 1HP
Distance from Star: 5 AU's
Atmosphere: Poison
Mean Temp: 0°
Hydrograph: 0%
Day Length: HUman Population: 0
Settlement Status: Explored, abandoned
Law Level: 0
Civil Level: 1
Spaceport Class: 0

Resources: Nitrogen chemicals (exportable), silver (exportable), germanium (exportable), edible plants, ammonia, phosphorus, radioactives, cesium, adamantine, mercury

Remarks: Laidley orbits Onionis like our moon orbits the Earth. The shaded side is always in darkness, while the other side is always light. The temperature modifiers should be ignored.
NAME: Kryo  TYPE: Earth-like  MOONS: 0
DISTANCE FROM STAR: 2.5 AU's  ATMOSPHERE: Thin  MEAN TEMP: 25°C
HYDROGRAPH: 40%  DAY LENGTH: 24 hours  HUMAN POPULATION: 10 million
SETTLEMENT STATUS: Full-tech colony  LAW LEVEL: 3  CIV LEVEL: 7
SPACEPORT CLASS: 2  RESOURCES: Iron (exportable), carbon chemicals (exportable), aluminum, light fiber plants, edible plants, sulfur, argon, nitrogen chemical, silver, phosphorus
UNIVERSE
The Role-Playing Game of the Future

Seek your own destiny among the stars in quest of wealth, knowledge, and glory. Plunge boldly into adventures on unexplored planets, confronting the unknown armed with your own unique skills and the marvels of 25th Century technology. Designed as the definitive game of a whole generation of science-fiction adventure products, Universe is now complete in this one book, with a huge full-color Interstellar Display and four pages of color adventure logsheets included. Although we are continuing a program of fascinating supplemental material, you need nothing more than this book and two decimal dice to play a lifetime of complete and enjoyable games.

CONTENTS

I. Introduction
1.0 The Universe and the Future
2.0 The Gamesmaster and the Players
3.0 Sequence of Events
4.0 Requirements for Play

II. Character Generation
5.0 Character Heritage
6.0 Character Development
7.0 Character Professions

III. Skills
8.0 Acquiring and Improving Skills
9.0 Military Skills
10.0 Psionic Skills
11.0 Vehicle Skills
12.0 Scientific Skills
13.0 Technical Skills
14.0 Interpersonal Skills
15.0 Environmental Skills

IV. Robots
16.0 Robot Attributes
17.0 Robot Systems

V. Equipment
18.0 Economic Guidelines
19.0 Weapons
20.0 Protective Equipment
21.0 Vehicles
22.0 Personal Equipment

VI. World Generation
23.0 Star Systems
24.0 Geographical Features
25.0 Population and Technology

VII. Character Action
26.0 Travel and Record Keeping
27.0 Creating Encounters
28.0 Creature and NPC Interaction
29.0 Action Rounds
30.0 Hits and Damage

VIII. Space Travel
31.0 Hulls and Pods
32.0 Interstellar Travel
33.0 Interplanetary Travel
34.0 Space Combat

IX. Encounters
35.0 Creatures
36.0 Non-Player Characters
37.0 Spaceship Encounters
38.0 Accidents

X. Adventure: Lost on Laidley
39.0 The Orionis System
40.0 The Players and the Characters
41.0 The Gamesmaster’s Background
42.0 Laidley
43.0 Adventure Afterword

Appendix A: Logsheets
Appendix B: Player Charts & Tables
