

LAST MINUTE SHOPPING LIST (we ran out of space in the magazine, as well as time)

DIE CUT COUNTERS NOW AVAILABLE FOR TSG'S

We are slowly, but surely, converting the TSG to "S&T" quality component games. We now have available die-cut counters for the following Test Series Games;

These counters are \$2.00 a set. As both sides are usually on the same sheet (as with the GRUNT counters) you must buy the entire set.

We are also converting all of the TSG playing boards to "S&T" standards. Only one is completed so far and that is the board for KOREA. This sells for \$3.00. It is printed on the same type of stock as the GRUNT board.

Still available is GAME DESIGN, which looks like it's going to make it. The response has been quite good. It costs \$3.00 for a one year (6 issue) sub.

Don't forget that we need at least two months notice of change of address. Otherwise you'll lose an issue.

We are also converting the rules of existing TSG's. In other words, there will soon be completely revised "second editions" of all the TSG's. These will be announced when available. All TSG's should have die cut counters by the end of the year. New boards also, if we can afford to get them printed. A sample section of the new KOREA board is shown below, as well as a similar section of the old KOREA board.
